EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 14th of September amounted to 575,420*l*, and for the corresponding week of last year to 579,845*l*, showing a decrease of 4,425*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 268,720*l*, and for the corresponding week of 1860 to 270,853*l*, showing a decrease of 2,133*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept. 23.—The railway market to-day showed increased depression, from sales in anticipation of diminished traffic through the stagnation of trade in the manufacturing districts. The heavier stocks were chiefly affected, especially Midland, and Lancashire and Yorkshire, both of which receded 1¼ to 1½ per cent. London and North-Western was also ¾ per cent. lower, Great Western ½, and North-Eastern descriptions, Caledonian, Sheffield, and South-Eastern, ¼. The latter stock left off rather better than at one period, the decrease in the present traffic return being less considerable than had been expected. Colonial descriptions closed about the same as on Saturday. The foreign market was firm, French shares, Bahia, Pernambuco, Dutch-Rhenish, and Lombardo-Venetian in particular improving. Great Luxembourg, on the other hand, were lower. American securities were generally steady, except Erie preference, which slightly declined. Mines were quiet, but fully supported. In joint stock banks, Oriental shares advanced.

TUESDAY, Sept. 24.—British railway stocks were again depressed in the morning, but towards the afternoon a recovery took place, and the market at the close was generally steady. The principal fluctuations were in Midland, and Lancashire and Yorkshire, the former leaving off at a fresh decline of ⅜ per cent. North-Eastern descriptions, North British, Sheffield, and Caledonian were flat, while London and North-Western, Great Western, and South-Eastern slightly improved. The principal feature in the colonial market was a fall in Grand Trunk to 19½ to 20, and in Great Western of Canada to 9¼ to ½, on the decrease in the traffics. Indian guaranteed stocks were steady. In foreign descriptions, French shares, Bahia and San Paulo, improved. Lombardo-Venetian were dull at 1⅜ to ½ pm. In American securities, Virginia 6 per Cents. and Illinois Central shares receded. Mines were inactive, and occasionally lower. No change of importance occurred in joint stock banks. In miscellaneous descriptions, London Dock stock was quoted higher.

WEDNESDAY, Sept. 25.—The railway market, although there was not much business transacted, was rather dull in the earlier hours, but subsequently a recovery occurred, prices at the close in some instances exhibiting a slight improvement. Lancashire and Yorkshire, Midland, Eastern Counties, and London and North-Western were fractionally better. Caledonian, however, on the other hand, drooped, and were about one per cent. lower. In the other departments operations were restricted, though Indian and Brazilian continued to be supported, especially the latter. American securities were without important variation, but Illinois 100 dols shares exhibited greater strength. Little business was negotiated in banking, miscellaneous, or mining shares; prices on the average, nevertheless, were steady.

THURSDAY, Sept. 26.—The railway market was steady in the earlier part of the day, but declined in the afternoon, the tendency after official hours being especially heavy, owing to the announcement of the rise in the Bank of France rate. Compared with yesterday, most of the leading stocks showed an average reduction of about ½ per cent., Caledonian, Lancashire and Yorkshire, and Midland being especially flat. The final prices were at the lowest point of the day. Colonial stocks were in moderate demand, and showed little change. East Indian, however, was heavy at 101 to ½. In foreign descriptions there was a fractional decline in Bahia, San Paulo, Great Luxembourg, and Lombardo-Venetian. The latter were especially flat after regular hours at 1⅛ to ½ prem. American securities were rather dull. Scarcely any transactions are reported in mines, but the market remained with a firm tendency.

FRIDAY, Sept. 27.—The railway share market to-day was inactive, but prices were well supported. Caledonian stock rose 1 per cent., and Eastern Counties ⅝. Great Western declined ½. Other lines scarcely varied in price. Lombardo-Venetian Railway shares remained dull, at yesterday's reduced quotations 1⅛ to 1¼ prem. Great Luxembourg and other foreign shares were little inquired for. Indian and Canadian railway shares were very quiet. In mines, a fair business was transacted.

The Economist's Railway and Mining Share List.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of his invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77 STRAND,
London, W.C.

CAUTION.—Beware of Proposed Substitutions.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.
By SAMUEL HARE, F.R.C.S., &c.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.
London: John Churchill; and may be had of all booksellers

HYDROPATHY AND HOMŒOPATHY.—WELL-FIELD HOUSE, MATLOCK.—Pure air and water, most beautiful scenery, and soothing social influences may be enjoyed, with a systematic combination of gentle hydropathic and homœopathic treatment, at Dr SPENCER HALL'S Establishment, Well-field House, and 3 Prospect terrace, Matlock Bank, near Matlock Bridge Station, Derbyshire. Terms, Two Guineas per week. Particulars furnished on application.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

BLAIR'S GOUT AND RHEUMATIC PILLS.—Price 1s 1½d and 2s 9d per box.
This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.
Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

HOLLOWAY'S OINTMENT AND PILLS.—Safety for Children.—In measles, diptheria, scarlatina, and many other infantile maladies, no safer or more certain remedies can be prescribed than this cooling Ointment and these purifying Pills. The Ointment should be well rubbed upon the throat every night and morning, in the same manner that salt is forced into meat to preserve it. From the damp unsettled state of the weather, colds and chest complaints are now prevalent. They can be quickly cured by Holloway's remedies, which may always be given with perfect safety. While the Ointment is used externally, the purifying Pills should be taken in regulated doses according to the printed directions, easily to be understood, which are folded round each box.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.
The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.
Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS, between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX. The following, or other vessels, are appointed to sail from Liverpool, calling at CORK to receive the mails:—

ARABIA, for BOSTON, Saturday, Oct. 5.

C., or Oriental place, Southampton.

TRADE B/P MARK.

BROWN AND POLSON'S

PATENT CORN FLOUR, In packets 2d, 4d, 8d, and tins 1*s*, 5*s*, and 9*s* 6d.

Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.

BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers thro h out the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

EXTRAORDINARY DISCOVERY—NEW THEORY. (Medicines Superseded.)

NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Applisance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: *Its History*—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

ROYAL LYCEUM THEATRE. Manager—Mr Edmund Falconer. Triumphant success and seventh week of the new Comedy WOMAN; or Love against the World. Great Hit of Miss Lydia Thompson in the "Volunteer Quick Step."

On Monday, for the benefit of Mr F. B. Chatterton, acting manager, the performance will commence with WOMAN; or Love against the World, in which Mrs D. T. Bowers, of the principal American Theatres, and of the Royal Sadler's Wells Theatre, will make her first appearance at this Theatre. To be followed by a Grand Miscellaneous Concert by Madame Florence Lancia, Miss E Pearce, the Misses Brougham, Miss Minnie Clifford, Mr Tenant, Mr Aynsley Cooke, Mr Alberto Laurence. Instrumental harp, Mr Frederick Chatterton, Cornet, Mr Levey. Conductor, Mr F. Kingsbury. After which "the Volunteer Quick Step," by Miss Lydia Thompson. To conclude with a New Farcical Sketch entitled A MIDSUMMER EVE. On Tuesday and the remainder of the week, the performance will commence with A MIDSUMMER EVE. After which, every evening, at ½ before 8 o'clock, WOMAN; or Love against the World. And to conclude with AN UNPROTECTED FEMALE, in which Miss Lydia Thompson will dance "the Volunteer Quick Step." Prices as usual. Box office open from 11 till 5 daily. Acting Manager, F. B. Chatterton.

NEW THEATRE ROYAL ADELPHI. Sole Proprietor and Manager, Mr B. Webster. Return of Mr and Mrs Dion Boucicault. 238th, 239th, 240th, 241st, 242nd, and 243rd nights of THE COOLLEN BAWN.

On Monday, and during the week, MUSIC HATH CHARMS. Mr D. Fisher and Miss K. Kelly. THE COLLEEN BAWN. Mrs Dion Boucicault, Miss Woolgar, Mrs Billington, Mrs H. Lewis; Messrs Dion Boucicault, S. Emery, D. Fisher, Billington, Stephenson, and C. J. Smith. And LOVE and HUNGER. Commence at 7.

POLYTECHNIC INSTITUTION.—The Directors beg to announce that the First Course of Monday Evening Lectures and Musical Entertainments for the Industrial Classes will commence on Monday next, at 8 o'clock, when Professor J. H. Pepper will deliver a Lecture on the "Prevention of Railway Catastrophes and Collisions." The following gentlemen have kindly promised to deliver lectures in this course—The Rev. J. Butterworth Owen, M.A.; Dr Lankester, F.R.S., &c.; Dr Chr. Dresser, F.L.S. &c.; Dr Ryan, L.L.D. (late Polytechnic); The Rev. A. Bath Power, M.A., F.C.S.; Douglas Thompson, Esq.; Dr Edmund Pick; W. R. Birt, Esq.; G. A. Cooper, Esq.; Walter Newport, Esq., and the St George's Choir: George Perfect, Esq.; and the Cremona Musical Union, the Great Head Family. Admission Tickets at half-price are now being distributed to the heads of firms and employers of labour, which will admit those in their employ and their families.

JOHN HENRY PEPPER, Honorary Director.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

KEATING'S PERSIAN INSECT DESTROYING POWDER.

This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.

Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry, it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension as it has no qualities deleterious to animal life.

Sold in packets, 1*s*, 2*s* 6d, and 4*s* 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING Chemist, 79 St Paul's churchyard, London, E.C.

Take notice, each genuine packet bears the above name and address.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4*s* 6d; post free, 5*s* 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

TRELOAR'S CORK FLOOR CLOTH,
OR KAMPTULICON.
Cocoa-Nut Fibre, Manilla, and China
MATTINGS AND MATS.
T. TRELOAR, MANUFACTURER, 42 LUDGATE HILL, LONDON.

KAMPTULICON FLOOR CLOTH.
E. GOUGH AND CO., ORIGINAL PATENTEES & MANUFACTURERS,
12 BUSH LANE, CANNON STREET. MANUFACTORY—GREENWICH ROAD.

KAMPTULICON, OR
INDIA-RUBBER & CORK FLOOR CLOTH;
As laid at the Houses of Parliament, British Museum, Bank of England, and numerous Public and Private Offices.

Impervious to wet, indestructible by damp, soft to the tread, and warm to the feet. Far superior to every other material ever invented for the Covering of Floors, &c. Invaluable on Stone Floors.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS

with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

GLENFIELD PATENT STARCH,

USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

THE CELEBRATED "INDISPENSABLE SUIT,"

In an immense variety of Patterns and Textures of Walking, Riding, Travelling, or Business, from 30s to 70s, particularly recommended to Tourists and Excursionists, and to be obtained only of

Country Establishments:—
SHEFFIELD and BRADFORD, YORKSHIRE.

N.B.—An immense and choice assortment of goods for all classes and all ages in the several above-mentioned branches of our business.

MERCHANTS HAVING

commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

THE INDUS STEAM FLOTILLA.—

The Directors are prepared to receive applications for Debentures at par, bearing interest at five per cent. per annum, guaranteed by the Secretary of State for India in Council.

The debentures are for five years, and may be renewed for a further term of five years at the same rate of interest.

The debentures may be converted into Indus Steam Flotilla Capital Stock at the option of the holder.

THOMAS BURNELL, Secretary.
Indus Steam Flotilla Office, Gresham House, Old Broad street. Sept. 25, 1861.

CORNWALL RAILWAY.—

GUARANTEED PERPETUAL PREFERENTIAL SHARES.—The Directors of the Cornwall Railway are now prepared to issue the Preferential Shares Guaranteed under the provisions of the Cornwall Railway Act, 1861, by the Great Western, Bristol and Exeter, and South Devon Railway Companies, bearing a Perpetual Interest, or Dividend, of four and a half per cent. per annum, payable half-yearly. Application to be made to W. H. BOND, Secretary.
Cornwall Railway office, Truro, Sept. 12, 1861.

EDINBURGH AND GLASGOW RAILWAY.—RAILS WANTED.—

The Directors of the Edinburgh and Glasgow Railway Company are prepared to receive Tenders for the supply of about 2,500 tons of 75-lb Rails, to be delivered at any station on their line, Queen street excepted, one-half before the 1st March, and the other half before the 1st April next.

The rails are to be of the best quality and make; specifications may be had at the office of Mr Adie, the Company's engineer.

Tenders may be lodged on or before the 28th October next.

Company's offices, George square, Glasgow, 18th September, 1861.

THE OTTOMAN RAILWAY

(from Smyrna to Aidin) of His Imperial Majesty the Sultan.

At the Seventh Half-yearly Ordinary General Meeting of the Shareholders of the above Company, held this day, Sir Macdonald Stephenson in the chair, it was proposed by the Chairman, and seconded by William Dent, Esq., and unanimously resolved—

That the Report of the Directors, together with the statement of accounts to the 30th June, 1861, now submitted, be adopted.

It was then proposed by R. W. Billings, Esq., seconded by R. C. Morrice, Esq., and unanimously resolved—

That a cordial vote of thanks be given to the Chairman and Directors. S. J. COOKE, Secretary.
Ottoman Railway Company, 2 St Michael's House, Cornhill, E.C., 27th Sept., 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 5 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.
Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

THE EAST INDIAN RAILWAY

COMPANY requires Stores of the following kinds.—Particulars may be seen upon application at the Company's Offices, Alderman's walk, New Broad street, London.

Tools of various descriptions.	Carriage Iron and Brass Work.
Ironmongery, &c.	Glass.
Brass, Copper, and Metal Work.	Cotton, Canvas, &c.
Locks and Keys.	Emery, &c.
Brushes.	Machinery, &c.
Lamps.	Signals.
Carriage Fittings.	Axle Box Duplicates.
	Miscellaneous.

Tenders, which must include all charges for packing and delivery free alongside in any dock or on any wharf in any part of the stream in the ports of London or Liverpool, are to be made on or before 12 o'clock at noon on Thursday, the 10th October next.

Tenders must be sent in in sealed envelopes, and endorsed "Tender for Stores, &c."

The Company is not bound to accept the lowest or any Tender.—By order of the Board,

D. I. NOAD, Secretary.
East Indian Railway House, Alderman's walk, New Broad street, London, Sept. 23, 1861.

GREAT FIRES IN BELFAST,

in which nine of MILNER'S SAFES (six in the first and three in the last) have preserved their contents. The following is one of the certificates from all the owners:—

(Copy.)

"Messrs Thos. Milner and Son.

"Belfast, February 13, 1861.

"Gentlemen,—We beg to say that the block of buildings in Bedford street, in which our warehouses and offices were situated, was totally destroyed by fire on the 8th instant, but we are happy to say that all our books contained in two of your Safes were found, on forcing the Safes open, to be perfectly secure and the writing quite legible, though the edges and some leaves were stained by the steam, and some of the covers damaged by adhering to the sides of the Safes from the heat to which they were exposed.

"We are, Gentlemen, your obedient servants,

"J. B. RALSTON and Co."

Milner's Phœnix Safe Works, Windsor, Liverpool.
London Depot, 47A Moorgate street, City.

METROPOLITAN AND PROVINCIAL BANK (Limited).

Established under the Joint Stock Banking Companies Amendment Acts, 20 and 21 Vict., cap. 49, and 21 and 22 Vict., cap. 91, which specially limit the liability of each shareholder to the amount of his shares.

Capital, One Million, in 10,000 Shares of £100 each, of which it is not intended to call up more than £25 per share, with power to increase to two millions by resolution of general meeting of Shareholders.

Deposit on application, £2 per share, and a further deposit of £3 on allotment, making £5 per share. If no allotment be made, the deposit will be returned in full.

It is provided by the Articles of Association that no call shall exceed £5 per share, and that at least three months shall intervene between two successive calls.

DIRECTORS.

The Right Hon. the Lord Fermoy, M.P. for Marylebone, 5 Clarendon place, Hyde park gardens (Chairman).
R. J. Blyth Esq. (firm of Charles Blyth and Co.), Cripplegate buildings, Wood street.
Thomas Campbell, Esq., 5 Westbourne street, Hyde park gardens.
John Geary, Esq., Hyde Side, Edmonton.
John V. Gooch, Esq., C.E., the Firs, Frimley.
Sydney Gurney, Esq., 1 Paper buildings, Temple.
George Haines, Esq. (late of the firm of Brown, Eagle, and Co.), 36 Lombard street.
William Hawes, Esq., Skinner's place, Sise lane.
G. Goldsmith Kirby, Esq., Director of the Albert Insurance Company.
Cyrus Legg, Esq., Bermondsey.
Thomas Miers, Esq., Director of the Commercial Gas Company.
Isaac L. Mocatta, Esq., 2 Upper Montague street, Russell square.
W. F. Drought Stephens, Esq., 12 Cleveland gardens, Hyde park.
(With power to add to their number).

MANAGER.

The Directors will secure the services of the most able and experienced Manager that can be obtained.

BROKERS,

Messrs Crosley Brothers, 30 Cornhill, London.
Messrs Hoyland and Son, Manchester.
Messrs Gasguoine and Chamberlain, Liverpool.
Nathaniel Lea, Esq., Birmingham.
M. B. Beverley, Esq., Leeds.
Messrs F. E. and S. Smith, Sheffield.
Messrs William Connell and Co., Cork.

BANKERS.

Bank of London, 52 Threadneedle street, and Charing cross.

AUDITORS.

Henry Chatteris, Esq., 5 Lothbury, Public Accountant.
W. Barton Ford, Esq. (Clarke, Ford, and Co.), Nicholas lane, Lombard street.

SOLICITORS.

Messrs Crosley and Burn, 34 Lombard street.
Messrs Wickens and Brutton, 4 Tokenhouse yard,

SECRETARY—J. Pope Cox, Esq.

Temporary Offices—27 Gresham street, Bank.

Hitherto the entire property of the shareholders in Joint Stock Banks has been liable for the debts and engagements of the bank of which they were proprietors, and the risks and inconveniences which have occasionally occurred therefrom have necessarily deterred many from investing their capital in shares in such undertakings.

The Joint Stock Banking Companies Amendment Acts, passed expressly to remove this uncertain risk, and to give confidence in Joint Stock Banks, have entirely obviated this objection as regards banks of limited liability; and the "Metropolitan and Provincial Bank (Limited)" has been established under the express provisions of those Acts, so that no shareholder therein can possibly be liable for any sum beyond the amount of the shares he holds.

The following tabular statement of the business results of four of the London Joint Stock Banks to 30th June last clearly indicates their advancing success, and the present market value of their shares:—

Joint Stock Banks.	Paid-up Capital.	Current and Deposit Accounts.	Dividend and Bonus.	Amount Paid per Share.	Price per Share.	Net Profits for Half-Year ending June 30, 1861.
	£	£	Per Cnt.	£	£	£
London and Westminster	1,000,000	14,821,650	20	20	66	131,592
London Joint Stock	600,000	11,425,087	25	10	30	84,006
Union Bank of London	600,000	10,415,020	10	12	28½	95,616
Banks with Provincial Branches.						
London and County	500,000	5,973,348	10	20	36	40,744
National Provincial Bank of England	600,000	Not Published.	18	35	108	70,990

The current accounts and deposits held by the London Joint Stock Banks on the 30th of June last amounted to a total of £47,315,366, being £5,407,772 more than the total at the corresponding period of last year; there is, therefore, ample room for others, and especially for one which will secure all the benefits of the existing Joint Stock Banks, and at the same time positively limit the liability of every shareholder therein. And with regard to the customers, as it is not intended to call up more than £25 per share of the subscribed capital of the Bank, the remaining £75 will form an ample guarantee to them.

A deposit of £2 per share must be paid to the Company's bankers previously to the application for shares being sent in.

Applications for shares, accompanied by the bankers' receipt for the deposit, to be made to the brokers or Secretary, at the Company's temporary offices, 27 Gresham street, Bank, London.

PERUVIAN FOUR-AND-A-HALF PER CENT. DEBT, 1853.

Notice is hereby given, that the following sums, £104,000, the amount of the redemption fund for the six months ending the 1st day of September, 1861, and £32,253 15s, the amount of accumulated interest of previous redemptions, have been employed in the redemption of

London, Sept. 26, 1861.
Present, THOS. EDWD. NEWTON,
Notary Public.

PENNSYLVANIA CENTRAL RAILROAD SIX PER CENT. CONVERTIBLE STERLING BONDS.

The Dividend Warrants due on the 1st October next on the Pennsylvania Central Railroad Six per Cent. Convertible Sterling Bonds, negotiated through T. Wiggin and Co., will be Paid on the 1st of October, or any succeeding day (Friday excepted), between the hours of 10 and 2, at their Counting-house, 15 Old Jewry, where lists may be obtained as usual. The warrants must be left two clear days for examination.

FIVE PER CENT. PREFERENCE SHARES.

The Directors of the DUBLIN, WICKLOW, and WEXFORD RAILWAY COMPANY are ready to receive applications for the Five per Cent. Preference Shares of the Company, now in course of issue, under the Gorey and Enniscorthy Extension Acts, redeemable at the option of the holder in 1868, and the interest meanwhile secured on the existing lines, and the whole undertaking of the Company. Application to be made to the Secretary, 48 Westland row, Dublin, where any requisite information, and the necessary form can be obtained.

ARTHUR MOORE, Secretary.

IMPERIAL TURKISH SIX PER CENT. LOAN of 1854.

Notice is hereby given, that the Half-yearly Dividend, due on the 10th of October next, on the outstanding Bonds of the issue of £3,000,000 of the above Loan, negotiated by the late Baron J. L. de Goldsmid and J. Horsley Palmer, will be Paid at the offices of Messrs Dent, Palmer, and Co., the agents of the Loan, 11 King's Arms yard, London; or Messrs Bischoffsheim, Goldschmidt, and Co., rue de la Chaussée d'Antin, Paris, on Thursday, the 10th of October, or any subsequent day (except Saturday), between the hours of 11 and 3. The coupons, with a list in numerical order, must be left for examination two clear days previously. Coupons are not received on Saturdays. Printed forms of the lists may be had on application.

Notice is also given, that the Bonds drawn for redemption on the 10th of October next, as advertised by the Turkish Ambassador, amounting to £40,150, will be paid off at par on that day or any subsequent day (except Saturday), between the hours of 11 and 3, on presentation to Messrs Dent, Palmer, and Co., in London; or Messrs Bischoffsheim, Goldschmidt, and Co., Paris, as above.

London, September 25, 1861.

ARMY CONTRACTS.

Tenders will be received at this Office until Noon on the 12th of October, from persons who may be willing to enter into Contract for the supply of

FORAGE and PAILLASSE STRAW,

in such quantities as may be required for the use of Her Majesty's Land Forces stationed in the following places.

Forage for 12 months from 1st November, 1861, and Paillasse Straw for 11 months from 1st December, 1861.

FORAGE.

1. Hyde Park, Kensington, Regent's Park, and Horse Guards.
2. Hounslow and Knoller Hall.
3. Hampton Court.
4. Windsor.
5. Brighton.
6. Sandhurst.
7. Enfield.

PAILLASSE STRAW.

1. Brompton house, Hyde Park, and Kensington.
2. Regent's Park, St John's Wood, and Portman street barracks.
3. Wellington barracks and St George's barracks.
4. Tower.
5. Hounslow and Knoller Hall.
6. Hampton Court.
7. Windsor.
8. Brighton, with Coast Forts from Newhaven to Shoreham.
9. Croydon.

Separate Tenders must be made for Forage and for Paillasse Straw for each of the above-mentioned Stations as grouped and numbered.

Forms of Tender, and conditions of Contract, may be obtained on application at this office, by letter or in person, between the hours of 10 and 4 o'clock.

Tenders on the printed forms must be properly filled up and signed, and delivered at the under-mentioned office, under closed envelope (marked on the outside, "Tender for Commissariat Supplies,") before noon on the 12th October next,

W. T. POWER, Deputy Commissary General.
Commissariat office, 5 New street, Spring gardens, London, S.W., Sept. 2, 1861.

REDUCTION OF THE 'TIMES'

NEWSPAPER.—P. LAWLESS, News Agent, 13 Philpot lane, E.C., will supply the above on and after the 1st October, 3d plain and 4½d stamped. The "Times" forwarded by Morning Mail at 26s plain, 29s 3d stamped, per quarter, and by the Evening Post at reduced prices. The Morning Papers lent to read. Stationary supplied at moderate prices.

THE ATHENÆUM.—

On and after October the 5th the price of THE ATHENÆUM will be THREEPENCE.

Thirty years ago, when THE ATHENÆUM came into the hands of its present Proprietors, its price was Eightpence, and its contents, with advertisements, forty-eight columns. Convinced that the circulation of Literary Journals was restricted by high price, and that every advantage offered to the public would bring increase of circulation and authority, the Proprietors reduced the price one-half—to Fourpence. The experiment succeeded, and cheap Literary Journals became the rule.

The Proprietors have always held to the principle then proved. They have given to the public the benefit of every change in the law, increasing the size without increase of price, until the average has become about sixty columes of literary matter, with forty columns of advertisements, selected so as to be of general interest.

The Proprietors, taking advantage of the abolition of the Paper duty, have now resolved that on and after the 5th of October the price of THE ATHENÆUM shall be reduced to THREEPENCE.

NEW COMMERCIAL NEWSPAPER AT LIVERPOOL.

Will be published on Tuesday next, October 1,

THE LIVERPOOL JOURNAL OF COMMERCE,

and Daily Shipping and Mercantile Advertiser, price One Penny, at the office, 32 Castle street. Editorial Department, 41 Harrington street.

COUNTY ANTRIM.
VALUABLE FREEHOLD PROPERTY for SALE.

TO BE SOLD BY AUCTION, at the Mart of Mr HUGH C. CLARKE, 5 ROSEMARY STREET, BELFAST, on MONDAY, the 21st day of October, 1861, at the hour of ONE o'clock p.m.,

All that FARM of LAND, containing 106a 0r 22p, statute measure, or thereabouts, be the same more or less, situate in the Townland of BALLYKEEL, in the Barony of Upper Glenarm, and County of Antrim, as lately in the occupation of Mr Philip Thornton, deceased, and held in fee farm, subject to the yearly rent of £10 16s 11d sterling; besides receiver's fees, duties, and tithe rent-charge.

Adjoining the Dwellinghouse there are extensive Offices and Farm Buildings, recently erected, with Churning and Thrashing Machines fitted up therein; Garden, Orchard, and every convenience for the residence of a respectable family, with an abundant supply of water at all seasons. It is well accommodated with regard to roads.

The Lands are in a good state of cultivation, a large sum having been lately expended in draining, fencing, and liming.

The above Farm is beautifully situated, within one mile of Kilwaughter Castle, two miles of the seaport town of Larne, and fourteen miles of Belfast, between which towns railway communication will be completed within a year.

The North of Ireland will shortly be brought into easy communication with Scotland and the North of England by the short sea-passage about to be established between Larne and Cairnryan, the passage being made in two hours.

For title and further particulars, apply to
Sir EDWARD COEY, Merville, Belfast.
HUGH C. CLARKE, Auctioneer, Belfast; or, to
JOHN M'NEILL, Solicitor, Larne.

Reigate, Surrey.—The Westfield Estate, comprising a capital Residence, with Pleasure Grounds and small Park of about 16 Acres.

MR JOHN LEES has received instructions from the Proprietor to SELL by AUCTION, at the Mart, opposite the Bank of England, on Wednesday, October 16, at 12, in one or more lots, unless an acceptable offer be previously made by private contract, a very desirable FREEHOLD RESIDENCE, in the Gothic style, with ornamental grounds, beautifully planted and timbered, and a small Park of undulating land, altogether nearly 16 acres, within a ring fence. This property is delightfully situate on the hill at Reigate, three quarters of an hour's ride from London, about half a mile north of the Town Station, at an elevation of about 100 feet above the railway. The aspect of the house is due south, and sheltered from the north and east by the Reigate and Gatton hills. The soil is dry; water abundant and good. The house is tastefully decorated, and in good order; it contains on the basement—a larder, wine and coal cellar; on the ground floor—dining room 21ft. by 17ft., library with groined ceiling 20 ft. by 12 ft., breakfast room 15 ft. by 11 ft., and drawing room 24 by 17 ft., opening to conservatory 40 ft. long, kitchen, scullery, and butler's pantry; on the first floor there are four principal bed rooms, two dressing rooms, and one servant's room; on the second floor—two bed rooms, but others can readily be formed. There is a two-stalled stable and coach-house, together with the usual out-offices. The kitchen garden is well stocked, and of good size.

Particulars may be obtained of Orton Lucas Esq., Solicitor, 50 Fenchurch street, London; at the Hotels in Reigate, Dorking, Guildford, Horsham, Brighton, Epsom, Croydon, Tunbridge Wells, and Hastings; at the Mart; and of Mr John Lees, Estate Agent and Auctioneer, Reigate, Surrey, of whom alone orders to view may be obtained.

Between HIGHGATE and HAMPSTEAD.

TO BE SOLD BY PRIVATE CONTRACT, THREE FIRST-CLASS RESIDENCES, of handsome elevation, Nos. 5, 11, and 13 St Alban's villas, West hill, Highgate. One is let on lease at £75, the others are in hand. Held by separate leases direct from the Freeholder at the nominal ground rents of £2, £5, and £5 respectively. If not previously disposed of, the Houses will be OFFERED to AUCTION at the Mart, on TUESDAY, October 15, at 12. Printed particulars can be had of Messrs DEBENHAM and TEWSON, 80 Cheapside.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head-office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.
W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

ANNUITIES.

NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION.

3 Pall Mall East, London.

Empowered by Special Act of Parliament, 17 Vic. cap. 43.
Established A.D. 1844.

IMMEDIATE ANNUITIES granted on very favourable terms.

The Tables for Reversionary and Deferred Annuities are particularly deserving of attention, whether regarded as a means of providing for a particular individual, or as a resource against the casualties of age and the uncertainties of health and fortune.

PETER MORRISON, Managing Director.

Prospectuses sent free on application.

AUDITORS—William Barton Ford, Esq.; Alexander Sim, Esq.; John Pasman Tate, Esq.
BANKERS—The London and County Bank.
SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification, thus adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the mercantile community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust that they will receive such support as will enable them to carry out the system of rating on a classification of goods.

The Directors will, at the expiration of five years, return to Insurers a per centage upon the profits of the fire business.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

September 30, 1861.

QUEEN INSURANCE COMPANY.

London Office—85 King William street, E.C.
Chief Office—In Liverpool.

Fire and Life Insurances of every description effected.

Fire Policies falling due at Michaelmas (29th September) should be renewed on or before the 14th October next.

W. P. CLIREHUGH, Manager.

IMPERIAL LIFE INSURANCE COMPANY,

No. 1 Old Broad street, London, E.C.
Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

The Political Economist.

As the American crisis is so very important to the commercial interests of this country, we have made arrangements for a Series of Letters from a Gentleman of great intelligence, practically acquainted with the Cotton Trade, who is now on his voyage to America to learn, as far as possible, the real facts from personal observation.

INTERVENTION IN MEXICO.

No expedition ever left any shore with juster objects or more ample warranty than the joint expedition against Mexico, to which the term "intervention" has been so inaccurately applied. Whether it be as wise as it is just, or as adequate as it is defensible, may perhaps be open to question. Certain French and English men-of-war, in conjunction with a Spanish squadron having a strong body of troops on board, have proceeded to Vera Cruz, with the full concurrence of the United States, in order to compel a redress of grievances from the Government of Mexico—or from the particular marauders who may for the time have assumed the functions and incurred the responsibility of that Government. The grievances which have at last called forth this demonstration in earnest may be classed under four heads.

The first is the flagrant, persistent, and shameless frauds which have been practised, for long years and by every successive party in the State, against their creditors—the European, and more especially the British, Bondholders. Those unhappy individuals can obtain neither repayment, nor dividends, (though the latter at all events have been over and over again most solemnly guaranteed); while the Mexican property hypothecated to them as security has been fraudulently and violently seized, misappropriated, or withheld. The facts and figures of the case in brief are as follow:—Large sums of money were at various periods lent by confiding capitalists (chiefly English) to the Republic of Mexico—a country whose vast resources could not be called in question, and whose success in developing those resources would, it was hoped, be greatly aided by her emancipation from the feeble and backward Government of Spain. The interest accruing upon these sums was very tardily and irregularly paid; and after a series of disputes—of angry demands on the one side and shabby excuses on the other, which brought the very name of Mexican Bonds into merited abhorrence—an arrangement was, in December 1850, proposed by the Mexican Government and accepted by the Bondholders, in virtue of which the extant debt was reduced to the sum of 10,241,650*l*, the interest was fixed at 3 per cent., and 25 per cent. of the entire import duties, with 75 per cent. of the export duties from Pacific and 5 per cent. from Atlantic ports, was formally set aside and mortgaged as security for the regular payment of this interest. The new Bonds issued on the faith of this agreement bear upon them the following indorsement:—"Now know ye that we, the said Ministers of the General "Treasury of the Mexican Republic, acting in the name and "on behalf of the Government of Mexico, do hereby solemnly "promise and engage that all and each of the conditions con- "tained in the said decree shall be duly and faithfully "observed and kept by the Government of the Republic of "Mexico, and that as guarantee for the payment of the in- "terest, and also for the redemption of the principal of the "said New Consolidated Debt, the Mexican Republic hereby "solemnly hypothecates its whole and entire revenue from "whatever source derived, but in a more especial and distinct "manner, one-fourth part of the import duties of Customs "wherever levied, 75 per cent. of the export duties from the "ports of the Pacific, and 5 per cent. of the same duties in "the ports of the Atlantic; and that the same shall not, on "any pretence, be alienated therefrom, so that the half- "yearly dividends on the said New Consolidated Debt shall "be faithfully and punctually discharged."—In addition to this there is a further debt called the "British Convention Debt," amounting to 5,000,000 dollars, the interest on which was originally 4 per cent., but which has recently been raised by the successful intervention of our Minister in Mexico to 6 per cent. It was agreed that this debt, arising from acknowledged claims on Mexico, should be gradually paid off; and the payments were to be made by an assignment, first of 12 per cent., and subsequently of 16 per cent. of the import duties; but owing to the long suspension of these due payments, an assignment of an additional 10 per cent., until all arrears are paid off, has lately been obtained by the British authorities. Thus it would appear that in all 51 per cent. of the Mexican Customs duties has been legally mortgaged to the British Bondholders and the creditors of this supplementary debt. We are unable at this moment to state exactly to what extent the interest due on these two sums has been suffered to fall into arrear. We believe, however, that at least thirteen half-yearly dividends are still, in spite of all remonstrances, unpaid.

Now, it is not the practice of the British Government, as our readers are well aware, to consider itself bound to enforce from foreign States payment of sums voluntarily lent to those States by British subjects, however shameless or audacious be the behaviour of the defaulting country. But our Government *does* usually concern itself to procure indemnity or restitution, where property of Englishmen has been forcibly taken from them, or authoritatively withheld. And it seems as difficult to argue that the Customs revenues of Mexico, which have been mortgaged to British Bondholders, are not legally the property of those Bondholders, as to deny that these revenues have been persistently diverted from their hypothecated purpose, pocketed and misappropriated, by the Mexican Government.

The second class of grievances for which redress is needed consists of wholesale and retail robberies committed on British subjects resident in Mexico by Government authorities, or with their connivance, or at least with their perfect acquiescence and inaction. These are too numerous for recapitulation here, but have been duly set forth in authenticated memorials to Her Majesty's Ministers. Sometimes they comprise highway robberies committed with perfect impunity, in open day, in or near the capital;—sometimes attacks on and wanton destruction of property held by Englishmen, many of whom have been in former times invited to settle in the country in order to enrich it and develop its resources by their skill and enterprise,—destruction for which no indemnity could be obtained;—sometimes plunder on a large scale committed by bodies of armed men in the pay of some one of the ruffians who from month to month seize the reins of power from each other;—sometimes "forced loans," or demands extorted by imprisonment and threats of worse treatment still, from any wealthy merchant or manufacturer whom the authorities fancied could be squeezed with advantage. In fact, all rich men in Mexico seem to be regarded and handled much as our Plantagenet Kings and Norman Barons treated Jews—sacks to be emptied—outcasts to be trodden under foot. Instances of this sort are quoted by the dozen.

The third class of complaints is more serious still, and relates to constant and unpunished murders. Within one year it is said that no less than twenty-three Englishmen have been thus assassinated. Indeed, it would seem as if the extermination of foreigners were the settled policy—the only settled policy—of that miserable and lacerated country. The public conveyances are constantly attacked, and the aliens alone robbed and slain, with a sufficiently significant discrimination. Houses both of Frenchmen and of Englishmen, official residences and private residences, are surrounded and assailed with cries of "Death to Foreigners." And not only will the Government do nothing either to prevent these outrages or to punish them; but they are not unfrequently committed by the armed retainers and at the express command of chieftains who are themselves the principal rivals for the seizure of the supreme power.

The fourth and last grievance is that of repeated insults and outrages offered to the British flag, in the persons of our Consuls and resident Minister in Mexico. An escort of Government troops plundered the very convoy they were protecting. The house of the British Legation was broken open by the orders of Miramon and robbed of 660,000 dollars. No redress could be obtained for either outrage, and Sir Charles Wyke therefore very properly struck his flag, and sent home for further orders.

After this enumeration, our readers will probably be of opinion that the measure of Mexican iniquity is full, and that the limits of British forbearance have been reached. But whether the scheme of interference planned (so far as this is correctly known to the public) be the most desirable that could be adopted, or whether the demands which it is said are to be enforced will effectually meet the requirements of the case, is unfortunately by no means so clear. In the first place, joint military expeditions—especially expeditions undertaken in conjunction with the French—*a fortiori*, expeditions undertaken in concert with both French and Spaniards—are always objectionable and should be avoided wherever practicable. The Spaniards are proud, slow, ineffective, and unmanageable. The French are quick, grasping, selfish, and slippery. We had enough of Spanish co-operation in the Peninsular wars. We had enough of French co-operation in the Crimean campaigns. The two Governments may act cordially and loyally together: the two armies or navies seldom will. Moreover, we can never feel perfectly clear that the views and prospects of our allies are as simple and avowable as our own. They like spoil: we only wish for repayment. They want glory: we only want justice. They stick like glue to any soil they land upon: we are only anxious to get home as soon as possible. The co-operative part of the business is, therefore, to be regretted; but under the circumstances we can well believe it was unavoidable. The French have claims on the Mexican Government for redress and restitution as well as we, though much less serious and heavy ones; and so have some Spaniards. We could not ask France to do our work for us, and we could scarcely expect that she would have let us do it for ourselves without much uncomfortable suspicion of sinister designs—for we must remember that no Continental Government believes in that national purity of purpose on which we so justly pride ourselves, the French least of all. Spain, too, would have been jealous, and not unnaturally so, at an expedition to coerce one of her emancipated colonies, conducted by the country which most contributed by early recognition to establish the fact of that emancipation. On the whole, therefore, though we foresee embarrassment and dissatisfaction, we do not know that our Ministers could help themselves.

It would seem that the plan arranged between the co-operating Powers, and to which they intend to restrict their action, is to take possession, with or without the acquiescence of the Mexican Government, of the Custom Houses of the country, and to levy the import and export duties imposed by law, retaining one-half the proceeds to be applied to the liquidation of the just claims of the creditors of the peccant Republic, and paying over the residue to the Mexican authorities. There can be no doubt that they have a perfect right to do this—and much more. There can be no doubt that they display singular moderation and self-control in confining themselves within such narrow limits. There can also, we understand, be little doubt that the proceeds of these Customs duties, if effectually levied, will suffice to discharge in time the outstanding liabilities of Mexico. But two or three qualifying considerations at once suggest themselves to the mind. Foreigners, already so hated by the factions which prey upon that wretched country, will not become more popular when they have seized upon the principal revenues of the country, and administer those revenues with strict impartiality and for their own behoof in the first instance. The more vigorously and honestly they manage the business the more will they be detested by people accustomed to officials who were timid, feeble, and corrupt, and who could be bribed, bullied, hoodwinked, and robbed almost at discretion. The Consuls or Special Commissioners, therefore, who are appointed to levy and enforce these import dues, will require to be protected and sustained by an adequate force. For they will not only be required to *receive* the duties, but to see that they are not evaded;—they will have to act not only as collectors but as preventive officers;—they must, in a word, have the Coast Guard Service as well as the Custom Houses in their hands; and that service, as we well know, in order to be of any use at all, must be composed of tried Europeans and not of rascally and unserviceable natives. They must in consequence have a considerable permanent force at their disposal; for Mexico is a large country: her coast line extends 1,500 miles on the Gulf and 2,000 miles on the Pacific shore. The coast, too, is usually unhealthy, and the ports, though few, are scattered. An adequate Coast Guard force would involve something approaching to military occupation of large districts. All this proceeds on the assumption that the Mexican Government, feeling itself helpless, will at once acquiesce in the proposal of the allies. If it turns restive, a force will be needed not only to watch smugglers, but to coerce the authorities.

But supposing all this done; supposing the revenue collected and the proceeds duly allotted to the liquidation of established claims; we shall still have met only one of the four requirements of the case, we shall have redressed only one of the proved grievances under which our countrymen and our representatives have so long suffered. Extortions, murders, and insults to the British flag may go on just as before. We shall have obtained the punishment of no offenders; we shall have secured no guarantee against continued wrong; we shall have done nothing towards establishing either a strong Government which *can*, or a just Government which *will*, maintain order, enforce equity, and punish crime. The lives and properties of Europeans in the interior, and especially near the infested capital, will be as insecure as ever. No effective step will have been taken either to restore tranquillity to that unhappy land, or to protect those of our fellow-citizens who have settled there on the faith of authoritative assurances of just and decent treatment, or who may be travelling there on business or for pleasure. It seems, on the first glance at the affair, as if we were undertaking

both more than we have calculated on doing, and less than we shall be compelled to do, if we really desire to remedy the mischief. The mere seizure of Mexican revenue redresses only one of the grievances, the cumulative magnitude of which, and not the mere unpaid debt, has led to the expedition we are commenting upon.

But the subject is a large one, and we shall have to return to it next week.

THE FRAUDS UNDER SCHEDULE D, IN THEIR RELATION TO THE EQUALISATION OF THE INCOME TAX.

We do not anticipate that the refined objections of Mr Lowe and others to the better adjustment of the pressure of the income tax will produce any general conviction. They are difficult to answer; they go deep as to the theory and principles of taxation; they raise difficulties of detail; they puzzle most people, but they persuade none. Very few persons can even repeat them. Hardly any one could pursue Mr Lowe's line of argument but himself: fewer still could reproduce it, if questioned respecting it on a sudden. But, on the other hand, there is a general feeling that it is unjust and unequal to tax a precarious income as if it were a certain income; a terminable annuity, perhaps, with but a single year to run, as if it were a perpetual annuity which will never end. The evident unfairness of taxing at the same amount smaller means and greater means will retain its place in popular apprehension, whatever refined fallacies may be scattered over the subject.

It is otherwise with another objection which the commercial classes have brought upon themselves, or rather which certain numerous individuals scattered through those classes have brought upon the whole of them. It is objected, —and the objection, though a mistaken, is a popular one,—to the contemplated reduction of the taxation upon the industrial body, that as a whole, and *as a class*, it already pays *less* than it should. Persons taxed under Schedule D have the dangerous privilege of self-assessment, and they unquestionably use it. To what extent they do so is uncertain, but every one knows that the amount of fraud continually practised is lamentably large. Recent information gives us reason to fear that it is greater even than was supposed. A return in the Appendix to the Report of the recent Committee shows, at least presumably, that the effect of these defalcations upon the revenue is very considerable. We have here a return of the produce of a penny of the income tax in each of a series of years, and of the portions of that produce respectively contributed by each of the schedules. Thus, in 1855, a penny of the income tax produced 1,108,365*l*, of which

	£
Schedule A yielded	481,413
— B —	121,452
— C —	109,114
— D —	332,677
— E —	63,709
Total	1,108,365

and in 1859 the produce of a penny in the pound had augmented to 1,216,340*l*, of which

	£
Schedule A yielded	532,559
— B —	129,122
— C —	122,278
— D —	353,984
— E —	78,397
Total	1,216,340

by which it appears that Schedule A, the real property schedule, has increased from 481,413*l* to 532,559*l*, or 10 per cent.; whereas the produce of Schedule D, the traders' schedule, has augmented merely from 332,677*l* to 353,984*l*, or only 6 per cent., yet during those years the national commerce was extended with marvellous rapidity. In those years

	1855. £		1859. £
Our Imports were	143,542,850	.....	179,182,355
— Exports —	116,691,300	.....	155,692,975
	260,234,150		334,875,330

or an increase of 29 per cent. It can hardly be that in truth so large an extension of trade could happen with so very small an augmentation of profit; that so much more should have been transacted and so little more gained; nor is it credible that our realised property is augmenting at a vastly greater rate than our commercial capital. The reason, we fear, is, that the income tax on real property is levied upon that which the tenant pays—*upon the bulk*; whereas it is levied upon mercantile property according to the word of the trader, upon an hypothesis that he will be veracious.

If, as would therefore appear, it is not only true that certain exceptional traders defraud the Government, but further that the defalcations of the trading class are in the aggregate very serious; and if, as is certain, the opportunity which they have of committing those frauds cannot be taken away from them,—for they must be taxed according to a self-assessment or not at all,—it certainly becomes a grave matter to be asked to give an exceptional concession to those who now enjoy irregular advantages. 'A certain 'class,' it may be said, 'cheats the Government out of 'much, and has then the impertinence to ask the remission 'of more. Surely it would be absurd in the Government 'to listen to their demand.'

It cannot be said in reply, that we must, at all events, make the proposed remission to the honest traders who now conscientiously assess themselves. The whole subject is one for a rude and rough classification. We cannot search out exceptional individuals here and there. If it, as we fear, be true that the whole proceeds of Schedule D are much less than they ought to be, we ought not to regard scattered and individual cases of hardship. These must exist under every possible income tax, and it would be absurd to break up the tax which now exists in a vain attempt to alleviate them.

The reason which we believe to justify, and even to require the suggested concession to the trading classes, is different. The Government has tempted the mercantile community by placing it in a position in which it never should have been placed—which was too tempting for human nature to endure without deterioration. It was required to participate in taxing itself *unjustly*. A tax was imposed which pressed equally upon a richer class and a poorer class; while, by an anomalous absurdity, the poorer class was required to assess how much it should pay, and the richer was not so required. It was unreasonable to expect such virtue from the average morality of ordinary Englishmen. It is much that people should assess themselves accurately to what they consider a just tax. Hardly any nation in the world has ever shown sufficient morality to do even as much as that. But it is absurd to expect men to assess themselves accurately to what they believe to be an unjust tax. They say, or they feel: 'The Government is unfair to us, and therefore we need 'not be too scrupulous with the Government. The Govern- 'ment wishes to take from us money which it ought not to 'have, and therefore there is no such great harm in prevent- 'ing it from having it.' An obscure idea of this sort lurks in the minds of many who would not be prepared to state it, and who would shrink from it if stated. It does not induce them to defraud the Government of anything which they know to be its due; but it does induce them to decide all dubious questions in their own favour; to catch at every petty circumstance of excuse, however invalid; to give themselves the benefit of every doubt, however shadowy and imaginary be its nature. The impudence of the State, if we may be so bold as to use an expression which is not too strong, in asking people to contribute to their own wrong and co-operate in their own maltreatment, has largely enhanced the inevitable fraud which must exist under every conceivable system of self-assessment.

It would, therefore, be monstrous to make the frauds of the commercial classes a reason for subjecting them to an unequal rate of direct taxation. Even if the income tax were new, it would be demoralising in a Government to say to the trading or to any other class: 'We know that 6d in the '£ is all which *in justice* you ought to pay; but we charge 'you 9d, inasmuch as you are to tell us what your incomes 'are, and we know that you will tell us they are much less 'than they really are.' A Government which used even this language would be justly chargeable with corrupting its subjects and suggesting to them to commit frauds upon itself; but it is far less culpable than a Government which should say: 'We have required our subjects to tax themselves 'at more than was just, and we have thereby demoralised 'them: we will continue for the sake of the money to tax 'them unjustly still further, though in all likelihood we 'shall demoralise them still more.' Such a Government is

not only risking a *possible* deterioration of the honesty of its subjects, but making an actual, a present, and a growing deterioration the avowed motive of its action and the specified basis of its financial policy.

Common sense teaches us that all persons who are to assess themselves to a tax should be treated by that tax not only with true justice, but with conspicuous justice. They should inevitably feel that they ought to pay the money which they have a ready, though immoral, expedient for not paying if they choose. If the State is obliged to trust for its money to the conscience of its subjects, it should at least be careful to have the whole of that conscience upon its own side.

THE JAPAN OUTRAGE.

The sanguinary attack upon our mission at Japan, of which tidings arrived last week, is we fear only a foretaste of future and perhaps graver difficulties. Intercourse between nations in very different stages and with very different ideas of civilisation is always attended with perplexity and peril, and requires the nicest management. Forbearance is sometimes impossible, and is frequently imprudent, because habitually misunderstood; and even the most earnest and sincere desire to act with justice and with clemency is by no means always sufficient to ensure justice being done or mercy being shown. Wherever a superior race comes into close contact with an inferior one, or a highly-civilised race with a semi-civilised one, or a thoroughly European with a thoroughly Oriental race, it seems inevitable that there should be cruelty, oppression, and subjection, and the appearance, if not the reality, of wrong. At least it has always been so, with every people and in every quarter of the world. The relations of the Spaniards to the Mexicans, of the Dutch to the Hottentots, of the Americans to the Indians, have ever been fatal to the weaker tribes, even when not intentionally barbarous and tyrannical; and it would seem that even our own higher morality and our own more scrupulous sense of justice, though vigilantly and suspiciously watched and checked by the jealous philanthropy of England, have not been able either to prevent the feeble and wretched Australian from gradually dying out before us, or to save the more capable and energetic Maories from ceaseless quarrels with us or from the imminent prospect of ultimate extermination. In both cases we believe that we have really done our best to exempt these unfortunate people from the usual fate of savages brought into collision with European superiority; but in both cases our efforts have been in vain.

It is the same or nearly the same when we come in contact with the most civilised nations and the most ancient polities of the East. Amicable co-existence seems hopeless,—in the first instance, because barbarism cannot coalesce with civilisation,—in the second, because the two civilisations are incongruous and incompatible. In India and in China, our course has been one continued series of encroachments, advances, and conquests,—often innocently, usually unwillingly, but always inevitably. In our conduct with reference to both countries we have often been scandalously guilty, especially in earlier times;—but if we had always been as scrupulously just and long-suffering as we have been of late, it may well be doubted whether the issue would have been very different. Our march might have been slower, but it would have been in the same direction. Our hands would have been cleaner, but they would have been nearly as full, nearly as hard, nearly as coercive as they are. The moment we set foot in any of these countries as merchants, still more, the moment we acquire one foot of territory, even for the building of wharves and factories, all the rest seems to follow as it were with the regularity and the certainty of fatalism. The process is nearly everywhere the same—and nearly everywhere irresistible and unavoidable. The merchants and settlers have certain rights conceded to them and certain property assigned to them—for which they have usually given ample equivalents in services or in commodities. The habitual caprice or insincerity or violence of Eastern Potentates leads to the violation of these guaranteed rights and the robbery of this ceded property. Of course men must defend what is rightfully their own,—or their Government must do it for them. They do so; they are successful; they demand not only indemnity but security for the future. This can seldom be given them except in the shape of extended possessions and wider immunities—perhaps a fort and soldiers for their own protection. Then native Sovereigns quarrel: the Sovereign who has most favoured the European settlers asks their aid against his opponent, who perhaps has injured and assailed them. The assistance is granted; is effectual; is recompensed by a portion of the spoil taken from the conquered party,—probably by lands. The European thus becomes by degrees himself a proprietor and a potentate, and of course soon an influential, a suspected, and a dreaded one. He is just and faithful to his engagements: his Oriental neighbours never are; they intrigue, they plot, they violate the most solemn promises; they rob him shamefully, they attack him treacherously: they have, in fact, notions as to the sacredness of treaties the very opposite of his. A long course of insincere and dishonourable dealing, crowned perhaps by some act of flagrant enmity, at last wears out his endurance: a war ensues in which he is successful; and he punishes and disarms his assailant in the only way open to him, by dispossessing him, or reducing him to vassalage. For in dealing with Asiatics, the only safety lies in *incapacitating* a man who has once become your enemy. In this way, in the course of years, and without wrong on our part—nay, by the mere process of self-defence—we may become possessed of half a continent. This—with the addition of much wrong in former times, no doubt—has been the history of our Indian acquisitions. In China, the process has been somewhat modified. We acquire a footing. We become successful and welcome traders. We are attacked and outraged by jealous or fanatical natives. We demand and enforce protection from the Government. That Government enters into certain solemn engagements with us, and takes the first favourable opportunity, with the usual Asiatic perfidy, of setting them all insolently at nought. We are compelled to punish; and in punishing to exact harder and more unwelcome conditions. These are again shamelessly violated: we must once more right ourselves; and this time we must exact means of future and permanent security; we must insist upon being provided with a territory and a force which will enable us to defy alike treachery and violence. In addition, it is absolutely necessary—or is believed to be so—that we should have a resident Minister at the offending Court, who shall be able at once to bring under the notice of the Sovereign any wrongs committed against the foreigners whom he represents, and to demand redress for the same. Such residence of an "Outside Barbarian" at the capital is particularly unpleasant both to the people and the Court: insults and outrages naturally occur; are almost invited, and perhaps cannot easily be repressed:—the old course has to be run again: indemnities and apologies are demanded, demurred to, and enforced by an appeal to arms. We grow stronger; the native Government grows weaker; we become a prominent power in the land, and may not improbably end, most unwillingly, in finding ourselves, first virtually, and then actually, its real rulers. Yet all this time we *may* have acted not only with perfect correctness, but even with laudable forbearance.

The case of Japan is peculiarly regrettable. It does not appear that in this instance we have been at all culpable—unless it was in being there at all. There is no reason to believe that our representatives have been either insolent, encroaching, or negligent of the prejudices and feelings of the natives; and there is reason to know that the usual disorderly and reckless behaviour of sailors while on shore has been carefully watched and rigorously checked by the British authorities. The error on our part, if there be any, was earlier in date, more venial in character, and cannot we fear now be amended. The Japanese were a peculiar *people*, with a singular but most elaborate civilisation, industrious, comfortable, and contented, supplying themselves with all they needed by the exercise of an almost unmatched ingenuity; assailing no nation, injuring none, asking only to have no intercourse with any. For generations, for centuries, the strongest characteristic of the people and the most marked desire of the Government was to prevent all communication with foreigners, and especially all residence of foreigners upon their shores. The feeling was a fanatical one—the

result mainly of historical antecedents; but it pervaded and determined the whole policy of the country. First, the Russians, then the Americans, and finally the British, annoyed at this rigid exclusion; deeming perhaps that such isolation from the influences of our higher culture could not be good for the Japanese themselves; deeming certainly that it shut us out from markets which might reward our enterprise with wealth and our luxury with new productions; fancying, perhaps, that no nation had a right thus to shut itself up in self-satisfied exclusiveness,—resolved to break through the cordon of inhospitality by which these islanders hoped to guard themselves against foreign gold, foreign manners, foreign influences, foreign demoralisation perhaps. Accordingly, Lord Elgin, being in those seas, having time on his hands and a force at his disposal, sailed for Japan, entered their harbours, anchored near their capital, was received with a false and assumed cordiality—the offspring of the mingled timidity and cunning which belongs to the Asiatic character; and succeeded in obtaining a treaty of commerce, in which there was nothing unwarrantable, oppressive, or unjust;—against which, in fact, nothing could be alleged—except that we know the Japanese authorities, if left to themselves, would rather have sunk us in the ocean than have signed it. As usual with Orientals, they consented because they did not venture to refuse, resolved to make the treaty a dead letter if they could, and to discourage subsequently by every means they dared the intercourse and residence of Europeans. As usual with Englishmen, we have no tolerance for those underhand and double-faced proceedings, and insist upon the treaty being fulfilled and upon our countrymen being well-treated and respected. Of course we have a full legal right to do so. Of course, practically, when attacked or wronged, we can do nothing else. But it is a painful feature in the matter, and must always remain so, that we are conscious in our hearts that we are unwelcome visitors, and that we are there in defiance of the strongest prejudices of those who have—or had originally—the same right to say what shall be the policy of Japan, as we have to say what shall be the policy of Britain.

As far as we can ascertain from the details that have yet reached us, it would appear as if in this instance the authorities have not been either treacherous or inactive. The mission house that was attacked was defended by guards duly appointed by Government. These guards encountered the assassins, and several appear to have been slain and wounded on both sides. There is no charge of connivance on the part of the authorities. The suspected party is an "opposition" Prince, head of the *Frondeurs*, or "Know-Nothing" section of Japan politicians. The unpleasant feature of the affair is the notorious fact that if any one, without getting the Government into a scrape, will make Japan so uncomfortable to Europeans that they will leave it in disgust, he will be fulfilling the secret wishes of both the people and their rulers.

THE PAPER TRADE.

EXAMPLE VERSUS PRECEPT.

No one will deny the practical conclusion at which the Committee appointed to consider and report upon the state of the the paper trade in England arrived at the close of their investigations. Every one will admit that it is the duty of our Government to endeavour, by all the force of sound reason and good argument, to induce other nations to abolish the prohibitions or the duties which they have imposed upon the export of rags from their countries to this. As such interferences with the natural course of trade are always hurtful to the interfering nation, it is easy to prove that the foreign nations with whom we remonstrate are injuring themselves by their present policy, as well as that this policy is ungenerous to us, who willingly receive from them the manufactured article of which they refuse to us the raw material. But at the same time in so doing, we must be very careful not to fall into the use of arguments which may be easily enough turned back in an unrefutable shape upon ourselves. It is not too much to say that most of the arguments used by the paper-makers, and some of those which the Committee half seem to sanction, are really Protectionist arguments, and, so far as they go, rather justify than impugn the wisdom of the course which France and Belgium and certain other nations are pursuing.

The fundamental maxim upon which the Governments of the countries that refuse to us their rags are acting is a simple one. They say:—'We must look to our own people; we are not at 'liberty to consult the interest of other countries; we are Belgian 'statesmen, or German statesmen; we are bound to consider 'the interest of Belgium and the interest of Germany: 'that of England and that of the rest of the world is in com-'parison nothing to us. Rags are a peculiar article. No-'body makes them for the sake of making them, and, 'therefore, they are an exception to all the rules of political 'economy. A rise of price will not give us more rags,—a 'fall in price will not give us fewer. The paper-makers of 'all countries are struggling—are scrambling—for the casual 'remnants of the clothes of all countries. The evident 'interest of those who, like us, have many rags, is to prevent 'foreigners getting hold of them: we shall thereby give our 'manufacturers a cheap raw material, and shall secure to 'them the production of a valuable article, and to our 'country the profits of a considerable trade.'

On the other hand, our paper-makers turn almost the same words backwards. They say:—'Rags are a peculiar 'article. They are an accidental article, the production of 'which does not increase even when the demand increases. 'The supply of them in England is now insufficient for the 'consumption of England. We want rags from abroad, but 'several foreign countries either make us pay very dear for 'them, or refuse to let us have them at all. We do not get 'them as cheap as other people, and it is the duty of the 'Government to rectify the disadvantage. There is no 'possibility of our continuance in the manufacture in which 'we are engaged if we are left as we are. Unless some-'thing is done for us, and that soon, we shall lose our whole 'trade, and England will be deprived of all the profit she 'now makes by her large trade in paper.'

It is difficult to say which of these arguments is the more inconclusive in reality or the more plausible in appearance. Our sympathies are of course with the English argument; but if we were Belgians, those sympathies in all probability would be with the Belgian argument. The two, in fact, rest on the same old but ever-recurring fallacy which has more to answer for in distorting the course of business operations and disturbing the trade of the world, than any other piece of unsound reasoning which was ever discovered by the perverted ingenuity of philosophers or accepted by the mistaken instincts of practical men. It is a natural impression at first sight, that it is the business of Government to watch over the interests of the producer and not over those of the consumer. The former is a visible, perhaps suffering, almost certainly complaining man: the latter is an unknown individual in an innumerable crowd, who is nearly sure to suffer little; who is quite sure to say nothing about his sufferings, unless he is materially stinted in his primary necessities and nearest wishes; who gains no sympathy and feels no pain. The producer, too, says very justly:—'I am injured, and I tell you 'how I am injured. I have made this article for twenty 'years and more; I lived in comfort by making it; and I 'should have been so living now if a caprice of economical 'policy had not induced you to favour the foreigner.' The consumer, on the other hand, knows nothing about the matter. If a protective duty is remitted, he is very glad that what he buys is a trifle cheaper; but he generally expects the benefits of legislation to be more rapid than in the nature of things they can be. For the most part, he rather grumbles at what he does not get, than is thankful for what he does. No one can wonder that the interest of the ungrateful and unknown man is postponed to the interest of the eager, grateful, and visible man.

The only effectual answer is the answer of the political economist. Whenever the State selects one class of producers for special favour, it in fact impedes and injures some producers of another class. If Government is so unwise as to encourage people to produce paper, who, if it had been inactive, would not have produced it, such interference will indisputably discourage the import of foreign paper, but it will also discourage the manufacture or production of those commodities which would have been sent abroad to pay for that paper. Capital is attracted to a pursuit which, of itself, it would not

have selected because of its comparative unprofitableness, and drawn away *from* the pursuit which it would have selected because of its greater profitableness. The Government is pleased at seeing a large branch of industry conspicuously growing under its hand, and does not know that there is another unseen branch of industry which is depressed as much as the former is raised,—whose latent grievances are to be precisely measured by the artificial advantages conferred upon that which was selected for undue favour.

This argument irrefragably proves that the policy which Belgium and those other nations, which prohibit the export of rags in order to develop their own paper manufacture, have designedly chosen, is, for their own interests, a mistaken policy. If the natural tendencies of capital so willed it, they ought to export every rag they can collect and import all the paper they require. But it proves undoubtedly, also, that the paper-makers should not grumble at recent legislation. It proves that it was formerly unwise for us to foster artificially the manufacture of English paper, as much as it proves that it is now unwise for foreigners to stimulate that of foreign paper.

It is to no purpose to reply that our foreign legislation was retaliatory merely: that is true; but such legislation is not the less injurious for such a reason. Foreign nations may refuse to send us some of their commodities, and thereby they suffer as well as we; but we should not, therefore, refuse to receive any others, for by that we suffer as much as they. It is hurtful to us that foreign nations will not give us their rags; but it would also be hurtful to revive the Customs duties on foreign paper, for by so doing we should injure the branches of manufacture of which the products are now being exchanged with other countries for such paper.

The English Government, therefore, should press on Belgium the abolition of its prohibition to export rags, and upon other countries the remission of the high duties they have imposed upon that exportation; but their argument should not be that which the paper-makers suggest. It would be of little use to go to the Government of Belgium or any of the German Governments and say:—'You are hurting the paper 'manufactures of Essex, or Hertfordshire, or Scotland by your 'legislation.' They will say at once:—'We do not care about the 'special interests of those districts, for we have not been in-'trusted with them, but with those of our own country.' The real argument is:—'You are hurting your own country; you are turn-'ing capital from its natural pursuits to less profitable pursuits; 'you are injuring us unquestionably, and that is why we speak, 'but you are injuring yourselves also.' This argument could not be effectually urged upon foreign nations so long as our Customs duty on foreign paper was more than equivalent to our Excise duty on home-made paper; for it at once admitted of a retort. 'Act on your own principles yourselves,' it might have been replied, 'before you ask us to act on them. 'Show confidence in your maxims by submitting them to the 'most searching of all tests, before you ask us to expose our-'selves to that test. If your theory is true, you ought to 'abolish your protective duties even if we do not follow your 'example. You should begin who believe: we will imitate 'you when we are converted.' So far, then, from the abolition of the Customs duty on foreign paper having placed our diplomatists in a worse argumentative position with foreign countries, it has placed them in a better position. They have now the free use of the free-trade argument: before, they could never use it except at the risk of an unanswerable reply.

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom, in the undermentioned periods, ended September 30, 1861, compared with the corresponding periods of the preceding year.

III.—An Account showing the Revenue and other Receipts of the Quarter ended September 30, 1861, the Application of the same, and the Charge of the Consolidated Fund for the said Quarter, together with the Surplus or Deficiency upon such Charge.

	£	£
Surplus balance beyond the charge of the Consolidated Fund, for the quarter ended June 30, 1861, viz.:—		
Great Britain	...	
Ireland	839,748	
		839,748
Income received in the quarter ended Sept. 30, 1861, as shown in account I.		14,601,232
Amount raised per Act 23-24 Victoria, cap. 109, on account of Fortifications, &c.		240,000
Amount received in the quarter ended Sept. 30, 1861, in repayment of advances for public works, &c.		288,490
		15,969,470
Balance, being the deficiency, on Sept. 30, 1861, upon the charge of the Consolidated Fund in Great Britain, to meet the dividends, and other charges, payable in the quarter to December 31, 1861, and for which Exchequer Bills (deficiency) will be issued in that quarter		3,962,612
		19,932,082

	£	£
Amount applied out of the Income for the quarter ended Sept. 30, 1861, in redemption of Exchequer Bills (deficiency), for the quarter ended June 30, 1861		2,065,934
Amount applied out of the Income to Supply Service, in the quarter ended Sept. 30, 1861		10,435,835
Charge of the Consolidated Fund for the quarter ended Sept. 30, 1861, viz.:		
Interest of the Permanent Debt	5,528,862	
Terminable Debt	653,732	
The Civil List	100,897	
Other charges on Consolidated Fund	521,349	
Advances for Public Works, &c.	300,488	
		7,105,328
Surplus balance in Ireland beyond the charge of the Consolidated Fund in Ireland, for the quarter ended Sept. 30, 1861		274,985
		19,932,082

The above returns do not present any very unexpected features. The Excise reduced principally in consequence of the deficient barley harvest of last year, and the Income Tax in consequence of its diminished rate. It should likewise be remembered that the Excise was last year irregularly augmented by the malt credit called in by Mr Gladstone. The Customs, as usual, are prosperous.

Agriculture.

FARM BUILDINGS.

UNDOUBTEDLY the insufficiency of the buildings for the accommodation both of the farmer and his family and his stock, is one of the greatest of existing drawbacks on English farming. On the great majority of farms not only is there an absence of buildings suitable for feeding or rearing stock, but there is commonly a great and nearly useless source of outlay in the enormous wooden barns at one time thought necessary for "inbarning" the grain crops. In short, besides being deficient, our farm buildings are not in kind or in plan adapted to modern husbandry, neither are most of our farm houses such as to offer any great temptation to men of capital and intelligence to embark in the business of husbandry. On many estates it would be good economy entirely to rebuild and rearrange the whole of the farm houses and farm buildings; and as even the proprietors of settled estates can now charge their property with the greater portion of the cost of new buildings by a rent-charge extending over 20 years or longer, there is really no reason why all needful farm homesteads should not be built wheresoever prudent management demands such outlays. In general, however, the work of reconstruction and renewal will be gradual. Yet it is of much importance that right principles in the construction of farm premises suitable to the exigencies of modern husbandry should prevail. Thus we often see on a change of tenant much cost incurred in the reparation of a parcel of ungainly, ill-arranged, and inconvenient wooden buildings, which after all do not meet the farmer's requirements, where a comparatively small additiona outlay would afford vastly increased accommodation to the farmer, and, by the use of the more durable material of brick or stone in the place of wood, would much diminish the often-recurring expense of repairs. It is the more important that the plan and method of constructing farm homesteads should undergo much consideration, because the present may be said to be a period of transition in such matters. Every farmer of skill and capital requires large additions to the existing buildings both for his stock, and in consequence to the increasing use of steam power in the operations of husbandry. Now such additions ought to be made upon some plan not inconsistent with a future more complete rearrangement of the whole of the premises. In our old farm yards there was unquestionably much uniformity of plan. The yard for the most part constituted a square enclosure, having the farm house on one side, the barn on the other, and the various other buildings and sheds placed on the other sides. The system assumed was that the straw thrashed from day to day would be thrown out into the yard, there to be consumed or trodden down by the cattle and other live stock. This has since been modified by dividing the yard, by building additional yards and the like; but for the most part farm steadings are as ill arranged and inconvenient as can well be conceived.

A very useful work, entitled "The Book of Farm Buildings," by Mr Henry Stephens and Mr Robert Scott Burn, has been published by Blackwoods, in which the authors have two objects, "one to establish principles upon which the planning of farm-buildings should be based,—the other to concentrate correct and valuable information on the nature and use of the materials employed in constructing farm-buildings." Now the objects proposed are just such as we have shown to be mainly wanted in reference to our English farm buildings. It is also necessary that the different characters of the soils of various farms should be more attended to. Thus a stock farm, a mixed arable and pasture farm, or a strong land farm, will each require a differently constructed set of buildings. Farm houses require something like a definite plan. The working and dwelling parts of a farm house should be kept separate; and the "working part should be in all cases nearly of the same dimensions, because the utensils employed and the room required for work are nearly the same in all cases;" while "the dwelling part should be enlarged and embellished in conformity with the importance of the farm." Farm cottages, too, confessedly require improvements both in plan and material, as well as increase in number. These objects have been carried out with considerable skill by the authors, and the landowner, the farmer, the law agent, and the country architect and builder, will all and each find in this work much valuable and practical information. To render many of the special and detailed descriptions of the various kinds of farm buildings included in this work intelligible without plans would be hopeless, and the details are unsuitable to our columns. But as an indication of the divisions they adopt, we may give the following as applicable to the three kinds of farms most common in England.

1. Common farming, at a distance from towns.—"Not being dependent upon towns, this kind of farming follows a regular rotation of cropping with green and grain crops, and it fattens purchased cattle and sheep for the market. It is also suitable to arable culture. This is the most common kind of farming in the country, and being so extensively practised, necessarily comprehends great variety of soil, the rotations on which are contracted and expanded from the common standard, as the culture of live stock or grain claims the predominance. Locality rather than soil determines this kind of farming. The farms are not of large extent, seldom exceeding 400 acres. The rent is generally moderate."

2. Dairy farming, cheese and butter being their chief products. —"For these purposes it requires a considerable portion of old pasture grass, as well as arable land for raising food for the cows in winter. It is thus suited to both arable and pastoral conditions. Its farms are of small extent, seldom exceeding 150 acres, and the rent moderate. Locality chiefly determines this sort of farming, which has reference to proximity to good markets." There are, however, considerable tracts of land in England on which the dairy farms are much larger than here indicated, and which are in no degree dependent on locality. This is the case in Gloucester, Wiltshire, Somersetshire, and other counties.

3. "The sixth and last sort of farming is the mixed husbandry. It is so named because it embraces the culture of the soil in intimate connection with the rearing of live stock. The system of rotation of crops is therefore solely adapted to promoting the welfare of the live stock reared. Thus pursuing arable culture with the rearing of stock, this mode of farming cannot be practised within narrow bounds. The farms are therefore large, seldom less than 500 acres, and extending even to 1,500 acres. Its adoption is determined neither by locality nor soil, its mixed character affording a happy medium for adapting itself to circumstances whether of the one or the other." It may perhaps be concluded that in each and all of these various kinds of farms the system pursued depends very much on the farmer's own objects and inclination. The buildings, however, ought clearly to be adapted to that system for which the land is best suited.

Literature.

THE PAST AND PRESENT LIFE OF THE GLOBE. Being a Sketch in Outline of the World's Life-System. By DAVID PAGE, F.G.S. William Blackwood and Sons.

SCIENCE made easy is much in vogue just now; and the reason is easy to find. An "iron age," or, as those who think it needs no "physician" better love to call it, "an age of progress," eagerly seeks for the materials of its prosperity in an increased control over the forces of nature through a more thorough knowledge of her laws. A conscious dependence upon the development of the sciences has led, not so much perhaps to more ardent study on the part of men of science, as to a more widely-diffused curiosity and interest among all classes upon subjects to which a generation since they were profoundly indifferent, if not openly hostile. Geology has come in for her share of popularity, and has indeed made more rapid progress in public favour than any other. Fifteen or twenty years ago it was looked upon with suspicion, as containing the seeds of dangerous and unlawful innovations. The very name of geology was suggestive of heretical and subversive ideas. Those who, undaunted by the popular disfavour in which it stood, pursued so suspicious a study, were regarded as little better than infidels, and secret underminers of revelation. Young people were kept as far as possible in ignorance of their discoveries and conclusions, and if by chance they gleaned stray hints of the forbidden knowledge, it was with some such feelings as those with which a few centuries earlier they would have listened to tales of astrology or witchcraft. It is only within the last few years that geology has had leave given it to live,—to take its stand as a recognised science,—and to pursue its investigations unfettered by that narrow and timid bigotry that seeks to prop up religion by ignorance, and fears the light a greater knowledge of the Creator' works may throw upon his ways of dealing with his creatures. Even now there is in many quarters a strong prejudice against this particular branch of the study of nature, and in others "an uneasy tenderness," as our author delicately expresses it; but that these are no longer the prevalent feeling is plainly shown by the number of elementary works on geology,—of handbooks, sketches, footprints, &c., that issue from the press, and aim at rendering the more abstruse researches of the learned in this science "into the common tongue of every man."

There are few studies more attractive and interesting, when divested of its technical terms and brought within the comprehension of unscientific readers, than geology; and none, not even astronomy, has exercised a more powerful fascination over men's minds, or led them into wilder flights of speculative theory. To the geologist, as he gazes backward through the lengthening vistas of past ages to the "dim dawn" of creation, and traces through the mists that hang over them the varying and often monstrous forms of vegetable and animal life that successively clothed and peopled the earth, the temptation becomes almost irresistible to give a freer play to his imagination than is consistent with strict scientific rules,—and to build up some theory of creation, of the origin and development of life, and of the physical problems of the globe, instead of painfully toiling bit by bit at raising a durable edifice by incontrovertible facts and well-founded induction. For such speculations, as Mr Page asserts, geology is "not fairly accountable." They stand or fall upon their own merits or demerits, which last, in his opinion, are enough "to destroy the reputation of any science not founded on the sure and ample bases of truth and philosophy." However this may be, such works as the "Vestiges of the Creation," or Darwin's

"Origin of Species," have undoubtedly attracted attention to the subject of geology, and assisted in making it popular.

Mr Page's book endeavours, and with much success, to keep the golden mean between too dry a detail of facts, and too amplified and romantic a panorama of World Sketches. His little work is certainly very readable, and gives a vivid outline of the orderly series of creation as far as can be gathered from the accumulated researches of geologists up to the present day. "I have endeavoured," he says, "in tracing the long line of Past Life to assimilate its extinct forms to those now existing, that we may be enabled to catch a glimpse, however faint, of the unity and connection that run throughout the whole." In this sentence we have the key to his whole plan; which is, by showing the close connection of past and present, to do away with the ideas of spasmodic action, of violent breaks in the existing order of things, or of monstrous and imperfect births in the first eras of the world. Orderly and continuous development, yet not that development that deduces the higher animals genetically from the lower,—Law acting not by chance or blind fate, but "as the unconscious machinery of a system requiring superintendence at every turn, and whose every variation is in effect equivalent to a new creation": —these are the facts and forces he finds in the teachings of geology, and these he endeavours to impress upon his readers.

His style is animated and impressive, his method clear and instructive, and of the spirit in which he conducts his inquiries the following extract may serve as a specimen:—

Geology is at best but a recent science, and its task (as yet but imperfectly performed) is a very wide and difficult one; wide, as embracing a vast field of correlative science; and difficult, as the objects of research can only be obtained by great labour, are often obscure, and, for the most part, far removed from their producing causes. In this case, though the history of the past be ever attractive, its elimination requires extensive travel and careful research. Guided solely by a desire to arrive at truth, our observations must be made with great caution; and even with the utmost care we must often remain contented with mere description, confessing, and not ashamed to confess, that the facts observed are beyond our explanation. To observe without being biassed by preconceived theory—to describe accurately, so that others may reap the legitimate fruits of our observation—to advance our opinions with humility when there is so much liability to error—and to deal charitably towards the opinions of others, are duties, without the exercise of which no man can be said to be imbued with the right spirit of geology. It has been nobly said, that "to do justly, to love mercy, and to walk humbly," are the chief requirements of moral duty:—would the same spirit were ever reverently carried into matters of scientific investigation! It was for the want of these qualities that the early course of geology was so much obstructed; it is still for the neglect of their exercise that so much contention prevails, and that humble honest truth is so often overridden by bold-faced ignorance and dogmatism. Guided by this spirit, and exercising it within her own proper field, a glorious future lies before geology—that future being nothing short of a perfect history of our planet.....Let us take care, lest by presumptuous generalisation, by illiberality to the opinions of others, by the want of moral courage to avow the truth as it appears to us, or by giving way to unworthy prejudices, we should do aught to retard such a devoutly-to-be-wished-for consummation.

THE CORNHILL MAGAZINE. October. Smith, Elder, and Co.
MACMILLAN'S MAGAZINE. October. Macmillan.
TEMPLE BAR. October. Temple Bar Office.
THE SIXPENNY MAGAZINE. No. 4. Ward and Lock.
THE ST JAMES'S MAGAZINE. October. W. Kent and Co.

THE "Cornhill" is up to the mark this month. There are several papers of interest besides the regular instalments of Mr Thackeray and Mrs Stowe. The former is considerably more genial and amusing than he has been of late. In the present number the uproarious old Peer is carried off by gout in the stomach, and Philip stranded without a shilling. There is an interesting account of the Herring Fishery. Some fears are expressed in it that we may exhaust our supply of herrings as well as of salmon by over-fishing, but these we hope are groundless. The value of one season's fishing is estimated at the enormous sum of two millions sterling. A paper "On Physiognomy," endeavouring to account for the little progress that this science (if it may be so called) has made, is worth reading, though we differ from the writer of the article in thinking that it can ever, properly speaking, be resolved into a *science*. There are too many vague and arbitrary elements in the study of the human face, expression, and form, for any definite rules to be laid down for certain effects from particular appearances, even allowing for what is called *temperament;* but that there is much to make Physiognomy interesting and useful as a study, we are far from denying. One remark of the writer's we must demur to: he is quoting Fuseli, who says: "Let the twelfth part of an inch be added to, or taken from, the space between the nose and the upper lip of the Apollo, and the god is lost." This is true, but the remark on it is: "That *is* too strong a way of putting it. The god remains in the Greek marbles even when his nose is broken off." True; but in the latter case we *imagine* the purely Greek feature,—as Fuseli put it, the whole cast of the countenance, would be altered. Mary Howitt has a poem of some beauty and merit, entitled "Barbara Fleming's Fidelity." The Seventh Bird's-eye View of Society, "The Picture Sale," is clever and observant of human peculiarities as usual. "The Struggles of Brown, Jones, and Robinson," is an amusing extravaganza verging on the vulgar. Nothing has yet appeared adequately to supply the place of "Framley Parsonage."

In "Macmillan," Mr Patmore inaugurates a new poem, or rather takes up the thread of his two previous poems. The title of the present one is "The Victories of Love." The purport of it will be intelligible only to those who have read "The Angel in the House," and "Faithful for Ever." The real beauty and pathos of Mr Patmore's poetry is to us much alloyed by the occasional affectations of the diction, and a too intimate handling of the domestic affections, which sometimes revolts our taste. We cannot but wonder at this in one who possesses, as Mr Patmore undoubtedly does, so much real poetic insight and refinement of mind. "Ravenshoe," by Henry Kingsley, has as much *verve* as ever: there is a curious charm of originality and audacity in this story, which we must confess fascinates us more than perhaps its intrinsic merit seems to warrant. There is an interesting paper by Mr Hughes on the disputes between masters and men. Of course he represents the workmen's side of the question, though in no narrow or prejudiced spirit. The least disputable element in his view will be gathered from the following short extract:—"There are trades in which there has been no strike within the memory of the present generation. There are many firms, in trades where strikes have been frequent, where no such thing has ever been heard of. Wherever this is the case, it will be found that it is because the reality of the partnership has been recognised and acted upon, and the men have been made to feel that their interests and those of their masters were the same. But when the spokesmen of deputations are dismissed and become marked men, and masters refuse to give any answers, and every advance of wages or other privilege has to be wrung out of them by strikes or threats of strikes, then you will never get the men to believe that their interests are the same as those of their masters, or that there is any partnership between them." The article on the "American Union" is written in a spirit of stronger sympathy with the North than we have adopted in these columns. It is written by an American, and is an able exposition of the Northern view.

"Temple Bar" has for its chief attraction, as usual, the highly-seasoned chapters of "The Seven Sons of Mammon." There is much digressional padding about the race-course at Epsom, but the capture of the wicked little Mrs Armytage is happily accomplished, and Sir Jasper Goldthorpe is bankrupt. The mystery of Hoogendracht and Bellereport still has to be unveiled. Mr Sala will then, we presume, point his moral and adorn his tale with any tag-rag ends of virtue and goodness that may remain, amidst such a portentous assemblage of wickedness and folly as he has accumulated. We have scarcely left ourselves room to notice more than very slightly the remaining contents of this number. "Thomas Gray and the Literature of the Eighteenth Century," is an agreeable piece of literary gossip. A paper on the "Pre-Adamite World," and one on "Precious Stones," form the more solid basis of this number, in which is erected a superstructure of light and ephemeral tales, more or less clever.

The "Sixpenny Magazine" has, as usual, some comical and clever little illustrations of About's tale. For the rest, it contains nothing remarkable.

This is a better number than usual of the "St James's Magazine." It contains a good deal of instructive and entertaining matter, with less than the normal amount of actual rubbish. "Isabella Carr," a Scottish story, by the author of "Margaret Maitland," opens well, and promises both originality and power. "Cousin Julian," and an "Adventure in the Hoyle;" a retrospect of the "Hanover Square Rooms," and an exposition of "Clays and their Uses" by Professor Ansted, are all articles worth reading, either from their subject, or the way in which they are written. Nor must we forget to mention a useful chapter about the new Metropolitan Railroads, "London's Iron Belt."

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The Bank of France the day before yesterday made a new increase in its rate of discount, so that the rate now stands at the high figure of 6 per cent. This was necessary in consequence of the demands for specie, to pay for purchases of grain, having increased rather than diminished: the large sum of 49,000,000f or 50,000,000f has in fact, it appears, been taken from the Bank in the space of the last fortnight. And not content with increasing the discount, the Bank has decided that, instead of making advances in the proportion of 80 per cent. of the value on the deposit of securities for *rente*, it will only do so to the amount of 60; also, that instead of lending 60 per cent. on railway shares and bonds, it will only advance 40. These measures show how heavy the drain on the Bank is. They have the effect—accompanied as of course they are by a severer control than ever of the paper presented for discount—of producing most serious inconvenience to the whole commercial world, and of placing not a few firms in a critical position. In the opinion of many persons of authority, they indicate, too, that the commercial crisis which has been long foreseen in this country, owing to the scarcity of the harvest, the ter-

rible falling off in trade caused by the civil war in America, the exaggerated building speculations in Paris, and other causes of minor importance,—they are considered to indicate, I say, *that* the crisis has commenced, and that the belief of those best able to form a judgment on the matter, is that it will be extremely serious. Already, indeed, are a considerable portion of the silkweavers of Lyons out of work, and the Municipality has to grant funds for establishing *ateliers* to relieve them,—a disguised way of giving them charity; whilst the high price of cotton must needs produce a certain degree of stagnation at Rouen, Lyons, Mulhouse, and other manufacturing towns. Already, too, have failures in Paris become almost alarmingly numerous: from a table which I have prepared, it appears that whilst in July, August, and September, 1860, the number of them was 279, they have in the same months of the present year (even though the return for September is incomplete) amounted to 381. In the failures of last year there were 2 bankers and 13 builders; in those of this year, 4 bankers and 34 builders.

The effect produced on the Bourse by the measures of the Bank has of course been very depressing, though to-day there has been a slight reaction:—

The general expectation was, that the 1st October, the day fixed in the English and Belgian treaties for the removal of prohibitions, would lead to a large import, or, to use the favourite French expression, an "inundation" of English and Belgian manufactured goods. But from a statement which the Government has had published, it appears that only "a certain quantity" of such goods arrived in the bonding warehouses of the Customs in the fortnight preceding the 1st, and that, though the Customs authorities afforded every facility to the importers in the payment of the duties, so as to have them taken out of bond by the 1st, the total amount of duty received was little more than 400,000f (16,000*l*), and the declared value of the goods only 3,800,000f (152,000*l*). This is certainly not much; but it is perhaps not inferior to what was reasonably to be expected as a beginning, seeing that the goods, in addition to freights, carriage, and incidental expenses, had to pay the very respectable protecting duties of 15, 20, or even 25 per cent. I observe with regret that one or two newspapers have published articles representing that the English and Belgians will take advantage of the new tariffs to send to France all the stale, inferior, or damaged goods which they have in vain attempted to sell in their own markets; and I hear that retailers are trying to palm off on the public articles as English which are not so, or are charging more for really English articles than they ought to do. But their efforts to create prejudice against English wares will have no permanent success, especially if English importers take the measures they ought to do to prevent the public from being deceived.

In the *Moniteur* of yesterday appeared an Imperial decree which is of interest to importers of goods into France under the English and Belgian treaties:—

Art. 1. The ports of Marseilles, Bordeaux, Nantes, Rouen, Havre, Dieppe, Boulogne, Calais, Dunkirk, and the custom houses of Turcoing, Roubaix, Lille, Valenciennes, Mulhouse, and Lyons, are open to the importation of cotton and woollen yarn of all kinds of English and Belgian origin.

Art. 2. The articles hereafter mentioned of English and Belgian origin or manufacture can only be imported by land or by sea by the custom houses opened to imports, namely:—Merchandise taxed at more than 20f per 100 kilogrammes; carriages, playing cards, chicory, cutlery; articles in skin or leather, and in horse or cow hair, pure or mixed; chemical productions and ordinary soap; glass and crystal, window glass, coloured glass polished or engraved, watch and optical glasses, and other articles of glass not specially designated; machinery; sea-going vessels, hulls of *ditto, boats*; woollen yarn, yarn of alpaca, lama, and vicuna, camels' hair.

Art. 3. Yarn and fabrics of cotton, yarn of wool, alpaca, lama, and vicuna, of camels' hair, can only be imported, whether by sea or land, in parcels containing fabrics or yarn of the same kind.

It may be well to note that, though the large imports of grain which have lately been made into France were of course owing principally to the deficit in the harvest, some portion of them must be ascribed to the fact that the law of the 18th of June last maintained an Imperial decree of the 22nd of August, 1860, by which grain and pulse imported or taken on board in the exporting ports up to the 30th of September, 1861, were allowed to enter France on the payment of only 25c the hectolitre, whether brought in by French or foreign vessels.

The monthly Customs returns have appeared, but a few days later than usual. The import duties for the month of August last amounted to 10,258,000f, in the corresponding month of last year they were 10,126,000f, and in that of 1859, 14,294,000f. For the first eight months of the present year they were 76,090,000f, same period of last year 89,513,000f, and of the year before 127,056,000f. Considering the abolitions and reductions of duties which have been effected, these results must be considered satisfactory. Still more satisfactory is the result if the *quantities* of merchandise brought in be noted. From the table below it will be seen that the imports in the first eight months of the present year, compared with the corresponding periods of the last two years, were much larger in all the principal articles of consumption,—cocoa, coffee, foreign sugar, cotton, wool, pig iron, coal, &c. As to exports, the result is not so favourable. It will be observed that in the subjoined tables the imports and exports of grain and flour, which, for some inexplicable reason, and to the great inconvenience of commerce, were omitted from the returns of the last two or three months, are given:—

The following were the principal imports for consumption in France:—

	Eight months of 1861	Eight months of 1860.	Eight months of 1859.
Oxen and sheep ..... head	434897	330601	280410

Subjoined is an account of the markets:—

FLOUR.—Prices at *Paris* are lower: yesterday they were 91f to 92f the sack of 159 kilogs, and the demand was not active. Four marks were 88f 25c for the current month, and 88f for November and more distant periods.

WHEAT, at *Paris*, has undergone a decline. In native, yesterday, transactions were almost null, and quotations were from 45f to 48f and 50f the sack of 120 kilogs. In foreign, English was 47f to 49f, and even 50f; California was offered at 47f to 48f, but no sales were made; Dantzic new was 45f 50c to 46f; old was offered at 45f, but there were no buyers; and Hungarian, offered at 45f 50c and 46f, was not taken. As to the provincial markets, 13 present a rise of from 10c to to 1f 50c the hectolitre, 109 a fall of from 11c to 2f 50c; 3 are reported firm, 22 without variation, 9 calm.

COTTON.—At *Havre*, in the week ending Friday, business was very animated, and prices continued to rise considerably. The sales were 37,572 bales to 768 arrivals. The closing prices were 8f higher for the very low qualities, 9f to 10f for low, very ordinary, ordinary, and good ordinary, and 9f for other sorts. Consequently very low New Orleans was at 127f the 50 kilogs; low ditto, 136f, and very ordinary ditto, 141f. The stock on Friday was 192,560 bales, against 168,358 at the same date in 1860, and 70,650 in 1859. This week, during the first two days, the sales did not reach 700 bales. Yesterday, the sales were only 198 bales; prices unchanged.

COFFEE.—At *Havre*, last week, business was dull. The sales were 2,000 sacks Rio, not washed, disposable, at 70f to 77f the 50 kilogs in bond; 1,550 ditto, for delivery, 75f to 77f 50c; 231 Java disposable, 118f duty paid; 1,700 Macassar, 109f; 526 Malabar, for delivery, 111f; 280 Mysore, 114f; 26 casks Ceylon plantation, 110f to 122f. The arrivals were about 2,200 bales. This week, Santos has been at 78f 50c; Rio at 74f; Hayti, 82f 50c; Cape, 84f 50c. At *Nantes*, last week, the sales consisted only of 500 sacks Hayti, for delivery, at 82f for Port-au-Prince, and 84f for Gonaives; 652 Java damaged were also disposed of at 110f to 118f 25c. This week, no business has been done. At *Bordeaux*, last week, the sales were 100 casks Malabar, at 115f; 570 Salem, for delivery, at 125f: by auction, 631 Mysore damaged were disposed of. This week, Santiago has been at 104f. At *Marseilles*, last week, 250 Rio went at 72f; 1,500 Rio, superior, 75f; 1,500 Rio, 70f; 500 ditto, 72f; 2,000 Rio in bond went at 65f to 75f. This week, Rio has been at 70f.

SUGAR.—At *Havre*, in the week ending Friday, business was not animated, without however any appreciable variation in prices. The sales were 234 casks French West India "usine," at 51f to 53f 50c the 50 kilogs duty paid; 200 bales Reunion, 45f; 243 casks and 116 sacks Trinidad, 45f 50c, duty paid; 118 casks Porto Rico, 45f; 248 Cuba, 45f; 1,400 Havana, 34f in bond. By auction, the sales consisted of 1,213 Havana damaged, and 592 Pernambuco. The arrivals were only 460 casks. This week, French West India has been at 46f, and "usine," 53f 50c; Trinidad, 46f 50c; Havana, 34f. Some lots of Havana damaged were sold by auction. At *Nantes*, in the week ending Friday, the sales consisted of 1,200 casks French West India for delivery, prices not stated; 100 usine, 51f 50c; 300 sacks Reunion, 54f 50c; 859 Havana, 53f. This week, Reunion has been at 50f; French West India from 46f 50c to 51f. At *Bordeaux*, in the week ending Friday, the sales were 200 casks French West India, 46f; 227 ditto, 46f 50c; and 100 ditto, 49f; 200 bales Rennion, 57f; 800 ditto, 46f 50c; 1,556 Santiago, 45f 50c. This week, French West India usine has been at 54f 50c. At *Marseilles*, last week, transactions in foreign were rather important, and prices advanced. This week, Havana has been 34f.

INDIGO.—At *Havre*, in the week ending Friday, business consisted only in the sale of 31 chests Bengal, part at 2f 50c above the estimates, and the surplus at prices kept secret. The arrivals were only 27 chests. This week, the sales have been 18 chests; prices firm. At *Bordeaux*, last week, prices very firm, and the sales were 19 chests Kurpah, 3 Madras, 58 Bengal. This week, the sales were 12 Madras, and 3 Bengal; prices not stated.

HIDES.—At *Havre*, in the week ending Friday, business was animated and prices firm. The sales were 3,430 La Plata dry, at 106f to 110f the 50 kilogs; 3,250 ditto, salted saladeros, 67f for cow and 70f for ox; 250 Bahia dry salted, 83f; 672 Lima ditto, 72f; 300 Valparaiso salted cow, 59f; 395 New York salted, 42f; 1,894 horse La Plata salted disposable, 84f the 100 kilogs; 5,000 ditto for delivery, 84f; 100 bales cow Calcutta, 80f to 90f the 50 kilogs. The arrivals were above 37,800. This week, Monte Video salted saladeros has been at 71f for ox, and 67f for cow; Buenos Ayres, 51f to 52f 50c; Pernambuco, 83f; New York salted, 46f for cow and 47f for ox.

WOOL.—At *Havre*, last week, business was somewhat animated. The sales were 10 bales Russia washed, 7f 50c the kilog; 10 ditto Donskoi, 2f 2½c; 160 ditto, 1f 98c in bond. The arrivals were 100 bales wool, and 16 ditto in sheepskins. This week, Buenos Ayres' washed has been at 2f 57½c; Buenos Ayres, not washed, was at 1f 40c.

TALLOW.—At *Havre*, last week, the sales consisted of only 50 casks New York, at 61f 50c the 50 kilogs, and the arrivals were 100 casks. This week, no business. At *Paris*, yesterday, the 100 kilogs were at 120f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was at 91f to 92f the hectolitre; Montpellier, disposable, of 86 deg., at 115f. At *Bordeaux*, the day before yesterday, Languedoc was at 110f, and beetroot at 93f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed commercial report is dated Calcutta, Aug. 22:—Produce Market—Holders in this market have been giving in to a slight decline upon previous rates, and freights also have slightly given way. Purchasers in consequence have been more active, and a fair amount of business has been done in some of the weightier staples. Import Market—The fortnight which has elapsed since our last detailed account has been marked by no improvement in any kind of cotton manufactures, and the business that has been done has been, in some instances, at lower rates than those previously ruling. What is usually our best season for sales is passing away without any active demand, and it is much to be feared that the supplies on the way from England will prove in excess of our requirements, while stocks here are rapidly accumulating from recent heavy arrivals. Exports—Sugar—A limited business has been transacted in white vacuum pan for Bombay and the Gulf at previous rates. Yellow kinds are neglected, but a considerable quantity of Benares sugar of all descriptions has been moved off at an advance of six to eight annas per maund. Jute—The inquiry for this staple continues limited, and prices are, if anything, looking down. Opium—There is a tolerable steady demand for this staple at 1,557 rs for Patna and 1,590 rs for Benares.

The following report is from Jamaica to Sept. 7:—There is no visible activity yet in our market to report. Commerce appears at a standstill, and although the last steamer from New York did not bring a very large supply, yet so restricted is the demand, that even this limited supply has had a depressing influence on the market. Coffee is very scarce. 43s to 44s for good ordinary, and 50s for mountain, continue to be the ruling rates. Freights are dull, no produce offering. Logwood—36s to 38s has been paid, free on board, at Black River and at Say-la-Mar. Pimento—12s 6d per 100 lbs is still being demanded for the coming crop, which is reported to be very limited. Rum—The sales have been 2s 6d to 2s 8d per gallon for proof 18 in bond. Latter price for choice lots. Sugar—Sales 16s to 18s, according to quality. The supply is not large. Exchanges—On London: Colonial and Jamaica Banks, 90 days ½, 60 days 1, and 30 days 1½ per cent. premium.

From Pernambuco, the annexed intelligence has come to hand:—Some supplies of new sugar have come in, but the roads are still in a very bad state, owing to the unsettled weather, and the entries have been insignificant. Transactions have been small. Channel muscovadoes are quoted 1,960 rs to 2,000 rs per arroba, or 16s 6d to 16s 11d per cwt f.o.b. ex freight. Clayed, 2,100 to 2,200, or 17s 8d to 18s 5d per cwt; whites, 2,560 to 4,000 per arroba, or 22s 4d to 32s 6d per cwt. Cottons have been eagerly bought up, and a considerable advance has taken place in prices. First quality Pernams have been bought to-day at 10,000 rs per arroba on shore, equal to 8 15-16d per lb on board, exclusive of freight; and the usual assortments of Paraibas (one-fourth second quality), at 10,500 rs per arroba on board, or 8 7-16d per lb. No sales of Maceio, and holders ask 10,500 to 11,000 per arroba on board. Very little improvement in the import trade. The demand for dry goods has somewhat improved, and prices of staple goods are firmer.

We have received the annexed intelligence from Rio, dated Sept. 7:—After the departure of our last of 24th ultimo, the coffee market relapsed into a state of apathy, and towards the end of the past month dealers, although anxious to effect sales on easier terms, did not succeed in promoting activity, transactions being limited to about 12,000 bags up to the 31st ult., making a total of 97,000 bags during August, of which 16,000 bags for the United States, 60,000 for the North of Europe, 5,000 for the Mediterranean, 6,000 for the Cape of Good Hope. Supplies of new crop have somewhat increased, but the demand being limited almost exclusively to good coffees, the market continues to exhibit a poor selection, and the bulk of the stock of 200,000 bags consists in common qualities. Dealers are very firm at the following quotations for the better descriptions, while the lower grades may be considered nominal:—Ordinary quality, 36s 1d to 39s 11d; regular firsts, 44s 6d to 46s; good first, 47s 6d to 48s 3d; prime good first and superior, 49s to 51s 3d; round lots, 43s 9d to 46s; the better selections, 47s 6d to 49s per cwt, free on board, without freight, exchange at 24½d.

An account of the importations and exportations of bullion and specie registered in the week ended 2nd October, 1861:—

Gold imported into the United Kingdom.

Countries from which imported.	Coin.	Bullion.	Total.

MARKETS IN THE MANUFACTURING DISTRICTS.

Notwithstanding that there has been much less activity in the markets held in the manufacturing districts than in the previous week, prices almost generally have been well supported. The stocks of goods continue only moderate. In the iron trade, a fair amount of business has been passing at about previous rates, and coals have commanded extreme quotations.

MANCHESTER, Oct. 3.—After the active speculations of last week there has been a pause, and some sellers who had then risen too quickly to effect sales are now less extreme in their quotations, whilst others who had then been selling are now holders for the full advance. Yarns are quoted ½d to ¼d per lb higher, and the amount of engagements running, along with the restricted production, render prices exceedingly stiff against the manufacturer. Goods of most descriptions are either inanimate and neglected, or else are held largely both in first and second hands, at rates considerably above the views of the regular trader, whilst the speculator has done sufficient for the moment, and seems waiting for a possible relapse to come in and force up prices again. Accounts from Calcutta to 11th Sept. report yarns ¼d per lb better, and cloths no better in price, but readily saleable and selling freely, which, with similar accounts from our other markets, but tend to increase the caution of merchants, who cannot now hope to replace their stocks by cheaper purchases here.

BRADFORD.—The wool market has the appearance at least of great quietness. Nevertheless, a fair quantity of wool has been bought, only to supply the immediate wants of consumers. Prices of all sorts are firm, and for Lincoln wools very firm. Long wools are unusually difficult to buy, and Down wools equally difficult to sell. The price quoted for Lincoln hogs and wethers is 19*l* 15s and 17*l* 15s respectively. There is a very flat market for yarns, and neither cotton nor worsted yarns go off at all freely. The demand for fancy goods still continues, and some orders for quick delivery have been given out; otherwise the market remains inactive.

LEEDS.—Goods in general continue to be bought in small parcels, and chiefly fabrics, both plain and fancy, of a heavy character for winter wear. Prices remain pretty firm, those of cloth as well as wool. Some of the manufacturers in the township of Leeds, as well as others in the outlying villages, are rather worse employed than they were a month ago, and they are checking their rate of production so as to keep it near the amount of demand.

ROCHDALE.—The flannel trade keeps very quiet. The demand is below an average for the season for both the home and the foreign trade. There is no material change in prices, those of wool and flannel keeping up alike, although, as already stated, the trade is slack. There is no improvement in the demand for Yorkshire goods.

LEICESTER.—The demand for most classes of hosiery goods continues steady, and a tolerable business has been done in the warehouses. Some foreign orders are in course of execution, and there is a fair demand for articles for the home trade, but not equal to an average. Worsted spinners continue well engaged; and material is in fair request. The wool market remains firm, and prices are fully equal to recent quotations.

NOTTINGHAM.—The demand for black silk laces remains good, and plain nets are in fair request, but the prices offered are still very low. Upon the whole, business, although dull, is more healthy, and stocks on hand are very light. Both the home and shipping trades are quiet, the buyers who have recently been in the market having purchased only in small quantities. There is a fair amount of business doing in hosiery; the home trade is more active, and rather more is doing for export. Yarns hold high in price, and have an upward tendency.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates.

The cotton market has been much quieter this week than previously. On one or two days some slightly irregular business was done, though to no great extent: On the whole prices have not varied greatly, but, except in the better qualities, are no higher than last week's quotations in American. Egyptians have been decidedly dearer in the mediums and better grades. Our quo-

tations are raised fully ½d per lb. Brazil are also ½d per lb higher. East India are without alteration, but still in demand "to arrive" by speculators. The sales to-day are 10,000 bales. The reported export amounts to 8,310 bales, consisting of 3,380 American, 330 Brazil, and 4,600 East India.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 21.—The demand for State and Western flour was tolerably active on Wednesday, but an advance of 5 to 10 per cents per bbl demanded by holders tended to restrict operations. Yesterday, there prevailed an active inquiry for State flour and shipping grades of Western, which sold freely, both for the local trade and for export, at prices showing an advance since our last of from 15 to 30 cents per bbl, the transactions being heavy at the improvement. Canada flour is also firmer, with sales to the extent of 2,600 bbls, including 650 yesterday, at 4.90 dols to 6.50 dols. With a fair demand of Southern flour, holders are rather firmer, though prices are generally unchanged.

EXPORT from 1st to 17th September.

	1861. barrels	1860. barrels
Wheat Flour	88,481	138,635

The wheat market has been greatly inspirited by the very favourable advices from Europe. The receipts have been light, and the supply being small, a portion of the sales have been to arrive. Transactions since Tuesday foot up 670,000 bushels, of which 131,000 changed owners yesterday, including 67,500 winter red Western at 1.23 dol to 1.28 dol; 18,400 white Ohio, Illinois, and Indiana, 1.28 dol to 1.35 dol; 9,500 white Kentucky, 1.30 dol to 1.40 dol; 13,400 amber Iowa, 1.16 dol; 1,000 common red Kentucky, 1.20 dol; and 1,000 ditto red Delaware, 1.25 dol. The market at the close was irregular and unsettled. There has prevailed a very active demand for corn, and prices have greatly enhanced; we note sales for the three days of 300,000 bushels, including 120,000 yesterday, the market closing steady at 56 to 58 cents for Western mixed, 50 to 55 for unsound, 60 to 70 for white Southern, 57 to 59 for yellow ditto, 56 to 58 for mixed ditto, 57 to 59 for round yellow, and 62 to 68 for ditto white.

EXPORT from 1st to 17th September.

Corn	561,671	129,627

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only moderate supplies of home-grown wheat have been on offer this week, the demand for all kinds, owing to a sudden falling off in the inquiry for France, has ruled heavy, at a further decline in the quotations of from 1s to, in some instances, 3s per quarter. Foreign wheat has commanded very little attention, and the currencies have given way quite 1s per quarter. The receipts of barley having increased, sales have progressed slowly, on rather lower terms. Malt, however, has realised full prices. Good sound oats have been in fair request, but low and damp parcels have declined 6d to 1s per quarter. Beans and peas have sold at former rates; but the value of flour has ruled the turn in favour of buyers.

The following table shows the extent of the arrivals of grain, &c., into London during the third quarter of the present year, compared with the same period in 1860 and 1859:—

	Wheat. qrs	Barley. qrs	Oats. qrs	Beans. qrs	Peas. qrs	Flour. sacks	Flour. brls
English	88,520	10,794	34,555	4,524	3,735	151,335	...
Scotch	56	146	2,775	...	48	7	...
Irish	...	...	5,362	...	...	...	...
Foreign	365,907	39,903	432,190	24,595	31,033	10,922	314,514
Total	454,483	50,843	475,382	29,119	34,816	162,264	314,514
Total 1860	523,240	140,588	749,878	33,972	33,283	248,322	179,243
Total 1859	244,071	63,063	665,021	14,706	13,574	140,241	2,051

Advices from New York bring prices above the views of buyers in this country. The shipments to England are, therefore, only moderate; but those to France have increased to some extent. On the Continent, produce generally has sold heavily, and the quotations have had a drooping tendency.

The new wheats still continue to appear in excellent condition, and the yield of all spring crops, especially of barley and oats, is unusually large.

Letters from Scotland state that the harvest has turned out much better than was at one time anticipated. The quality of the wheat and barley, however, is by no means so fine as last season. The grain trade has been in a most inactive state, and prices have had a drooping tendency.

In Ireland, there has been a fair, but by no means active, demand for oats and maize; but nearly all other kinds of produce have changed hands slowly, on rather easier terms.

At Mark lane, to-day, the show of English wheat was only moderate; yet the demand for both red and white qualities ruled inactive, at Monday's decline in the quotations. In foreign wheat, sales progressed slowly, at late rates. Barley was dull, at drooping currencies, and for inferior oats rather less money was accepted. Beans and peas realised former prices, with a moderate, though by no means active, demand. Flour moved off slowly, and, in some instances, the quotations were the turn easier.

The following observations are from Messrs Sturge's monthly circular:—We have had another month of splendid weather, which has enabled our farmers to harvest in the finest possible order the remainder of their corn crops, with the exception of a few beans still in the fields, and in late districts a little wheat; yet the French demand in the early part of the month caused a further rise of 3s to 4s per quarter. During the last week or two, however, this has considerably lessened, and prices have somewhat receded again. From the extent of the French purchases and the large proportion for future delivery, it is very difficult to estimate the total quantity contracted for. As the new crop in France is only just harvested, and therefore still nearly all on hand, this demand must be mainly speculative, founded on anticipations of great future requirements, and not on any present scarcity. We are assured that the excitement has been so great all over the country that with few exceptions every miller and dealer, large or small, has speculated in wheat to some extent or other, and in most cases as far as means and credit will allow. It is said that the advance in the rate of discount to 6 per cent. by the Bank of France is made in the hope of checking this speculative spirit. However great the deficiency, these enormous purchases must be quite sufficient, if not unnecessarily large, to provide for the wants of the country up to the next harvest; and some of the latest market reports inform us that there is "no sale for wheat." As might be expected from the rainy weather at the time when the wheat plant was in blossom, the most critical period of its growth, the yield all over Great Britain proves very deficient, even allowing for the thinness of the crop; but as nearly all the grain is fine and very heavy, this will afford some compensation to the growers. Although the stocks of foreign wheat in the ports are still heavy (notwithstanding the reshipments to France), we think we shall require large importations before next harvest: these, we believe, our present prices are sufficiently high to command. As our farmers are now generally in a position to hold their corn, the quantity being short and the quality very fine, we do not think they will bring much to market at any material reduction from the rates at which the season has opened. The last advices from the United States report less favourably as to yield, but quality and condition are excellent, and the samples we have seen are certainly better than those of last year's crops. From Canada reports are not quite so favourable as a month back. The produce of the crop in the South of Russia, and also the Danubian Provinces, will be large, but not of fine quality, having been injured by wet weather.

The following is Mr E. Rainford's report of the floating trade:—There have been 35 arrivals of grain-laden vessels reported at ports of call since the 26th ult. to last night, consisting of 9 cargoes of wheat, 19 maize, and 7 miscellaneous, viz.:—Wheat, 2 cargoes from New York, 1 Philadelphia, 1 Marianople, 2 Taganrog, 1 Odessa, 1 Berdianski, 1 Sulina; maize, 7 Sulina, 2 New York, 1 Mazagan, 3 Ibraila, 2 Constantinople, 2 Odessa, 2 Galatz; barley, 3 Alexandria, 1 Ibraila; beans, 1 Saffi, 2 Alexandria. A considerable number of these were sold before arrival. The continental demand having ceased, there is a slight tendency downward in the prices of foreign wheat, and less doing. Maize is moving upward.

The London averages announced this day are:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 2nd day of October, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,010,520	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,360,520
		Silver Bullion	..
	28,010,520		28,010,520

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,733,123
Rest	3,869,537	Other Securities	17,717,494
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,909,918	Notes	6,922,565
		Gold and Silver Coin	764,106
Other Deposits	12,115,942		
Seven Day and other Bills	748,891		
	36,187,288		36,187,280

Dated the 3rd October, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,836,846	Securities	28,547,617
Public Deposits	4,909,918	Coin and Bullion	14,124,626
Private Deposits	12,115,942		
	38,862,706		42,672,243

The balance of Assets above Liabilities being 3,809,537*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£1,171,798
A DECREASE of Public Deposits of	900,506
An INCREASE of Other Deposits of	158,134
An INCREASE of Government Securities of	282,323
An INCREASE of Other Securities of	278,235
A DECREASE of Bullion of	117,615
An INCREASE of Rest of	13,517
A DECREASE of Reserve of	231,990

The above account shows the usual changes consequent upon the termination of the quarter. The decrease in the public deposits is due to the large disbursements for Government salaries, and, with the increase in the other securities, chiefly makes up the diminution in the reserve. Notwithstanding the influx of gold from the Continent and elsewhere, a decrease is shown in the bullion, owing to the withdrawals of coin customary at this period of the year. The Bank appear to be making further purchases of Government stocks, in the absence of any material demand for money for commercial purposes.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	20,707,351	21,635,717	23 021,406	22,756,607	21,836,846

In the corresponding week of 1851, attention was being directed to the forthcoming American cotton crop. Intelligence had been received of the satisfactory landing in complete order of the Submarine Telegraph at a point near Calais. Kossuth and his co-exiles had embarked at Marseilles, on board an American vessel, for England, the French Government not allowing them to pass through France. A concordat had just been concluded by Spain with the Holy See. The terms had been definitively arranged for the continuance of the commercial treaty between Belgium and the Zollverein. The advices from Canada stated that gold-seeking was being conducted in the colony, but without success. The great American novelist, Fenimore Cooper, had just died. A Swedish 4 per cent. loan had been introduced on the London Stock Exchange.

In 1858, French ships of war had been sent to make a demonstration in the Tagus. The Bank of Vienna were collecting large quantities of silver with a view to the resumption of specie payments; and the rate of discount at Hamburg had consequently risen to 5 per cent. The Bank of England held 19½ millions of bullion, and were expected to lower their rate of discount from 3 to 2½ per cent. The subscription list for the second issue of 2,000,000*l* of Messrs Dent, Palmer, and Co.'s Turkish loan of 5,000,000*l* closed on the 8th, when it transpired that 1,280,000*l* had been taken, making 4,280,000*l* in all. Notwithstanding this new issue, the Turkish 6 per Cent. loan of 1854 was supported at 97½. The official particulars of the new Lombardo-Venetian Railway concession had transpired. The new shares were quoted 4½ premium, and the old 5½. A great sensation had been excited in Scotland by the announcement of another call of 100*l* per share on the unfortunate proprietors of the Western Bank.

In 1859, money was very abundant. The Bank rate was 2½ per cent., and in the discount market the terms were generally a shade under. The bullion at the Bank had increased within five weeks by 1,082,836*l*. The rate for money in the Stock Exchange was 2 per cent. from day to day, and little more than 1½ per cent. from account to account.

In 1860, the official despatch had been received of the capitulation of Ancona to the Sardinian troops, and of the surrender of General Lamoricière and his army as prisoners of war. The Pope had pronounced an allocution, protesting against the invasion of the Papal provinces by the Italian forces. A manifesto of Mazzini had also been published. The accounts from Canada described great enthusiasm to be attending the progress of the Prince of Wales. The New York press contained accounts of the execution of the Filibuster Walker. At home there were no events of importance, but great sensation had been caused by the mysterious child murder at Road.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 6,067,068*l*; in 1858, a deficiency of 3,207,142*l*; in 1859, a deficiency of 6,520,918*l*; and in 1860, a deficiency of 7,938,662*l*. In 1861, the deficiency is 5,601,552*l*.

DISCOUNT AND MONEY MARKET.—There has been an increased demand for money this week, owing to the preparations for to-day, the 4th of the month. As usual at the termination of the quarter, the proportion of commercial bills to be met is larger than on ordinary occasions, but notwithstanding this circumstance, there has been an entire absence of pressure. In the open market, the rate for the best bills has been only 3¼ per cent., and in exceptional cases business has been done below those terms. At the Bank there have been fewer applications for discount than in average years. The impression, however, appears to gain ground that for some time, at least, money will not fall below its present value.

On the Stock Exchange there is a good supply of money, and the current rate for loans on Government securities is 2½ to 3 per cent.

The Bank of France on Tuesday again raised their rate of discount from 5½ per cent., at which it was fixed last week, to 6 per cent. It was generally understood that this movement was certain, and it is considered that a further rise will be necessary. The drain upon the resources of the national establishment appears to have been larger than had been originally believed, and the publication of the next monthly account is consequently looked for with much interest. Meanwhile the Bank have been strengthening their position by borrowing about a million sterling on Government stock, a perfectly novel operation in Paris, which has occasioned considerable confusion at the last settlement on the Bourse. A report was generally circulated that a loan of 2,000,000*l* was contemplated from the Bank of England, but there seems no ground for the rumour.

The following are the rates of discount in the principal cities of the Continent, showing a rise not only in Paris, but also in Turin :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	6	6
Vienna	6	5
Berlin	4	3
Frankfort	3	2⅞
Amsterdam	3	3
Turin	6½	6½
Brussels	4	3½
Hamburg	...	2½
St Petersburg	7	...

ENGLISH FUNDS.—There were again some rather considerable sales of Consols for money in the earlier part of the week, which, together with the failure under unfavourable circumstances of a speculator for the rise, caused a fall on Tuesday to 92½ to ⅝. A reaction, however, then occurred, and a gradual rise took place to 92⅞ to 93. For the new account in November, the last quotation was 93⅛ to ¼. Speculative purchases appear to be the chief cause of the recovery, the floating supply of stock on the market remaining undiminished. Little attention has again been paid to political events, the only external question of importance receiving for the moment much consideration being that of the cotton supply.

Owing to the comparative abundance of capital on the Stock Exchange, Exchequer bills have slightly improved, the final quotations of the June issue being par to 3s premium, and of the March, 6s to 9s premium. India bonds are also higher, at 11s to 15s premium.

India Five per Cents. have shown renewed heaviness, and were at one time pressed for sale as low as 102⅞. From this point, however, the price has recovered to 103¼ to ½.

FOREIGN STOCKS.—The principal movement in the foreign market this week has been a heavy fall in Buenos Ayres bonds, on the announcement that the negotiations for peace between that province and the national Government have been broken off. The cause of the rupture is stated to be a difference respecting the public armament of Buenos Ayres. The Six per Cent. bonds have receded from 91 to about 84 to 86. Mexican experienced a reaction in the earlier part of the week, partly from sales on the late rise, and partly from some doubts being thrown on the progress of the negotiations for the joint intervention of England, France, and Spain, in the affairs of Mexico. Yesterday, the feeling was more favourable, and a recovery took place which, however, has not been fully supported. Peruvian descriptions are firm. The purchases in the Three per Cents. for the sinking fund, amounting to about 65,000*l*, have been effected at 82 ex div. Spanish and Brazilian stocks have also been more inquired for. The certificates of the confiscated interest on the former debt were higher in the commencement of the week, but no announcement that the Spanish Government are about to award some compensation to their foreign creditors has appeared to warrant this movement. Russian bonds have shown a renewed tendency to droop.

The final price of French Three per Cents. on the Paris Bourse this evening was 68f 30c for the new account, showing a decline compared with last Friday of more than a half per cent. On Tuesday, on the announcement of the rise in the rate of the Bank of France, transactions took place at 68f 10c, and the present quotation is therefore about a quarter per cent. above the lowest point touched in the course of the week.

The annexed communication is from the Committee of Mexican Bondholders :—

The Committee have received advices from Mr Whitehead, dated Mexico, the 29th ult., and from Messrs Viya Brothers, dated Vera Cruz, the 1st inst. The latter send 30,000 dols by this packet for the dividend fund at the Bank of England. Nothing of particular interest to the bondholders had occurred since Mr Whitehead's letter of the 28th of July. The Government tried to raise 400,000 dols per month on the security of the entire proceeds of the custom houses of both coasts, but failed in doing so. It then imposed a contribution of 1 per cent. on capital, which British residents were advised to pay under protest. Diaz had been tried as an accomplice in Miramon's robbery at the British Legation, and had been acquitted. Congress, which adjourned on the 31st of July, was expected to meet again in extraordinary Session on the 30th ult., "for the consideration of grave subjects in connection with foreign relations, military movements, &c." A discussion is going on in the papers about the establishment of a Dictatorship. According to the usual routine in Mexico, it was thought that the time for this change had about come. General Gonzales Ortega had defeated Marques on the 13th ult., about 20 leagues from Mexico, in the direction of Toluca, and had taken the oaths as Judge of the Supreme Court of Justice, in which capacity he is Vice-President of Mexico.

The advices from New Granada brought by the usual mail, postal communication having been now resumed, state that general tranquillity prevailed, and that General Mosquera was quietly consolidating his power. Panama had acknowledged the new Government. Mosquera has revoked all existing consular and diplomatic appointments in accordance with the practice of the United States. The Minister for France, Dr Toro, has arrived by the present mail. Dr Padrilla has been nominated for London, and General Herran, after completing his mission to Antigua, for Washington.

The following advices from Venezuela have just been published. The accession of General Paez to supreme power in that Republic is an event of some importance in South American affairs :—

Sir,—By the mail arrived this day I have received a letter from Venezuela, of which, as it will interest many of your readers, I beg to send you a copy :—

"Caracas, Sept. 7, 1861.

"Sir,—Circumstances of great importance have taken place during the last few days in this Republic. The Government of Dr Gual has ceased to exist since the 29th of last month, and he who subscribes this, proclaimed by the people Civil and Military Chief of this province, exercises the command until the arrival of General Jose Antonio Paez, chosen to be the supreme chief of the Republic. To put you better in possession of the circumstances above referred to, I have the honour to enclose some particulars as they appear in one of the papers of this city.

"My Government, as you see, does not partake of a national character, but I thought it proper, in the interests of the Republic, to make this communication to you.—With sentiments of consideration, I subscribe myself, yours, &c.,

"JOSE ECHEZURIA, Colonel

"September 8.

"General Paez entered the city last night, and it is almost certain that he will accept the command of the Republic.

"Senor F. H. Hemming, Consul for Venezuela in London."

I am happy to be able to add that the paper referred to, and others which I have received by the same mail, speak of this revolution as being up to that time entirely of a bloodless character. It appears that on the 29th of August the offer of the supreme power was made to General Paez, who at first declined; but the postscript of the above letter, written on the day the mail left, would tend to a different result.—Your obedient servant,

FREDERICK H. HEMMING, Consul.

Consulate of Venezuela, 25 Moorgate street, E.C., Sept. 30.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The railway market was very depressed in the commencement of the week, and in

most of the heavier stocks a severe fall took place. The unfavourable movement was chiefly attributable to the disturbing influence that has prevailed in this department for some time past, viz., the apprehension of reduced receipts from the stagnation of trade caused by the American crisis. Latterly, however, a marked improvement was established, the weekly returns being generally favourable, in consequence, probably, of the increased pleasure traffic induced by the fineness of the weather. This morning the market was especially buoyant, but a partial reaction subsequently followed. The principal operations continue on provincial account. Apart from the ordinary influences of the market, one or two stocks have been exceptionally dull through the failure of the speculator for the rise in Consols, who had also some accounts open in this department, Midland and South-Eastern, in particular, being affected.

In the colonial market, Great Western of Canada shares have receded. It is announced that no dividend is proposed by the Directors of this Company for the past half-year. Grand Trunk stock is also flatter. Indian guaranteed descriptions have been rather dull.

Foreign railways were firm until the rise in the Bank of France rate, when any tendency to advance was immediately checked. Lombardo-Venetian are especially heavy at $\frac{7}{8}$ premium on sales in connection with the monthly settlement in Paris. American securities are depressed, particularly Illinois Central shares.

In the miscellaneous market, there has been an improvemen in St John del Rey and United Mexican Mining shares. Joint stock banks are also in demand, particularly London and Westminster. Mercantile Fire Insurance receded on Monday to $\frac{1}{4}$ discount to par, but afterwards rallied to $\frac{1}{8}$ to $\frac{1}{4}$ premium. Commercial Union were last quoted $\frac{1}{8}$ discount to par.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

Foreign Exchanges.—The foreign exchanges continue to show undiminished firmness, the rates this afternoon being generally a fraction higher.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals since our circular of 26th Sept., comprise the Tasmanian, from the West Indies, with 59,000*l*; the Oneida, from the Brazils, with 120,000*l*; the Ceylon, from Alexandria, with 11,080*l*. The shipments are per Asia, to New York 12,800*l*; per Seine, to West Indies, 7,980*l*; per Pera, to Alexandria, 9,500*l*; per Pera, to Madras, 600*l*. There is hardly any demand for export. The purchases made by the Bank of England amount to 266,500*l*.

Silver.—The Tasmanian, from the West Indies, has arrived since the date of our last circular. She has brought no less than 597,000*l* in bar silver and Mexican dollars, chiefly the latter. This specie will not be deliverable before the middle of next week; it has not yet been disposed of. The shipments have been:—4,600*l*, per Seine, to the West Indies; 10,260*l*, per Pera, to Calcutta; 6,941*l*, per Pera, to Hong Kong; 496*l*, per Pera, to Fow Chow Foo; 36,455*l*, per Pera, to Shanghai.

Mexican Dollars.—The amount brought by the Tasmanian, which is very considerable, has not yet been disposed of. Prices during the past week have not varied from our last quotations, viz., 4s 11½d per oz.

Exchange on India is firmer, and we quote 60 days' sight Banks' drafts on Bombay and Calcutta, 1s 11⅞d per rupee; bills, with documents, 1s 11½d to 1s 11⅝d. Banks' drafts on Madras, 60 days' sight, 1s 11½d to 1s 11¾d.

India Government loan notes remain at last week's quotations, viz., 103 to 103½ for 5½ per cents., and 96 to 96½ for 5 per cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 76s 6d to 77s, nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, 76s 6d per oz. Silver—Bar silver, 5s 0⅝d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅞d per oz std.; fine cake silver, 5s 5¼d per oz; Mexican dollars, 4s 11½d per oz last price; Spanish dollars (Carolus), 6s 6d per oz, nominal.

The amount of gold purchased by the Bank to-day was 155,000*l*, which, with 7,000*l* yesterday, makes a total of 162,000*l* since making up the last return.

Failures and Mercantile Embarrassments.—The advices from Rio de Janeiro announce the failure of the importing house of Pinto é Pimenta, with liabilities for about 100,000*l*. The assets are stated to be less than a third of that amount.

The suspension transpired this afternoon of Messrs Sowerby, Tatton, and Co., silk mercers and general warehousemen, with liabilities for about 50,000*l*.

Public Companies.—A meeting of the London General Omnibus Company has held on Monday, but the only business transacted was the presentation of a report from the Directors. It was stated that, owing partly to the severity of the weather in the commencement of the year, the traffic has been diminished, while the expenses have been high from the extreme price of provender caused by the late deficient harvest. For the future, however, a better result is anticipated, the outlay on this account having been in August 700*l* a week less than in the preceding January. The result of the profit and loss account is mainly determined by the expense of this item. In the first month of the year there was a decrease in the receipts of 2,455*l*, but this deficiency has been more than regained, the accounts at the close of the half-year showing an augmentation of 4,816*l*. The stock of horses has been maintained at a diminished expense of 2,227*l*, compared with the corresponding period of 1860, and is considered to be in a highly satisfactory condition. In the general expenditure a reduction has also been effected of 1,302*l*. The Directors look forward with confidence to the future, the Great Exhibition next year being expected to add materially to the profits of the Company. The actual gain in the past half-year has been 220*l* only, but in the succeeding ten weeks 14,700*l* has been earned. The number of passengers carried in the six months ending in June was 20,431,652, the miles run were 5,896,195, the average omnibuses working daily 588, and the average fare per passenger 3½d.

The United Mexican Mining Company notify the repayment of a second instalment of 40 per cent. of their borrowed capital. The 20 per cent. remaining to be paid with the stipulated bonus of 25 per cent. now amount to 7,505*l*, against which the Company have received by the mail just arrived about 7,600*l*, while a similar or larger sum is expected to leave Guanaxuata for transmission to England in the course of the present month.

The Jamaica Cotton Company have sent out nearly two tons of Egyptian seed to Jamaica, and as much Sea Island as they could procure.

The Riga and Dunaberg Railway was opened for traffic along the whole line on the 25th ult.

Miscellaneous.—Messrs Glass, Elliot, and Co. have received a telegram from Malta, announcing the successful completion of the submarine telegraph from Malta to Alexandria: the total length of the line is 1,400 miles, and there are intermediate stations at Tripoli and Benghazi. The working arrangements are nearly concluded, and the telegraph is expected to be opened to the public by the end of the present month, by which communication with India will be expedited by 13 days.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 4-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 430½ per mark, and the short exchange on London is 13.7½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1-10th per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 108⅝ to 109¼ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

GRAIN IMPORTED.

An Account of the total quantities of each kind of corn, distinguishing foreign and colonial, imported into the principal ports of Great Britain, viz.:—London, Liverpool, Hull, Newcastle, Bristol, Gloucester, Plymouth, Leith, Glasgow, Dundee, and Perth. In the week ending September 25, 1861.

	Wheat and wheat flour.	Barley and barley-meal.	Oats and oatmeal.	Rye and ryemeal.	Peas and peameal.	Beans & bean-meal.	Indian corn and Indian meal	Buckwheat & buckwht meal.

Imports of the week ..... 279,028 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat at Mark lane, to-day, was only moderate. Generally speaking, the trade ruled slow; yet, compared with Monday, there was a slightly improved feeling in the demand, at that day's decline in the quotations. In foreign wheat, sales progressed slowly, yet no further change took place in prices. Barley was dull, and the currencies had a downward tendency. Malt sold slowly, on former terms. Good and fine oats were in steady request, at quite previous rates, but low parcels were rather cheaper. Beans and peas were in fair demand, at former prices. The flour trade was inactive, and, in some instances, the quotations were somewhat easier. This week's imports amount to 13,300 quarters of wheat, 1,050 barley, 14,120 oats, and 2,100 barrels of flour.

At Liverpool, this morning, wheat commanded more attention, and quite former prices. Flour sold more freely at extreme rates; and in maize, an advance of 6d per quarter took place.

The following is Mr Othon Trithen's monthly report of the corn trade at Odessa, under date Sept. 20:—The descent of wheat from the interior, during the month of August, attained considerable proportions, especially as regards new Ghirkas, whilst Polish wheats, hard wheats, barley, oats, and rye were only scantily represented. It is, however, expected that during this month the descent will reach an importance such as it ought to attain after a harvest so abundant as that of the present year. The too rapid advance in prices has at last checked operations; nevertheless, the sales of the week still amount to more than 100,000 chetwerts, and there is no doubt that the quantity would have been yet larger had not the scarcity of vessels, the advance in freights, the difficulty of loading, and especially the dearness of cartage and shipping, thrown so many obstacles in the way of shippers. During the past month about 500,000 chetwerts of wheat changed hands, chiefly, however, for the Mediterranean. Current prices:—Superior Polish Odessa wheat, 45s per 495 lbs, 43s 6d per 480 lbs; fair average ditto, 41s per 480 lbs; superior Sandomirka wheat, 44s per 485 lbs, 43s 6d per 480 lbs; fair average ditto, 41s per 475 lbs, 41s 6d per 480 lbs; superior Ghirka wheat, 45s 6d per 500 lbs, 44s 8d per 492 lbs; fair average ditto, 42s 6d per 485 lbs, 43s per 492 lbs; hard ditto, 43s 6d per 500 lbs, 42s 6d per 492 lbs; maize, 25s 6d per 500 lbs, 25s per 492 lbs; barley, 17s per 385 lbs, 17s 6d per 400 lbs; oats, 15s 6d per 285 lbs, 16s 6d per 300 lbs; rye, 23s 6d per 450 lbs, 24s 9d per 480 lbs; superior linseed, sifted, 49s per quarter; fair average ditto, 46s per quarter; unsifted ditto, 45s per quarter; fair average rapeseed, 25s per quarter, all free on board.

	Exports during August. To United Kingdom. chetwerts	To Continent &c. chetwerts	To all parts since 1st January. chetwerts

Telegraphic advices mention a decline in the value of wheat.

Messrs Briggs and Co., of Alexandria, writing from that port Sept. 18, in reference to the corn trade, observe:—Since our last, a steady business has been done at full prices, and with a strong demand for both wheat and beans. Linseed also continues in good request at previous quotations. The following are the sales of the past week:—Saide wheat, private trade produce, 21,130 quarters, 30s 6d to 32s 3d; Beheireh wheat, private trade produce, 15,060 quarters, 29s to 30s; Beheireh wheat, private trade produce (white and Buhi), 4,700 quarters, 30s 3d; Beheireh wheat, Pasha's produce (white), 2,190 quarters, 32s 6d to 33s; Beheireh wheat, Pasha's produce, (red), 1,875 quarters, 30s 6d to 31s; Saide beans, private trade produce, 15,630 quarters, 26s 8d to 27s 2d; Beheireh beans, private trade produce, 2,070 quarters, 25s to 25s 6d; barley, 11,420 quarters, 17s 6d to 18s; lentils, 1,237 quarters, 24s 9d to 25s 6d; ceci, 750 quarters, 32s 6d to 33s; linseed, 2,500 quarters, 46s 6d to 47s 6d per quarter, free on board. Freights—Shipping continues very scarce, and freights firm at 6s 6d to 7s for beans to the United Kingdom for orders, and wheat or other grain or seed in proportion. To a direct port, 6s to 6s 3d for wheat or beans. By steamer to Liverpool, 5s 6d per quarter.

The Liverpool cotton market, this week, has been less excited than the week before, but still a fair amount of business has been done, and prices close for the middle qualities of American cotton ⅛d, for fair qualities ¼d, higher than last Friday. The sales are 67,000 bales, including 30,000 to spinners, 29,000 on speculation, and 8,000 for export. The general opinion is strongly in favour of the article, as there is not the slightest chance of an understanding between the belligerent parties in America, and this feeling is greatly strengthened by reports of great injury done to the crop. The estimates of four million bales, which were pretty general a few weeks ago, are now quite abandoned, and one million less is regarded as the probable result. This prospect will most likely, should peace be concluded in America, very soon counterbalance any reduction of prices which needs must follow such an event. Low prices are quite out of the question for the next twelve months.

The cotton trade of Alexandria, for the week ending Sept. 18, was firm in the extreme as regards prices; but the amount of business transacted was much restricted. The sales were as follows, amounting, in the aggregate, to only 172 bales:—28 bales sweepings to low ordinary, at 6½d to 7¾d; 48 ordinary to middling, 8d to 8½d; 72 good middling to fair, 8⅝d to 9d; 19 good fair to good, 9 1-10d to 9 4-10d; 5 good, 6⅝d per lb, free on board. Freights by steamers at 3-16ths of a penny per lb.

A few public sales of tea have been brought forward, this week, and they have gone off steadily, at quite previous rates. By private contract, a fair business has been transacted, and prices have been well supported.

The annexed intelligence, in reference to tea and silk, is dated Hong Kong, Aug. 12:—

Canton Silk—Settlements only 10 piculs. The third crop has arrived, but the yield is deficient, amounting only to 300 piculs. Tea—Settlements of new congou during the fortnight amount to only 16 chops, including three chops contracts. Prices show a still further advance, and may be quoted 1 tael to 1½ tael over opening rates. Latterly, however, teamen have shown more disposition to realise, and would accept some reduction, but this has not led to business, a considerable reduction being looked for. Scented teas continue to be taken at previous rates; for the finest kinds, which are scarce, extreme prices are asked. At Macao, export of Tayshan teas continues, but of the three vessels now there no memorandum of the cargoes has been circulated. Amoy advices are to the 5th inst. A good portion of the tea purchased had been shipped to Foochow. Foochow advices are to the 20th inst. Tea—During the fortnight a fair amount of business had been done. The lower qualities of congou had rather declined, but the better kinds show an advance of ½ tael to 1 tael. Stocks had increased, and chiefly consisted of low to good ordinary. Of the Kaisow kinds to fine there were none on the market. The third crop was beginning to be gathered, and was well spoken of as regards quality and quantity. Prices in the country had again fallen, but were still very high. Souchong had been taken to a fair extent at rather easier rates for good medium to fine. Finest were still held for extreme prices—say 40 taels. Oolongs—Of the better kinds small purchases had been made for England. The American firms were still holding off. Scented teas had been in fair demand in the market, and full supplies of contracts had gone and were going forward. Two vessels had sailed for London. Shanghai advices are to the 3rd inst. Silk—Settlements during the fortnight amount to 3,500 bales, making a total of 9,500 for the season. Export was 4,958 bales, and in addition 4,097 bales were on board ship. Stock, about 12,000 bales. There was no fine silk in the market, and even No. 3 Tsatlees were scarce. Quotations are:—Tsatlee, Nos. 1 and 2, none: ditto, No. 3, 415 to 520 taels; ditto, No. 4, 390 taels; ditto, inferior, 330 to 380 taels; Tayeam, No. 1, 360 taels; ditto, No. 2, 330 taels; ditto, No. 3, 300 taels; ditto, No. 4, 270 taels; ditto, inferior, 230 to 260 taels. Total export of silk from China to Europe is 4,895 bales, against 4,573 bales last year, or an increase this season of 322 bales. Tea—Black—A moderate business had been done in new Oopeih, brought from Hankow, at firm rates. The first chop was settled at 33 taels, and five others found buyers at prices ranging from 29 taels to 32 taels. Three chops were on the market. Arrivals from Hankow since last mail amount to 25 chops. Settlements had been:—Congou, Oopeih, 3,300 chests, at 29 to 33 taels; souchong, 240 chests, at 25 taels. Stocks—6,200 chests Oopeih congou; 1,800 chests Shanghai packed and low tea; 1,600 chests new flowery pekoe; 800 chests old flowery pekoe. Green—Settlements amounted to 500 half-chests Pinsurye, at 35½ to 38 taels; 14,000 half-chests Moyune and Fychow, and 4,000 half-chests Japan. Stocks—1,500 half-chests Moyune and Fychow, 1,300 half-chests Pingsury, 2,500 half-chests Japan. Total export of tea from China to Great Britain is 11,286,800 lbs against 10,746,800 lbs last year, or an increase of 540,000 lbs for this season. To the United States the export is 419,000 lbs, against 2,387,900 lbs, showing a decrease of 1,968,900 lbs or 1861-62.

Messrs Arles Dufour and Co. remark as follows with regard to the silk trade of Lyons to September 27:—"After a protracted dulness, we are glad to notice a slight improvement in our transactions since the beginning of the month. Manufacturers have succeeded in diminishing their stock of silk goods, and have also received some orders for the various European consumptions. Prices are, consequently, very firm for all descriptions of silk; we have even to notice a slight advance on those qualities which had undergone the heaviest fall. However, as long as we hear of no improvement in the American trade, a more favourable change can hardly be expected."

Good and fine qualities of raw sugar have sold steadily at full currencies; but for low samples, the inquiry has been much less active, though without leading to any quotable change in prices, compared with last week. Refined goods have moved off slowly on former terms.

We extract the following from Messrs Trueman and Rouse's circular:—

Imports and Stocks of Sugar and Coffee at the Principal European Ports, for the Eight Months ending 31st August, 1860 and 1861.

	Sugar. Imports. 1860.	Imports. 1861.	Stock, 31st Aug. 1860.	Stock, 31st Aug. 1861.

The demand for coffee has continued active, and, in some instances, a further improvement of 6d per cwt has taken place in value.

Messrs Fryer, Schultze, and Co., writing from Colombo, Aug. 31, remark as follows with regard to the coffee trade:—

Purchases of early plantation coffee have been made at extreme rates for the Australian market. There is none of the new crop as yet in Colombo; gathering has commenced on low elevations, but crops generally are expected to be late. The arrivals of native Ouvah coffee have been light, and there being a demand for this description for the Southern colonies, the price has advanced to 43s for unpicked. The new crop of Kandy growth is expected to be late and not very large. Freights—Coffee in cask, 4*l* 10s to 5*l* for favourite ships. The shipments of the fortnight have been limited, and the exports of coffee to date are as follow:—

Plantation Coffee.

To Great Britain	cwts 413,015	against last year,	cwts	416,695
Foreign Ports	23,814	—	—	30,391
Australia and India	14,086	—	—	10,870
	450,915			457,956

Native Coffee.

To Great Britain	cwts 75,301	against last year,	cwts	83,939
Foreign Ports	50,769	—	—	67,269
Australia and India	6,326	—	—	3,640
	132,396			154,848

The market for rice has been dull, and for indifferent parcels rather less money has been accepted.

The dry fruit trade remains much in the same state as previously reported, the demand being still confined to useful samples of old produce.

Annexed is Messrs Witherby and Son's report of the fruit trade: Currants—We announced in our last report the arrival of two steamers with new currants. Six others have since been reported, making the total importation into London to 4th inst. about 3,500 tons, against 7,000 tons to same date in 1860. About 3,500 tons have arrived at Liverpool against 1,700 tons to same date in 1860. The stock of currants here on 1st inst. was about 6,700 tons, against 9,000 tons at same date in 1860, and against 4,400 tons in 1859. Of the present stock, about 4,000 tons are old fruit, which is being worked off rapidly. As the quality of the new crop has not given satisfaction, the business, till towards the end of Sept. was almost limited to old fruit, the finest sorts of which have further advanced 2s and 3s per cwt. A considerable quantity of rain-damaged fruit has been received this week and taken readily at 29s to 30s per cwt. The range of prices of old and new is now from 29s to 41s per cwt. New fruit, however, is gradually coming into more favour as the old disappears, but we require much larger supplies for our requirements than seem likely at present to come forward. Raisins—The arrivals of new Valencias to 4th inst. consisted of 29,413 boxes and 17,883 half-boxes, or 930 tons, by seven ships, against 1,200 tons by nine ships to 3rd October, 1860, and 2,050 tons by fifteen ships to 3rd October, 1859. About 250 tons had arrived at Liverpool, against 385 tons in 1860, and 480 in 1859. There have been continuous and heavy arrivals of muscatels, both here and at Liverpool. London stock 1st inst. 500 tons, against 1,000 in 1860. It is still stated that the crop of Valencias this year will not exceed 6,500 tons, against 10,500 tons last year. Since the date of our last report the price declined from 46s to 41s, but the news since received of a further advance in Spain, with extremely light shipments, has caused a reaction, and 42s is now the market price. Muscatels, though of inferior quality, have been taken freely. Turkey fruit will be here next week, and will be very acceptable. New Sultanas have been sold at 53s to 54s; quality very indifferent. The crop is a short one. The stock here is very small. Figs—Our first supply has again come, *via* Liverpool, and a week later than last year. The quality is better than was expected. The crop is more than one-half less than that of 1860, and fine fruit is commanding high prices.

The following is dated Rangoon, Aug. 16:—Rice—Since the receipt of the last mail prices have become weaker, as dealers have come forward with larger supplies, and exhibit more readiness in submitting to a reduction. The quantity at market during the past fourteen days has been very fair when compared with the smallness of present requirements. Exporters have not lost the opportunity of reducing their offers, and we are now able to quote for the best grades of Natsain, containing a paddy-admixture of 16 to 18 per cent. only, 81 to 86 rs, while prospects are good for a further retrogression in price by next mail. We learn that there are but few vessels expected, and as shippers are generally not without stock, the chances for an advance upon present value, for some time, are very few and remote.

In rum, a very moderate business has been transacted, yet prices have ruled about stationary. Brandy has fully supported former rates; but the inquiry for it has not been active. British spirit has advanced 2s per gallon.

The wool trade, both as regards English and colonial qualities, is far from active. The quotations, however, are maintained. Flax is very firm, and clean Russian is worth 33*l* per ton.

Comparative Statement of Hemp and Flax on hand in London, on the 1st of October, 1860 and 1861, Dealers' Stocks included.

Messrs Ronald and Son, of Liverpool, thus remark in reference to the wool trade:—

The demand for wool, generally, during the month has been very active, consumers continuing to buy merely for current wants, and prices have in several instances ruled in their favour, but within the last week or ten days an export demand from America has sprung up, chiefly for such descriptions of low foreign wools as are suited for army clothing and blankets, and a considerable business has been done in them at about late rates. Our fourth series of public sales here will commence on the 8th inst., when the arrivals of East India, amounting to about 17,000 bales since our last July sales, and about 6,000 bales other low wools, will be brought forward. There has been a fair inquiry for the lower descriptions of East India, at rather improved prices. There is no change to report with regard to either English, Scotch, or Irish wools; only a moderate amount of business doing, at prices without any material variation.

With regard to the leather trade of the past month, Messrs Powell and Co. observe:—The amount of business in leather during the past, falls short of the transactions of the previous month, but as the sales of August considerably exceeded an average, some diminution might naturally be expected to follow such excess. There has been, however, throughout September a fair demand for most descriptions of goods, which has rather increased towards the close of the month, and which has been, for most articles, commensurate with the supplies. Prices have been steady

and generally firm, so that there are scarcely any changes to make in our quotations. Raw goods, with some slight exceptions, remain at the quotations of the previous month. The import of South American hides has been large, and the stocks show a further considerable increase. The sales have been to a good average extent, and a demand for exportation at the public sale on 26th ultimo established a further advance on light Australian hides.

The annexed remarks are from Messrs Grant and Hodgson's monthly report of the tobacco trade:—At the commencement of last month the market presented a very quiet appearance, and business was almost restricted to small purchases to supply immediate requirements. Subsequently there was an improved demand, more especially for exportation, and sales were effected of 877 hhds, viz., 591 hhds of Kentucky leaf, 156 hhds of strips, 8 hhds Virginia leaf, 14 hhds strips, and 108 hhds Maryland. Prices have remained firm for all descriptions, and for some, especially of choice quality, a fractional advance has been realised. Imports, 1,857 hhds. Deliveries, 1,004 hhds, against 889 hhds in the corresponding month of last year. Stock, 27,541 hhds, against 20,693 hhds in 1860, 19,385 hhds in 1859, 11,687 hhds in 1858, 1,013 hhds in 1857, and 8,674 hhds in 1856.

The crop of indigo in India is thus estimated:—

	Crop of 1859.	Estimate of present Crop.
Bengal	52,795	17,150
Tirhoot and Chupra	35,260	14,500
Benares	12,310	33,000
Doab	13,500	
Total	1,13,865	64,650

Large public sales of ivory have been held, consisting of 240 tons of various kinds, being the largest quantity ever offered in one series. The biddings have been tolerably active, and prices on the whole have been fairly, though in some instances not quite supported.

Scotch pig iron is dull, and prices have a downward tendency. Mixed numbers are selling at 50s per ton. Spelter is firm, at full quotations. Present stock, 3,235 tons, against 3,715 tons on September 1, and 4,394 tons on October 1, 1860. The following is the monthly statement of Banca tin in Holland:—

	1861. slabs	1860. slabs	1859. slabs
The stock on warrants amounted on Aug. 31	94011	100502	113678
Deliveries in September	12261	12430	28201
Stock, September 30	81750	88072	85477
Stock in the hands of the Trading Society for their annual sale	30246	32989	34831

Linseed oil has changed hands to a fair extent, at 34s per cwt on the spot. All other oils have been very firm, and prices have had an upward tendency.

The receipts and exports of naval stores at New York, since Jan. 1, were as follows:—

	Receipts.		Exports.	
	bbls 1861.	bbls 1860.	bbls 1861.	bbls 1860.
Turpentine	32,064	47,836	19,465	44,459
Spirits of turpentine	44,512	115,892	20,061	54,555

"The subscriptions to the National Loan at the office of the Sub-Treasury," observes the New York *Shipping List* of the 21st ult., "have progressed rapidly, and the full amount allotted to the New York Banks to the 15th prox., 35,000,000 dols, have already nearly all been paid, and it is expected that the balance will nearly be paid in to-day. For the benefit of our readers we have prepared the following table, which will afford a clear insight into the workings of the loan in this city during the three weeks. The public subscriptions have been as follows:—

	Week ending Sept. 7. dols	Week ending Sept. 14. dols	This week. dols
Monday	340,000	427,000	480,000
Tuesday	307,000	517,000	308,000
Wednesday	818,000	527,000	445,000
Thursday	575,000	1,040,000	250,000
Friday	347,000	995,000	...
Saturday	402,000	355,000	...
Paid in by banks	5,600,000	3,500,000	7,000,000
Total public subscription	2,789,000	3,861,000	1,483,000
Total for the week	8,389,000	7,361,000	8,483,000

Total since 1st September 24,233,000
Previously—by banks 7,000,000
— by individuals 1,786,000
8,786,000

Total paid up to 20th September 33,019,000
Balance of first Bank guaranty 2,019,000

Total allotted to New York to Oct. 15 35,000,000

The money market has become comparatively easy on call loans and first-class signatures, owing in part to the abundant supply of money, which is largely in excess of the demand, but chiefly to the free disbursements of specie by the Government, which renders discounting unnecessary, and tends greatly to stimulate trade of nearly every description. Our quotations show a considerable reduction, call loans being now quoted at 5 to 6 per cent., and with the right security, money is easy of access at the usual price. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9
First-class single signatures	7 ...
Other good bills	... ...

In trade circles, the aspect of things is without essential change. There is much excitement in the markets for a few commodities, for which there is an active speculative demand at rapidly enhancing values, but general trade is not very active, and the Fall trade may fall considerably short of the general expectation at the commencement of the season. The dry goods trade continues comparatively active, though there is scarcely as much doing as there has been, and business is still restricted by many of the dealers demanding cash for their goods; still, business is fair, and the aggregate sales are to a fair extent. The following is a summary of the condition of the banks of the three cities named, as shown by their last weekly statements:—

	Loans. dols	Deposits. dols
New York, Sept. 16	136,565,624	106,760,876
Boston, Sept. 16	64,202,000	22,171,000
Philadelphia, Sept. 16	27,871,497	16,976,017
Total	228,720,121	145,907,893
Last week	231,828,634	155,079,517
	Specie. dols	Circulation. dols
New York, Sept. 16	37,529,412	8,793,620
Boston, Sept. 16	6,671,000	6,446,000
Philadelphia, Sept. 16	5,046,536	2,148,865
Total	49,246,948	17,387,485
Last week	54,582,745	17,502,374

COTTON.

New York, Sept. 18.—The market continues extremely dull, heavy, and irregular. We remark that to effect sales to any considerable extent, lower rates would undoubtedly be accepted. The transactions are limited to about 1,500 bales.

New York, Sept. 21.—The market is inactive, and prices may be considered nominal. The reported sales are 1,000 bales. We quote:—

New York Classification.

	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	18	18	18	18
Good ordinary	19½	19¾	19¾	19¾
Middling	21¼	21⅝	21⅝	22
Good middling	22	22⅜	22⅜	23
Middling fair	...	...	...	...

The arrivals have been from Providence, 405 bales. Total import since 1st inst., 1,647 bales. Export from 1st to 17th Sept., 6 bales, against 4,548 in 1860.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The demand for strong refining kinds continues steady. Fine grocery sugars and floating cargoes maintain their former value, but the market generally is not very active in the face of a further accession to the stocks on hand. Up to yesterday (Thursday) 1,702 casks West India had sold, including the parcels by auction. 530 casks Barbadoes, 33s to 43s. 312 casks other sorts: Jamaica, 33s to 38s 6d; Trinidad,

32s to 38s per cwt. During last week, 6,175 tons were landed, and 4,340 tons delivered, consequently the stock at the close had increased to 91,850 tons, against 74,200 tons in 1860 at the same period.

Mauritius.—On Tuesday, 2,170 bags, consisting chiefly of the lower qualities, went off at former rates: black to good soft brown, 29s 6d to 34s; low grey to middling soft yellow, 34s 6d to 37s per cwt. The transactions by private contract have been limited since then.

Madras.—1,000 bags dark Jaggery have sold by private contract at 29s 6d per cwt.

Foreign.—169 casks 180 barrels Cuba, by auction, were partially disposed off: brown, 34s 6d; low grey to good yellow, 35s to 39s 6d. 800 casks 250 barrels Porto Rico partly sold: brown, 34s to 35s; low greyish to fine yellow, 35s 6d to 43s 6d. A floating cargo of Havana, No. 9½ to 10, has sold at 25s for a near port; a landed cargo of Cuba at 38s 9d; and one of Porto Rico at 38s. 500 baskets Java have sold privately at 44s per cwt.

Refined.—The market is quiet, but common dry goods, suitable for grocery purposes, cannot be obtained at 49s per cwt. Crushed and pieces remain unaltered.

MELADO.—Further sales have been effected at 21s 6d to 27s per cwt.

MOLASSES.—A good demand still prevails. Several contracts are reported in West India at 15s to 16s, and 250 casks Cuba muscovado have realised 16s per cwt.

RUM.—The market is rather firmer, with buyers of common kinds at previous rates. Demerara last sold at 1s 8½d to 1s 9d; Leeward Island, proof, 1s 7d to 1s 7½d per gallon. English corn spirits have been advanced 2d per gallon.

COCOA.—Quotations have still an upward tendency, and there now appear to be few sellers. Trinidad has been in demand by private contract. The last sales of Guayaquil were at 55s to 56s per cwt.

COFFEE.—Although importers keep the market liberally supplied, there has been a further rise of 6d to 1s per cwt paid for native Ceylon, and some other kinds are also rather dearer. A floating cargo of Rio of good quality, including part of the new crop, has sold at 58s for a near port. By auction, 1,184 casks 2,810 barrels and bags plantation Ceylon went at 73s to 83s for low middling and small berry to good. 2,133 bags native: good ordinary to good, 68s to 69s 6d; small berry, 66s to 67s. A few lots of Jamaica brought 68s 6d to 82s 6d. 1,440 bags Costa Rica: pale to middling, 74s to 77s. 1,868 cases 16 casks 291 barrels and bags East India partly sold: pale and small to fine, 72s to 93s; Malabar, 70s 6d to 72s. 146 bags bold pale Guatemala, 72s 6d to 73s. 2,358 bags sea-damaged Rio, 48s to 53s per cwt.

TEA.—Transactions by private contract have been upon a moderate scale, but at very full prices for the green descriptions just landed. The public sales commenced yesterday, when the catalogues contained 28,172 packages. 13,378 packages passed, 5,178 being sold, including 3,719 printed "without reserve." Some broken leaf congou realised a slight advance.

RICE.—The recent large export and speculative demand having abated, most kinds are quiet. 475 bags good middling white Bengal, by auction, were taken in at the previous value of 13s 6d, and since sold at 13s 3d, being rather cheaper. Privately the business has been smaller than for some time past, including new Necrancie Arracan at 10s 9d; white Bengal from 11s 6d to 14s 3d; and Ballam, 10s 4½d to 10s 9d. 14,200 bags new Necrancie Arracan have sold, the price said to be 10s 9d per cwt.

IMPORTS and DELIVERIES of RICE to September 28, with STOCKS on hand.

Stock	33400	43100	70450	89600

SAGO.—About 4,000 boxes have changed hands at advancing prices, chiefly small grain at 19s up to 22s per cwt.

SPICES.—1,663 bags Singapore black pepper went at 4d, and partly sold, with a small portion at 4⅛d. 390 bags common Batavia were taken in at 3⅞d. 697 bags white were held for further enhanced rates and bought in: the bulk Singapore at 6⅝d to 6¾d, with Penang at 6¾d to 7d; all the former since sold at 6¼d. 342 cases 114 bags Cochin ginger, more or less wormy, chiefly sold at 50s to 57s. 105 barrels Jamaica: low to good, 2*l* 14s to 7*l* 1s per cwt.

SALTPETRE.—A few orders have been executed in Bengal at the late decline: refraction 10½ to 5½, 32s 3d to 34s. By auction, 578 bags were bought in at 34s to 34s 6d, refraction 3¾ to 2⅝. 940 bags Bombay, refracting 6½ to 52, sold at 30s to 30s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to September 28, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	8860	10220	14150	7440
Delivered	8900	9700	13450	10920
Stock	3410	4360	3645	2670

COCHINEAL.—There has been more inquiry for clean grain, and at rather better prices. Good to fine Honduras silvers are firmer, and holders demand advanced rates. The present stock comprises 4,208 serons, &c., Honduras, 1,766 Mexican, and 2,486 Teneriffe, against 7,950 serons, &c., last year.

OTHER DYESTUFFS.—Gambier is quiet, at 17s 6d to 18s. Cutch inactive: 1,907 packages by auction were bought in at 22s 6d to 23s per cwt.

METALS.—There have been few alterations in prices to notice this week, and the market is rather quiet. Scotch pig iron has declined to 50s 1½d per ton for mixed Nos. Copper keeps firm. The last sale of spelter was at 18*l* 12s 6d per ton on the spot, and 18*l* 15s forward delivery. Stock on the 1st inst. 3,250 tons, or 1,200 tons below that of 1860 at the same period. Foreign tin is quiet, and the stock on the 1st inst. was rather more than 1,000 tons. Straits 116s 6d to 117s per cwt.

JUTE.—The market is firm, and the public sales on Wednesday, comprising 5,320 bales, went off at full rates to 10s advance, ordinary to fine quality commanding 11*l* 10s to 20*l* per ton.

HEMP.—Russian has advanced 20s, clean Petersburg being quoted 32*l* 10s to 33*l*. 2,000 bales fair roping quality of Manilla have sold during the week at 21*l*. By auction, 500 bales realised 22*l* 5s to 22*l* 10s; Sorsogon, 22*l* 12s 6d to 23*l*.

OILS.—Cocoa nut has advanced: Cochin, 50s to 50s 6d; Ceylon, 49s 6d to 50s. 221 casks palm, by auction, part sold at 38s 9d to 44s 3d per tun. Rape is 1s higher: foreign refined, 46s to 47s; brown, 43s to 43s 6d; forward delivery, 43s 6d to 44s paid. Linseed is steady at 34s per cwt. 113 tuns sperm were partly sold at 92*l* to 92*l* 10s for colonial. 35 tuns Southern part sold at 34*l* to 36*l* 5s per tun.

LINSEED remains steady. Large sales of Calcutta afloat are reported at 57s to 59s 6d per quarter.

TURPENTINE.—American drawn spirits quiet at 62s to 63s per cwt.

TALLOW.—The demand continues to improve, and prices of foreign are 1s to 1s 6d higher than on Friday last, with some speculative business doing. First sort Petersburg Y.C. on the spot and to the end of the year, 50s to 50s 3d; for delivery in January to March, 1862, 50s 6d; old Y.C., 48s 6d to 49s per cwt. By auction, yesterday, 550 casks sold at a corresponding improvement in prices: Australian sheep, 43s 6d to 50s 9d; beef, 45s 3d to 48s 6d; South American, 50s to 51s per cwt.

PARTICULARS OF TALLOW.—Monday, September 30.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firm. 482 casks 580 barrels West India, by auction, principally sold at former quotations. 1,500 bags Gurpatta date Bengal party sold at 38s to 39s. 1,350 bags Mauritius at full rates. The week's business in West India is 2,637 casks.

MELADO.—470 casks partly sold: dry and sugar, 28s to 30s; sugar and melado, 24s 6d to 27s 6d.

MOLASSES.—299 casks Madras were disposed of at 15s per cwt.

COFFEE.—176 bags native Ceylon sold at 68s 6d to 70s, being again rather dearer for the better sorts: small berry, 66s 6d. 471 bags Guatemala, 61s to 73s. 60 cases East India sold upon former terms.

COCOA.—250 bags Guayaquil sold at 57s 6d to 58s per cwt, being 2s per cwt dearer.

TEA.—9,600 packages more passed the sale to-day, and 4,108 packages sold at full rates, including fine flowery pekoe as high as 2s 7¾d per lb, 5,815 packages are left for sale on Monday.

CASSIA LIGNEA.—150 cases middling quality have sold at 87s to 88s per cwt.

SHELLAC.—52 chests sold at 9*l* 12s 6d to 9*l* 15s per cwt for good button. Clean Petersburg active at 33*l* per ton.

TALLOW.—Y. C., 50s to 50s 6d; 51s January to March; town, 52s 9d, against 50s 9d per cwt last week.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains moderately well supported. For export there has been no demand this week. Prices: 33s to 33s 3d in barrels for crushed.

GREEN FRUIT.—Market brisk. Large contracts for the new crop of Barcelona nuts have been made in consequence of an expected short supply from Gison. Arrivals of lemons from Spain, Lisbon, and Sicily, have rendered prices easier. Some parcels sold, by Keeling and Hunt at public sale, went at full prices. Some black Lisbon grapes realised a high figure, the quality being better than the green.

DRY FRUIT.—Considerable activity has prevailed this week in new currants, and the article is gradually developing itself. Demand chiefly runs on 29s to 30s sorts, which are to be had now in fair supply by the Kedar, which vessel brought 1,400 of all descriptions. In fine currants, the trade still stick to old at 39s to 40s, in preference to fine new 30s to 37s, these latter being more or less irregular. Valencias are firmer, and none to be had at 42s. A good demand for bunch and layer muscatels. New Sultanas dull; 53s to 54s selling rate. New figs at public sales this week realised sundry prices from 37s to 99s.

ENGLISH WOOL.—Very little doing.

COLONIAL WOOL.—The market is without change.

FLAX unaltered.

HEMP.—Market very firm, and but few sellers.

COTTON.—Sales of cotton from Friday, 27th September, to Thursday, 3rd October, inclusive:—2,600 bales Surat at 7⅝d and 7½d to 7¾d for good fair to good new Broach, 7d for good new Dhollera, 6⅝d for fair old ditto, 7d for good new Oomrawatty, 6⅝d for middling fair Oomrawatty, 5⅝d to 6¼d for ordinary to fully fair Compta; 1,200 bales Tinnevelly at 6⅝d to 7⅛d for middling fair to good fair for cash. Although the transactions are not extensive, the market continues very firm, and the extreme prices of last week are readily paid, and for good new Broach ¼d per lb advance has been paid on last week's quotations, the market closing quietly but firmly. Sales for arrival:—1,200 bales new Broach, guaranteed fair to good fair, 7½d to 7⅝d per lb; 550 Western Madras, fair, 6d. P.S.—Very firm; sales 350 fair to fully fair old Dhollera, 6⅝d to 6¾d.

SILK.—There has been rather more animation in the silk market this week, but at previous rates, without any improvement.

TOBACCO.—Sales for home trade have been principally of a retail character, at full prices; for exportation, several inquiries have been made, but the firmness of holders has prevented buyers from operating to any extent.

LEATHER AND HIDES.—The supply of leather at Leadenhall this week was only moderate in extent, and the transactions there were not extensive. A fair general business was done at former quotations.

METALS.—Business is very quiet in our market. Copper keeps firm at quotations, and ores have advanced in price at the public sales, but there have no considerable transactions in copper reported during the week. Iron has not varied in any way. Tin is barely so buoyant, and a trifle less than last week's quotations has been accepted for Straits. Lead has stiffened in price from increased demand. Spelter has had little attention. Tin plates unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	9
Fat by ditto	2	8
Yellow Russian	51	6
Melted stuff	37	6
Rough ditto	21	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

The bacon market is in a very unsettled state, prices varying from 66s to 68s, with every prospect of lower quotations next week. The trade generally very dull. Friesland butter in fair demand, at 116s; quality good. Jersey in good request at from 96s to 106s.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 30.—The total imports of foreign stock into London, last week, amounted to 11,763 head. In the corresponding period in 1860, we received 8,673; in 1859, 8,563; in 1858, 6,911; in 1857, 6,329; in 1856, 6,354; and in 1855, 7,764 head.

There was a full average supply of foreign stock on offer in our market to-day. The quality of the beasts was very middling; of the sheep, remarkably good. The show of home-fed beasts was seasonably extensive as to number; but their general condition was by no means first-rate. Prime Scots, crosses, shorthorns, Herefords and Devons, commanded a steady sale, at full quotations—the highest quotation being 4s 8d per 8 lbs—otherwise the beef trade was in a sluggish state, and, in some instances, prices had a drooping tendency. From Lincolnshire, Leicestershire, and Northamptonshire, we received 2,900 shorthorns, &c.; from other parts of England, 300 various breeds; from Scotland, 27 Scots and crosses; and, from Ireland, 750 oxen and heifers. With sheep we were tolerably well, but not to say heavily, supplied. The best Downs and half-breds were in steady request, at full prices, viz., from 5s to 5s 4d per 8 lbs. Inferior breeds were a dull inquiry, on former terms. The quality of the sheep was very middling. There was a fair average number of calves on offer, and the veal trade ruled heavy on easier terms. The top price was 4s 6d per 8 lbs.

SUPPLIES.

	Oct. 1, 1860.	Sept. 30, 1861.
Beasts	5600	6030
Sheep	25600	23630
Calves	120	169
Pigs	440	570

THURSDAY, Oct. 3.—Our market, to-day, was fairly supplied with beasts as to number; but their general quality was inferior. The few prime breeds on offer were disposed of at Monday's currency; but inferior beasts were very dull, and 2d per 8 lbs lower. The show of sheep was moderate. Downs and half-breds realised previous rates. Other breeds were 2d per 8 lbs cheaper. The best Downs and half-breds sold at 5s 4d per 8 lbs. Calves—the supply of which was rather limited—were a dull inquiry, at late rates. Pigs commanded extreme currencies; but milch cows were heavy.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	8	3	0	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	2	3	6	Large coarse calves	3	4	3	10
Prime large oxen	3	8	4	2	Prime small ditto	4	0	4	6

Coarse and inferior sheep	2	10	3	2	Small porkers	4	8	5	0
Second quality ditto	3	4	4	0	Suckling calves.....each	21	0	30	0
Prime coarse-woolled do.	4	2	4	10	Quarter old store pigs	22	0	30	0

Total supply—Beasts, 1,020; sheep and lambs, 6,880; calves, 310; pigs, 500.
Foreign supply—Beasts, 360; sheep 1,120; calves, 220.

NEWGATE AND LEADENHALL

FRIDAY, Oct. 4.—Somewhat extensive supplies, of meat have been on sale here. Prime qualities have been sold steadily at very full prices; otherwise the trade has ruled heavily at barely late rates.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	6	3	2	Middling mutton	3	6	4	0

Large Pork	4	0	4	6	Lamb	0	0	0	0
Inferior mutton	3	0	3	4					

HOP MARKET.

BOROUGH, Monday, Sept. 30.—As the picking of the new growth progresses, the reported falling off in the yield becomes fully confirmed, and the duty has in consequence declined to 115,000*l*. The trade for new Wealds and Sussex is very active, and last week's currency is fully maintained. In the choicer sorts the demand is at present limited. Mid and East Kents, 200s, 273s; Weald of Kents, 170s, 200s; Sussex, 155s, 170s.

FRIDAY, Oct. 4.—The demand for new hops rules steady, but by no means active, at former prices. In yearling and old samples, very little is doing. About 1,200 bales have come to hand this week from the continent.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 30.—These markets are moderately supplied with potatoes, for which the demand rules steady at full prices. The receipts entirely consist of home-grown produce. Scotch Regents, 80s to 90s; York ditto, 90s to 100s; Kent and Essex ditto, 85s to 115s per ton.

FRIDAY, Oct. 4.—The receipts of potatoes have been less extensive, and the inquiry for them has been steady, at an advance in prices of 5s to 10s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 14s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Trade steady.

COAL MARKET.

FRIDAY, Oct. 4.—Wall's-end Tees 19s—Wylam 16s—Walker Primrose 12s. 43 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 4.—The low wool sales will commence here early next week, on the 8th inst., and last until the 23rd inst.; and, besides 18,000 bags East India, between 10 and 11,000 bales other descriptions will be brought forward. The demand for export to the States is still considerable, and prices of such kinds as are suited for army purposes show great firmness.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 4.—Market steady, with a firm feeling for wheat. Unaltered prices. Low qualities of flour in good request at full rates. Indian corn 6d dearer; the advance checks business. Peas 6d higher.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, Oct. 4.—The transactions in manufactured iron during the past week have been on a limited scale, with little or no change in price. For Scotch pig iron the market has a drooping tendency, and the business done quite unimportant. Copper remains unaltered. The price of spelter is well maintained. Most other metals are dull.

The Gazette.

TUESDAY, Oct. 1.

BANKRUPTS.

C. Harris, Stratford-le-bow, Essex, ironmonger.
J. Eminton, Salisbury, leatherseller.
T. Goldsmith, Norwich, baker.
J. Fridlington, Southorpe mill, Northamptonshire, miller.

SCOTCH BANKRUPTS.

D. Adams, saddler, Kirriemuir.
A. Johnston, tailor, Glasgow.
D. Neil, wright, Rutherglen.
J. A. Drown and J. M'Laren, paper hanging merchants, Glasgow
D. Ellis, farmer, Bush, Aberdeenshire.
J. Scott, grocer, Girvan.

CRYSTAL PALACE.—M. Blondin's engagement at the Crystal Palace approaches its termination. Besides the twenty-six ascents which Blondin has made at the Crystal Palace during the four months he has been in England, he has made between fifty and sixty other ascents in various parts of the country. It has been estimated that above a million and a half of persons have attended his representations. M. Blondin's benefit will take place at the Crystal Palace on Monday next, on which occasion it is anticipated he will outdo himself. Tiejens, Giuglini, and other Italian vocalists, commence a series of Concerts on Saturday, 12th October.

COMMERCIAL TIMES

Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

LONDON, FRIDAY EVENING.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 21st of September amounted to 577,565*l*, and for the corresponding week of last year to 562,135*l*, showing an increase of 15,430*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 270,348*l*, and for the corresponding week of 1860 to 258,748*l*, showing an increase of 11,600*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept. 30.—The railway market was dull the whole day, London and North-Western and Great Northern being especially flat. Midland also receded. Compared with yesterday, most of the leading stocks exhibited a decline of ⅛ to ¾ per cent., and the market closed with a heavy appearance. Eastern Counties was exceptionally firm. In the colonial market there was little business, and as regards Indian stocks prices were occasionally lower. Foreign descriptions were generally less steady, and San Paulo and Western of France were quoted a fraction lower. Lombardo-Venetian, however, were a shade firmer, at ⅞ to 1 pm. American securities improved, particularly United States Five per Cents., Virginia Sixes, and Erie and Illinois Central shares. British mines were heavy. In foreign adventures there was a rise in United Mexican and St John del Rey, the former especially marking at one period 6¾.

TUESDAY, Oct. 1.—The railway market to-day sustained a general, and in some cases severe fall. Midland receded fully 2 per cent., Lancashire and Yorkshire 1⅜, and London and North-Western, Great Western, South-Eastern, Great Northern, Caledonian, and Sheffield ¾ to 1 per cent. Other stocks were about ½ per cent. lower, except North British, which slightly improved. The closing prices were at the worst point of the day. In the colonial market, Grand Trunk of Canada stock declined to 19¼ to ¾, and Great Western shares to 8⅛ to 9⅛. Foreign railways likewise showed increased heaviness, especially French descriptions, Bahia, and Pernambuco. Lombardo-Venetian also receded to ⅜ to ½ prem. American securities were rather firmer, especially the bonds of the New York Central. British mines continued dull, and in a few instances exhibited a decline. In foreign, there was another advance on St John del Rey. Joint stock banks were inactive, but fully supported. No change of importance occurred in miscellaneous descriptions.

WEDNESDAY, Oct. 2.—The railway market was quiet but firm during the greater part of the day, and after regular hours experienced a rather considerable advance. Compared with yesterday, Great Western showed a recovery of 1⅜ per cent.; Midland and South-Eastern, 1¼ to ⅜; Great Northern and Caledonian, 1 per cent.; and the other leading stocks, ½ to ¾. The market closed with a stronger appearance than for some days past. Little change took place in the colonial market. Cape Town shares were flatter, while East Indian closed steadily at 101 to ½. In foreign descriptions, there was a reduction in the principal French railways and in Great Luxembourg. Bahia were also dull during regular hours, but subsequently improved, with San Paulo, to ⅝ to ¾ dis. Lombardo-Venetian receded to ⅛ to ⅜ prem. on sales in connection with the settlement in Paris. American securities were less steady, Illinois Central and Erie shares especially exhibiting a decline.

THURSDAY, Oct. 3.—The railway market showed increased buoyancy to-day on the generally favourable traffic returns. The stocks chiefly in demand were Midland, Lancaseire, and Yorkshire, and Great Northern, all of which advanced 1½ to 2 per cent. London and North-Western, North-Eastern descriptions, Great Western, Caledonian, and Sheffiel also improved ⅜ to 1 per cent., and the other leading railways about ¾. North British was exceptionally dull. The closing prices were mostly at the best point of the day. In the colonial market, Atlantic and St Lawrence shares receded, while Cape Town were firm. The principal movement in foreign descriptions was a rise in Lombardo-Venetian and Pernambuco. American securities left off the same as yesterday. British mines were again dull, but in foreign there was a rise in St John del Rey and United Mexican.

FRIDAY, Oct. 4.—There was a reaction to-day in the railway share market. A decline of ⅝ to ¾ per cent. took place in most of the principal stocks. Lancashire and Yorkshire and Midland receded ⅝ to ¾. The market was quiet. Lombardo-Venetian Railway shares were rather dull, at ⅞ to 1 prem. Other foreign as well as colonial lines were quiet. In mines, about an average business was transacted.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

HYDROPATHY AND HOMŒOPATHY.—WELL-FIELD HOUSE, MATLOCK.—Pure air and water, most beautiful scenery, and soothing social influences may be enjoyed, with a systematic combination of gentle hydropathic and homœopathic treatment, at Dr SPENCER HALL'S Establishment, Well-field House, and 3 Prospect terrace, Matlock Bank, near Matlock Bridge Station, Derbyshire. Terms, Two Guineas per week. Particulars furnished on application.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

HOLLOWAY'S OINTMENT AND PILLS.—Hopes and Fears.—Whatever be the ailment, let no one be afraid of meeting with a cure till these searching and purifying remedies have been fairly tried. A vast variety of chronic complaints, which had baffled the most learned prescriptions, have readily been relieved by the conjoint action of Holloway's curative agents. They act primarily in discharging all deteriorating dregs from the blood, and secondarily in rectifying disordered conditions of the secretions, caused by unknown or unavoidable impurities existing in the air or in the food, or resulting from late hours or dissipated habits. Cutaneous disease, so frequently afflicting the scrofulous, consumptive, and feeble, yield with surprising rapidity to the steady use of Holloway's medicaments.

FRAMPTON'S PILL OF HEALTH, Price 1s 1½d and 2s 9d per box

This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.

Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.

These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

DR CURTIS'S MEDICAL WORK "MANHOOD," An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The author of the above *Medical Treatise* may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

TRELOAR'S CORK FLOOR CLOTH,
OR KAMPTULICON.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the table can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

ALLSOPP'S PALE ALE,

JOHN HENRY PEPPER, Honorary Director.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers thro h out the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium).

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris,—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr LANKESTER, F.R.S., Superintendent of the Food Collection, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

THE INDUS STEAM FLOTILLA.—

The Directors are prepared to receive applications for Debentures at par, bearing interest at five per cent. per annum, guaranteed by the Secretary of State for India in Council.

The debentures are for five years, and may be renewed for a further term of five years at the same rate of interest.

The debentures may be converted into Indus Steam Flotilla Capital Stock at the option of the holder.

THOMAS BURNELL, Secretary.

Indus Steam Flotilla Office, Gresham House, Old Broad street, Sept. 25, 1861.

CORNWALL RAILWAY.—

GUARANTEED PERPETUAL PREFERENTIAL SHARES.—The Directors of the Cornwall Railway are now prepared to issue the Preferential Shares Guaranteed under the provisions of the Cornwall Railway Act, 1861, by the Great Western, Bristol and Exeter, and South Devon Railway Companies, bearing a Perpetual Interest, or Dividend, of four and a half per cent. per annum, payable half-yearly. Application to be made to W. H. BOND, Secretary.

Cornwall Railway office, Truro, Sept. 12, 1861.

FIVE PER CENT. PREFERENCE

SHARES. — The Directors of the DUBLIN, WICKLOW, and WEXFORD RAILWAY COMPANY are ready to receive applications for the Five per Cent. Preference Shares of the Company, now in course of issue, under the Gorey and Enniscorthy Extension Acts, redeemable at the option of the holder in 1868, and the interest meanwhile secured on the existing lines, and the whole undertaking of the Company. Application to be made to the Secretary, 48 Westland row, Dublin, where any requisite information, and the necessary form can be obtained.

ARTHUR MOORE, Secretary.

SCINDE RAILWAY COMPANY.—

SCINDE RAILWAY, INDUS STEAM FLOTILLA, and PUNJAUB RAILWAY.

At the Eleventh Half-Yearly Meeting of the above Company, held at their offices, Gresham House, Old Broad street, on Monday, 30th September, 1861, W. P. Andrew, Esq., in the chair, the following resolutions were carried unanimously:—

1. That this meeting receive and adopt the Report of the Directors.

2. That the best thanks of the meeting be tendered to the Chairman and Directors for the zeal and ability with which they have conducted the business of the Company.

3. That the cordial thanks of this meeting are due to W. P. Andrew, Esq., for his courteous conduct in the chair this day. W. P. ANDREW, Chairman.

THOMAS BURNELL, Secretary.

Gresham House, Old Broad street, Sept. 30, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

THE EAST INDIAN RAILWAY

COMPANY requires Stores of the following kinds. —Particulars may be seen upon application at the Company's Offices, Alderman's walk, New Broad street, London.

Tools of various descriptions.	Carriage Iron and Brass Work.
Ironmongery, &c.	Glass.
Brass, Copper, and Metal Work.	Cotton, Canvas, &c.

Brushes.	Machinery, &c.
Lamps.	Signals.
Carriage Fittings.	Axle Box Duplicates
	Miscellaneous.

Tenders, which must include all charges for packing and delivery free alongside in any dock or on any wharf in any part of the stream in the ports of London or Liverpool, are to be made on or before 12 o'clock at noon on Thursday, the 10th October next.

Tenders must be sent in in sealed envelopes and endorsed "Tender for Stores, &c."

The Company is not bound to accept the lowest or any Tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, Sept. 23, 1861.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT COMPANY.

The Directors are prepared to comply with all applications for their Debentures at par. They are issued in sums of £50, £100, £500, and £1,000, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in mortgages of improved freehold land of very ample value, the Company by its charter being in every case first mortgagee.

Individuals and public institutions, who usually lend on mortgage, are offered a higher class security than is afforded by the old mortgage system.

The interest is payable by coupons, on the 1st January and 1st July, at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, and the same is receivable through any of the country banks.

The last half-yearly statement and the Debentures may be had at the Company's brokers, Messrs Brunton and Son, Auction Mart chambers, Bartholomew lane, London, E.C.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W,

BRITISH AND FOREIGN INVESTMENT.

Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

THE GREAT FIRE.—

Destructive Fire at the Jarrow Docks Station, on the North-Eastern Railway.—"Collector's office, Tyne Dock, South Shields, 28th Jan., 1861. Gentlemen,—In reply to your favour of the 25th inst., respecting the state and contents of one of your Safes after the fire at this office on the 31st ult., I have to inform you that it was subjected to a very hot fire for three or four hours, and must at one time have been nearly red hot, as the workmen were not able to touch it for two or three hours after the fire was extinguished. On the Safe being opened, the books and cash were found to be in good condition. The cash boxes contained both notes and cheques, the whole of which were quite safe. I am, gentlemen, yours respectfully, R. THUBRON. Messrs. Milner and Son, Phœnix Safe Works, Liverpool, and 47A Moorgate street, City, London." Note.—Another party says, "I have seen the Safe, and it has had a regular roasting. There was a large amount in bank notes and several bags of gold in the drawers, and the principal books above. Everything else in the building was entirely destroyed; nothing left but the bare walls."

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand,

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Now Ready,

London: George Manwaring, 8 King William street, Strand.

THE ATHENÆUM.—

On and after October the 5th the price of THE ATHENÆUM will be THREEPENCE.
Thirty years ago, when THE ATHENÆUM came into the hands of its present Proprietors, its price was Eightpence, and its contents, with advertisements, forty-eight columns. Convinced that the circulation of Literary Journals was restricted by high price, and that every advantage offered to the public would bring increase of circulation and authority, the Proprietors reduced the price one-half—to Fourpence. The experiment succeeded, and cheap Literary Journals became the rule.
The Proprietors have always held to the principle then proved. They have given to the public the benefit of every change in the law, increasing the size without increase of price, until the average has become about sixty columes of literary matter, with forty columns of advertisements, selected so as to be of general interest.
The Proprietors, taking advantage of the abolition of the Paper duty, have now resolved that on and after the 5th of October the price of THE ATHENÆUM shall be reduced to THREEPENCE.

GOOD DIVIDENDS.—

Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C, have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ¼, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

by a Gentleman of good connections, a Partnership in a Ship and Insurance Broker's Business. Can command from £500 to £1,000 capital.—Address A. B., Messrs Baily Brothers, Royal Exchange buildings.

PARTNERSHIP.—

Mr H. SALTER has numerous Clients with capital at command from £500 to £20,000, who are Desirous of Commercial Partnerships. Established firms of good standing and sound position will always save much unnecessary trouble and expense, by communicating with him.—17 Abchurch lane, E.C.

PARTNER WANTED.—

A first-rate opportunity offers for an energetic Man of Business, with a capital of from £1,500 to £2 000, to join in an old-established Engineer and Implement Concern within 20 miles of London, with a Town Agency.—Apply, by letter, to W. W., care of Mr Aird, 18 Exeter street, Strand, W.C. None but Principals need apply.

SITUATION WANTED IN

England by a Young Gentleman (German), having been employed Nine Years at the office of a Manufacturing concern at Hamburg. Qualifications—Book-keeping, German, and English Correspondence. First-rate references. Pretensions moderate.—Address A. B., No. 60, care of Messrs Haasenstein and Vogler, Hamburg.

TO CAPITALISTS.—

A first-class Patent for disposal, now in operation, the Owner not having the means of properly developing it. It is of great household utility and commercial importance, and cannot fail to attract general attention at the coming Exhibition, and realise a fortune to an enterprising capitalist. Purchase money, £1,000, for the Patent, the Stock, new Steam Engine, and Machinery.—Apply personally to Mr H. Salter, 17 Abchurch lane.

COUNTY ANTRIM.
VALUABLE FREEHOLD PROPERTY for SALE.

TO BE SOLD BY AUCTION, at the Mart of Mr HUGH C. CLARKE, 5 ROSEMARY STREET, BELFAST, on MONDAY, the 21st day of October, 1861, at the hour of ONE o'clock p.m.,

All that FARM of LAND, containing 100A 0R 29P, statute measure, or thereabouts, be the same more or less, situate in the Townland of BALLYKEEL, in the Barony of Upper Glenarm, and County of Antrim, as lately in the occupation of Mr Philip Thornton, deceased, and held in fee farm, subject to the yearly rent of £10 16s 11d sterling; besides receiver's fees, duties, and tithe rent-charge.

Adjoining the Dwellinghouse there are extensive Offices and Farm Buildings, recently erected, with Churning and Thrashing Machines fitted up therein; Garden, Orchard, and every convenience for the residence of a respectable family, with an abundant supply of water at all seasons. It is well accommodated with regard to roads.

The Lands are in a good state of cultivation, a large sum having been lately expended in draining, fencing, and liming.

The above Farm is beautifully situated, within one mile of Kilwaughter Castle, two miles of the seaport town of Larne, and fourteen miles of Belfast, between which towns railway communication will be completed within a year.

The North of Ireland will shortly be brought into easy communication with Scotland and the North of England by the short sea-passage about to be established between Larne and Cairnryan, the passage being made in two hours.

For title and further particulars, apply to
Sir EDWARD COEY, Merville, Belfast.
HUGH C. CLARKE, Auctioneer, Belfast; or, to
JOHN M'NEILL, Solicitor, Larne.

Reigate, Surrey.—The Westfield Estate, comprising a capital Residence, with Pleasure Grounds and small Park of about 16 Acres.

MR JOHN LEES has received instructions from the *Proprietor* to SELL by AUCTION, at the Mart, opposite the Bank of England, on Wednesday, October 16, at 12, in one or more lots, unless an acceptable offer be previously made by private contract, a very desirable FREEHOLD RESIDENCE, in the Gothic style, with ornamental grounds, beautifully planted and timbered, and a small Park of undulating land, altogether nearly 16 acres, within a ring fence. This property is delightfully situate on the hill at Reigate, three quarters of an hour's ride from London, about half a mile north of the Town Station, at an elevation of about 100 feet above the railway. The aspect of the house is due south, and sheltered from the north and east by the Reigate and Gatton hills. The soil is dry; water abundant and good. The house is tastefully decorated, and in good order; it contains on the basement—a larder, wine and coal cellar; on the ground floor—dining room 21ft. by 17ft., library with groined ceiling 20 ft. by 12 ft., breakfast room 15 ft. by 11 ft., and drawing room 24 by 17 ft., opening to conservatory 40 ft. long, kitchen, scullery, and butler's pantry; on the first floor there are four principal bed rooms, two dressing rooms, and one servant's room; on the second floor—two bed rooms, but others can readily be formed. There is a two-stalled stable and coach-house, together with the usual out-offices. The kitchen garden is well stocked, and of good size.

Particulars may be obtained of Orton Lucas Esq., Solicitor, 50 Fenchurch street, London; at the Hotels in Reigate, Dorking, Guildford, Horsham, Brighton, Epsom, Croydon, Tunbridge Wells, and Hastings; at the Mart; and of Mr John Lees, Estate Agent and Auctioneer, Reigate, Surrey, of whom alone orders to view may be obtained.

LAURIE'S INTEREST TABLES.
New Edition, 800pp. 8vo, price 21s strongly bound, or 26s in calf,

MANAGER—Henry Thomson, Esq.

AUDITORS—William Barton Ford, Esq.; Alexander Sim, Esq.; John Pasman Tate, Esq.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification, thus adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the mercantile community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust that they will receive such support as will enable them to carry out the system of rating on a classification of goods.

The Directors will, at the expiration of five years, return to Insurers a per centage upon the profits of the fire business.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

September 30, 1861.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE COMPANY, No. 1 Old Broad street, London, E.C.

Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

THE MERCANTILE FIRE INSURANCE COMPANY.

BRITISH AND FOREIGN INVESTMENT.

Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

WINTER SEASON.—

The OATLANDS PARK HOTEL, at Walton on Thames, Surrey, the property of the South-Western Hotel Company (Limited), is situated in a locality famous for its salubrity, and offers accommodation and attractions such as cannot be equalled at any other establishment in the kingdom. Terms moderate. For particulars apply to Miss Dent, the manager. N.B.—Board and apartments by the year.

A.D. 1720.

ROYAL EXCHANGE ASSURANCE CORPORATION,

Medical Referee, Samuel Solly, Esq., F.R.S.

Notice.—The usual fifteen days allowed for payment of Fire Premiums falling due at Michaelmas will expire on 14th October.

Fire and Life Assurances may be effected with this Corporation on advantageous terms.

In the Life Department, assurances are granted with participation in Profits, or, at lower Premiums, without such participation.

The Reversionary Bonus on British Policies has averaged nearly 2 per cent. per annum on the sum assured.

Equivalent reductions have been made in the Premiums payable by persons who preferred that form of Bonus.

The divisions of Profit take place every Five years.

Any sum not exceeding £15,000 may be insured on one Life.

This Corporation affords to the Assured Liberal participation in Profits,—with exemption from the liabilities of partnership.

A rate of Bonus equal to the average returns of Mutual Societies,—with the guarantee of a large invested Capital Stock.

The advantages of modern practice,—with the security of an Office whose resources have been tested by the experience of nearly a CENTURY AND A HALF.

The Corporation have always allowed the Assured to serve in the Militia, Yeomanry, or Volunteer Corps, within the United Kingdom, free of charge.

MUTUAL ASSURANCE WITHOUT INDIVIDUAL LIABILITY.

Extracts from the Report of the Directors for the year 1860:—

	£	s	d
Number of new policies issued during the year 988			
Assuring the sum of.....	481,231	1	10
Producing an annual income of.....	16,053	15	7
Making the total annual income, after deducting £50,112 annual abatement in premium.....	298,251	10	4
Total number of policies issued... 23,573			
Amount paid in claims by the decease of members, from the commencement of the institution in December, 1835..	1,034,368	5	4
Amount of accumulated fund.....	1,898,895	14	11

The effect of the successful operation of the society during the whole period of its existence may be best exhibited by recapitulating the declared surpluses at the four investigations made up to this time.

	£	s	d
For the 7 years ending 1842 the surplus was	32,074	11	5
— 5 years — 1847 —	85,122	8	3
— 5 years — 1852 —	232,061	18	4
— 5 years — 1857 —	345,034	5	11

The next division of profits will be made up to the 20th November, 1862. Policies effected prior to that date, if subsisting at the time of division, will participate in such profit for the time they may have been in force.

The Prospectus, with the last report of the Directors, and with illustrations of the profits for the five years ending the 20th November, 1857, may be had on application, by which it will be seen that the reductions on the premiums range from 11 per cent. to 93½ per cent., and that in one instance the premium is extinct. Instances of the bonuses are also shown.

Members whose premiums fall due on the 1st of October are reminded that the same must be paid within 30 days from that date.

September, 1861. JOSEPH MARSH, Secretary.

The Political Economist.

As the American crisis is so very important to the commercial interests of this country, we have made arrangements for a Series of Letters from a Gentleman of great intelligence, practically acquainted with the Cotton Trade, who is now on his voyage to America to learn, as far as possible, the real facts from personal observation.

A Supplement, containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 6th of April last, will be issued very shortly.

THE *REAL* JUSTIFICATION OF THE INTERFERENCE ON BEHALF OF THE MEXICAN BONDHOLDERS.

Every one will rejoice if the present interference in Mexico should prove successful, and if the European holders of the Bonds of that State should at last receive payment of their just claims. The conduct of Mexico has been so shamelessly immoral—so utterly and irretrievably wicked—that every one will rejoice at seeing that it is at last compelled to regard at least the very simplest maxims of good faith and morality. Every one, therefore, will be glad to perceive that there are good grounds for our interference in this individual case, though it is most necessary to distinguish that case from others which are in appearance similar to it, and with which it may very easily be confounded.

We can imagine nothing more dangerous than that the Government of this country should consider itself bound to enforce the contracts which foreign Governments may have made with English capitalists, or to realise the securities which those Governments may have given to such capitalists as an inducement to them to lend their money. If, for example, the Emperor of Morocco were to require financial assistance, and were to obtain it in England on the mortgage of certain Customs revenues, it would be very dangerous to admit that the English Government ought to go to war with Morocco in the not impossible event of neither the interest nor the principal of the loan being ever paid, and of no part of the Customs revenue being forthcoming. We should tremble for the peace of England if such a principle were once admitted. It would be equivalent to a British guarantee on all secured loans to foreign States. It would be equivalent to saying to the English capitalist: 'Obtain from a foreign Government, an Asiatic or South American Government even, 'the mortgage of 'a specific revenue for your loan to it, 'and we with our army and our fleet will at once put you in 'possession of the dues secured by your mortgage.' If this principle were once admitted, it is not too much to say that the English Executive would become in a brief period little more than a great collector of foreign interest for the English capitalist. There is scarcely a money-lender so cautious as not to be tempted by the security of a specific revenue enforceable by the British Government, and, if needful, collected by the British fleet.

It is not, however, necessary to adopt any such principle as this to justify an interference in behalf of the Mexican bondholders. The Mexican Government has not confined itself to promises to individuals. It has made a specific convention with *our Government* to apply certain revenues to the liquidation of the claims of the bondholders in a certain specific manner. One agreement to that effect was signed at Vera Cruz on the 7th February, 1859, and another, identical in substance, though with modifications of detail, at a still later period. There are, therefore, two positive contracts with our own Government which it is competent to that Government to enforce, and which, if circumstances admit, it will enforce.

It may be said that this only removes the difficulties a single stage. Why should the British Government have asked the Mexican Government to perform the promises to the bondholders, and why should it thus have given itself a *locus standi* for further interference? 'Is not this,' it may be asked, 'much the same in principle as if the British Go-'vernment were to interfere at once to realise the securities 'pledged to the English capitalist?' 'Negotiation is,' it may be alleged, 'a less violent intervention than war; but it is 'an interference nevertheless.'

We certainly admit that the English Government is not bound to negotiate in behalf of English capitalists who have lent money to foreign States. We think it has a discretion whether it should do so or not. In the case of Mexico, our Government thought there was a case of peculiarly gross fraud, committed under circumstances which did not extenuate but enhance its guilt. It therefore voluntarily chose to interfere. The Mexican Government voluntarily chose to promise the British Government to perform its former promises to British subjects. This international contract is as much binding as any other, and as much enforceable. We should be very sorry to see the English army, the English fleet, and the English taxation placed at the mercy of any English capitalists who may choose to lend money to a foreign nation upon specific security: our fleet would soon have little else to do than attend to such claims upon it, and the augmentation of our taxes would be more than the interest on the unpaid loans. But no such danger is incurred if it is clearly understood that the English Government need not even negotiate in such a case if it does not think fit; that it cannot interfere save by negotiation and representation unless it obtains a renewed promise to itself; and that even then it must be guided by circumstances, by the probability of success, by the absence or the presence of more pressing duties, in deciding whether it will interfere by arms to enforce the performance of the contract which

the foreign Government has specifically and voluntarily made with it.

THE PRESENT POSITION OF THE BANK OF FRANCE AND THE EFFECTS OF ITS OPERATIONS UPON OUR MONEY MARKET.

LAST autumn the Bank of France commenced an anomalous series of operations which had a very serious effect upon our money market, and had a large share in occasioning the rapid rise in the value of money at that time. The Bank of France is now beginning a second series of analogous though not identical operations, and it is most material to inquire whether these will or will not have the same effects upon us as the former.

The present operations of the Bank of France appear to be as follows:—The Bank has made a contract with the great house of Rothschild, according to which the latter is to draw bills at three months' date on London for the large sum of 1,000,000*l*, and to place them in circulation upon the French Bourse; and it has made a similar contract with the house of Baring to the extent of another 1,000,000*l*. It is understood to have obtained in Paris some loans upon the stock of the French Government, and it is credibly asserted that it is endeavouring to obtain similar loans hereover and above, and indeed irrespective of, the large transactions which we have mentioned with Messrs Rothschild and Baring.

The effect of these transactions is simple. So long as the bills upon London remain in circulation on the Paris Bourse, they depress the premium now given for bills on London, and prevent the efflux of gold from France to England. If those bills find their way to the English discount market, they will give to the parties who discount them here the power of withdrawing gold to a corresponding extent from this country if they choose to exercise it. In the one case, the effect of the operation will be to retain in Paris specie which would otherwise have been exported from it: in the other case, it may cause the import into Paris of specie which would otherwise never have been sent there, and which, when it is in Paris, will become part and parcel of their general stock of gold, and be subject to be retransmitted here or otherwise, as the state of the exchange market and the law regulating the movements of the precious metals may direct. As far as the public are concerned, the effect of the operation is precisely like that of a mortgage of French *rentes* to an English capitalist in the English money market. It gives to France the command of a certain sum of English money, which it can either use in paying claims upon France here, or transport to Paris to be employed as circumstances may require.

If it were not for erroneous rumours which have got abroad, it would not have been necessary to mention even the *name* of the Bank of England upon the present occasion. It would not be within the usual or within the legitimate business of that establishment to lock up much money for a considerable period of time on large advances upon French *rentes*, nor would it be advisable for it beforehand to agree to discount large quantities of bills which have not yet been presented to it, and which probably do not as yet exist. On the other hand, it would be absurd, and worse than absurd, in the Bank of England to say: 'We will 'reject the bills of Messrs Baring and Messrs Rothschild, 'though we know them to be good, because we apprehend or 'suspect that they are part of an arrangement for 'the convenience of the Bank of France.' The present means of the Bank of England are unusually ample, and if it can use them at a good profit, it should not refrain merely from a fear that it may be facilitating the arrangements of the National Bank of a country with which we are most intimately connected. Good sense dictates that the Bank should pursue the course *which it has pursued*, viz., that it should be a party to no singular or anomalous arrangement whatever; that it should not bind itself in any degree, or in any manner, respecting the future; but that it should discount good bills when it seems suitable so to do.

The position of the Bank of England is a much pleasanter subject than the position of the Bank of France. The latter is indisputably in a position of considerable difficulty. France has had a bad harvest. How bad it is we do not know, but the most trustworthy accounts are among the most unfavourable. She has made very large purchases of foreign corn, more especially in England, and now she has to pay for them. She is under heavy liabilities to foreign countries on other accounts. The late Italian loan, especially, has been largely taken on the French Bourse, and very serious payments will have very soon to be made on account of it. In France as in England, drains of the precious metals have to be met almost entirely from the reserve in the vaults of a single central establishment. The Bank of France has at this moment to find the money for the foreign corn which is necessary for the national subsistence, and for the foreign payments that are necessary to liquidate the national engagements. Unfortunately, it is not in a satisfactory position for meeting a heavy drain. By the accounts published as we write, and which are conveyed to to us by telegraph; it has only a reserve of less than twelve millions and a half, against liabilities amounting to more than 40 millions. This reserve has rapidly diminished of late, and the treasure which the Bank still retains, though very sufficient if it had arrived at the end of a period of difficulty, is not very sufficient at the very commencement of what may be a protracted one. It will at once be said that the Bank should raise the rate of interest, and thereby attract foreign capital from other countries. And the Bank has done so, but it is unfortunately suffering from a long accumulation of previous errors and previous misfortunes, which render the use of this great and effectual remedy very difficult and even dangerous. The Bank of France has not educated the mercantile community of France to bear high rates without excitement and without alarm. Even in England, after a much more instructive experience, and with a much more diffused knowledge of correct banking principles, the mercantile community have only just begun to do so. But in France, until a recent period, the National Bank, on which almost everything there depends, never professed to act on that principle. Even now it has never acted on it steadily for any such long period or with any such consistency as would be necessary to give the general public, which in all countries learns only from its own experience, any sure and satisfactory grasp of it. Until lately, the Bank of France could not by its charter charge more than 6 per cent., its present rate; and even now, under its amended charter, it is obliged to capitalise any additional profits it may make by exceeding this rate. At times of less grave difficulty than the present, the Bank of France has neglected to train the national opinion to a solid confidence in effectual remedies; and now at a crisis of serious moment, it can only use those remedies timidly, anxiously, and nervously.

There is some danger, too, that in the case of France foreign capitalists might act upon the familiar maxim, "high interest, "bad security." It has always been the misfortune of the Bank of France that it is known to have been founded by the Government (by the first Napoleon) for Government purposes, and that no one knows how far it may be ordered to depart from sound banking principles for those purposes. In ordinary times this doubt is not much felt, and the judgment and discretion with which the Bank of France has been managed in most respects, and through many trying vicissitudes, has much diminished its intensity. But a time of difficulty raises every doubt. It is very possible at the present moment that a foreign capitalist may say: 'I prefer '3 per cent. in England to 6 per cent. in France. England 'is a country in which all rates are equally sure; but 'France is, to my mind, in a very different position. We 'do not *know* that France can go through a great panic. Her 'present Government may be capable of sustaining it or may 'not. All is conjecture. She is now in a very critical position. 'She has experienced the pernicious effects of a diminished 'trade, and is about to feel those of another. She has to pay 'large sums for rash investments in foreign countries. She has 'a Bourse which foreigners do not comprehend, and where 'seems likely there will soon be much disaster. She will suffer 'from a deficiency of cotton, which must throw out of employ-'ment into misery an important part of her working classes Her 'great towns—Paris especially—abound in manufactures of 'luxuries which the first breath of calamity, and even of ap-'prehension, throws into disorder, and the operatives in 'which have been the prime agents in many revolutions. 'She is governed by a single man, of great ability doubt-'less, but of peculiar character and concealed intentions; by

'a man who, rightly or wrongly, obtains no confidence in the 'world at large; by a man who, at a dangerous crisis, may 'order something which no one could expect, of which no 'one can anticipate the effects, which may cause sudden 'uncertainty and continued depression. As such is the 'condition of France, I do not think that I shall send my 'money there; at any rate I shall *wait*.' The minds of capitalists are proverbially timid, and there is some danger of their reasoning in this manner, though we are far from alleging that they would be right to do so.

We believe that the Bank of France will have to raise its rate again, and we hope that it will have the fortitude to face the dangers of so doing, considerable as we know these difficulties to be. But if it does so—if it consistently adopts the right course—it is, perhaps, not to be altogether condemned if it uses other remedies, or rather palliatives, at the same time. it possesses good credit and very considerable securities of the very first character. We do not think its managers are, with their peculiar antecedents and in their very peculiar political position, to be much blamed if they employ that credit and these securities to mitigate the impending evils of an alarming difficulty. It is true that the capital which they attract from other countries in this irregular manner is, in all likelihood, the very capital which would have first come to them in the regular manner. The moveable capital of all countries can be attracted, as our own experience shows, by a high rate of interest to a country in good credit, and no other sort of capital can in any manner be touched by the peculiar operations of the Bank of France. Still, in its very difficult position, that Bank may, perhaps, be justified in using all means. At any rate, its error, if it be such, is by no means an inexcusable one.

What, then, will be the effect of these operations upon our market? It may be taken as quite certain that France can borrow a large sum of us if she pleases,—a sum limited only by her credit with us, or with those to whom we may happen to be in debt. Even in ordinary times the transactions of nations are by no means transactions of purchase and sale exclusively. There are not unfrequently intervals between the regular seasons of export and import, during which bills are drawn by the country which has ceased to export *upon credit*, and these drafts are liquidated at an after period when the exporting season has arrived, and the equivalent merchandise is safely delivered at the port of discharge. These bills, though not based upon real transactions, and though in effect a loan from one country to another, are sometimes very useful in preventing the violent fluctuations of the rate of exchange which would be inevitable,—if, for example, all the bills represented by the cotton crop of the Confederate States were drawn at the precise moment when it was shipped, and none at any other period. In that case, a remitter from America would at one time have an immense surplus of bills out of which to take his choice, and at another scarcely be able to find any bills at all to serve his purpose; and in actual practice the demand is equalised by the anticipatory bills which we have described. The use of bills upon credit by France, though more anomalous in principle, and much more liable to abuse in practice, is similar. Bills are drawn in France on London by persons who have good credit in London, and while that credit is unexhausted, France has the means of obtaining and renewing a loan from England.

The inevitable *tendency* of such a loan by us is to raise the value of capital in our market; but whether it will augment the rate of interest which we are now paying is a different and far more difficult question. It may only prevent it from declining still further. France is now very largely in debt to this country. If she could pay us at once in cash, the supply of money in Lombard street would be augmented, and in the present state of that market a small augmentation would cause a diminution in the rate of interest. So far, therefore, as the effect of the present policy of the Bank of France is to prevent the immediate payment of an existing debt due to this country, it will not tend to raise the value of money, but to prevent a further decline in that value.

Again. Even if the effect should be to attract capital from hence, the result may not be in practice different. We are now undergoing a great contraction of our business operations. The state of America diffuses an *uncertainty* through men's minds, which checks business in various quarters, and throws much unemployed capital upon the market. If this process should go on, a further reduction in the rate of discount is not improbable. And experience shows that this is a very potent cause. The effect, therefore, of the impending loan of capital to France may not improbably be rather to check the tendency to diminution in the value of money, than to overpower it and to change it into an advance.

It likewise appears by the telegraphic return just received, that the amount of Rentes and other funds now at the disposal of the Bank is 1,077,861*l*, against 2,180,591*l* at the date of the previous return, showing a decrease of 1,102,730*l*, or 50 per cent. Enormous efforts have, therefore, been made to maintain the reserve at its present amount, insufficient as we have shown it to be under the circumstances.

COTTON AND THE BLOCKADE.

The interrupted supply of American cotton and the consequent advance in price, are producing their natural effects both upon the condition of the operatives and the feelings of masters in Lancashire and Cheshire. "Short time" is becoming very general, and will soon press heavily upon the workpeople. Diminished production and difficult sales and severe losses are beginning to make many of the millowners impatient and some of them unreasonable. There is a sort of indefinite feeling among them, which most experience but which a few only express, that a quarrel which seems so hopeless and objectless ought not to be suffered to continue, and that a blockade which threatens so much distress to the innocent operatives of Europe, should be terminated by the peremptory interference of England and France. We have letters urging this so vehemently and recklessly that we must give a few moments' consideration to their representations.

"Cotton," they plead, "must be had. It is an article of "first necessity to us, just like food. It is monstrous that, "because two folks choose to fight, they should prevent us, "who have no quarrel with either of them, from obtaining "what we need so urgently. It is still more monstrous that "one country, for her own purposes, should hinder another "from sending us what she wants to sell and what we want "to buy. England must not be ruined because the Free and "the Slave States are fools enough to go to war. Let us re- "cognise the Southern Confederacy at once, and insist upon "the North raising the blockade, and at most levying a mode- "rate export duty on the indispensable article."

Now, in the first place, we must remind these correspondents that the recognition of the South by all the Powers in the world would not affect the blockade one iota. The right of blockade belongs to all belligerents, not only to States who call their antagonists rebels. In the next place, the recognition of the South at the present epoch of the conflict would be a distinct and indefensible act of hostility towards the North. It is far too soon to affirm that the latter cannot subdue or re-annex, or entice back, the Seceded States. The war is only just begun; the course of it no man can predict; the North is undoubtedly the stronger, though the South may as yet be the more skilful; but in any case the relative resources and capabilities of the combatants have not yet been tested; and no one has any claim to forestall or anticipate the issue. The independence of the South is not yet established; it is ostensibly uncertain whether it ever will be (though our readers of course are well acquainted with our private expectations); and till it has become an indisputable and patent fact, our recognition of it would be simply premature, indecent, and wholly at variance with our uniform and long-descended practice. We cannot without wrong and insult to the Federal authorities *recognise* that which *is not*, but only desires and *endeavours to be*.

To insist upon the United States ceasing the blockade would be neither more nor less than to declare war against them. It would be to take forcibly their strongest weapon out of their hands. It would be the same as if we interfered to insist upon their fighting the South without Armstrong guns or Minié rifles. If they *can* blockade the Southern Ports, so as to prevent any cotton leaving them, they have just as unquestionable a right to do so, by every natural and by every international law, as they have to shoot Southern

soldiers, or to capture Southern privateers, or to destroy Southern property. This is so obvious that only passion or starvation could for one instant blind any man to its truth, and we ought to apologise to our readers for thus "holding a "farthing candle to the sun." If the Federal army entered the Planting States and burned every bag of cotton stored or growing there, they would be merely exercising the habitual and undoubted privileges of war. We might call them brutes and ruffians, but we should have no claim of redress, and no legal complaint against them. We want the cotton, and are willing to buy it; but it does not belong to us but to the Secessionists, their foes. If, then, they might destroy the cotton, *à fortiori* they may confiscate it, seal it up, lay an embargo upon it. The same argument, which would warrant us in demanding that the cotton shall be allowed to come forward, because we need it *and cannot do without it,* if pushed one step further would justify us in seizing it by force from its owners if they refused to sell it to us—as it is affirmed by some they intend to do. Nay, more: it would almost warrant us in insisting on the Negroes growing cotton for our use, so long as their masters desire them to do so. For if the urgency of our needs is an excuse for one act of unlawful interference and coercion, why not for another?

There is another point of view in which to consider the matter. To violate the blockade or to insist on its cessation would be to interfere in the war. To interfere in the war would be to render ourselves responsible for the conditions of peace. We can have no conceivable right to prevent one combatant from using the most effective weapons he can to subdue his antagonist, unless we are prepared ourselves to compel that antagonist to yield to his just demands. This involves, further, the constituting ourselves arbiters of those demands. Are we ready to do this? Or do we expect that the Americans on either side would for a moment submit to such a pretension? Or can we point to any principle of international law or justice which would warrant such assumption? Again. If we interfere now, the same grounds would be equally valid for our interposition whenever the North and the South shall in future quarrel, and again by their quarrels jeopardise or interrupt our supply of cotton. And as these quarrels are likely enough to be very frequent, we could not effectually gain our end without virtually undertaking the police, guidance, and control *in sæcula sæculorum* of the most proud, turbulent, and unmanageable people on the globe.

Another species of Government intervention has been suggested in order to secure us against a deficiency of cotton—not quite so bold, but almost as questionable and far less effectual. A week or two ago a letter appeared in the City article of the *Times*—not exactly indorsed by that journal, but certainly not repudiated—proposing that our Government should guarantee a minimum price to the importers of all East Indian cottton for (say) a year to come. "India (it was argued) grows enough to fill the hiatus caused "by American withdrawal. Present prices (say 6d per lb "for decent Surat) are quite high enough to draw from India "all we want, if only merchants *could be sure that those prices* "*will continue.* But as they feel no such confidence, and as "they know that a compromise of the American dispute, "which may be effected any day, would reduce those prices "enormously, and entail ruinous losses on enterprising im- "porters, they are not willing to operate courageously, and "the needed amount of the article is not in consequence drained "from the interior and attracted to the ports. All that we "need, then, is that Government shall *guarantee the con-* "*tinuance of present prices,* and the salvation is achieved. If "the American war continues, prices will keep up of them- "selves, and the Government guarantee will simply be a "dead letter, and no expense will have been incurred. If "the war ceases, the loss of a few millions, which the "guarantee will then entail, will be a far less evil than a "starvation of the Lancashire mills; and the price of "American cotton will fall so low (from the artificially "increased supply) that we shall recover virtually a great "portion of the loss from the Americans."

The project seems at first sight ingenious and tempting enough. There are, however, three or four objections, which do not appear to have occurred either to the *Times* or to its correspondent.—In the *first* place, all interferences of Government with the regular course of trade have long ago been condemned by economic science, and experience has demonstrated almost to superfluity that the exceptional emergencies in which such interference do more good than harm are almost always apparent merely. We do not say that no case can by possibility occur in which the interposition of Government might not be warrantable; but we do say that the *primâ facie* arguments against any such case are overwhelming.—In the *second* place, the proposed guarantee would be an act of direct injustice to those merchants, who, on the faith of our adherence to our recognised and avowed policy of non-interference, have sent out their orders and made their calculations. These merchants have perhaps purchased cotton on an estimate of the price which it would reach under the operation of natural, probable, and foreseeable causes. The increased quantity of cotton to be drawn from India by the proposed Government guarantee, would of course lower prices or prevent their reaching a natural level; and all holders of cotton would therefore be deceived and virtually robbed.—In the *third* place, it is by no means certain that the object for the sake of which a great principle had been violated would be effected by that violation. We are by no means sure—for reasons we have repeatedly stated—that the Government guarantee of a minimum price would attract much more cotton from India than we should get without it. Not only the present price, but such a price as may be and is fairly calculated upon for the next six months, will probably bring us all the Surat cotton that is grown within reach of the coast, and it is yet unproved that even a considerably higher and more permanently sure price would bring what is grown a good deal further in the interior.—In the *fourth* and last place, the effect of any such Government guarantee as that proposed—if it operated as is expected—would be (by increasing the supply from other quarters and thus reducing the price which would else be certainly attained) to diminish the inducement of English and New Orleans merchants to obtain as much American cotton as possible, and thus defeat its own end. In proportion as it increased the supply from India, it would diminish the supply from the United States. As we have more than once shown, a very high price in Liverpool would leave such vast profits to all vessels that succeeded in evading the blockade, that such evasions would be constantly attempted, and many of them would be successful. The true way to supply the Liverpool market, we may feel pretty sure, is to allow prices to run up to their natural point as fast as they naturally will.

It is, then, by no means certain that the suggested scheme would materially increase the Indian supply. It is quite certain that it would diminish the American supply. It would violate a great principle; and it would commit undoubted individual injustice.

THE JEALOUSY OF ENGLAND ABROAD.

THERE is something well worth careful analysis in the excessive political jealousy which is entertained of England both in America and on the Continent of Europe. We have had two marked examples of it quite recently. It is not easy to understand why the Czar's hint that he would be happy to negotiate between the North and South should have been ignored indeed, but ignored with courteous and grateful expressions, while the same suggestion with regard to England was received months ago with scorn and contumely. But whatever be the reason, it shows, what nobody doubts, that much less jealousy is entertained in North America of Russia than of England. Again, quite recently we have been told that Count Bernstoff, the new Foreign Minister of Prussia, in search of an ally, greatly prefers France to England on account of that "imperious" character of the English nation which has recently shown itself in the Macdonald and other disputes with Prussia. With regard to the fact itself, we of course have no means of speaking. The recent visit of the King of Prussia to Compiègne, and the elaborate and emphatic compliments which the *Moniteur* has paid to the Prussian army and Generals in commenting on the review of the Prussian troops at Dusseldorf, at least appear to indicate that the understanding between Prussia and France is rapidly improving. And in any case there can be no doubt that the immediate feeling of the Prussian people

towards England is anything but friendly. In Spain, which *is*, after its fashion, constitutional, no European Power is so unpopular as England. And to the smaller Powers, excepting Italy and Portugal and perhaps the Scandinavian Kingdoms we are far less tolerable than France. And yet there is no Power in Europe giving less cause for fear or practically less feared. Prussia, while she cultivates the friendship of France and denounces the "imperiousness" of England, fears France much and England not at all. The American Government, often as it has irritated and challenged England, knew perfectly well that it was quite safe in doing so. And, except Greece, there has been no Power in Europe which has sustained during the present generation any practical humiliation from England standing alone. Even Russia, which suffered in the Crimea more from France than from England, apparently regards France with comparative favour. And if the Czar's anxiety to preserve the American Union as essential to the "balance of power" have any intelligible motive, the reason is probably to be found in his hope that the American navy would, —if the Union be not broken,—soon become a formidable set-off against the English navy. What is the reason of this special jealousy to which England is exposed? We ought at least to know thoroughly the cause of so wide-spread and dangerous a phenomenon.

English foreign policy, though it gives the other nations of Europe little to fear, gives them also little to hope from England, and hence she has few strong friends either among the Governments or peoples. The former know they can rarely rely on her in time of war and never in time of revolution for any effectual help, — the latter know they can never rely on her in time of revolution for any effectual help. Being a naval Power chiefly, her means of reaching the interior of continents is small; and being a commercial and parliamentary Power wholly, there are few cases in which any adequate motive can be brought to bear upon her, — for her rulers can do nothing unless the nation is heartily with them. Now this bias in favour of neutrality removes all fear from other nations,—but, what is quite as important, it removes all hope also. And there is another circumstance which tends in the same direction. The foreign policy of England is generally foreseen by all the world. It depends on no man's will. There is no arbitrary element about it. The Foreign Secretary and Prime Minister are but the spokesmen of a constitutional nation which almost always sympathises with one set of tendencies, and dislikes the opposite set. When there is any chance of our intervention at all, every one knows how it will be used,—to forward a constitutional cause or resist an act of overbearing aggression. There is no hope from diplomatic dexterity in dealing with England. If the Foreign Minister were brought over, he must bring over the House before he could do anything; and no Foreign Minister can bring over the House, though the House can often bring over a Foreign Minister. There is, therefore, little chance of getting England to interfere at all in other nation's quarrels,—and no chance of getting her to resign her *natural* policy by any diplomatic management. That she will take any side at all is generally improbable; but if she takes any side, it is quite certain and by no means open to negotiation what side she will take. Hence the constitutional Governments look on England with little hope; and the despotic with no hope. There is no reward for official complaisance; no great stake for which to play. English foreign policy desires to be neutral; and where it is not neutral, it is determined by means over which foreign Governments have no control. No inducements of their's can win us. First, then, there are no doubtful prizes to play for in negotiating with England. Even Cavour whose cause had English sympathy knew this, and turned to a Government which held more arbitrary powers in its own hand.

But if this were all, there would be no reason why England should be actively disliked. This is sufficient reason why no people and no Government which does dislike England should care to conceal this dislike, or to overcome it. The absence of any real *dread* of English aggression, and the absence of any *hope* of effective aid from England, have simply this effect, that the true sentiments of other Powers are freely expressed towards England, without any anxiety as to the consequences. Most Governments and most peoples look with little fear and little hope to England, and consequently they say what they think, and make no effort to think differently. But why do they think thus unfavourably of us? Chiefly, we believe, because England, while it takes no part, is an exceedingly free and not very tender critic of all that goes on abroad, and has, in the Parliamentary debates, and the *Times* newspaper, authoritative organs of that criticism which all the world identifies with the British nation. No criticisms are so irritating as those of a by-stander quite out of the *melée*, commenting indifferently, with his hands in his pockets, on the weaknesses of all who scuffle and scream beneath him. And that is in effect very much the position of England in political matters. We pity the French and the Americans and the Prussians for their defective institutions and unattained liberties, in a voice which is heard all the world over. We are not speaking expressly for them to hear,—but we speak with no less unpleasant emphasis than if we knew that it could never reach them. Hence our statesmen's despatches, however conciliatory, are read by the light of these often cynical criticisms, and lose all their popular weight. The hostile ones, on the other hand, gain a thousand-fold in sting. And there is no other nation in this position; for there is none other, unless it be the new Kingdom of Italy, in which Parliament and the Press are accepted as the organs of a great nation. When the French Chambers heaped every insult upon Italy, the Italians scarcely felt the attack,—so well did they know that the French Chambers do not represent the French nation. Nor is there any organ in the Press of any other nation that can speak with anything like the national authority of the *Times*, which,—justly or unjustly, —has acquired the repute of speaking the convictions of the majority of the English middle classes, and whose pity or scorn, therefore, bears something like the authority of a national sentiment.

The result is, that the jealousy entertained towards England is partly due to there being less to hope and less to fear from her than from any other equally powerful nation, while her unsparing and often insular national criticisms on the other Powers are more distinctly and authoritatively heard. This is necessarily an irritating position. Standing high above the anxieties of most other nations, our voice is heard commenting on their position with the indifferent *nonchalance* and something of the sarcasm of compassionate pride and occasionally of local prejudices. Towards Prussia and the other German nations especially there is an intolerance and contempt in our manner which is anything but praiseworthy, and has nothing in it of the considerateness of tone which would encourage a nation plodding slowly on our track to the efforts which are necessary to win our freedom. If the German fleet is popular in Germany, why should the English Press shower ridicule on a movement certainly harmless to us and not improbably wise in them? We cannot help the jealousy which our natural freedom of speech excites, and we would not conceal the pride with which our free institutions and political stability inspire us. But we can help that half cynical tone of contemptuous criticism which we habitually adopt towards a nation whose mind is cast in a different mould, and whose freedom grows with slower pace.

Agriculture.

AGRICULTURAL PROSPECTS.

If the actual position of the English farmer of fair capital is not at present one of complete ease, his prospects for the coming year are certainly not unfavourable. The long period of dry weather we have had has enabled him to secure his grain crops in high condition, and to clean his land, necessarily foul from last year's wet, in a very superior manner. Seldom do we experience an autumn so favourable for land cleaning as the present, and no one can have moved about the country without observing the prevalence of weed burning and other marks of diligence and activity in this direction. By common consent, the best time for wheat sowing is between new and old Michaelmas, and on the 11th of October of the present year an unusually wide breadth of wheat was sown. We have not had rain enough as yet to render the clover leys fit for ploughing; but on every other kind of land wheat sowing will soon be completed. The ley lands can be well

sown in wetter weather than the rest of the wheat lands, so that we may fairly regard our wheat prospects, so far as they depend on a good season for planting, as uncommonly good; and a good autumn season goes far to secure a good crop at the succeeding harvest.

The present crop of wheat is beyond all question a short one, but the grain is so good that it will produce a better return to the growers than the wretched crop of last year, besides being very saleable. Other crops will give fair returns. Live stock have suffered from shortness of keep, consequent on the drought; but during the past ten days, the weather having been wonderfully warm, with some occasional showers, the grass has grown prodigiously, so that if there is not a great deal of wet during November, cattle may be kept abundantly in the pastures for some time to come. This will be an important gain, as the hay crops are somewhat scanty. There has of late been sufficient rain to effect much improvement in the turnip crop; and mangold, where a plant was obtained, will produce a large bulk.

While the weather has been so unusually dry in England, South Wales has suffered from superabundant moisture. The *Mark Lane Express* report from that district states that after a good deal of rain, which was not wanted there, "the first half of September was sufficiently favourable for harvest purposes, for the rain never lasted longer than twenty-four hours, which is good for the climate of the Principality; but from the 20th to 25th inclusive, farmers had to suspend labour, and submit to continuous rains, which spoiled some corn a good deal..... Carrying was more than half over before the 20th, and on the 2nd of October most of it had been got in, though in equivocal condition..... ..Last year, the wheat was tolerably well-filled, but badly harvested; whereas, this year, it has been decently harvested, but very poorly filled. However, good plump samples of autumn and early winter wheat may be seen .....April wheat is variously spoken of." Oats are this year better than usual in Wales.

The following summary of the quarterly reports from the more important Scotch counties, which have been furnished to the *North British Agriculturist*, will give a notion of the state of the crops north of Tweed:—

Aberdeenshire.—The grain crops, particularly oats, are above an average both in grain and straw. Potatoes a somewhat deficient crop, and a considerable portion destroyed by disease. Turnips an inferior crop, and much damaged by finger-and-toe.

Ayrshire.—Wheat is the most inferior crop reaped in Ayrshire for many years, while oats are a very superior crop. Potatoes very much diseased—not more than one-fourth or perhaps one-sixth part being sound. Turnips below an average.

Banffshire.—In this county, at the date of our correspondent's report, the grain crops were nearly all in stook, the unfavourable weather prevailing causing considerable alarm for their safety. Oats are said to be bulky. Potatoes much diseased, one-half being tainted. Turnips under an average.

Edinburghshire.—Wheat under an average, but of fair quality. Oats a full average. One-third of the potato crop is diseased, but turnips promise a good crop.

Inverness-shire.—Wheat will generally be a short crop, but the quality is fine. Barley a fair average crop. Oats are above an average in bulk. Potatoes are far from promising, although it is hoped a considerable portion may escape disease.

Kirkcudbrightshire.—Oats, almost the only kind of grain grown in the northern districts, are above an average. Scarcely one-half of the potatoes sound. Turnips under an average.

Lanarkshire.—Wheat of fine quality, but under an average. Oats are a full crop. Beans and peas inferior. Potatoes, except in the choicest soils, an indifferent crop; in some cases one-half to three-fourths being diseased. Turnips an inferior crop.

Linlithgowshire.—Wheat under an average; barley above an average crop; oats a full average, and of good quality; beans yield a fair return. One-half of the potato crop will be lost. Turnips above an average.

Peeblesshire.—Oats are a full average crop; barley under rather than over an average. All other crops grown in the county are trifling, and have little effect on the general average of the crops. Potatoes are affected with disease to the extent of one-half. Turnips considerably under an average.

Perthshire.—Where grain has been thrashed it yields well, especially oats; barley is very varied; wheat of autumn sowing will be good, spring-sown deficient; turnips improving, but below an average. One-third of the potato crop is only fit for the farina mill or cattle feeding.

Ross-shire.—Wheat under an average; oats a full return of fair quality; turnips a fair crop over the county, but many fields affected with finger-and-toe. Potatoes are diseased to the extent of at least one-fourth.

Selkirkshire.—Wheat a fair crop; barley and oats about an average; potatoes suffering much from disease; turnips a fair crop.

Stirlingshire.—Wheat has gone into less bulk than was anticipated before it was cut, and will be below an average. Barley a fair average crop; oats a fair sample, but rather light. Turnips are not coming up to the promise they gave at the 1st of July, and may be reckoned nearly a third short of last year. Potatoes a fair crop, but not equal to last year.

Wigtownshire.—The wheat crop has turned out light and thin; oats almost an average. The potato disease varies in extent to from one-tenth to one-fourth of the crop. Turnips under an average.

Literature.

JAVA; OR, HOW TO MANAGE A COLONY: Showing a Practical Solution of the Questions now affecting British India. By J. W. B. MONEY, Barrister-at-law. In Two Volumes. London: Hurst and Blackett. 1861.

[FIRST NOTICE.]

WE have here a most valuable contribution to the science of Oriental government. The author having practised at the Calcutta bar for about six years, is well acquainted with the social and political state of that part of India. Having occasion to visit Java, he took the opportunity of making a very careful inquiry into the system of government adopted by the Dutch rulers of that colony, and he has collected a mass of information as to their financial and judicial administration which is as important as it is new. He appears to have received the most cordial assistance from the authorities, and to have adopted the best mode of obtaining a thoroughly accurate knowledge of the state of things. His book, however, is valuable not only for the careful collection and lucid arrangement of facts, but because at every step he institutes a comparison between Java and India, in respect to all the great political and social questions of the day. Whatever difference of opinion there may be as to the conclusions he has drawn, there can be none as to the extreme importance of the questions he has raised or as to the ability with which he has discussed them. We have no hesitation in saying that it is the duty of every one interested in the government of India to study these volumes with profound attention.

We have only space to indicate very briefly the main features of the Java administration, and its contrast with the system of government adopted in British India.

However much we may question the justice of the principles of government adopted by the Dutch rulers of Java and so highly approved by Mr Money, there can be no doubt about the wonderful success which has hitherto been achieved. That result is fairly described to be "prosperity and contentment among the people, and good-will between European and native, united with a large revenue and surplus income for the State." There can be equally little doubt that this is not the result we have arrived at in our Eastern dominions.

But it was not always so. Previous to the administration of Governor-General Van den Bosch, which commenced in 1830, there was every year a growing deficit in the finances, which at last amounted to a year and a half's income,—the limits of taxation appeared to have been reached,—the people were in great poverty,—the native chiefs exercised their usual oppression,—and organised crime prevailed among the poor. The first object of the great statesman we have just named was to restore the finances. He persuaded the King of Holland to permit him to make an experiment by which he said the island might be made to yield a revenue sufficient to supply the expense of an improved administration, and to give a large surplus to the mother-country, with a great increase of welfare to the people. The experiment was perfectly successful, and is known by the name of "The Culture System." As the adoption of this system was the foundation of the wonderful prosperity which has made Java so remarkable, and exhibits the peculiar character of Dutch notions of government and political economy, we proceed to describe it.

It must be premised that in more than three-fifths of the subject part of the island, the Crown was *sole owner* of the land, having a right to one-fifth of the occupying tenants' produce and one-seventh of his labour (one day out of seven) as his rent. The greater part of these lands appear to be held in *villages* (as in the North-west of India) belonging jointly to the whole village community, each householder having a share. The Government thus being landlord, the Governor-General's scheme was to turn that position to account, and make the landlord assume the position of capitalist, planter, and merchant. Mr Money says that the landlord had always had the right of directing his tenants' cultivation, so that the peasantry found nothing tyrannical in being ordered to plant with certain valuable products such a proportion of their lands as it was found, after careful survey, could be spared from the area necessary to supply the quantity of rice required for home consumption. Every village was accordingly called upon to plant about a fifth of its land with sugar, indigo, or tobacco, and the cultivators were promised an amount in payment which should make the crop so much more profitable than rice that the money received from it would be more than double the rent assessed on the whole village, while the land sown with the Government crop would be exempted from rent altogether. To show how liberal was the remuneration to the peasant under this system, Mr Money calculates that the same hundred acres which in the year 1830 would have produced 3,960 florins net, produced 6,210 florins in 1857.

The next step consisted in inviting intelligent and respectable Europeans to enter into contracts for the manufacture of the particular kinds of produce so grown. Every contractor was credited with a building and machinery advance sufficient to start the manufacture. The advance was for twelve years *without interest*, and repayable by instalments of one-tenth

in the third and every succeeding year, the works to belong to the contractor at the end of the twelve years. The gratuitous one-day-in-seven labour of the Crown peasants was given him for two years, with such timber and materials from Government land as he might require, besides the use of the Government post-horses. As soon as the mill or factory was ready, the contractor received annually an advance, without interest, of the sum required for the purchase of the produce and the manufacture. It was made optional with him to sell to the Government the whole of the manufactured produce at the price (one-third above the cost) fixed by Government, or to deliver so much of it as would at that rate repay the *yearly* advance and the one-tenth of the *building* advance. The delivery to Government of two-thirds of the manufacture at the contract rate would repay the advance, leaving the contractor one-third for his profit. In the case of a sugar contract, it was found that with the produce of 600 acres, the contractor would thus net in one year from 3,600*l* to 4,350*l*. The contracts ran for twenty years.

Other Government cultures, such as indigo, coffee, cinnamon, and pepper, were carried on without the intervention of contractors, either because nothing was required in the nature of skilled preparation or manufacture, or because, as in the case of *indigo*, it was found that the profits were not sufficient to meet the cost of employing a European contractor. But in all these cultures, the profit derived by the peasantry was so great as to reconcile them to the mild pressure of the Government and to stimulate them to exertion.

The mode in which the Government derives its profit from this system is by selling the produce in Holland at the high price secured to the Government by high discriminating import duties; so that in great measure it is the Dutch consumer out of whose pocket the Java surplus comes, while a smaller portion of the revenue is raised in the same way in Java by discriminating duties in favour of Dutch imports. Another curious link in the chain is that the Government produce is exclusively exported to Holland by a joint stock company called the "Netherlands Trading Society," which received this monopoly (as well as that of importing supplies into Java) in return for enabling Government to introduce its culture system by lending it three millions at 4½ per cent. These advances were repayable out of the proceeds of the system, and were discharged with interest in a few years.

The advantages derived by the colonial revenue from the adoption of this system have been indirect as well as direct, in consequence of the immense increase in the prosperity of the native population, which has led to the creation of new wants and the rapid disappearance of crime.

"The introduction of this system," says Mr Money, "has raised the revenue to 16s 6d per head of gross income, with only 1s 6½d direct land tax, instead of, as in India, only about 5s 0½d per head of gross revenue, of which 2s 8½d per head is taken directly from the soil. With the same gross revenue per head from India which the Dutch derive from Java, not only without impoverishing the native peasant but in making him rich, we should have an income, from the 132 millions of people under our direct rule, independent of the native States, of over 108 millions sterling per annum; not only enough to govern India effectively and to cover it with public works, but leaving surplus enough to pay off the Indian debt, and also to relieve England's taxation, as the surplus revenue from Java now does that of Holland." In fact, instead of a yearly increasing deficit, there is now a surplus of three and a half millions sterling, notwithstanding that the expenditure has been doubled in order to improve and strengthen the civil administration of the country.

Now throughout the book runs the perpetual question, why should not the British Government follow the wise example of the Dutch, and solve all their financial difficulties by the adoption of the culture system? Mr Money sneers bitterly at our slavish subjection to *doctrinaire* theories of free trade, free bargaining, uncontrolled competition, unprotected enterprise, law of supply and demand, as things which, however suitable to European civilisation at the present day, lead to nothing but failure when applied to semi-barbarous races. The only Government for Orientals, he argues, is a "judiciously paternal Government" which will secure the material welfare of the people by doing everything for them, and allowing them to do nothing except by direct permission and under the closest supervision and control. All enterprise should originate with the Government,—all bargains between Europeans and natives should be superintended by Government,—Europeans should neither settle or plant or farm, buy or sell, without direct authority and minute control. The peasantry should be made industrious, obliged to grow what is profitable, forced to keep their houses clean, under penalty, and so on. Whether he would follow the Dutch example of forbidding all education or missionary instruction in Christianity, and of interdicting all political discussions by the Press, Mr Money does not precisely say. But even supposing we were to adopt these Dutch principles of government, there would still remain obstacles to the introduction of anything like the culture system into British India which Mr Money does not appear to recognise. We must not overlook the fact that the proportion of revenue (more than one-half) raised in Netherlands India by Government cultures is not paid by the native population at all. *It is paid by the Dutch people at home.* In other words, the people of Holland and of such other countries in Europe as consume their inferior indigo, their most unpalatable tea, their sugar, coffee, and cochineal, pay nearly five millions sterling for the prosperity and good administration of Netherlands India! How would the English people like to secure improved administration and a financial surplus in India at such a price as this? But even supposing this small difficulty of passing a law for high differential and protective duties on produce imported to England in favour of India were surmounted, there are other difficulties which must not be overlooked. It does not follow that because a colony like Java managed to find produce which the Government could grow and manufacture at a profit sufficient for its small revenue, we should be able to raise the enormous revenue of an Empire in the same way. It was found even in Java that the culture experiment broke down in the case of several of the articles which were tried, and if it had not happened that the climate and soil were suited to sugar, the result of the culture system would have been very different.

Waiving all theoretical objections on the score of such operations being foreign to the province of Government, we say that we have not the data necessary to enable us to judge how far the adoption of any such system in British India would be likely to meet with success. If the Dutch had adopted the policy of free trade, then we might have been able to form an opinion; but as it is, we are unable to calculate how far their success depended upon a system of high differential duties and the taxation of the people of Holland for the benefit of the people of Java.

Considering the immense importance of extending and improving cotton cultivation in India, we should be content to waive many theoretical objections in favour of trying the Government culture system in respect to that product. Capital might certainly be advanced to English contractors of good character and ability, to receive, clean, and press the produce, and English civil servants might be employed to make arrangements with the peasants in ryotwarry villages to cultivate and pick the crop on an improved system at a certain rate of payment. We believe that in course of time they would come to see the advantage to be derived from increased care and exertion, and that the desire of increased gain would stimulate them. But this object would certainly not be achieved with the rapidity and success that attended the efforts of the Dutch officers in Java, for the simple reason that our Government would not consider themselves entitled by law, prescription, or equity, to *compel* the ryots to grow cotton when, where, and how they might think proper. Mr Money ridicules the idea of these ryots having any proprietary rights in the soil, and treats this as only one of the numerous mischievous crotchets which has led to the failure of our administration in India. And he argues further, that compulsion in these cases being for the good of the people, we ought, as a paternal Government, to compel them. If he can prove, in contradiction to all Indian authorities, that the Indian cultivator has no proprietary rights and is only a tenant of the Crown which can impose upon him any terms it likes, he will do what has never yet been done, and remove a great difficulty in applying this Dutch culture system to cotton. Such a system, if practicable, would have one great advantage over the "free bargaining between European and native" in that it would prevent the collision between planter and ryot which has taken place in Bengal. Indeed, we find that even in Java when independent planters were allowed to settle in parts where the culture system had not been introduced, they did not get on comfortably with the ryots. If the scheme which has recently been put forward at Manchester is carried out, it will be through the medium of the system of making "advances" to the cultivators, and that system always leads to mischief when one of the parties is a determined go-ahead Englishman with strong race-prejudices, and the other is an indolent, procrastinating, unstable, quick-witted Asiatic. This "controlling," "protecting," and "despotic" system of the Dutch is no doubt admirably adapted for the harmonious union of English capital and enterprise with Indian labour, to the advantage of both, and without the race-hatreds, disastrous losses, and disgraceful oppression which seem inevitably to follow where the paternal arbitration of the Government is absent.

Mr Money appears to think that the unfortunate disputes which have prevailed of late in the indigo districts of Lower Bengal might have been entirely obviated if the Indian Government had followed the wise example of the Dutch. Indeed, he undertakes to show how the whole difficulty would have been solved, and it is important to see how he would do it. He says: "The Government in India will not give the planter encouragement;" and he proceeds to show what he means by "encouragement." "For want of the simple order of Government which would be cheerfully obeyed by both native landlord and tenant, and would enable the planter to secure a better cultivation by paying a remunerative price, he is driven in spite of himself to resort to other means." Mr Money quite overlooks the important fact that the whole dispute in Bengal was that of "remunerative price," and that it was just because the planters would not pay that price that the ryots refused to grow indigo. He quite forgets that he has himself stated that in Java no planter was allowed to settle except on the condition of paying the *same rates* that the Government paid, and

that those rates were far more remunerative than what the ryots could get by rice cultivation. In Bengal, on the other hand, the planters wanted to force the ryots to cultivate a crop which was *less* remunerative than rice. He furthermore talks of compelling the native landlords in Bengal to permit the planters to make indigo contracts with the ryots, whereas the Dutch in Java allow of no such contracts without the landlords' consent. He adds, that it is too bad that the planter in Bengal should be prevented from developing the resources of the soil by indigo cultivation, because it happens to be in the possession of an ignorant zemindar. But he should have known that the planters have in a vast number of cases bought out the zemindars, so that this difficulty at least has almost disappeared.

Mr Money blames our Indian Government severely for the fact that they have not succeeded in covering India with enterprising English planters; but it appears from his own statements that when the Java Government granted leases of uncultivated land to planters they did not succeed, and this for two reasons:—1st, that the Government neglected, by "authoritative persuasion," to make the peasants cultivate sufficiently for the planters' requirements; and 2nd, that "the high rate of interest for the borrowed funds with which most of the independent plantations are carried on, leaves but little surplus profit for the planter." Here, therefore, we have the conditions which, according to Mr Money's own showing, would be necessary to the success of Indian planters. We may remark as to the second point, that the enormous rate of interest which the Bengal planters pay for their borrowed capital is one main reason why they have got into their present troubles, because it prevents them from paying a proper price to the cultivator for indigo.

Mr Money is equally unjust to the Indian Government in the matter of tea cultivation. There is not a shadow of evidence to show that they ever discouraged the cultivation. Indeed, they established tea farms to pioneer the way to private enterprise. The Indian tea planters were in want of capital and of labourers. In Java, Government advanced the capital, and there was no want of labourers. That quite sufficiently accounts for the fact of the greater degree of success which has attended this cultivation in Java, as compared with India. Remarks like these scattered through his work show that Mr Money has not altogether escaped the influence of the violent spirit of opposition to Government which distinguishes Calcutta society.

THE NATIONAL REVIEW. October. Chapman and Hall.
THE WESTMINSTER REVIEW. October. Manwaring.

THE "National" opens with an article on a subject of great importance, under the emphatic title of "Principle and No-Principle in Foreign Policy." The article is throughout marked by much more than average ability, but the writer appears to us to be far more able and successful as an expositor of the *diagnosis* of public and ministerial sentiment and motives on foreign policy, than as an enunciator of an exact theory of international law. Nothing can be more masterly than his statement of the changes which time has wrought in the elements of foreign diplomacy, and of the inconsistent and crude impulses under the alternate or combined influence of which the foreign policy of this country drifts helplessly along, saved by the inherent strength of the nation and the substantial integrity of the national sentiment from total shipwreck, but on that account only the more lamentable spectacle of wasted moral energies.

Now the point on which we wish to fix attention is, that these changes in external facts, this multiplication in the elements of the problem, and this entire subversion of ancient economic doctrines, render it absolutely imperative upon us to reconsider all our maxims of international policy, and to frame new and steady principles of action applicable to the altered world, if we wish either to influence others or to respect ourselves. It will never do to go on repeating the old formulas, talking the old language, running in the old ruts, quoting rules out of which all the meaning has departed, whining after dead and buried possibilities, speaking as if we still believed in the incredible, and hoped for and were intending to attempt the unattainable. We could scarcely need a clearer proof, or a more telling instance of the want of some such revision and reconstruction of our code of foreign policy, than the language and conduct of our ministers at this moment in reference to Austria. According to traditional ideas, Austria is our natural, ancient, and faithful ally, our bulwark against France, a mighty power, a European necessity. This is what Lord Palmerston and Lord John Russell *say*, and—do not think, but—have not got out of the habit of fancying they think. But the warmest sympathies of the British nation, and to a certain extent their own, go along with the two provinces which are seeking to release themselves from, and virtually to dismember, this ancient ally and necessary empire—with Hungary in her constitutional claims, with Venice in her intolerable wrongs. The English *ministers* would fain keep Austria erect and complete: the English *people* would fain strip her of her Italian and Magyar subjects, whom she has so robbed and trampled on; and between the two conflicting sentiments, not yet fused into a principle, the English *nation* is vacillating, paralysed, and powerless.

But when the writer exchanges his function of an expositor of facts for one of theories, his sagacity and clearness seem to desert him, and, after elaborating a complete theory of non-intervention, and intimating that the alleged exceptions to it are apparent only, he refutes himself, on this point, by honestly owning in several specific cases that it is difficult, if not impossible, to see how the theory could be applied to these. Nothing, for instance, can be more absolute than his rejection of his own theory in the case of an intervention with Mahometan States in behalf of oppressed Christians. The writer admits that "the instincts of common humanity, as well as those of religious sympathy, forbid a passive spectatorship. On the other hand," he candidly allows, "it seems equally difficult to argue that we may justly afford to men who are suffering for their religion, or striving for its free exercise, an assistance *ab extra* which we may not render to those who are suffering for their love of liberty, or striving for those civil rights which are as indefeasibly sacred as freedom of conscience and of worship." And he concludes:—

On the whole, we do not feel prepared to lay down any positive dictum on this branch of the question, or to pronounce that no case or degree of religious persecution can warrant armed foreign intervention. But assuredly the case must be marvellously strong and marvellously clear, and each instance must stand upon its own merits. What Burke said in reference to revolutions will apply here. "Times, and occasions, and provocations, will teach their own lessons. The wise will determine from the gravity of the case; the irritable from sensibility to oppression; the high-minded from disdain and indignation at abusive power in unworthy hands; the bold and the brave from the love of honourable danger in a generous cause;—but, with or without *right*, intervention will always be the very last resource of the thinking and the good."

We are quite of Mr Burke's opinion, and are only sorry that the writer of this clever article did not see its more general applicability, and save himself from a useless expenditure of theoretic ingenuity.

The article entitled "Medieval English Literature—Piers Ploughman," is an ethical and historical commentary rather than a literary criticism. The text of this celebrated medieval satire is employed as a vehicle for a review of the social characteristics of that age. In this point of view the article has considerable merit. The "Great Arabian" is the title of an admirable and most interesting sketch of the career of Mahomet, considered as a legislator and prince. It supplies, indeed, a great desideratum in English literature,—a condensed yet animated account of the career of one of the master-spirits of the world. The student will naturally seek for fuller information from the volumes of Mr Muir, which form the text for the article—but to him also this independent though sympathising sketch will form a useful and agreeable preliminary to a more elaborate study of the subject, while to the general reader, who might shrink from the learned apparatus of Mr Muir's volumes, such an abstract of the latest results of historical researches into the life of the Prophet of Mecca will be very valuable. The "Science of Language" is a title which speaks for itself, and will recommend the article to a select circle of readers. Its hero is Professor Müller. "Street Ballads" is a new subject, handled in a lively and amusing manner. These flowers of native genius, the writer tells us, are in the last stage of their existence, to be replaced by newer exponents of popular feeling. It is, perhaps, well for the future historian of the "Decline and Fall of England" that there is a chance of his being speedily relieved from such embarrassing materials of history as the following biographical fragment of Lord John Russell's career:—

> I'm the son of old Bedford, I'm going to Deptford
> To look for employment, and find out a friend,
> And then I'll come back with a pack on my back,
> Bawling frying-pans, saucepans, and kettles to mend.
>
> I have lost all my riches, I have worn out my breeches,
> I am turned out of place, and have nowhere to go,
> My state is most shocking, great holes in my stocking,
> And my poor tender toes peeping out of my shoe.

Professor Strauss and the "Westminster" Reviewers ought surely to pension "John Morgan" for this admirable illustration of the mythical expansion of a single fact.

"Tracts for Priests and People" is a theological article of breadth and grasp, the topics discussed in which will be familiar (if incomprehensible) to the large class of readers of and dippers into "Essays and Reviews." The article "Is Cotton King?" is clear, but hypothetical (as must necessarily be the case) to an extent which of course detracts from its practical utility. It is well, however, to talk over calmly all the possibilities, even if we are obliged after all to arrive with the writer at the conclusion that "everything is harassingly uncertain." The quiet and philosophical logic of the concluding article, "The American Constitution at the present Crisis," will be much appreciated by those—and how many does not that include?—who are perplexed and disgusted by the outrageous and self-contradictory statements of the ultra-partisans of the two belligerent federations. The writer has escaped from the passions of the present controversy back to the origina of the American Constitution; and, arming himself there with facts and philosophical inferences, has descended with the natural *stream of causes* and events to the existing crisis, with a commensurate power of separating incidental from essential features in the contest, and of anticipating, so far as any contemporary can, the verdict of history. The American Constitution, he concludes, always contained the seeds of disunion, and such a crisis might have been expected to arise at a much earlier epoch than it really has. The founders of the Federal Constitution left the democratic essence of the Government unchanged, and the ingenious devices by which they

endeavoured to guard against its characteristic vices, while they have themselves "produced painful evils, and exaggerated great dangers, but have failed of their intended purpose,—they have neither refined the policy, nor restrained the people."

The most striking article in the "Westminster" is the first, on the "Study of History," *apropos* of, and in answer to, Mr Goldwin Smith's recently published lectures on that subject. The article is valuable, as giving us in a more exact form the views and some of the arguments of the scientific school—that of Comte and Buckle, against which Mr Kingsley and Mr Goldwin Smith wage a war to the knife. We must not now enter on a consideration of the arguments of this school, ably and clearly as these are set forth in the present number. Certainly, however, the *difficulties* attending the preliminary steps towards such a scientific method are not disguised by the writer:—

In the first place, we need a general knowledge of the leading instincts and capacities of man. For this we require at least some of the laws of human life and of the human organisation which involve some general science and a basis of logical belief. We need also a knowledge of the natural and necessary institutions of human society, and of the paramount laws of human development. Having these we need a truly complete survey of history, especially of its earliest and simplest phases. We need to regard all history as a whole, and to connect it with the rest of our knowledge. Lastly, we need to study it with a purpose, and value it for the use to which we can turn it.

"After all," continues the writer, "social science must establish itself by visible results;" but surely, if we are to await visible and generally acknowledged results from such an enormous, complicated, and subtle inquiry as that sketched with such apparent unconsciousness of its real magnitude, we may as well for all practical purposes abandon the subject altogether, or fall back on some less omniscient or more immediately attainable judicial apparatus. "Biography, Past and Present," supplies the topic for a sensible and very agreeable paper. We confess that we do not admire the spirit in which the article on "Count Cavour" is conceived and written. They are no true friends of the departed statesman who endeavour to exaggerate his undoubted greatness by narrow detraction and unworthy insinuations against those, who, if mistaken in some points, had a distinct and in its essence a noble policy of their own, and through it at any rate escaped one imputation to which Cavour was always subject—too great versatality and an excess of *finesse*. The "Westminster" gives us its own version of the contents of the "Apocalypse," and from this we may be thankful that the book itself exists for our personal inspection, the *inferential* element in the article rather overriding the simply expository. We scarcely recognised some of the more familiar passages in their new sceptico-poetical dress. The "American" article in the "Westminster" is historical and statistical rather than philosophical or argumentative. Its general spirit, taking this into consideration, differs little from that of the contemporary article in the "National." The number closes with an "independent" article, by Professor Beesly, on "Trades' Unions," containing an amplification of the arguments urged in the letters of "the eight gentlemen" to the *Times* newspaper. Our readers will judge for themselves, from the experience of practical life, how far the statements and arguments of Mr Beesly are warranted by the stern realities of things.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The arrangement which has been concluded between the Banks of England and of France, or which is about to be concluded, will no doubt before this letter reaches you be known all over London. According to what is said here, the Bank of France applied to the Bank of England for an advance of 50,000,000f (2,000,000*l* sterling), and the latter expressed its readiness to afford the accommodation in any manner not interdicted by its statutes. Lending to a foreign bank on deposit of foreign securities (all the Bank of France had to offer) is prohibited, and accordingly this arrangement was made:—Bills, amounting to 2,000,000*l* sterling, were drawn by or for the Bank on some great London firms:—Messrs Baring, Messrs Rothschild, Messrs Hambro, and Mr Dobree are specially mentioned—and were accepted by them; the Bank transferring to them as security for their acceptances a sufficient amount of French *rente*. The bills are to be discounted by the Bank of England, and the proceeds are to be remitted to Paris. If this should not be the precise arrangement made, it is one very like it that will be adopted. Thus then (if this statement is exact) the Bank of France has had to have recourse to the not very agreeable expedient of raising money on accommodation bills; but, under the circumstances, it was perhaps the only one it could employ. It might, to be sure, as some persons have recommended, have sold some portion of its *rentes*, the value of which is very large, the revenue from them having last year been not less than 7,652,358f; but a sale of *rentes* would have presented the inconvenience of causing a profound depression in the money market, and would besides have disturbed a source of income which the Bank Directors are very anxious to keep intact. The 50,000,000f will give relief to the Bank, but will hardly, it is thought, enable it to battle through the existing crisis. But some persons say that if the Bank succeeds in its present operation, it will soon be an applicant for another 50,000,000f at London.

Some of the journals having published most exaggerated accounts as to the quantity of English and Belgian goods brought into France since the 1st of October, when the commercial treaties with the two countries came into full operation, and having complained that French manufactures must be ruined by the competition to which they are exposed, the Government has had published in the *Moniteur* an article which shows that, though in the month of September a considerable quantity of Belgian and British goods were brought into France and placed in bond, a much smaller quantity has been taken out of bond for consumption than might have been expected. In proof of this statement, the *Moniteur* publishes the following table:—

Customs Houses.	Duties levied.	Value of Goods taxed ad valorem.
	f	f
Paris	*759,903	3,474,235
Lille	50,551	250,372
Rouen	36,803	191,891
Lyon	25,255	141,469
Bordeaux	14,337	70,966
Marseilles	13,337	27,131
Mulhouse	7,477	11,207
Jeumont	1,011	10,113
Le Havre	865	5,364
Total	999,579	4,188,778

* In the 779,903f set down for Paris is included a sum of 177,523f for goods taxed by weight, and of which the value has not yet been fixed.

Any one who takes the trouble to examine the shop-windows of Paris will convince himself that the statement of the *Moniteur* is exact, the shops in which English goods are exhibited being singularly few. This certainly is surprising, seeing that an eager demand for the wares of our country was considered inevitable; but, as I said on a previous occasion, French traders are not very willing to go out of their usual routine to push the sale of new articles, especially when those articles compete with the stocks on their shelves, and English importers, on their part, seem to have taken no measures whatever to reach the public who purchase by retail. All this, however, is merely temporary.

The arrivals of wheat at Marseilles are becoming very important. In two days of the present week upwards of 123,000 hectolitres arrived. The following at the present moment may not be without utility:—

Years.	Imports of wheat & flour (the latter reduced into wheat), deduction made of exports. hectol.	Exports of wheat & flour (the latter reduced into wheat), deduction made of imports. hectol.	Average price per hectolitre (22¾ gals) f. c.
1846	4,722,722		24 5
1847	9,884,337		29 1
1848	...	662,823	16 65
1849	...	2,936,070	15 37
1850	...	4,313,733	14 32
1851	...	4,716,387	14 48
1852	...	2,073,137	17 23
1853	3,736,603		22 39
1854	5,303,789		28 82
1955	3,670,665		29 32
1856	8,752,112		30 75
1857	3,482,803		24 37
1858	...	4,594,090	16 75
1859	...	6,726,213	16 74
1860	...	4,062,775	20 24

It is calculated that this year's deficit will certainly exceed 10,000,000 hectolitres, so that it is more grievous than that of the calamitous year 1847, and that of 1856. But, on the other hand, the cost of bringing grain to this country, and of distributing it, has undergone a considerable decline. In order further to reduce the expense of distribution, several departmental Councils General have called on the Government to abolish the duties it levies on conveyance of grain by canals.

Complaints were, as you have been informed, loudly made against the Board of Customs for having during two or three months, in its monthly returns of imports and exports, omitted flour and grain, the two most important articles at the present moment. In the last monthly return the Board, as you may have noticed in the table printed in last ECONOMIST, supplied the omission; but, extraordinary to relate, it turns out that the figures given were erroneous, and the Board has had to publish a table of *errata* in the *Moniteur!* If the omission were considerable, what is to be said of erroneous figures, which at this peculiar juncture might have the effect of leading astray the entire corn trade and reducing many of its members to absolute ruin? According to the tables published (they were given in last week's ECONOMIST) the total export of grain of French production in the eight months ending in August was 991,652 quintals, and that of flour 103,526; but in reality only 539,177 quintals of grain were sent out of the country, whilst the quantity of flour was 260,066 quintals. In "General Commerce," that is the production of France *and* foreign countries (which the ECONOMIST did not notice), the export of grain was represented to be 1,518,250 quintals, whilst in reality it was only 656,604; and that of flour, which was put down at 113,786

quintals, was in reality 442,279. The returns respecting the imports and exports from Algeria were also erroneously given. Such "mistakes" as these are truly deplorable; and when they are made at a time when a correct knowledge a few days in advance of the state of imports and exports may be worth thousands of pounds to any particular trader, they give rise to the most sinister interpretations.

The 656,604 quintals of grain French *and* foreign, which were exported in the first eight months of the present year, consisted of 361,665 wheat, 101,879 barley, 50,971 maize, 27,918 oats, 114,171 other grains. The 539,177 of *exclusively French* exports consisted of 319,327 quintals of wheat, 84,024 of barley, 17,864 maize, 22,802 oats, and 95,160 of other grain.

As the returns of the Savings Bank are an admirable criterion of the situation of the working classes, I have taken the trouble of comparing those of the last three months,—July, August, and September,—with the corresponding periods of the two preceding years. The result is not very satisfactory as regards the present year. Thus, whilst the deposits in the said three months in 1861 were 5,635,648f, they were in the same period of 1860, 5,883,031f, and in that of 1859 (a year of wars and loans), 5,801,980f; and whilst the withdrawals in the present year were 5,128,641f, they were in the same period of 1860 only 5,041,807f, and of 1859 only 4,244,986f.

The following were the quotations of the Bourse:—

Subjoined is an account of the markets:—

FLOUR, at *Paris*, has declined, and sales are difficult. Yesterday, the quotation was 85f to 90f the sack of 159 kilogs. Spanish was offered at 88f to 90f; Northern at 89f; but there were no purchasers. Four marks were at 86f 50c for all epochs.

WHEAT.—At *Paris*, yesterday, business was not active, and the quotation was 44f to 48f 75c and 50f the sack of 120 kilogs, the last two, however, being for exceptional qualities. In foreign, English was 47f to 49f and 50f; California in demand at 48f to 50f; America offered at 42f to 44f. As to the provincial markets, 13 present a rise of from 5c to 1f 10c the hectolitre, 85 a fall of 10c to 2f; 6 are reported firm, 29 without variation, 12 calm.

COTTON.—At *Havre*, in the week ending Friday, business compared with that of the preceding week was very slack, and prices receded. The sales were 5,986 bales to 137 arrivals. The closing prices were 2f lower for the very low qualities, 2f to 3f for low, and 1f to 2f for very ordinary and other sorts; consequently, very low New Orleans was at 125f the 50 kilogs; low ditto, 134f; and very ordinary, 139f. The stock, on Friday, was 184,400 bales, against 162,500 at the same date in 1860, and 68,200 in 1859. This week, business has been very animated, and prices improved yesterday: the very low went at 128f, and low, 137f to 138f.

COFFEE.—At *Havre*, in the week ending Friday, business was not very animated, but prices were firm. The sales were 1,359 sacks Hayti Port-au-Prince, disposable or for delivery, at 82f to 83f the 50 kilogs in bond; 70 Cape, 84f 50c; 157 Rio, not washed, disposable, 74f; 1,000 ditto, for delivery, half at 75f 50c and half 77f; 720 ditto, for delivery, 75f to 76f 50c; 3,800 Santos, 78f 50c. By auction, 153 sacks Java damaged, 772 Padang ditto, 232 Ceylon, and 54 East India were disposed of; also 15 sacks Rio, sound, 97f duty paid. The arrivals were above 3,400 sacks. The stock on the 1st October was 67,665 sacks 1,375 casks. This week, Rio, washed, has been at 80f to 92f; ditto, not washed, 73f to 75f 50c; Hayti, 83f 60c to 84f. At *Bordeaux*, in the week ending Friday, 81 plantation Malabar went at 121f 50c to 122f; 6 Santiago, 104f. This week, Costa Rica, damaged, went at 207f to 217f the 100 kilogs. At *Marseilles*, last week, the sales were 1,300 Rio disposable, 72f; 2,380 ditto, 75f; 400 ditto, 76f; 2,020 sacks, 65f to 76f. This week, Brazil has been at 65f to 65f 50c; Santiago, 100f to 110f.

SUGAR.—At *Havre*, in the week ending Friday, business was dull, but prices were firm. The sales were 93 casks French West India at 46f, duty paid, the 50 kilogs; 148 ditto usine, 53f 50c to 54f; 451 Cuba, 46f; 12 Trinidad, 46f 50c; 2,122 Havana, 34f to 34f 50c in bond. By auction, 1,544 casks Havana damaged were also disposed of. The arrivals were above 4,200 casks. The stock of French West India on the 1st October was 14,000 casks. This week, French West India went at 46f. At *Nantes*, last week, the sales were 3,187 sacks Reunion, at 50f; 9,835 ditto, 49f 12½c; 9,017 ditto, 50f 12½c; 4,139 ditto, 49f; 2,269 Mayotte, 42f; 800 ditto, 51f; 44 ditto, 32f. This week, no business has been done. At *Bordeaux*, last week, the sales were 4,000 bales Reunion, at 56f; 130 casks French West India usine, 58f; 825 Santiago, 45f 50c to 46f. This week, French West India has been at 47f; Santiago, 45f 75c.

INDIGO.—At *Havre*, in the week ending Friday, business consisted only in the sale of 35 chests Bengal, at 2f 50c to 2f 25c above the estimates. The arrivals were 57 chests, and the stocks about 850. This day, the sales were 4 chests Bengal at secret prices. At *Bordeaux*, last week, some chests were sold at prices not stated. This week, the sales have been 47 chests Bengal, and 9 ditto Kurpah; prices not stated.

HIDES.—At *Havre*, last week, business was animated, and prices were firm. The sales were 1,124 Buenos Ayres dry, at 100f to 105f the 50 kilogs; 5,100 La Plata salted saladeros, 65f to 67f for cow and 70f to 71f for ox; 715 ditto ditto mataderos, 51f to 52f; 1,814 Rio Grande salted cow, 65f; 400 Pernambuco drysalted, 83f; 250 Rio Janeiro salted, 48f; 1,223 Valparaiso salted, 64f; 3,073 New York salted, 42f for somewhat damaged articles, and 46f to 47f 50c for the rest; 400 horse La Plata dry, 9f each. The arrivals were 8,864. This week, Buenos Ayres dry has been at 120f for cow and 140f for ox; Valparaiso salted, 60f for ox; Monte Video, 71f; Pernambuco salted, 55f; Monte Video dry, 105f to 115f; Rio Grande salted cow, 66f to 67f.

WOOL.—At *Havre*, in the week ending Friday, business consisted only in the sales of 95 bales La Plata, not washed, at 1f 40c to 2f 67½c the kilog. The arrivals were 1,042 *bales*. This week, Buenos Ayres, not washed, went at 2f 50c; Monte Video, at 2f 35c to 2f 52½c.

ANTWERP, Oct. 9.

The importation of coffee into this place from the 1st of January to the 30th of September were 233,143 bales; same period last year, 184,847: the stock on the 30th of September was 28,000 bales; same date last year, 24,500. The import of cotton in the first nine months of the present year was 39,165 bales; for the same period of last year 47,539.

Correspondence.

THE SUPPLY OF COTTON.

Constantinople, September 25th, 1861.

TO THE EDITOR OF THE ECONOMIST.

SIR,—As very great anxiety is felt at the present moment with regard to the future supply of cotton, I presume that any information which can be obtained upon so important a subject will be of some interest to your readers, and I am, therefore, desirous of directing the attention of those concerned in the matter to the facilities which exist for the growth and improvement of that plant in Turkey. The natural advantages possessed by Turkey, in her soil, climate, and geographical position, offer every inducement to the capitalist, and few enterprises would, perhaps, be more profitable at the present time than one having for its object the improved cultivation of cotton in this country.

In the department of Salonica, cotton is grown to a considerable extent, but it is principally gathered in the district of Sèrès, a city of Macedonia, well known in European Turkey for the richness of its market, and situated, fifteen leagues to the north-west of Salonica, in the centre of the great valley through which flows the river Strymon. The annual harvest of cotton in the valley of Sèrès has lately very much decreased, but fifty years ago it was estimated at 70,000 bales, of which 30,000 were exported to Germany, 12,000 to France, 4,000 to Trieste, 1,500 to Leghorn, and as many more to Genoa. At present, however, nearly all the cotton goes to Germany, whence Sèrès takes jewellery, ironmongery, cotton, woollen, and silk manufactured goods, &c. At the annual fair of Sèrès, held from the 20th February to the 30th March, 1860, imported goods were sold as follows:—

	£
From Austria and Germany	64,425
— Great Britain	17,500
— Turkey	8,827
— France	4,916
— Holland	648
Total	96,316

From the above figures it will be seen that the Germans have nearly a monopoly of the trade in consequence of the preference which they give to the cotton of Sérès. It has been estimated that Macedonia produces 800,000 imperial quarters of corn, 100,000 bales of tobacco, and 80,000 bales of cotton; yet only one-fourth part of the land is under cultivation, and even that part does not yield one-third of what it is capable.

Cyprus produces annually about 1,260,000 lbs of cotton, but its growth in that island is capable of very great extension. In the southern and western parts of the island of Rhodes, there are plains containing about 4,000 acres of land belonging to the Government, in every way adapted for the cultivation of cotton. In the neighbourhood of Brussa, experiments have been made from New Orleans seed, and Mr Sandison, Her *Majesty's Consul*, informs me that "the samples were very favourably reported upon, and give promise of the valuable addition being made of superior cotton to the products of Brussa."

In the province of Diarkbekhr, and, in fact, all over Asiatic Turkey, particularly in Mesopotamia, cotton could be grown to almost any extent; and when it is considered that Turkey in Asia possesses an area of 673,746 square miles, with a population of but 16,050,000, giving only 23.8 to the square mile, it may be imagined what vast tracts of fertile land are there lying unproductive. Vast tracts where water is plentiful and the soil most fruitful could be easily obtained on the easy terms of paying to the Government 10 per cent. on the value of the produce in lieu

of rent, and the cultivation of cotton for the English market would not only be a remunerative enterprise for those engaged in it, but, while benefiting to a very great extent the condition of the native population, would at the same time increase considerably the revenues of the Turkish Government.

Towards the end of the last and the beginning of the present century, when the production of cotton in America and in Egypt was still very limited, large shipments of cotton were made from the port of Smyrna (Asia Minor) to Europe, chiefly to Venice, Genoa, France, Holland, and, a small portion, to England. In the mercantile books of the few European firms then existing in Smyrna, the annual export of cotton is often mentioned as attaining a quantity varying from 150,000 to 200,000 bales. Mr R. J. Van Lennep, the present Dutch Consul-General at Smyrna, has mentioned to me that the old Dutch house of David Van Lennep and Co. used to ship, at that time, to the Netherlands and to Venice, about 50,000 to 60,000 bales per annum. When the war broke out, however, towards the end of the last century, shipments of cotton from Smyrna became a hazardous speculation, as during the French occupation of Egypt many cargoes sent from Smyrna to Europe were seized by privateers and sold in Malta. This state of things continued, with intermittent facilities or difficulties, until the years 1814 and 1815, and must have been very prejudicial to the growth of cotton in Asia Minor, for I find from copies of letters written in Smyrna during these two years that the annual exportation is mentioned as having been only about 70,000 bales. In 1820, just before the Greek revolution, the yearly exports of cotton from Smyrna were estimated at 40,000 to 45,000 bales, but since the year 1840, until very lately, the crop of cotton in Asia Minor has never exceeded 8,000 bales a year, of which not more than 2,000 to 3,000 bales were exported, the balance being required for home consumption. Recently, however, prices have increased, and the peasants appear to pay more attention to its cultivation. During the past year (1860) seven thousand bales of cotton were exported, and it is calculated that the exports in this year will amount to 14,000 bales. The localities in Asia Minor producing cotton at present are Souboudja, Kirek-Agadjé, Canaba, Kinck, and Baindir. Formerly, cotton was also grown in Magnesia, Menemen, Aidin, and in almost all the flat and level parts of the country. Tarsus and the neighbourhood of Satalia, as well as the island of Cyprus, were large cotton districts.

In Syria, the cotton plant has been produced for ages, but, owing to the defective mode of cultivation, and to the want of new seed, the quality has degenerated. An experiment has, however, recently been made with seed from America, and the sample of the quality produced has been pronounced fully equal to the cotton of New Orleans. Vast tracts of fertile land are lying waste in Syria where cotton could be advantageously grown. The waste lands on both sides of the Euphrates, the valleys of the Bekaa and Baalbek, the plains watered by the Orontes and the Jordan, as well as those beyond Damascus, and in the neighbourhood of Tarsus and Alexandretta, are capable of producing cotton to an almost unlimited extent.

There can be no doubt, therefore, entertained as to the possibility of an immense increase of the quantity of cotton grown in Turkey. The two great desiderata are, the introduction of new seed and the substitution of a better mode of cultivation to that now pursued; but complete success can only be achieved by means of European enterprise and European capital.—Yours, truly,

J. L. FARLEY.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following commercial intelligence is dated Bombay, Sept. 12:—The import market continues in an excited state, a somewhat new set of dealers, called the Guzeratees, being the principal speculators. The staple goods have well maintained their former value, and in several instances a further advance was established. Latterly, however, the dealers have evinced less inclination to buy. The produce market is rather quiet, but well maintained, owing to extreme scarcity of stocks. Cotton—There has been but a small business done in this staple during the past fortnight. Buyers do not seem disposed to enter into operations for ready cotton, the stock of which is very small and of inferior quality, and available only without selection. New cotton commands a better demand, and is sought for future delivery; but no extensive transactions have taken place, in consequence of holders demanding extreme prices, which buyers are unwilling to concede. Since the arrival of the English mail of the 19th ult. prices have undergone a slight decline, and speculation is less active among the natives.

The following intelligence is dated Quebec, Sept. 27:—Since the 13th instant, the demand for square white pine, particularly for small averages, has been active, and in one case a shipper paid as high as 7d per foot for a raft of 54 feet average. Larger averages have fetched 7½d to 9d, according to quality. Looking at the unusually large fleet, lumberers are likely to get high prices during the next few weeks. In board wood little has been done, the cutters being able to hold it. Red Pine—Shipments have been heavy, and prices are firm. Elm—A small lot of 81 feet fetched 9½d; larger is offered at 1s to 1s 1d. Oak—A large sale of prime has been made at 17½d. Birch—No sales. Staves are firm at 45l pipe, and 13l pun. Deals—Dry floated are held at 14l; bright, at 14l 10s to 15l: some first were sold at 18l. Coals—Arrivals heavy; they fetch 17s 6d to 22s 6d per 30 cwts, according to quality. Salt—A demand from the West has improved the value of this article. Considerable sales have been made at about 50c per sack delivered in Montreal.

The quarterly meetings of the ironmasters have been held this week. The business transacted has been only moderate; nevertheless, prices generally have been well supported.

An account of the importations and exportations of bullion and specie registered in the week ended 9th October, 1861:—

Gold imported into the United Kingdom.

COTTON.

NEW YORK, Sept. 25.—The market remains dull, and quotations are merely nominal. The sales do not exceed 1,000 bales. The arrivals have been from Providence, 177 bales. Total import since 1st inst., 1,824 bales. Export from 1st to 24th Sept., 95 bales, against 7,119 bales in 1860.

NEW YORK, Sept. 28.—The market remains dull, and prices are nominally unchanged. The sales comprise about 800 bales. We quote:—

Much excitement has been apparent in the cotton market throughout the week. The sales are large, and prices daily enhancing as the stock is reduced. We quote an advance of $\frac{3}{8}$d per lb in American. A large proportion of the business has been on speculation. Egyptian, of the better qualities, still improve in value, but the common grades do not much vary. Brazil are $\frac{1}{4}$d to $\frac{1}{2}$d per lb higher in the week. Surat are also quoted $\frac{1}{4}$d per lb higher. The sales to-day are 20,000 bales. The market continues firm, and advancing. The reported export amounts to 16,570 bales, consisting of 4690 American, 460 Brazil, and 11,420 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The accounts at hand from the manufacturing districts are, on the whole, favourable. An increased amount of business has been transacted in cotton and other goods, at enhanced quotations. The coal trade has steadily improved; but the demand for iron has been much restricted, and prices have had a drooping tendency.

MANCHESTER, Oct. 10.—A large speculative demand arose here on Tuesday, purchases being, as before, confined in a great measure to our leading staples, and undertaken by capitalists not in the trade, for the purpose of storing up against the winter. The effect of these purchases, concurring with action in the cotton market, has sent up prices still further and more universally, spinners and manufacturers also doing their best to store up as many of their products as they are able against the coming scarcity. In Eastern shirtings 3d per piece advance was freely realised, and another 3d has since been added nominally to the value. In common and medium yarns, the advance has lately been $\frac{1}{4}$d to $\frac{1}{2}$d per lb. The decrease in production goes on apace, whilst as yet scarcely more than one or two of our foreign markets have begun to be influenced, and that only in the slightest degree, by the exigencies of our position.

BRADFORD.—Since last week the demand for wool has not been great, and the market this morning is quiet. Spinners bought considerably a fortnight ago, and have in great measure covered their wants for the present, and show no disposition to speculate. Prices, which for bright wools have been slightly hardening during several weeks, are quoted to-day as just firm. Yarns remain much as last quoted. The demand for export is chiefly for lustre yarns, two-folds being very quiet. The home consumption is unchanged. There have been a few buyers of pieces in the market, and some small orders for Russell cords, mottled reps, and light ground fancies have been given out.

LEICESTER.—The hosiery trade continues in a satisfactory state; there is a fair business doing at the warehouses in goods usually in demand at this period of the year. Labour is more abundant, although there yet remain many hands only partially employed. At Loughborough and the adjoining hosiery districts business has undergone no important change. Yarns keep up in price, spinners being well engaged. Wools are firm, and recent quotations are maintained.

NOTTINGHAM.—There is no material change in the state of the lace trade this week. Business at the warehouses is quiet, and in hardly any branch is there much doing. There are a few orders in the market for plain goods, both for home and foreign consumption. There is also a little doing in muslin, and common cotton edgings. Black silk lace continues in request. There are many lace hands out of employ and much machinery is standing. Many departments of the hosiery trade continue active. There is a fair business doing for the home market and orders are completing for shipment. Manufacturers are, however, cautious how they receive orders, in consequence of the rising state of the yarn market.

HUDDERSFIELD.—For various descriptions of heavy goods suitable for winter wear, there is a good demand just now in the country, and this gives a briskness to the Dewsbury trade which is wanting here in Huddersfield. The demand for unions and low woollens of all kinds for export continues very quiet, and stocks of goods of this kind are still increasing in the manufacturers' hands. Small parcels of wool are being sold to manufacturers by staplers here, and stocks on hand are light.

LEEDS.—In the White Hall a few mediums were disposed of, but the trade had no noticeable features of importance. The clothiers still exercise considerable caution in production, and, with the exception of those firms which have orders in hand for army purposes, the operatives are not fully employed. In the warehouses, the general trade may be said to present the same exceptional features. The flax spinners are running short time, with few exceptions, though they keep anticipating a revival of trade.

ROCHDALE.—The export trade in flannel is flat, and even the home demand is rather below what it usually is at this period of the year. The Yorkshire goods trade is also dull, and manufacturers are curtailing their rate of production, so as not to overstock the market. The wool trade sympathises with that of the manufactured article, and purchases are made chiefly to supply small immediate wants.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 25.—The market for State and Western flour maintained the buoyancy previously mentioned until the receipt of later advices, when the market relapsed into a dull state, and prices yesterday receded 10c to 20c per brl from the highest point of the previous day. The sales for the three days aggregate 70,000 brls, of which 17,500 brls were placed yesterday, the market closing heavy. Canada flour is heavy and lower, with sales to the extent of 2,900 brls, including 900 brls yesterday. Southern flour has been in moderate demand, but prices are a shade higher.

The market for wheat ruled buoyant under a very active demand for shipment to Europe, on Saturday and Monday, and holders were enabled to obtain a considerable advance upon previous prices. The European advices were unexpectedly of a rather adverse tenour, however, and created a feeling something akin to a panic, the market being heavy and irregular, and all kinds depreciated 3c to 6c per bushel, while on some kinds the decline was still greater. The sales aggregate 665,000 bushels, of which 173,000 changed owners yesterday. There has prevailed an active demand for corn, though at steadily declining rates; the sales comprise 700,000 bushels, including 257,000 yesterday, at 51c to 52c for Western mixed, 49c to 50c for unsound, 55c to 56c for Southern yellow, 53c to 55c for Southern mixed, and 55c to 56c for round yellow.

NEW YORK, Sept. 28.—With an active demand for the better grades of State and Western flour for export, the market has ruled very buoyant and firm, and a further advance of 10c to 20c per brl has been established. Canada flour has likewise been more active, and the sales have been tolerably heavy. The demand for Southern flour has been moderate, but the market remains firm, and higher prices have in some cases been realised.

EXPORT from 1st to 24th September.

	1861. barrels	1860. barrels
Wheat Flour	142,521	189,185

The continued favourable character of the European intelligence exerts a most inspiriting influence on 'Change, and there has prevailed a very active demand for wheat for export at enhancing prices. Corn has been also in very active request, and the sales have been unusually heavy at rather better prices.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 9th day of October, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,027,770	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,377,770
		Silver Bullion	..
	28,027,770		28,027,770

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,733,123
Rest	3,814,693	Other Securities	17,440,363
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,893,914	Notes	7,095,885
Other Deposits	12,028,835	Gold and Silver Coin	763,749
Seven Day and other Bills	742,678		
	36,033,120		36,033,120

Dated the 10th October, 1861. W. MILLER, Deputy-Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,674,565	Securities	28,270,486
Public Deposits	4,893,914	Coin and Bullion	14,141,519
Private Deposits	12,028,835		
	38,597,312		42,412,005

The balance of Assets above Liabilities being 3,814,693*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£162,283
A DECREASE of Public Deposits of	16,004
A DECREASE of Other Deposits of	87,107
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	277,131
An INCREASE of Bullion of	16,893
An INCREASE of Rest of	5,156
An INCREASE of Reserve of	172,963

The above return presents few changes of interest. Notwithstanding the large sums in bar gold known to have been taken to the Bank, the bullion shows but a slight increase only. There is, however, a good augmentation in the reserve. An unimportant decrease has taken place in the other securities.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	20,784,468	22,028,392	23,043,159	22,112,936	21,674,563

In the corresponding week of 1851, several failures were announced from the United States, the most important being two banks. Two Welsh banking establishments had also suspended on this side. The Great Exhibition was open for the last week to the public, and was thronged by great crowds of visitors. From Italy, news had arrived of further repressive measures by the reactionary Governments. The old regulations respecting Jews had been revived in the Papal States, by which Israelites could not travel or reside in any town without special permission. A ministerial crisis was apprehended at Vienna, and from the universal distrust a panic had taken place on the Exchange. A large amount of Australian gold had just arrived in England.

In 1858, the dictation assumed by France towards Portugal attracted attention, but did not prevent Consols from touching 98½. The Turkish 6 per Cent. loan of 1854 was quoted 94 ex div., and that of 1858 issued at 80, 1 premium. The bullion in the Bank was verging on the highest point of the year, although some remittances of gold were being made to Constantinople on account of the loan. The payments on the Indian debenture loan were in progress, but seemed to have little effect on the London money market. On the Continent, however, money was becoming dearer, in consequence of the endeavours of the Bank of Vienna to attract specie.

In 1859, the rate of money was 2½ per cent., and the supply was very abundant. The principal feature on the Stock Exchange was the great rise in the Indian loan, which was quoted 102½, or 5½ per cent. premium. The public watched the events in Italy with much anxiety, the settlement of the Roman question being then, as now, the great difficulty.

In 1860, considerable discussion was taking place in the press on the question of iron-clad ships of war. The insolent attempt of the Prussian custom house officers to board and search the Queen's yacht Fairy on the Rhine had caused universal indignation in England. From abroad the principal news was from Italy, where Garibaldi was gaining continued successes over the troops of Francis II. King Victor Emmanuel was proceeding towards the Neapolitan frontier. The bill providing for the annexation of the various Italian provinces to Sardinia had passed the Turin Chamber of Deputies. A meeting at Warsaw had been arranged between the Emperors of Austria and Russia and the Prince Regent of Prussia. The London money market was exceptionally less easy from the temporary withdrawal of 600,000*l* in gold for France and of 200,000*l* for Spain. The Court of Bankruptcy was chiefly occupied with the great leather failures, and some further curious revelations had been made public.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 5,653,871*l*; in 1858, a deficiency of 248,343*l*; in 1859, a deficiency of 6,098,303*l*; and in 1860, a deficiency of 6,768,824*l*. In 1861, the deficiency is 5,411,528*l*.

DISCOUNT AND MONEY MARKET.—The demand for discount this week has generally been on a moderate scale, but the rates are approximating to the Bank terms. Only exceptional transactions have taken place at 3¼ per cent., and this afternoon the general business was at 3⅜ per cent. The loan to the Bank of France, mentioned below, appears to have chiefly influenced the market, but there has also been a good demand on the Stock Exchange. Loans on Government securities until the payment of the dividends have been in request this afternoon, and the charge varied from 3 to as much as 4 per cent.

An impression is gaining ground in Paris in the best informed circles that the Emperor of the French contemplates the speedy recognition of the Southern States of America, the declaration of the inefficiency of the present blockade, and the consequent opening of the Southern ports for the export of cotton. It is reported that the Emperor has been induced to take this determination in order to obviate the additional calamities that would be caused by a cotton famine at a time of general dearth. The Chambers of Commerce of Lyons Rouen, Mulhouse, and other manufacturing districts, have already memorialised the French Government in favour of the immediate recognition of the Southern Republic, but no step will probably be taken until after the departure of the Anglo-French expedition for Mexico.

The Bank of France have concluded an arrangement with Messrs Rothschild and some other banking establishment, by which the Bank will have power to draw for 2,000,000*l* on London. Of this sum, 1,000,000*l* will be on Messrs Rothschild, and 1,000,000*l* on Messrs Baring. The temporary effect of this measure will be doubtless to check the export of specie from Paris to London, and possibly to cause some slight efflux of gold from this side. It is, however, merely a postponement of the difficulties of the Bank of France, as in three months the bills will mature and, if not renewed, will have to be repaid. If accompanied by a further rise in the rate of discount, it might possibly be of service in averting panic, but otherwise there seems little likelihood of the measure producing any permanent good effect.

The continued pressure in Paris is due partly to the purchases of grain, but also in a great degree to the heavy investments in the new Italian loan, of which the instalments will have to be paid in specie. There has likewise been much over-speculation in building.

The return of the Bank of France, published to-day, gives the following very unfavourable results:—Decrease in the bullion, 3,240,000*l*, in the Treasury balance of 2,490,000*l*,

and in the advances of 80,000*l*. On the other hand, an increase has taken place in the bills discounted of 2,936,000*l*, in the issue of notes of 370,000*l*, and in the current accounts of 56,000*l*.

Notice has been given in the *Moniteur* that the Minister of Finance has fixed the rate of interest on French Treasury bonds at 3½ per cent. for those running three to five months, 4 per cent. for six to eleven months, and 4½ per cent. for bonds for a year.

The East India Railway Company have just completed the issue of 1,500,000*l* in debentures, the last they are authorised to create under their present powers. They were in the first instance offered in December, and do not possess the privilege of being convertible into stock.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	6	5½
Vienna	6	5
Berlin	4	3
Frankfort	3	2½
Amsterdam	3	3
Turin	6½	6½
Brussels	4	3½
Hamburg	...	2½
St Petersburg	7	...

ENGLISH FUNDS.—Consols during the greater part of the week were fairly maintained at their previous value, but the settlement yesterday showing an increased supply of stock, a fall took place, and the market has shown renewed heaviness this afternoon. Consols for November opened on Monday at 93 to ⅛, and yesterday went to 92⅞ to 93. To-day, a further reduction occurred, until they were offered at 92¾, but the final prices were a shade better, being 92¾ buyers for the account and 92½ to ⅝ for money. The public appear to be again effecting sales of Consols for re-investment, in other securities, India Five per Cents. being again especially in demand.

Exchequer bills remain steady, the March issue being quoted par to 3s premium, and the June 6s to 9s premium. India bonds are slightly lower at 10s to 14s premium.

India Five per Cents have again been buoyant owing to numerous purchases for investment, and the price at one period went to 103¾. A reaction, however, then followed to 103⅜ to ½, and the market closed firmly at that point.

FOREIGN STOCKS.—In the foreign market there has been less animation, and the principal business has been confined to Mexican. In the middle of the week a fall occurred on the publication of Earl Russell's reply to the memorial lately presented by the leading bankers and mercantile houses of the City, but a recovery took place yesterday on the announcement of the preparations made by Spain for intervening in Mexico. The rise, however, appears in a great measure due to speculative operations, the public being deterred from purchasing by the circumstance that whatever may be the course of events, the miserable state of Mexico precludes for some time to come any return to the bondholders. Turkish Six per Cents. of 1858 have suddenly advanced this afternoon about 1 per cent. Spanish bonds are firmer, and Buenos Ayres show a tendency to recovery. There have been scarcely any transactions in Peruvian stocks, and the previous improvement has not been fully maintained.

The closing price of French Three per Cents., this evening, in the Paris Bourse was 68f 35c, showing a fractional improvement compared with last Friday. In the interim, however, there had been a decline of about a half per cent., owing to the unsatisfactory position of financial affairs in Paris. The arrangement by the Bank of France caused a better feeling, but this has been checked by large sales of Rentes on account of the Bank.

A meeting of bondholders of the Turkish loan of 1858 *was held to-day, when it was resolved* to nominate a Committee, consisting of Sir Macdonald Stephenson, Messrs W. Mackinnon, M.P., R. Brooks, M.P., W. Dent, R. Hodgson, H. J. Meadows, J. Landon, and S. Worms, to represent the bondholders, and to enter into direct communication with the Ottoman Government. Mr Mackinnon, M.P., presided, and gave a favourable picture of the resources and prospects of Turkey, and also pointed out the general good faith and honesty of the nation. The chief object of the Committee will be to obtain a more regular transmission of the revenue hypothecated for the loan every month to England. It was stated, however, that since the 1st of last month a sum of 42,000*l* has been received, being the proceeds for September, and lodged in the Bank of England.

The following reply has been published of Earl Russell to the memorial lately presented by the leading mercantile houses of London on the affairs of Mexico:—

Foreign Office, Oct. 3, 1861.

Gentlemen,—I have received and considered with the greatest attention the memorial you have addressed to me.

You have described truly the evils which afflict Mexico—the robbery and the bloodshed, the impunity of crime, and the absence of any controlling authority in what is called the Government.

Her Majesty's Government have a right by treaty, and by all the laws which govern international relations, to require security for the persons and property of British subjects, and the performance of specific engagements on the part of Mexico.

Her Majesty's Government will exercise this right.

But Her Majesty's Government cannot think it wise to interfere in the internal government of Mexico. You seem to think that a protecting force thrown into Mexico for the simple purpose of maintaining public tranquillity would succeed in attaining that object, and that even a small force might suffice for the purpose.

I am sorry to say that I think a very large force would be insufficient to restore public tranquillity.

This is a task which the Mexicans must accomplish for themselves. There are very few cases in which foreign interference can be beneficial, and in those few cases there must be a large and numerous party in the country prepared to avail itself of foreign aid.

I am concerned to say that I see no proof of the existence of such a party in Mexico.

Her Majesty's Government, therefore, must confine their action to the clear and legitimate purpose of demanding from the *de facto* Government of Mexico, however constituted, respect for the persons and property of British subjects, and the fulfilment of recorded obligations.

I have the honour to be, gentlemen, your most obedient humble servant, RUSSELL.

To Messrs Rothschild and Sons,
Messrs Finlay, Hodgson, and Co., and others.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The railway market continues with little business, but has been fairly supported, owing to the traffic returns remaining generally more favourable than had been expected. The fineness of the weather appears to have induced a large amount of pleasure traffic, which has in some degree compensated for the falling-off in goods. Lancashire and Yorkshire, which shows an exceptional diminution, has declined to a slight extent only from the support experienced by the large outstanding account for the fall. The price is also now comparatively very low, and the rebound in this stock, on any sudden opening of the cotton ports, would necessarily be more marked than in other descriptions. To-day, the tendency of the market has been generally adverse, in sympathy with the reduction in Consols.

In colonial stocks, the transactions have been moderate, and little change has taken place. Grand Trunk of Canada, however, is again heavy.

Foreign shares have been rather dull, especially Brazilian. Lombardo-Venetian have slightly improved, closing at ⅞ to 1 premium. American securities show scarcely any alteration.

In the miscellaneous department, mining descriptions have been rather more inquired for, particularly East Bassett. London and Westminster Bank shares also continue in demand. The new Mercantile Fire Insurance are quoted par to ⅛ premium, and Commercial Union par.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

	Closing prices last Friday.	Closing prices to-day.

Foreign Exchanges.—The only material change this week is a decline in the Paris rate, consequent upon the financial arrangements effected by the Bank of France.

Bullion.—Annexed is a circular of Messrs Pixley, Abell, and Langley, on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—We have not any arrivals of gold to report during the past week, and, as there has not been much demand for export, some considerable sums that were on the market have been sent into the Bank, that establishment having purchased about 325,000*l* since the 4th instant. The exports have been:—The Athens, to the Cape, with 60,000*l*; the Arabia, to Boston, with 6,462*l*; the Tagus, to Lisbon, with 25,000*l*; and the Magdalena, to the Brazils, with 4,750*l*.

Silver.—The silver ex Tasmanian has been sold at 60¾d per oz standard; the whole has been cleared off at this rate, and if any demand should now arise, we may look for a slight increase in price. The Magdalena has taken 8,500*l* to the Brazils.

Mexican Dollars.—The whole of the dollars brought by the Tasmanian have been cleared off the market at 59½d per oz.

Exchange for banks' drafts on Bombay is 1s 11⅞d per rupee, on Calcutta 1s 11⅞d to 1s 11¾d. Bills with documents 1s 11¼d to 1s 11⅜d. Drafts on Madras at 60 days' sight, 1s 11½d to 1s 11⅝d.

India Government Loan Notes.—We quote the 5 per Cents. 96 to 96½, and the 5½ per Cents. 103 to 103½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 76s 6d to 77s, nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, 76s 3½d per oz. Silver—Bar silver, 5s 0⅞d per oz std, last price; bar silver, containing 5 grs gold, 5s 1d per oz std; fine cake silver, 5s 5⅜d to 5s 5½d per oz; Mexican dollars, 4s 11½d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, nominal.

There have been no sales of gold to the Bank either yesterday or to-day.

The amount of specie that will be sent by the steamer to the East to-morrow is 123,600*l*, of which 15,500*l* is in gold for Alexandria, and 13,100*l* in gold and 95,000*l* in silver for Bombay.

Bankruptcy.—The new Act of Bankruptcy comes into force to-day (Friday).

Failures and Mercantile Embarrassments.—The advices from New York mention several failures, the principal being that of Messrs C. W. and J. T. Moore, an old and respectable house in the dry goods trade.

M. Marco Adutt, who stopped payment last February, has made the satisfactory announcement that he has liquidated his liabilities in full, and has resumed business under the title of M. Adutt and Son.

The following circular has been issued, announcing a further dividend of sixpence in the pound to the creditors of a house that failed in the crisis of 1847. Including this amount, a total distribution has been made of 7s 6d in the pound:—

2 Gresham place, E.C., London, Oct. 8, 1861.

Sir,—The last dividend of 1s in the £ was announced to you by circular on the 9th of July, 1860. We are now authorised to declare a further dividend of 6d in the £, payable on and from Monday the 14th inst., at the above address, between the hours of eleven and two o'clock, Saturdays excepted. Vouchers to be produced as usual. We are very sorry that a larger dividend cannot be made at this time. The reason is, the delay in receiving payments of instalments due in February on two of the estates sold in Mauritius; but, besides that the amount is secured on the properties, we have assurances that the payment will take place very shortly. These collections are necessarily influenced by the extent and value of the sugar crop; in which respect last year was unfavourable, but there is the prospect of a much better return in the present. The recent passing of an Encumbered Estates Act for Jamaica will facilitate the disposal of our mortgage claims in that colony; and we are now taking measures to meet the legal requirements of the case, and to realise that debt. Beside the preceding, there are scarcely any claims remaining to be collected; but to the whole we give our constant attention, with a view to a speedy liquidation.—We are respectfully, Sir, your obedient servants,

Reid, Irving, and Co.

Public Companies.—The Commercial Union Fire Insurance Company have just issued their new tariff of charges. It proceeds upon the principle of classifying goods according to their several risks, similarly to the plan now partially used with regard to buildings and trades. For the more dangerous kinds of merchandise, the rates exceed those charged by the old Companies, while a reduction, on the other hand, has been effected for non-inflammable articles. It appears not to be the intention of the Board to encourage the class of business known as floating policies. The Company reserve to themselves the right of inspecting any dock, wharf, or warehouse at any time. After five years a portion of the premiums will be returned to the insurers by way of bonus. The whole scheme appears well considered, and will probably result in the general introduction of a better system than the present in managing fire insurance business. Annexed is the classification adopted:—

First Class—Tea, coffee, tobacco, spice, silk, ivory, dry fruit, metals, cochineal, flour, sumach, rice, hops, indigo, shells, hides, and other similar goods. Second Class—Sugar, wines and spirits in floors, wool, bark, certain oils, and other similar goods. Third Class—Cotton, hemp, flax, jute, coir-yarn, piassava, bristles, feathers, India rubber, gutta percha, certain drugs, essences, brimstone, rosin, tallow, and other similar goods. Fourth Class—Rags, saltpetre, junk, turpentine (spirits of), and other similar goods. Fifth Class—Shoddy, raw turpentine, oil of paraffin, naphtha, rock oil, pitch, tar, lucifer matches, and other similar goods.

It has been officially announced that the delay in the issue of the report of the Directors of the Bank of Turkey, which was intended to have been distributed some time back, is caused by the non-receipt from Constantinople of the latest proposition from the Turkish Government.

A half-yearly meeting of the Oriental Inland Steam Company took place on Wednesday, when it was stated that satisfactory advices have been received from India announcing that the tug steamer had arrived out and would soon be ready for use. The Sutlej has been working some time, and has made eight voyages without any difficulty. The pecuniary results of these trips have, however, been unfavourable, partly from the high working expenses, and partly from some difficulty in obtaining full cargoes. Apparently, it was said, the trade of the Indus is not so great as has been represented. Upon the Ganges, the Company was stated to be progressing as satisfactorily as could be wished. An eligible station has been secured on favourable terms, and three, if not four, barges are now in the river. A large and remunerative traffic is expected in this direction. The financial position of the Company is good. There is a balance of 70,000*l* in hand without any debts, and 90,000*l* uncalled on the C shares. It is not intended, however, to make any call at present. After some discussion, a resolution to adopt the report was carried unanimously.

A *pro formâ* meeting of the Atlantic Royal Mail Steam Company (Galway line) was called for Monday, but no business was transacted, an adjournment being taken to the 24th of next March. It was mentioned, however, that arrangements are in progress which are expected to prove very beneficial to the Company, including the assistance of gentlemen of great influence and high financial standing. Contracts have been entered into for two ships, and the works are proceeding rapidly, so that the Company will be

enabled to apply to Parliament next session for a renewal of the subsidy.

The Directors of the Oriental Bank announce a dividend of 7 per cent. for the past half-year, free of income tax. The general meeting of proprietors will take place on the 29th inst.

At a meeting of the Surrey Gas Consumers' Company, a dividend was declared at the rate of 8 per cent. per annum out of the available balance of 6,419*l*, leaving 692*l* to be carried to the next account. The report stated that the Company have completed the capital by the sale and issue of 234 unappropriated shares, which realised a profit of 704*l* in the shape of premiums. The temporary loan from the bankers has been paid off. The gas rental for the half-year amounted to 22,090*l*.

The prospectus of the London and Provincial Agricultural Company (Limited) has been issued. The proposed capital is 100,000*l*, in shares of 1*l* each. The Company has been established for the purpose of extending the manufacture of food for cattle, as well as of patented manures, the use of which has considerably increased of late years in most parts of the United Kingdom. Apparently the Company has been brought out at a favourable period, as there is a large augmentation in the demand for such articles, and if it should be successful, it will confer a benefit on agriculture.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 430½ per mark, and the short exchange on London is 13.8 per 1*l* sterling. Standard gold at the English *Mint* price is, therefore, about 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 108¼ to 108¾ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The fresh arrivals of English wheat at Mark lane, this morning, were small, and toe total show of samples was much restricted. For both red and white parcels, there was an improved demand at, in several instances, a further advance in prices of 1s per quarter. Foreign wheat—the supply of which was only moderate—was held for more money; but no quotable improvement can be noticed in its value, compared with Monday last. Barley was a dull sale, and prices had a downward tendency. Oats and beans sold slowly, at about previous rates; but peas—owing to the scanty supply on offer—realised higher currencies. The flour trade was firm, and the quotations were well supported. This week's imports amount to 7,720 quarters of wheat, 4,280 of barley, 17,860 of oats, and 3,440 barrels of flour.

At Liverpool, this morning, wheat was in good request, and an advance of 2d to 3d per cental took place in prices. Flour was firm, and fine marks were rather dearer. Maize sold freely, at extreme rates.

The wheat trade at Alexandria, for the week ending Sept. 26, was active, and prices were fully supported. Beans, however, were rather cheaper. The following was the business transacted:—Saide wheat, private trade produce, 32,010 qrs, 31s 6d to 33s; ditto, Pasha's produce, 625 qrs, 32s 6d to 33s; Beheireh wheat, private trade produce, 18,005 qrs, 29s 8d to 31s 2d; ditto, private trade produce (white and Buhi), 4,640 qrs, 31s 2d to 34s 8d; Saide beans, private trade produce, 18,840 qrs, 26s 9d to 27s; Beheireh beans, private trade produce, 1,500 qrs, 25s 8d to 26s 3d; barley, 11,560 qrs, 17s 6d to 19s 4d; lentils, 490 qrs, 25s to 26s; peas, 26s to 27s; ceci, 87 qrs, 32s to 33s 6d; linseed, 2,130 qrs, 46s 6d to 47s 7d per quarter, free on board. Freights are very firm at 7s 3d to 7s 9d per quarter for beans to the United Kingdom for orders, and for other descriptions in proportion; to a direct port, 6s to 6s 6d. There is at this moment no unengaged vessel in port. By steamers to Liverpool, 6s 3d to 6s 6d.

EXPORTS of GRAIN in Quarters from ALEXANDRIA from 19th April to 18th September.

	Wheat.		Beans.		Barley.	
	1860.	1861.	1860.	1861.	1860.	1861.
Great Britain	125,571	70,811	106,266	236,178	11,704	52,250
France	7,654	50,133	...	3,440	...	94
Austria	136	344	748	4,466	...	581
Other countries	5,134	6,755	1,353	17,295	379	14,694
Total	138,495	128,043	108,807	261,379	12,083	67,574

The Liverpool cotton market this week has again been very excited. The total sales amount to 121,000 bales, including 40,000 to spinners, 64,000 on speculation, and 17,000 for export. Quotations are for all descriptions ¼d to ⅜d above those of last Friday. The market closes very firm at extreme rates.

The exports of cotton from Bombay from Jan. 1 to Sept. 12 were as follows:—

	1861. bales.	1860. bales.
London	65,886½	45,221
Liverpool	667,354½	288,214
Clyde	5,739	1,404
Hull	655	919
Total Great Britain	739,635	335,758
Continent	26,187	15,114½
China	57,926½	165,099½
Total	823,748½	515,972

Messrs Briggs and Co., writing from Alexandria, Sept. 26, thus refer to the cotton trade of that port:—Prices of cotton are maintained at very high rates. The old is all but exhausted, and is beginning to be replaced by the new crop, of which the first few bales have appeared. The transactions for the week have been:—32 bales sweepings to low ordinary, at 6¼d to 7½d; 18 bales ordinary to middling, 8½d; 30 bales good middling to fair, 8¾d; 20 bales good fair to good, 9⅛d per lb. Freights by steamers at 3-16ths of a penny per lb.

There has been increased activity in the inquiry for raw sugar, and an improvement of 6d per cwt has taken place in prices. Refined goods have been firm at full quotations.

COMPARATIVE STATEMENT of SHIPMENTS of SUGAR from the Mauritius, from the 1st August to the 31st August of each Crop.

For coffee there has been a less active demand, and late rates have been with difficulty supported.

We extract the following from Messrs Thompson's colonial circular:—The numerous parcels of coffee brought forward from the recent arrivals have found ready buyers at gradually advancing quotations, the common to middling qualities obtaining 5s to 7s per cwt more than in August, prior to the announcement of the Dutch sale. Stocks at the European ports are remarkably light, and until the production keeps pace with the increased consumption, it seems evident that the article must bear a relatively high value. The Ceylon crop is said to be smaller than the former year's; the yield in Rio Janeiro will likewise be deficient; and future prospects of the article are, therefore, very encouraging to the growers of East India on the new estates, who may anticipate a continuance of remunerative prices. Although the stocks of sugar keep unusually heavy, the market has shown more steadiness than of late, and the total home clearances in Great Britain are 11,000 tons above the preceding year's. The diminished supplies in the Northern States of America may induce large purchases from this country, unless the Louisiana crop becomes available before long; indeed, orders have already been executed here and at Liverpool for the above destination. An expectation prevails that the use of grain for distillation in France will be prohibited; if this proves correct, the use of low sugar and molasses there seems likely to be materially augmented.

The public sales of tea held this week have gone off steadily at very full prices. Privately, the market has been firm, at full quotations.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to Sept. 30, 1860 and 1861, with STOCK on hand on October 1, 1860 and 1861.

In rice, a fair business has been transacted, and all kinds have been disposed of at quite former prices. The dry fruit trade has, on the whole, ruled steady at late quotations.

Government have accepted tenders for nearly 50,000 gallons of rum, and the market, though by no means active, has been steady, at previous rates. In brandy, sales have progressed slowly on former terms.

The annexed remarks are from Messrs Durant and Co.'s monthly report of the silk trade:—During almost the whole of the remainder of the month of September we had slow dragging business, drooping prices, and deliveries smaller even than in the preceding month; but for the last ten days buyers, both home and foreign, have apparently been compelled to come into the market, and fair business has resulted: deliveries to date show a marked improvement. In China silk the demand has fallen principally upon the lower qualities both of Tsatlee and Taysaam, the higher relative prices asked for classical silks, putting them beyond the reach of the bulk of consumers. The few bales of Japan silk that have arrived have been immediately sold. Chinese throwns continue neglected. Bengal silk has participated in the generally improved demand, but prices are as unsatisfactory as ever. The next periodical public sales are fixed to commence on the 23rd instant.

The public sales of indigo commenced on Tuesday: the quantity declared was 9,466 chests in the A catalogue, and 600 chests in the B. Total, 10,066 chests, of which 1,670 were not printed or withdrawn, leaving the quantity to be brought forward 8,396 chests, consisting of 5,020 Bengal, Tirhoot, &c., 1,571 Oude, 429 Kurpah, 859 Madras, 14 Bimlipatam, 183 Manilla, 96 figs, &c., and 224 sundries in the B catalogue. The biddings for all descriptions have ruled active, and prices have advanced from 3d to 1s 6d per lb—the latter for Oude qualities. Up to this evening, 5,936 chests have passed the hammer; 2,168 have been withdrawn; and 810 bought in—leaving 2,958 chests disposed of.

A few parcels of low English wool have been taken for shipment to America; otherwise, the wool trade is dull, at late currencies. The Liverpool sales have been progressing with considerable animation, and prices, compared with the previous series, have advanced ½d to 2d per lb. Hemp has met an active market, and clean Russian has advanced 34*l* to 34*l* 5*s* per ton.

The market for Scotch pig iron has been dull, and the quotation, cash, mixed numbers, has fallen to 49s per cwt. Spelter is dearer; but in the value of other metals no change has taken place.

The following is from Messrs. Churchill and Son's circular:—

COMPARATIVE STOCK of TIMBER at the PUBLIC DOCKS, Oct. 1.

	1861.	1860.	1859.
Foreign deals	pieces 1,253,000	1,079,000	950,000

East Indian teake	3,900	1,600	7,900

Linseed oil is firm at 34s 3d per cwt on the spot. All other oils have realised extreme—in some instances, further enhanced rates. Turpentine is dull, at 60s for American, and at 59s to 60s for English spirits.

The receipts and exports of naval stores at New York from Jan. 1 to Sept. 23 were as follows:—

	Receipts. bbls 1861.	bbls 1860.	Exports. bbls 1861.	bbls 1860.
Turpentine	32,064	48,339	19,465	44,459

"The great National Loan," observes the New York *Shipping List* of the 28th ult., "continues to be the controlling element in financial circles affairs, and all other enterprises are so conducted that they cannot conflict with its workings, even in the remotest degree. There is no question but that there is an abundant supply of specie in the country, and just so soon as confidence becomes fully restored and the public everywhere become satisfied of the entire safety and profitableness of the investment, the eagerness to invest in the 7 30 per cent. loan, it is expected, will be altogether without precedent. Trade prospects continue to wear an altogether more healthy appearance, and it is very gratifying to observe, as a partial compensation for the protracted dull condition of business, that there are on every hand,—in the interior as well as at the seaboard,—increasing indications of revival. The dry goods trade has been rather quiet during the week, and purchases have been restricted. The auctions are tolerably well attended, and the bidding is quite spirited at times, though prices as a general thing are very unsatisfactory and unremunerative. In the money market things remain substantially the same, and there is nothing to be said that has not already appeared in these columns. The current rate is as follows:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9
First-class single signatures	7 ...
Other good bills	... ...

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the leading markets held since we last wrote have been but moderately supplied with home-grown wheat, for which the demand has ruled steady, at, in some instances, an advance in the quotations of about 1s per quarter. Although the inquiry for foreign wheat on French account has wholly ceased, home millers have purchased rather more freely, and really fine samples have realised rather more money. There has been a slow sale for barley, both English and foreign, at a slight depression in the currencies. Malt, however, has moved off steadily, at late rates; but oats have been offering on easier terms. Beans and peas have commanded previous rates, with a slow sale. The flour trade has become somewhat firmer.

Letters from New York state that the grain trade was somewhat excited, and that prices of all kinds of produce had advanced to some extent. The French markets have become easier, with much less activity in the demand. The imports of wheat and flour into France have, of late, been on a very large scale.

The Scotch markets have been tolerably firm for wheat, at very full prices; but all other kinds of produce have changed hands slowly, on former terms. The yield of the new crops, generally, is not equal to last season, either as respects quantity or quality.

In Ireland, the best wheats have produced rather more money; but the demand has been by no means active. Fine barley and oats have been held on former terms. Most other articles have ruled heavy.

The annexed table shows the exports of grain, &c., from London, during the third quarter of 1861, compared with 1860 and 1859:—

	3rd Qtr 1859.	3rd Qtr. 1860.	3rd Qtr. 1861.
Wheat qrs	60	1,358	163,258
Barley	966	55	...
Malt	125	...	...
Oats	10,323	9,555	4,354
Beans	40	38	383
Peas	300	...	3,141
Tares	...	...	206
Linseed	18,494	17,048	18,907
Rapeseed	54,122	26,369	16,656
Maize	1,250	37	625
Seeds	130	39	...
Flour cwts	939	2,748	154,371

At Mark lane, to-day, the fresh arrivals of English wheat were small, and both red and white qualities sold somewhat freely at an advance, compared with Monday last, of 1s per quarter. Foreign wheat was held at extreme rates; but the amount of business transacted in it was limited. Barley was dull, at fully the late decline in its value. Oats and beans were a slow sale, at late rates; but peas were scarce, and rather dearer. The flour trade was firm, at full currencies.

Mr E. Rainford reports a moderate business doing in floating cargoes of grain at full prices. The arrivals off coast have amounted to 34 vessels.

The London averages announced this day are:—

	qrs	s	d
Wheat	6793	at 60	4
Barley	1424	39	5
Oats	657	23	4
Rye	...	...

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a continued good demand, generally at full prices, while strong dry descriptions and fine grocery have realised an advance of fully 6d per cwt in several cases. Some American orders received have also imparted greater activity to the market, but at present few speculative purchases are reported. An extensive business has been transacted in British West India, 4,000 casks finding buyers in three days. Barbadoes, by auction, realised 34s 6d to 43s; Jamaica, 34s 6d to 39s 6d;

grainy Demerara, 43s 6d per cwt. There is at length an improvement in the deliveries, which were 4,775 tons last week, and the stock at the close showed a slight decrease, viz., to 90,725 tons, or 17,200 tons more than in 1860.

Mauritius.—2,763 bags chiefly sold as follows: crystallised fine, 45s to 46s 6d; grainy, 41s to 43s.; brown, 31s to 33s 6d; dry yellow, 40s to 42s 6d per cwt.

Bengal.—1,622 bags mostly sold at and after the sale: very fine Bally, 46s; Cossipore, 43s 6d to 44s 6d; syrups, 41s 6d to 42s per cwt.

Madras.—445 bags sold steadily: native, 30s 6d to 32s: soft date kind, 29s 6d to 31s 6d per cwt.

China.—2,061 bags were partly sold: washed, 30s 6d to 31s; the remainder bought in at 31s 6d to 32s; a few lots dull white bought in at 44s per cwt.

Foreign.—1,350 casks 374 barrels Porto Rico sold readily at 36s to 36s 6d for brown, and 37s 6d to 44s 6d for low to fine yellow. 2,155 bags Guatemala muscovado. 32s 6d to 36s 6d. 157 casks Surinam, 33s 38s 6d. 197 casks Cuba, brown to good yellow, 34s 6d to 39s 6d, 350 boxes Havana, brown and yellow, 36s to 43s; florettes, 45s 6d to 46s; fine white, 51s. Several parcels of Havana and muscovado and 4,000 bags clayed Manilla are reported at 35s per cwt. A floating cargo of Cuba muscovado is reported at 23s 6d, with a small part clayed at 25s, for the United Kingdom. 600 tons clayed Manilla to arrive at 36s landed. Two of white Pernambuco for the Mediterranean at 28s per cwt.

Refined.—The market is firmer for dry grocery goods, few parcels offering at 49s 6d per cwt. Crushed and fine pieces met with steady inquiries.

MELADO.—A large business has been done at 24s to 28s.

MOLASSES.—100 puns St Kitts and Antigua have sold at 15s 6d to 16s per cwt.

COFFEE.—The market is still largely supplied. 1,651 casks 400 barrels 1,240 bags plantation Ceylon sold at slightly reduced rates for some marks: pale small berry to good, 71s to 82s 6d. 1,885 bags native went rather easier, from 66s to 70s for small berry to fine. 1,045 cases palish Cochin realised the former value, viz., 71s to 75s. 198 bags Padang kind, from Singapore, 63s to 66s. A few lots Jamaica and other sorts brought former valuations. A floating cargo of Rio, for a near port, sold ae 59s per cwt.

COCOA is again higher by 2s for Trinidad, Grenada being scarce. Several parcels of the former have sold by private contract. At auction, 542 bags realised 58s to 74s per cwt for ordinary greyish to good. The stock of foreign is much reduced, and advanced rates demanded.

TEA.—Two more vessels have arrived with the new season's congous. Sales were made yesterday at prices about on a par with those first imported per the Fiery Cross, the finest grades selling up to 2s 8d per lb. At auction, on Wednesday and Thursday, 9,266 packages went off with fair spirit, 5,828 packages finding buyers, including some green descriptions at full rates.

RUM.—No further change can be noticed in this market, which remains steady, with a moderate inquiry for all common descriptions. It is stated that the Government accepted tenders for 50,000 gallons last week, the price said to be 1s 6½d per proof gallon.

SPICES.—The sales have been rather large this week, but nearly all the various parcels offered sold at previous rates. 542 bags white pepper: Penang, 6¾d; Singapore, 6½d. 2,172 bags Singapore black, 3⅝d to 4½d; low dusty, 3¾d to 3¾d. 357 bags Penang: common, 3½d to 3¾d; Tranq, 4d. 255 bags Zanzibar cloves were bought in at 3¾d; privately, 3½d cash has been accepted for some. 820 bags pimento nearly all sold at 2⅞d to 3¼d per lb. Of 531 packages cassia lignea, rather more than half met with buyers at 85s to 92s; one lot, 93s for low to good. Of 590 cases Cochin ginger, three-fourths sold at 50s to 53s for small and rather wormy; 180 barrels Jamaica, low to good bold, 51s to 96s per cwt.

RICE.—An active and general demand has again sprung up, at prices which, in many instances, were not previously obtainable. Seven floating cargoes of Necrancie Arracan are reported at 11s to 11s 3d; one of Rangoon at 11s 6d; the quality of the latter guaranteed. By auction, 3,653 bags Bengal chiefly sold at 11s 9d to 13s 6d for low middling yellowish to good middling white. 5,610 bags good new Rangoon brought 11s; a few lots, 11s 6d. Extensive sales have been effected privately, including Madras at 10s 9d to 11s 4d; Java, 15s; Balham, 10s 3d to 10s 4½d; old Rangoon, 9s 7½d to 10s 9d; new Necrancie Arracan, 11s; white Bengal, 13s 9d to 15s; fine new Moulmein partly peeled, 11s 9d per cwt.

IMPORTS and DELIVERIES of RICE to October 5, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

Stock	34500	42000	70700	89100

SAGO.—612 boxes were chiefly taken in at 22s per cwt for small medium grain, and since partly sold at that price.

SALTPETRE.—The market still devoid of animation. A few parcels of Bengal have sold upon slightly easier terms: refraction 5½ to 2⅝, 33s 6d to 34s. At auction, 201 bags Bombay, refraction 16¼ to 10⅝, sold at 31s to 31s 3d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to October 5, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	9130	10250	14350	7440
Delivered	9100	9900	13800	11100
Stock	3360	4200	3500	2500

COCHINEAL is unaltered, 141 bags Teneriffe partly finding buyers: silver, 2s 7d to 2s 9d; black, 2s 9d to 2s 11d per lb.

OTHER DYESTUFFS.—No alteration has occurred in Cutch. Safflower is steady. Gambier in demand, at 17s 6d to 18s per cwt.

SHELLAC.—Business has been done for arrival, but the particulars do not transpire. The market on the spot is firmer.

RUBBER.—East India is dull: present quotation, 1s 1d to 1s 2d per lb.

METALS.—The low rates of discount do not increase speculative transactions in this market, and the only change to notice consists of the further advance upon spelter, 18*l* 17s 6d to 19*l* being paid on the spot, and as high as 19*l* 5s for forward delivery. Foreign tin is quiet. The last sale of Straits was at 116s 6d to 117s per cwt. Copper firm. Scotch pig iron is again weaker in price, business being done during the week at 48s 9d to 49s per ton, mixed numbers. Manufactured remains the same as before.

HEMP.—With short supplies of Petersburg, the price has further advanced to 34*l*. There is a strong demand for Manilla by speculators, but few parcels now offering on the market.

HIDES.—128,000 East India sold with diminished spirit, but prices showed scarcely any change to notice.

JUTE.—This article remains firm, and 5,600 bales, offered on Wednesday, went off at fully last week's rates, from 13*l* 2s 6d to 21*l* 12s 6d per ton for low to fine quality.

LINSEED.—Large transactions are reported for arrival: Calcutta, 59s 9d to 60s. Two cargoes of Taganrog at 58s 6d to 59s; one of Danubian, off the coast, 60s per quarter, delivered. On the spot, Calcutta quoted 62s; Bombay, 65s to 66s per quarter.

TURPENTINE.—500 barrels rough sold at 18s. American spirits dull at 60s per cwt.

OILS.—Linseed oil declined slightly at one time, but is now firmer at 34s to 34s 3d. Rape has advanced 6d: foreign refined, 47s to 47s 6*l*; brown, 43s 6d to 44s. Palm steady at 43s 6d to 44s. Cocoa-nut is quiet, at 49s to 51s per cwt. Olive is firm, the probable advance in the value of cotton fabrics being calculated to stimulate the demand for woollen goods, and consequently to increase the demand for this article, and it is held very firmly at 55*l* 10s for Mogadore, 58*l* for Sicily, and 60*l* for Gallipoli. Sperm remains dull, and production is greatly reduced in the manufacturing districts.

TALLOW.—The market has again been influenced by the operations of speculators. On Saturday, Petersburg Y.C. was quoted 51s 6d to 52s; for delivery in January to March, 52s 6d. Since then prices have receded quite 1s 6d. This morning, 49s is the nearest value on the spot; 3d to 6d more to the end of the year; and 49s 6d to 50s first there months of next. Old Y.C., 48s 6d to 49s per cwt.

PARTICULARS OF TALLOW.—Monday, October 7.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was firmer to-day and rather dearer. 4,620 casks West India have sold this week. 3,515 bags Mauritius about half sold at 6d advance, the remainder being taken in above the value. 667 bags Penang, brown to good yellow, 33s to 39s. A floating cargo of Cuba sold at 24s 3d for the U.K.

COFFEE.—266 casks 79 barrels and bags plantation Ceylon sold at former quotations; also 79 casks 74 cases East India and some trifling lots of Jamaica.

RICE.—20,000 bags sold privately: pinky Madras, 11s 3d; very good new Rangoon as high as 11s 7½d.

SAFFLOWER.—68 bales Bengal safflower went rather dearer, from 3*l* 15s to 5*l* 10s, middling to good.

RUBBER.—Fine Para sold at 1s 7d, being higher.

OILS.—By auction 108 casks palm went at 44s to 44s 3d. 790 casks Cochin chiefly bought in. 400 casks Ceylon were mostly taken in at 49s to 50s per cwt. 32 tuns sperm bought in at 91*l* per tun for American.

TALLOW.—1,040 casks Australian by auction sold at 44s 9d to 52s. 92 pipes 200 boxes South American, 48s 6d to 50s 3d. 240 casks North American part sold at 44s to 48s 9d per cwt. New Y.C. firmer at 50s; January to March, 50s 6d per cwt. Town unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been rather firmer this week. For export some few sales have been made at 33s to 33s 6d in barrels. Some sales have been made here in Dutch crushed: V.O., 32s to 32s 2d; B. and H., No. 1, 32s 7d, all in barrels, f.o.b. in Holland.

GREEN FRUIT.—Market good for all kinds, warm weather assisting consumption. Lemons have improved in price. Some parcels of Malaga, sold by Keeling and Hunt at public sale, went at full rates. Contracts for the new crop of Barcelona nuts have been made at an advance of 1s to 2s per bag. Lisbon grapes arrive in limited parcels, and any of good quality realise a high figure.

DRY FRUIT.—The market for currants this week has presented many features of interest. The first public sale of any note of new has been brought forward, and, judging by the prices paid, the demand for such sorts is very active. Though only 100 tons were brought forward, they were eagerly taken at full rates—29s to 37s. Privately, a large trade is doing, and samples as soon as offered are bought up. The supply seems far short of the demand. Old currants are neglected, but holders are very firm. In raisins, a steady advance is taking place in Valencia, 45s having been paid, and 43s to 44s refused for fruit afloat and on the spot. Red Smyrna raisins are expected in a few days, and a large trade is anticipated. Figs are in great request, at 36s to 45s for ordinary drums and boxes, to 85s to 95s for fine layers. Sultanas are neglected, at 53s. Muscatels scarce. No bunch on the market, and 43s refused for common layers.

ENGLISH WOOL.—The English wool trade continues generally very dull, and prices barely supported, but for low skin wools there has been more demand for American account, and some large stocks of (hitherto unsaleable) wool have been taken out of the market, at prices rather in favour of the seller.

COLONIAL WOOL.—The market remains without alteration.

FLAX.—Market quiet, and very little business doing.

HEMP.—Very firm, and a large business done during the week.

COTTON.—Sales of cotton from Friday, the 3d of October, to Thursday, the 10th of October, inclusive:—2,700 bales Surat at 7d to 7 1-16d for good fair to good new Dhollera, 6⅝d to 6⅞d for middling fair to fully fair old ditto, 7⅛d for good new Oomrawatty, 5⅞d to 6⅜d for ordinary to middling fair Oomrawatty; 500 bales Tinnevelly, 7⅛d to 7¼d for good fair to good, for cash; 100 bales Western Madras, 6⅛d for good fair. The demand continues good, and a fair amount of business has been transacted at rather higher prices for Surat, and for the better qualities ⅛d per lb advance has been paid. Prices of Tinnevelly and Western Madras are well maintained, and the market closes with great firmness and with an upward tendency. The following sales have been made for arrival:—4,400 bales Tinnevelly, 7d to 7⅛d for guaranteed fair to good fair; 1,000 bales Tinevelly (sold yesterday), 7¼d for guaranteed good fair; 750 bales Western Madras, 6⅛d for guaranted fair; 500 bales new Broach, 7⅛d for guaranteed fair. 63 bales Carriacou and 48 bales Surat are advertised for public sale on Thursday, the 17th inst. P.S.—Sales to-day, 500 Surat at extreme prices.

TOBACCO.—The market remains very firm for all descriptions, but sales have been chiefly of limited lots and selections for immediate consumption. About 50 tons have been taken for the navy.

LEATHER AND HIDES.—Since our report of last week no change has occurred in the leather trade. The demand has in most articles fully equalled the supply, so that the stocks are rather diminished than increased. At Leadenhall, on Tuesday, there was not much activity. Crop hides, 45 lbs and upwards, were scarce and greatly in request, and an advance of ½d per lb was realised on those of prime tannages and growth. Good heavy English butts and prime middle weight calf-skins were also much wanted

METALS.—There has been a little doing in metals this week, and quotations are mostly well maintained. Copper keeps steady in price and demand, although the latter is not active. Iron is a trifle more in request for some descriptions of manufactured, whilst Scotch pig has fallen slightly in value. Lead is fully maintained at late improvement. Tin is unchanged. Spelter has advanced still further in price. Tin plates have found a rather improved inquiry.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	9
Fat by ditto	2	8
Yellow Russian	51	6
Melted stuff	39	0
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

Imports this week 2,062 casks.

PROVISIONS.

Trade generally very dull. Bacon market very quiet; the price of best dried bacon 72s, whilst green is making 66s f.o.b. Butter very queer in quality; Friesland very washy; real fine Jersey the only thing that sells freely. English Cheese—Cheshire and other sorts much lower in price.

METROPOLITAN CATTLE MARKET.

THURSDAY, Oct. 20.—To-day's market was but moderately supplied with beasts, the quality of which was by no means first rate. Prime breeds commanded a steady sale, at fully Monday's currency; otherwise, the beef trade was in a sluggish state, on former terms. Prime Down and half-bred sheep were scarce, and in good request, at full prices; but other breeds were a dull inquiry, at late rates. The show of calves was only moderate; nevertheless, the veal trade ruled heavy, at the late decline in value. Pigs moved off freely, at very full prices; but milch cows were a dull sale.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	4	3	6	Large coarse calves	3	4	3	10
Prime large oxen	3	8	4	2	Prime small ditto	4	0	4	4
Prime Scots, &c.	4	4	4	8	Large hogs	4	0	4	6
Coarse and inferior sheep	3	0	3	4	Small porkers	4	8	5	0
Second quality ditto	3	6	4	0	Suckling calves.....each	21	0	30	0
Prime coarse-woolled do.	4	2	4	10	Quarter old store pigs	21	0	31	0

Total supply—Beasts, 820; sheep and lambs, 6,560; calves, 190; pigs, 500.
Foreign supply—Beasts, 210; sheep 900; calves, 95.

NEWGATE AND LEADENHALL

FRIDAY, Oct. 11.—The supplies of meat on sale here are moderate. Good and prime beef and mutton move off steadily at very full prices; but inferior qualities are in slow request at late rates. Veal is a dull inquiry. Pork, however, commands high currencies.

Per 8 lbs by the carcase.

	s	d	s	d		s	d.	s	d
Inferior beef	2	6	3	2	Middling mutton	3	6	4	0
Middling ditto	3	4	3	6	Prime ditto	4	2	4	4
Prime large ditto	3	8	3	10	Veal	3	4	4	0
Prime small ditto	4	0	4	2	Small pork	4	10	5	4
Large Pork	4	0	4	8	Lamb	0	0	0	0
Inferior mutton	3	0	3	4					

HOP MARKET.

BOROUGH, Monday, Oct. 7.—Our trade during the last few days has become less active, and prices for the inferior sorts have declined 5s per cwt. Mid and East Kents, 200s to 273s; Weald of Kents, 170s to 200s; Sussex, 155s to 170s.

FRIDAY, Oct. 11.—The best samples of new hops are in fair request, at full prices; otherwise the trade is in a sluggish state, at the late decline. Duty, 115,000*l.*

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Oct. 7.—The supplies of potatoes on sale here are moderate. Generally speaking, the trade is in a sluggish state, nevertheless prices rule firm. York Regents, 95s to 105s; Scotch ditto, 90s to 100s; Kent and Essex, 85s to 110s.

FRIDAY, Oct. 11.—The supplies of potatoes are moderate, and the trade rules firm, at late rates.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 5s to 5*l* 0s; clover ditto, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 8s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Trade steady.

COAL MARKET.

FRIDAY, Oct. 11.—Hetton 18s 6d—Lambton 18s—Russel's Hetton 17s—Hetton Lyons 16s 3d—Hastings 17s 6d—Lamberts 17s 3d—Tanfield Butes 12s 6d—Walker Primrose 11s 6d. Ships at market, 86; sold, 72.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 11.—A fair attendance at to-day's market. Wheat in good demand, at an advance of 2d to 3d per cental. Flour—Good qualities scarce, and 6d per barrel dearer. Indian corn in good request: mixed, 31s 6d to 31s 9d. Egyptian beans, 34s 6d to 35s. Very little offering. Other articles unchanged.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 11.—Our public sales in progress here since the 8th inst. are going off with great spirit, the lower-priced qualities of East India showing an advance of 1d to 1½d on last sale-prices, whilst in some cases it is even more; but the finer descriptions have so far undergone no very material change.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, Oct. 11.—The market for manufactured iron remains unaltered, and at the recent meeting of Staffordshire iron masters it was resolved to adhere to the prices fixed at the last quarterly meeting. The fluctuations in the price of Scotch pig iron during the past week have been very trivial. There is still a want of animation in the copper market, the demand being principally confined to the home trade. In lead there has been more activity, and a slight advance has been realised in recent sales. Tin plates have been in better request.

The Gazette.

TUESDAY, Oct. 8.

BANKRUPTCY ANNULLED.

W. Ronald, Manchester, warehouseman.

BANKRUPTS.

I. N. Davis, Brentford, distiller.
J. H. Paice, Fenchurch street, hosier.

Allan, Fraser, and Co., iron founders, Glasgow.
J. Campbell, spirit dealer, Rothesay.
A. Paterson, smith, Glasgow.

POLYTECHNIC INSTITUTION.—The scientific principles upon which Blondin and Leotard perform their wonderful feats of balancing receive from Mr Pepper, the popular lecturer of the Polytechnic, an exposition which creates surprise on the part of his numerous and gratified auditory that what they have looked upon with wonder should be so simple. A practical exemplification of the art is given, on a rope stretched across the platform, by John Snell, waterman and boat-builder, of Hampton who lately performed the difficult feat of walking across the Thames on a common towing rope. Snell walks backward as well as forward, and carries a boy on his back. The trapeze feats, which have made Leotard so potent an attraction at Cremorne and the Alhambra, are also explained, and their principle shown to be identical with that of the pendulum.

COMMERCIAL TIMES

Weekly Price Current.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 28th of September amounted to 574,265*l*, and for the corresponding week of last year to 568,680*l*, showing an increase of 5,585*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 269,353*l*, and for the corresponding week of 1860 to 264,326*l*, showing an increase of 5,027*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct. 7.—The railway market opened this morning without change, but subsequently became rather dull in sympathy with Consols. Towards the close, however, there was again a better feeling, and after regular hours an advance of ¼ to ⅜ per cent. took place; the final prices being generally the highest of the day. London and North-Western, Midland, Lancashire and Yorkshire, Great Western, and South-Eastern were especially firm. Colonial descriptions remained without material change. In the foreign market there was a slight decline in Bahia and Great Luxembourg. Lombardo-Venetian were steady at ⅛ to 1 pm. American securities were without alteration. Mines were in rather better demand, and occasionally exhibited an improvement.

TUESDAY, Oct. 8.—The railway market to-day was inactive, and the changes that took place were of little importance. Great Western, North British, and South-Eastern slightly improved, while London and North-Western, Midland, and Lancashire and Yorkshire showed a fractional decline. In the colonial market, Great Western of Canada shares advanced, while Grand Trunk closed without change at 19 to ½. East Indian remained steady at 101 to ¼. Foreign descriptions were little dealt in, and the only movements were a partial recovery in Great Luxembourg to 8½ to ⅝, and a reduction in Lombardo-Venetian to ¾ to ⅞ prem. American securities were firmer; Virginia Six per Cents., Illinois Central shares, and New York Central especially showed an improvement. The chief feature in mines was a rise in East Bassett. In joint stock banks, Egypt and London and Westminster advanced. In miscellaneous descriptions, Oriental Inland Steam shares were again quoted higher.

WEDNESDAY, Oct. 9.—The railway market to-day was inactive, and in some cases a slight decline took place. Lancashire and Yorkshire receded on the unfavourable traffic return. London and North-Western, Midland, and Great Western were also lower. The other leading stocks left off about the same as yesterday. In the colonial market Great Western of Canada shares were again slightly higher. Grand Trunk closed at 19 to ½, and East Indian 101 to ¼. Foreign descriptions were generally steady. Great Luxembourg experienced another fractional recovery. In American securities, Erie preference shares receded. Mines were generally firm; East Bassett in particular exhibited a further advance. In joint stock banks, London and Westminster shares again improved. Miscellaneous descriptions left off without material change.

THURSDAY, Oct. 10.—The railway market showed increased firmness to-day, the traffic returns proving more favourable than had been expected. Great Northern advanced 1 per cent., Midland ¾, and Eastern Counties ⅝; Lancashire and Yorkshire also improved ⅝ per cent., the comparatively low price of this stock in some degree counteracting the exceptional falling off in the receipts on this line. The market was especially good after official hours. Colonial descriptions showed no material alteration. East Indian left off at 101 to ¼; Grand Trunk, 19 to ½; and Great Western of Canada, 9¼ to ⅜. In the foreign market, Bahia and San Paulo were quoted a fraction lower. Lombardo-Venetian were steady at ⅛ to 1 premium. American securities were the same as yesterday. Mines were rather dull, and in some cases exhibited a reduction.

FRIDAY, Oct. 11.—The railway share market was inactive to-day, but prices on the whole ruled steady. Caledonian stock improved ⅝ per cent., while Midland receded ⅜. Otherwise there was no important variation. Lombardo-Venetian Railway shares remained steady, at ⅛ to 1 premium. Grand Trunk of Canada and Great Western of Canada were fairly supported. There were more inquiries for Great Luxembourg, which were last marked 8¾. The mining share market was moderately active.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

London: John Churchill; and may be had of al booksellers

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Roland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

DR CURTIS'S MEDICAL WORK "MANHOOD," An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1£, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

TRELOAR'S CORK FLOOR CLOTH,

OR KAMPTULICON.

Cocoa-Nut Fibre, Manilla, and China

MATTINGS AND MATS.

T. TRELOAR, MANUFACTURER, 42 LUDGATE HILL, LONDON.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c.

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other Articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

GREAT FIRES IN BELFAST,

in which nine of MILNER'S SAFES (six in the first and three in the last) have preserved their contents. The following is one of the certificates from all the owners:—

(Copy.)

"Messrs Thos. Milner and Son.

"Belfast, February 13, 1861.

"Gentlemen,—We beg to say that the block of buildings in Bedford street, in which our warehouses and offices were situated, was totally destroyed by fire on the 8th instant, but we are happy to say that all our books contained in two of your Safes were found, on forcing the Safes open, to be perfectly secure and the writing quite legible, though the edges and some leaves were stained by the steam, and some of the covers damaged by adhering to the sides of the Safes from the heat to which they were exposed.

"We are, Gentlemen, your obedient servants,

"J. B. RALSTON and Co."

Milner's Phœnix Safe Works, Windsor, Liverpool.
London Depot, 47A Moorgate street, City.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

ALLSOPP'S PALE ALE,

in Bottle, recommended by Baron Liebig and all the Faculty, may now be had in the finest condition, of Messrs HARRINGTON PARKER and CO., 54 Pall Mall, S.W.; and 144 Regent street, Waterloo place, S.W.

BASS'S EAST INDIA PALE ALE.

—The good crop of Barley and Hops enables Messrs BASS and CO. to Reduce the Price of their Ales 3s per Kilderkin, or 6s per Barrel.

The OCTOBER ALES are ARRIVING, in 18-gallon casks, and of excellent quality.

Last season's Ale, in bottles, is in prime condition.

BERRY BROS. and CO., 3 St James's street, S.W.

LAMBERT BROTHERS,

Walsall, Staffordshire, (Established 1830,)
Manufacturers
WROUGHT-IRON WELDED TUBES & FITTINGS, Chandeliers, High Pressure Steam and Water Valves.
Patent Metallic Bedsteads for exportation.
*** Illustrated catalogues on application.

GLENFIELD PATENT STARCH,

USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR

GLENFIELD PATENT STARCH,

see that you get it, as inferior kinds are often substituted.

WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

A BOON TO NERVOUS SUFFERERS.

—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

BLAIR'S GOUT AND RHEUMATIC PILLS.

—Price 1s 1½d and 2s 9d per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

HOLLOWAY'S OINTMENT AND PILLS.

—Order and Ease.—These remarkable remedies surpass every other medicine for general family use. Their action is alterative, anodyne, tonic, and healing. The Ointment has only to be perseveringly rubbed twice a day over any afflicted organ to penetrate to it, regulate and soothe it. Its tonic properties are obtained through the wholesome influence it exerts when rubbed over the stomach and liver, on both of which it produces the happiest effects by making their secretions abundant and natural. Holloway's purifying Pills should be simultaneously taken. The combined action of these safe yet potent remedies over stomach, liver, bowels, kidneys, muscles, and nerves, is immediate, beneficial, and lasting. Holloway's preparations restore order, ease, strength, and happiness.

DR KAHN ON MARRIAGE.—

A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

NOTICE TO INVENTORS.—

Office for Patents, 4 Trafalgar square, Charing cross.—Printed instructions (*gratis*) as to the cost of Patents for Great Britain or foreign countries. Advice and assistance in disposing of or working inventions. Branch offices and agencies in every continental state and in America. Established 20 years. Full information as to expired or existing patents at home or abroad.—Apply personally or by letter to Messrs Prince and Co., Patent Office, 4 Trafalgar square, Charing cross, W.C.

LOANS ON DEBENTURES.—

The BRISTOL and SOUTH WALES UNION RAILWAY COMPANY are prepared to receive TENDERS for LOANS of £100 and upwards, on the security of the Company's Debentures, bearing Interest at £5 per centum per annum—By order,

LEONARD BRUTON, Secretary.

Offices, 52 Queen square, Bristol.

THE INDUS STEAM FLOTILLA.—

The Directors are prepared to receive applications for Debentures at par, bearing interest at five per cent. per annum, guaranteed by the Secretary of State for India in Council.

The debentures are for five years, and may be renewed for a further term of five years at the same rate of interest.

The debentures may be converted into Indus Steam Flotilla Capital Stock at the option of the holder.

THOMAS BURNELL, Secretary.

Indus Steam Flotilla Office, Gresham House, Old Broad street, Sept. 25, 1861.

THE EAST INDIAN RAILWAY

COMPANY is prepared to received Tenders for the Supply of 857 SETS of ANGLE BOXES. Specification, drawings, and form of tender, upon which only tenders will be received, may be seen at the Company's offices, Alderman's walk, New Broad street, London. Tenders, sealed up, and marked "Tender for Axle Boxes," must be delivered to the Secretary on or before 12 o'clock at noon, on Thursday, the 17th instant.

The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, Oct. 4, 1861.

ROYAL DANISH RAILWAY.

Flensburg, Husum, Tonning Railway Company.

Notice is hereby given, that the guaranteed interest of 6 per cent. per annum upon the shares, and 5 per cent. per annum upon the bonds, for the six months ending 25th inst., will be payable on and after that date.

The Coupons, detached from the shares and bonds, must be deposited at the London office, 60 Old Broad street, or with the Resident Director at Flensburg, for three days, when drafts will be issued payable at Messrs Glyn, Mill, and Co., Lombard street, and at the offices in Flensburg.

GEORGE GRENFELL GLYN, Chairman.
FREDERICK H. GEACH, Secretary.
60 Old Broad street, London, 7th October, 1861.

EAST INDIAN RAILWAY

COMPANY.—Notice is hereby given, that the Fourteenth Half-yearly General Meeting of the East Indian Railway Company will be held at the London Tavern, Bishopsgate street, on Thursday, the 31st day of October, at one o'clock precisely, in conformity with the terms of the Company's deed of settlement.

The transfer books of the Company will be closed from the 21st to the 31st days of October, both days inclusive.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 10th Oct., 1861.

N.B.—Transfers will not be received at the office while the books remain closed.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT COMPANY.

The Directors are prepared to comply with all applications for their Debentures at par. They are issued in sums of £50, £100, £500, and £1,000, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in mortgages of improved freehold land of very ample value, the Company by its charter being in every case first mortgagee.

Individuals and public institutions, who usually lend on mortgage, are offered a higher class security than is afforded by the old mortgage system.

The interest is payable by coupons, on the 1st January and 1st July, at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, and the same is receivable through any of the country banks.

The last half-yearly statement and the Debentures may be had at the Company's brokers, Messrs Brunton and Son, Auction Mart chambers, Bartholomew lane, London, E.C.

TAYLOR, WATT AND CO.,

Merchants, Auctioneers, Commission Land and Estate Agents, Wanganui, Province of Wellington, New Zealand.

London Agent:—BERNARD LEWIS, WINE and COLONIAL MERCHANT, St Michael's House, Cornhill.

Wanganui, 4th July, 1861.

No charge for storage on goods consigned for sale.

FRENCH WINE BOTTLES,

Soda Water Bottles, Confectioners' Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works.—AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Free Trade Wharf, Ratcliff; and 61 King William-street, E.C. The Patent Stoppered Bottles of all kinds.

THE NEW SPIRIT ACT.—

By the 24 and 25 Vict., cap. 21, wine merchants are now allowed to sell a Single Bottle of Spirits. To carry out this boon to the public, J. J. R. is prepared to forward one dozen or half-dozen cases of assorted spirits, according to order. Brandy, 4s 6d; Whisky, 3s 6d; Rum, 3s; Gin, 2s 6d; Geneva, 2s 10d per bottle. Terms cash.

J. J. ROURKE, Importer, 31 Eastcheap City, London

SWANN AND CO.'S STOURPORT

MALT VINEGAR for PICKLING.

"The best known."—Vide "Lancet," Feb. 14 and Aug. 29, 1852.

CITY DEPOT—WHITMORE and CRADDOCK, 16 Bishopsgate street within, London, E.C., opposite "The Baltic" Coffeehouse.

Shippers and the trade supplied on best terms.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers thro h-out the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

MERCHANTS HAVING

commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains; and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

A WELCOME ANNOUNCEMENT.

E. MOSES AND SON

beg respectfully to acquaint the public that they have made preparations, on an unprecedentedly large scale, for the Autumn and Winter Seasons. Their stock of OVERCOATS comprises every modern style in all kinds of seasonable and serviceable materials, with the latest improvements in workmanship. The Eversley, Chesterfield, and Shelburne overcoats are particularly recommended.

Their general stock includes every description of attire for all classes, all ages, and all occupations; the articles are too numerous to particularise, but may be gathered from their several trades of—

MERCHANT TAILORS, HABIT MAKERS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Their BESPOKE CLOTHING DEPARTMENT is too important a branch of their business to be passed over without a special notice. It offers a perfect fit, combined with the most fashionable and comfortable styles, and the most elegant workmanship.

E. MOSES and SON need scarcely remind the public that in every department of all their establishments the Highest Degree of Excellence is associated with Prices the Most Moderate.

Any article not approved of will be exchanged or the money returned.

Rules for self-measurement and lists of prices post free.

E. MOSES and SON'S establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.

E. MOSES and SON.

London Houses:—

City Establishment—Corner of MINORIES and ALDGATE, 154, 155, 156, 157, Minories; 83, 84, 85, 86, Aldgate.

Oxford street Branch—NEW OXFORD STREET, corner of HART STREET,

506, 507, 508, New Oxford street; 1, 2, 3, Hart street.

Tottenham Court road Branch—Corner of TOTTENHAM COURT ROAD and EUSTON ROAD,

137, 138, Tottenham Court road; 283 Euston road.

Country Establishments:—

BRADFORD, YORKSHIRE, and FARGATE, SHEFFIELD.

N.B.—Our Celebrated "INDISPENSABLE SUIT," adapted equally for walking, riding, travelling, or business, may be had in a large variety of seasonable and fashionable materials, from 30s to 70s.

V. R.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr LANKESTER, F.R.S., Superintendent of the Food Collection, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

THE LONDON AND PROVINCIAL AGRICULTURAL COMPANY (Limited).

Registered under the Act of Parliament which limits the liability to the amount of shares taken.

Capital, £100,000, in shares of £1 each; 2s 6d deposit to be paid.

DIRECTORS.

Major-General Pemberton, York house, Chertsey, Surrey.
Henry Wetton, Esq., Chertsey, Surrey.

AUDITORS.

Messrs Burbidge and Fletcher, public accountants, 61 Moorgate street, E.C.
Messrs Cooper, Brothers, and Co., public accountants, 13 George street, Mansion House, London.

BANKERS.

The London and County Bank, Lombard street, London.

BROKERS.

E. Everett, Esq., 17 and 18 Royal Exchange, London; W. H. Pounfney, Esq., 5 Royal Exchange, Manchester; W. K. Thomas, Esq., 29 Clare street, Bristol; Messrs Massey and Son, Birmingham; Thomas Miller, Esq., 2 Princes street, Edinburgh; Messrs Stevens and Co., Dublin; Messrs Orr and Co., Belfast.

MANAGER—Mr Thomas Retigan.

Chief Office—40 Mark lane, London.

Manufactories—Albert Works, Nightingale street, Strangeways, Manchester, and Carlisle Works, Abbey Town, near Carlisle.

The above Company has been established for the more extended manufacture of the Royal Patent Compound Oil Cake for Cattle, the Compound Feeding Meal, the original economic food for cattle, and patented, superphosphate, and other standard chemical manures, at such reduced prices as will amply remunerate the Company, and furnish it with a claim upon the support of all consumers, who can participate in the profits by investing in its shares.

Ten years ago oil cake, as an article of import for feeding and manure, was comparatively unknown. Now the annual imports alone exceed 95,000 tons, and the deep interest with which the chemist and farmer now regard the character and adopt the use of manufactured foods and cake as essential auxiliaries to improve and vary the coarser produce in plentiful times, as effective substitutes in periods of scarcity, and valuable aids in forming manure after they have fattened cattle, define the position which their production has assumed as a staple trade associated with the agricultural progress of our time.

Our guano imports have doubled, and we now obtain foreign supplies of bones to the extent of 85,000 tons. The scope which is presented in the manure branch of this business may be thus estimated, as we can but indicate the range it commands in the use of materials, skill of manufacture, and certainty of enormous consumption. The productions which the Company propose to manufacture have been for the last three years before the public, and the unimpeachable testimony of the first agriculturists and the prize lists of all the agricultural shows attest their position and popularity.

Such has been the daily increasing demand that enlarged mill and mechanical facilities are now required to supply it, and this Company has therefore been designed.

The late proprietors have transferred to the Company the Manchester mill and machinery, utensils and office furniture, the patent, and all other property, their business connections and practical experience in the management, and have taken shares for the whole amount of their interest and the capital invested.

One of the Directors, owing to the demand of the district in which he resides, has also formally undertaken to fit up, with all necessary machinery, and work a mill called Carlisle Works, at Abbey Town, near Carlisle, furnishing all the capital required, and receiving shares in return for his outlay.

Negotiations are in progress to effect similar arrangements in London, where there are 3,000 dairymen alone to supply, and in Scotland and Dublin, so as to cheapen carriage and facilitate consumption. The Company, therefore, start with an established business in extensive demand, a staff of 500 agents to extend it, and the mechanical capabilities of two large manufactories to furnish an immediate supply.

It is estimated that the Manchester mill can produce a gross return in cake, meal, and food alone of £800 a week, and that the Carlisle mill can return about £500 a week, making a total of £1,300 per week; the profits upon which—necessarily private, from the nature of the business—will provide an ample margin for a dividend of from 20 to 30 per cent. upon the capital invested. The erection of wooden sheds adjacent to these mills will be all that is necessary to enable them to make a sale of 1,000 tons (say £5,000 worth) of manure per annum, a mere moiety of the demand of these districts.

In anticipating the results of the operations of the Company on the wide basis on which it rests, it has been calculated that with the 500 agents now connected with the Company, and exclusive of a London trade, supposing them to average a return of only half a cwt of food and half a ton of cake per week each, the gross returns of the Company will be, in round numbers, £182,0 0 per annum. Assuming they double that return, you have £364,000 per annum; and we may be allowed to observe, that this average return falls far short of what the working agents, during the late proprietors' experience, effected. The United Kingdom cannot be well covered under 1,000 agents; and assuming their return to be but on the basis of the first calculation, you still have £364,000 per annum income, while this latter calculation may be considerably increased by additions to the business which the agents can effect, or which may be received from direct customers.

The cost of production and working expenses would, of course, be much less upon this return than on a smaller one. And it would be but a moderate expectation that a return of 5,000 tons of manure, which, at £5 per ton, would be £25,000 per annum, could certainly be effected through the same connection.

Sufficient has now been stated, in the limited space of a prospectus, to prove that an exceptional opportunity is presented for effecting a profitable investment in a commercial business, which being established and peculiar, lucrative and patented, possesses every element of secure prosperity, and offers an unprecedented advantage to the investor. And the Directors are confident in the belief that the undertaking will receive that support to which it is entitled by the objects it has in view, from all persons interested in agricultural matters, as well as from those whose only desire is to make a successful investment.

The full prospectus, circulars, and share application forms can be obtained from all the local agents, the brokers, auditors, bankers, and solicitors; and from the Secretary, at the chief offices of the Company.

TESTIMONIALS.

ROYAL PATENT CAKE.

The following are a few out of thousands of testimonials that have been voluntarily rendered, while the number of customers who signify their approval in another mode—namely, repeating their orders and continuing their custom, could not well be calculated:—

Royal Farm, Windsor, Feb. 20, 1861.

Gentlemen,—Please send me one ton of your "Royal Patent Cake," per rail to Windsor station, directed to H.R.H. the Prince Consort, Norfolk Farm; invoice to me, which will oblige.

I have used your two boxes of cake sent me on one ox, and find that he did well and altogether satisfactorily. I now feel inclined to give it a more extensive trial.—I am, gentlemen, your obedient servant,

JAMES BREBNER.

N.B., Craignish Castle, Dec. 31, 1860.

Gentlemen,—Having been from home, yours of the 11th inst. has only come to hand. The ton of "Royal Patent Cake" I had from you was preferable to any other cake I have tried both for cattle and sheep. I have great pleasure in bearing testimony to its superiority over any other food I ever used.—I am, gentlemen, yours very truly,

SIMON FRAZER,
Steward to T. T. Gascoigne, Craignish Castle, Renfrewshire.

CATTLE FOOD.

Derrumby house, near Frankford, King's County, May 7, 1860.

Gentlemen,—In this instance I shall depart from the rule I have laid down of refusing testimonials. It is only very recently I discovered the real value of your Cattle Food, from the fact of the present scarcity of fodder, and its high price.

My horses, for the last month, have been living on old straw, cut up with gorse, which, with a measure of your food to each, they eat with avidity, and do not lose their condition.

I am also able to speak favourably of it in its effects on cattle; in one instance in particular, that of a milch cow that was hide-bound. I found that after a week's feeding with your food the skin gradually softened, the old hair fell off, and the quantity of milk considerably increased. I am quite convinced that, independent of its nutritive properties, its value as a condiment, mixed with inferior food, is of considerable importance to farmers, more especially in a season of scarceness like the present.—I am, gentlemen, yours most respectfully,

JOHN SILLS.

MANURES.

October, 1860.

Sirs,—I have great pleasure in expressing my perfect satisfaction with the manures which you recommended me for turnips, I tried it on land which was very materially worn, and gained the first prize in the second class at the Keele Agricultural Show, Sept. 29, for the turnips it produced, and which I exhibited there.—I am, Sirs, yours respectfully,

HENRY BRADBURY.

Peacock's Hay, Tunstall, Staffordshire.

*** Paris departure daily.

STEAM SHIPS.—

The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday morning. Chief cabin, 2l; fore, 1l 5s.

HARBURG—Sunday morning.

COPENHAGEN—STETTIN—The Arno and Elba.

ROTTERDAM—Tuesday, Thursday, and Saturday, at 11 morning. Chief cabin, 1l 10s; fore, 17s 6d. Cologne, 35s 6d or 19s 9d.

ANTWERP, BRUSSELS, and the RHINE—The Rhine and Dolphin, every Tuesday and Thursday at 12 noon. Chief cabin, 1l 7s; fore, 20s. Brussels, 22s 3d, Cologne, 35s 6d. Leaving Antwerp for London every Sunday and Friday at 1 afternoon.

OSTEND, BRUSSELS, and the RHINE—Every Wednesday and Saturday morning. Oct. 16 at 11; 19 at 12 noon. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 18s; fore, 14s. Brussels, 20s 3d. Cologne, 34s.

HAVRE—From St Katharine's Wharf, every Sunday morning. Oct. 13 at 6; 20 at 11. Chief cabin, 14s; fore, 10s London to Paris, £1.

PARIS, via CALAIS, direct—From London Bridge Wharf, every Wednesday and Saturday morning. Oct. 16 at 11; 19 at 12 noon. Chief cabin, 14s; fore, 10s. London to Paris, 17s 3d.

BOULOGNE—From London Bridge Wharf, every morning. Oct. 13 at 8; 14 at 10; 15, 16, and 17 at 11. Chief cabin, 14s; fore, 10s. London to Paris, 15s.

EDINBURGH—From St Katharine's Wharf adjoining the Tower, every Wednesday and Saturday at 10 morning. Fares: chief cabin, 20s; return, 30s; fore, 15s; return, 22s 6d; deck, 7s 6d; which fares include all pier dues at London and Granton.

HULL—From London Bridge Wharf, every Wednesday and Saturday at 8 morning Chief cabin, 6s 6d; return, 10s; fore cabin, 4s; return, 6s.

The Bank will effect the purchase or sale of Indian Securities; undertakes the safe custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys, for remittance through the Bank or otherwise.

The Bank receives Money on Deposit, on which Interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head office, 52 Threadneedle street, London.

Office hours from 10 *a.m.* to 3 *p.m.*; Saturdays from 10 a.m. to 2 p.m.

52 Threadneedle street, London, E.C.

METROPOLITAN AND PROVINCIAL BANK (Limited).

Established under the Joint Stock Banking Companies Amendment Acts, 20 and 21 Vict., cap. 49, and 21 and 22 Vict., cap. 91, which specially limit the liability of each shareholder to the amount of his shares.

Capital One Million, in 10,000 shares of £100 each, of which it is not intended to call up more than £25 per share, with power to increase to Two Millions by resolution of general meeting of Shareholders.

Deposit on application, £2 per share, and a further deposit of £3 on allotment, making £5 per share. If no allotment be made, the deposit will be returned in full.

It is provided by the Articles of Association that no call shall exceed £5 per share, and that at least three months shall intervene between two successive calls.

DIRECTORS.

The Right Hon. The Lord Fermoy, M.P. for Marylebone, 5 Clarendon place, Hyde park gardens (Chairman).
R. J. Blyth, Esq. (firm of Charles Blyth and Co.), Cripplegate buildings, Wood street.

G. Goldsmith Kirby, Esq., Director of the Albert Insurance Company.
Cyrus Legg, Esq., Bermondsey.
Thomas Miers, Esq., Director of the Commercial Gas Company.
Isaac L. Mocatta, Esq., 2 Upper Montague street, Russell square.
George P. Robinson, Esq., Director of the Chartered Mercantile Bank of India, London, and China.
W. F. Drought Stevens, Esq., 12 Cleveland gardens, Hyde park.
Thomas Stenhouse, Esq., Merchant, Liverpool.

MANAGER.

The Directors will secure the services of the most able and experienced Manager that can be obtained.

BROKERS.

Messrs Crosley Brothers, London.

BANKERS.

Bank of London, 52 Threadneedle street, and Charing cross.

SECRETARY—J. Pope Cox, Esq.
Temporary Offices—27 Gresham street, Bank.

Hitherto the entire property of the shareholders in Joint Stock Banks has been liable for the debts and engagements of the bank of which they were proprietors, and the risks and inconveniences which have occasionally occurred therefrom have necessarily deterred many from investing their capital in shares in such undertakings.

The Joint Stock Banking Companies Amendment Acts, passed expressly to remove this uncertain risk, and to give confidence in Joint Stock Banks, have entirely obviated this objection as regards banks of limited liability, and the Metropolitan and Provincial Bank (Limited) has been established under the express Provisions of those Acts, so that no shareholder therein can possibly be liable for any sum beyond the amount of the shares he holds.

The following tabular statement of the business results of four of the London Joint Stock Banks to the 30th June last, clearly indicates their advancing success, and the present market value of their shares:—

Joint Stock Banks.	Paid-up Capital.	Current and Deposit Accounts.	Dividend Bonus and	Amount Paid per Share.	Price per Share.	Net Profits for Half-Year ending June 30, 1861.
	£	£	Per Cent.	£	£	£
London and Westminster	1,000,000	14,821,650	20	20	36	131,592
London Joint Stock	600,000	11,425,087	25	25	30	84,006
Union Bank of London	600,000	10,416,020	10	12	25½	95,616
Banks with Provincial Branches: London and County	500,000	5,973,348	10	20	36	40,744
National Provincial Bank of England	600,000	Not Published.	18	35	108	70,900

Powers are taken in the Articles of Association to establish Branch Banks in the metropolis and the provinces as soon as the business operations of the Bank justify its extension.

A deposit of £2 per share on the number of shares applied for must be paid to the Company's Bankers; or, if more convenient, may be forwarded to the Secretary (it by check, to be crossed "Bank of London"), who will forthwith return the Banker's receipt for the amount.

Applications for shares to be made through the brokers, or the Secretary, at the Company's temporary offices, 27 Gresham street, Bank, London.

METROPOLITAN AND PROVINCIAL BANK (Limited).

Notice is hereby given, that no Application for Shares in this Company will be received after Tuesday the 22nd of October instant.

On closing the allotment of shares, the Directors will proceed to consider the applications for the appointment of Manager.—By order of the Board,

J. POPE COX, Secretary.

Temporary offices, 27 Gresham street, E.C.

EVENING LECTURES AT THE GOVERNMENT SCHOOL of MINES, Jermyn street.

—Professor HUXLEY, F.R.S., will commence a course of Ten Lectures "On the First Principles of Physiology," on Saturday, the 19th October, at 7 o'clock. To be continued on each succeeding Saturday evening. Tickets for the whole course, price Five Shillings, may be had at the Museum of Practical Geology.

TRENHAM REEKS, Registrar.

KENTISH TOWN COLLEGIATE SCHOOL, N.W.

—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable apply to Head Master, Leighton House, Kentish town.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey,

combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

DENT, CHRONOMETER,

Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

DEANE'S TWO-HOLE BLACKPENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

In boards, Two Shillings and Sixpence; now ready,

*** For full details, see prospectus, which may be had from the publishers, or through any bookseller.

"As regards the contents of this Cyclopædia, it is, however, impossible to give any sufficient impression of an aggregate which includes somewhere or other all the information generally required upon every conceivable topic. A good Encyclopædia, as every one knows, is a compendious library, and though students may require further information upon some points than its summaries contain, even students will be surprised in this instance to find the materials at their disposal when they once adopt the habit of resorting to its pages. For all practical purposes a large proportion of the articles may be said to be exhaustive; they are accurate to a degree which will strike even those who know what pains have been taken to render them so; and as they are concise as well as full, every column being rammed like a sky-rocket, the owner has a reservoir out of all proportion to the library shelves it will occupy."—The TIMES, Oct. 4, 1861.

The Advertiser wishes to meet with an appointment in the Share or Accounts Department of any Company now formed or forming. He has had eight years' experience in the situation he now holds in an Indian Railway office, possesses a perfect knowledge of the system of issuing stock and share capital, and can be well recommended.—Address A. Z. R., Messrs Leathwait and Simmons, Pope's Head alley, London, E.C.

GOOD DIVIDENDS.—

Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C., have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ¼, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

WHOLESALE HOUSES,

Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

COUNTY ANTRIM.
VALUABLE FREEHOLD PROPERTY for SALE.

TO BE SOLD BY AUCTION,
at the Mart of Mr HUGH C. CLARKE, 5 ROSEMARY STREET, BELFAST, on MONDAY, the 21st day of October, 1861, at the hour of ONE o'clock p.m.,

All that FARM of LAND, containing 100A 0R 29P, statute measure, or thereabouts, be the same more or less, situate in the Townland of BALLYKEEL, in the Barony of Upper Glenarm, and County of Antrim, as lately in the occupation of Mr Philip Thornton, deceased, and held in fee farm, subject to the yearly rent of £10 16s 11d sterling; besides receiver's fees, duties, and tithe rent-charge.

Adjoining the Dwellinghouse there are extensive Offices and Farm Buildings, recently erected, with Churning and Thrashing Machines fitted up therein; Garden, Orchard, and every convenience for the residence of a respectable family, with an abundant supply of water at all seasons. It is well accommodated with regard to roads.

The Lands are in a good state of cultivation, a large sum having been lately expended in draining, fencing, and liming.

The above Farm is beautifully situated, within one mile of Kilwaughter Castle, two miles of the seaport town of Larne, and fourteen miles of Belfast, between which towns railway communication will be completed within a year.

The North of Ireland will shortly be brought into easy communication with Scotland and the North of England by the short sea-passage about to be established between Larne and Cairnryan, the passage being made in two hours.

For title and further particulars, apply to
Sir EDWARD COEY, Merville, Belfast;
HUGH C. CLARKE, Auctioneer, Belfast; or to
JOHN M'NEILL, Solicitor, Larne.

A GENTLEMAN WHO HAS BEEN engaged for 20 years in a Joint Stock Bank, in which he has filled increasingly responsible positions, is desirous of forming an engagement with some other establishment.—Address S. M., 15 Southampton buildings, Chancery lane, London.

CLERKSHIP OR OTHERWISE.—Wanted, by the advertiser, a situation as above: has for 13 years filled the principal situation in a foreign merchant's office, and is thoroughly acquainted with bookkeeping and accounts. The highest testimonials from bankers and merchants can be given.—Address Z. Z., care of Secretary, Auction Mart, City, E.C.

PARTNERSHIP.—A GENTLEMAN already in business, and having a moderate capital at command, wishes to extend his business by connecting himself with a House already established, or with a Partner who could bring a good connection either home or foreign. Principals or their Solicitors only to apply.—Address Z., care of T. Edgcombe Parsons, Esq., Solicitor, 61 Gracechurch street, E.C.

GOOD DIVIDENDS.—Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C., have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ¼, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

SITUATION WANTED.—A Gentleman of middle age, of considerable mercantile experience, master of the principal Continental languages, is desirous of finding suitable employment in a mercantile house as Corresponding or Managing Clerk, or would have no objection to act as Agent here for foreign houses, or to settle in Paris, Hamburg, or any other important city on the Continent, to represent their English or Continental houses.—Address E. B., post paid, 22 Hanover square.

WHOLESALE HOUSES, Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.		Amount payable up to Dec., 1864.	
£	£	s	£	s
5,000	1,987	10	6,987	10
1,000	397	10	1,397	10
100	39	15	139	15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

LONDON LIFE ASSOCIATION,

81 King William street, E.C. Instituted 1806.

PRESIDENT—Charles Franks, Esq.
VICE-PRESIDENT—John Benjamin Heath, Esq.
TRUSTEES.

Francis H. Mitchell, Esq. | Robert Hanbury, Esq.
Alfred Head, Esq. | Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year, and appropriated solely to a reduction of the premiums after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 73½ per cent., whereby each £10 of annual premium will be reduced to £2 13s.

This Society has paid in claims more than £4,150,000.

And has policies now in force amounting to £6,450,000.

For the payment of which it possesses a capital exceeding £2,750,000.

And a gross income from premimns and interes of more than £340,000.

Assurances may be effected for any sum not exceeding £10,000 on the same life.

The Society has no agents, and allows no commission; nevertheless the new assurances effected in the last financial year amounted to £287,240, and the new annual premiums to £10,567.

ANNUITIES.

NATIONAL ASSURANCE AND

INVESTMENT ASSOCIATION.
3 Pall Mall East, London.
Empowered by Special Act of Parliament, 17 Vic. cap. 43.
Established A.D. 1844.

IMMEDIATE ANNUITIES granted on very favourable terms.

The Tables for Reversionary and Deferred Annuities are particularly deserving of attention, whether regarded as a means of providing for a particular individual, or as a resource against the casualties of age and the uncertainties of health and fortune.

PETER MORRISON, Managing Director.

Prospectuses sent free on application.

THE POLICIES OF

THE STANDARD LIFE

ASSURANCE COMPANY ARE MORE VALUABLE THAN ORDINARY POLICIES, inasmuch as they are free from extra Premiums in the case of Foreign residence, when the Directors are satisfied there is no intention or prospect on the part of the Assured to reside abroad. They are also free from other restrictive clauses. These are great benefits. Take as an example a life-renter who assures his life. In ordinary policies he is limited to residence in Europe, and his policy is subject to forfeiture on various grounds. A Standard Free Policy once obtained contains but one condition—payment of the Premium, and for that, too, increased facilities are given; while, at the end of five years, the Assurance Deed becomes—as regards any question—a simple promise to pay on proof of death. If the Policy is to be made the basis of a marriage contract, or to be a security in any way, the advantage of a Free Assurance is undeniable; and, in the present day, every Policy, it may be said, becomes in the course of its existence, in some way or other, the groundwork of a responsible transaction.

The BUSINESS of the STANDARD LIFE ASSURANCE COMPANY has been most successful since its Establishment in 1825.

PROGRESS DURING 1860.

	£
Sums proposed for Assurance during the year, 1860	807,747
Policies accepted and taken up	705,897
Annual Income was at 15th Nov., 1860	304,161
Accumulated Fund.....	1,856,802

SPECIAL NOTICE.

ADVANTAGE OF ASSURING BEFORE 15TH NOVEMBER, 1861.

A Policy effected before 15th November next will not only participate in the 7th Division of Profits to be made in 1865, but will secure one year's additional Bonus, at all future Divisions, over Policies of later date.

THE PROFITS OF THE COMPANY have been divided on six occasions—in 1835, 1840, 1845, 1850, 1855, and 1860, when large additions were made to Policies under the peculiar mode of division adopted by the Company, which is essentially Tontine, affording very important advantages to Assurers.

EXAMPLES OF BONUS ADDITIONS.

Date of Policy.	Sums in Policies. £	Bonus Additions to 1860. £ s	Sums in Policies with Bonus Additions. £ s

John Kemp Welch, Esq. (Orlando Jones and Co.)

MANAGER—Henry Thomson, Esq.
BANKERS—The London and County Bank.
SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification; adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the Commercial community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust they will be supported by the public to enable them to carry out this system with success.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861:

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s 10 £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life; when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

V. R.

ARMY CONTRACTS.

Tenders will be received at this office until Noon on the 5th of November, from persons who may be willing to enter into Contracts to Supply

BREAD and MEAT,

in such quantities as may be required for the use of Her Majesty's Land Forces stationed in the following places, from 1st December, 1861, to 31st May, 1862:—

1. Brompton House, Hyde Park, and Kensington.
2. Regent's Park, St John's Wood, and Portman street Barracks.
3. Wellington Barracks, Horse Guards, Buckingham Palace, and St George's Barracks.
4. Tower.
5. Hounslow and Kneller Hall.
6. Hampton Court.
7. Windsor.
8. Brighton, with Coast Forts from Newhaven to Shoreham.
9. Croydon.
10. Sandhurst.

Separate tenders for Bread, and for Meat, must made for each of the above-mentioned Stations for Barracks as separately grouped and numbered.

Forms of tender, and conditions of contract, may be obtained on application at this office, by letter or in person, between the hours of 10 and 4 o'clock.

Tenders on the printed forms must be properly filled up and signed, and delivered at the under-mentioned office, under closed envelope (marked on on the outside, "Tender for Commissariat Supplies,") before noon on the 5th November next.

The Political Economist.

As the American crisis is so very important to the commercial interests of this country, we have made arrangements for a Series of Letters from a Gentleman of great intelligence, practically acquainted with the Cotton Trade, who is now on his voyage to America to learn, as far as possible, the real facts from personal observation.

A Supplement, containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 6th of April last, will be issued very shortly.

THE EUROPEAN GOVERNMENTS AND THE AMERICAN BLOCKADE.

From letters and papers which have been forwarded to us this week, it would appear not only that there are certain parties among the manufacturers of Lancashire bent on urging our Government to break the blockade of the cotton ports of the Confederate States, but that there are others who hope and believe that the French Emperor is about to do what our Ministers, very properly, recoil from doing. To both of these sections we have a few words to say.

That England has far too great a respect for international law and morality, and far too much consideration for future and remote consequences, forcibly to interfere with or prohibit the blockade, we have, we trust, made clear in previous numbers. But those who, in their dread of a scarcity of cotton, would have our Government take this perilous and unwarrantable step, would do well to consider whether, apart from the impropriety and irrationality of their demand, they are not defeating their own end by making it. The Seceding States have based much of their action and many of their expectations upon the conviction that England cannot do without their cotton, and that, if it be long enough witheld, she will interfere to break the blockade by force;—in other words, that she will embrace their cause and virtually declare war against their rival;—that is, that she will take precisely the line which these complainants are urging her to take. The South is deliberately planning and toiling to *force* us into a quarrel with the North; and Englishmen are found ready to fall into the open trap, and help her sinister design! Is it not obvious that so long as the Confederates entertain any hopes that England *will* thus interfere, they will obstinately retain their cotton on the plantations and effectually prevent our getting it in any mode? And is it not obvious that nothing will so foster and prolong these fallacious hopes as the language which, under the dread of coming pressure, these inconsiderate merchants and manufacturers are using? That the distress must be great and wide-spread in the industrial districts of Lancashire and Cheshire, if the American crop is really and permanently withheld, we entertain no doubt, and we are not surprised that all concerned (and who is *not* concerned?) should view the prospect with alarm; but the sole practical question is, How can the threatened danger be most effectually, and yet rightfully, averted? Now, as we have repeatedly shown, the resources of the South, never very vast or very ready, are derived solely from the sale of their produce; for of accumulated funds they have no great store. The sale of their cotton crop will, therefore, soon become to them an object of absolute necessity; and when they feel this, *and can be definitively satisfied that forcible intervention from Europe is an idle dream*, they will hurry their cotton down to the ports, or to some easy and safe distance from the coast, so as to have it ready for shipment by any vessels that arrive and are prepared for the risk of endeavouring to evade the blockading squadron. At present they feel at ease, for there is no cotton gathered and packed, and no ships ready to receive it; so they can safely indulge in a menace which they hope will bring terrified Europe to their aid. But as soon as the cotton is ready to come forward, we have no doubt it will be transmitted to the coast; provided they can be made to renounce their hopes of foreign interposition.

Now, as far as England is concerned, we believe we may confidently assert that her interposition will be strictly limited to insisting that the blockade of every port *announced* to be closed, shall be *bonâ fide*, efficient, and continuous. She must take care that the blockading squadron shall be ample and *impartial*,—shall be considerable enough really to prevent ingress and egress, and shall connive at the escape of no ships, and shall give papers to none. If these requirements are not fulfilled—and we are by no means satisfied on this head—then we are entitled, and are bound, to notify to the Government of the United States that the blockade of that port or that coast is not effective, is not therefore valid by the law of nations, cannot be recognised by us, and will not be respected by our ships. If we are vigilant enough in this respect, we apprehend that the blockade in several quarters will be found inadequate and will have to be renounced. But this is a very different matter from interfering to "prohibit the block-"ade" altogether, on the ground that it is very mischievous to us. The one proceeding is strictly in accordance with international law and justice. The other is a flagrant and manifest violation of both.

But though we can speak thus boldly of what the British Government will and will not do in the matter of the American blockade, we cannot pretend to feel anything of the same certainty with regard to our incalculable neighbour, the Emperor of the French. The same reasons against interference exist in his case as in ours; but it by no means fol-

lows that he will as yieldingly obey them. Infraction of the blockade by France would be as distinct a violation of the law of nations as infraction of the blockade by England; but France does not always reverence that law as scrupulously as we do. Such infraction, in her case as in ours, would virtually imply, and would almost inevitably practically involve, war with the United States; but it is not certain that she would shrink from the prospect of such a war so shudderingly as we do. It becomes, therefore, important for all who would estimate the political and commercial prospects of the moment—the prospects of cotton and the prospects of the war—to consider carefully what, under the actual circumstances, is likely to be the decision of Louis Napoleon in the matter of interference with the American blockade,—bearing in mind the character of the man and the situation of the country. Is he likely to determine for action or inaction? What impression is likely to be made upon a man *with no settled principles and no assured future*, by the actual condition of France and the influence on that condition of the American contest?—and what conclusion is he, under that impression, likely to arrive at?

The facts before him are these. France is suffering under the consequences of a decidedly deficient harvest, which has raised the price of bread to an inconvenient degree,—to a degree which has already induced irregular Government interference in order to reduce it. The same circumstance has obliged her to purchase large quantities of wheat in foreign markets, especially in our own, and has thus grievously, though perhaps only temporarily, disturbed her monetary position. The trade with America, both North and South, hitherto one of the most extensive, regular, and profitable carried on by Lyons and Bordeaux (and chiefly consisting of luxuries, which can easily be dispensed with for a time, and which *must* be dispensed with in periods of poverty and war), has been terribly interrupted and curtailed by the unhappy conflict. The annual value of French exports to America is usually upwards 10,000,000*l* sterling, amounting to about *one-seventh* of the whole. The distress and stagnation in the manufacturing districts, mainly attributable to the stoppage of this trade, is severely felt; and the Chambers of Commerce at Lyons, Rouen, Mulhausen, and other places, have made strong representations to Government upon the subject. The cotton-spinners, too, like our own, are suffering from an actual or apprehended scarcity of the raw material, of which France imports large quantities from the States, either directly or *viâ* Liverpool. Now, the continued interruption of the cotton and silk trade with America, implies want of work and want of pay to hundreds of thousands of operatives—idleness, which gives political and moral devils plenty of time to be mischievously busy among them, and privation, which will predispose them to listen to the whispers of these exciting teachers. French operatives are not like English ones: they do not starve so patiently, and they have not been taught, like ours, that Government neither causes nor can cure their sufferings. On the contrary, they have been sedulously taught the exact reverse: they have been taught to accuse Government whenever they are wretched, and to insist upon its feeding them whenever they are hungry.

In all likelihood, then, Louis Napoleon sees before him an ominous and uncomfortable winter. If the American war and blockade continue, he will have whole districts of miserable and malcontent workmen out of employ, whom he will have to keep down with one hand and to feed with the other. The one will cost popularity; the other will cost money; and the Emperor has many reasons for not wishing either to risk the one or to spend the other. He may, not improbably nor altogether irrationally, be of opinion that it would be both safer and cheaper to disregard and force the blockade with Imperial high-handedness, even though it should involve a war with the Federalists, than to face a winter of insurrection and distress at home. Such a proceeding would, we do not doubt, be very popular in France: aggression and dictation always are. It would be very easy, for the United States have neither navy nor surplus wealth to compare with those of France. It would gratify his own passions and those of his people—the restless ambition of the one, the insatiable vanity of the other. It would give them something to talk about and to boast of, and him something to do. It might even serve the *temporary* interests both of his dynasty and his country;—and for the ulterior consequences, of the dangerous enemies he would be making and the bad precedent he would be creating—we fancy he would care but little. His remote future is too ideal—it is too uncertain whether any such future will belong to him or his—for it to influence materially his present actions.

Such are the reasons which might prompt him to interfere. The considerations which should deter him may possibly appear less cogent to a temperament like his,—of which we must never forget that a morbid and incurable *restlessness* is the most prominent characteristic. In the first place, we know he likes to act in concert with, or with the concurrence of, England, wherever possible; and in such a course we could give neither our consent nor our approval. In the second place, he is almost nervously cautious, and may well pause before he incurs the bitter resentment of a people so vindictive, so energetic, and so essentially powerful as the Northern Americans,—who at present are so excessively and irrationally well-disposed towards him,—as, indeed, towards most other despots. We incline to think that this consideration will have much weight with him; though probably the undignified and ill-advised step of the young Orleanist Princes, in taking service with the Federal army, may not be without its effect in the opposite scale. In the third and last place, so sagacious a reflector will not fail to perceive that an interference, which involves a quarrel with the North, would be a very strange and tortuous way of restoring French commerce with the richest portion of the Union. It would give France the cotton that she wants to buy, but it would not enable her to dispose of more than a very moderate amount of the wines and silks which she desires to sell. Perhaps, however, he may argue that the destruction of the blockade must speedily bring about a termination of the war.

It is not possible to predict how these balanced arguments *pro* and *con* may affect the mind of the French Emperor. His decision and actions must always remain to a great extent problematic and unknown, receiving no light whatever from his words, nor much from his silence. We would only counsel both merchants and manufacturers to bear constantly in mind that this absolutely *uncertain* element is yet one which must enter largely into all their calculations.

THE BANK OF FRANCE AND THE MONEY MARKET.

THE accounts from Paris indicate no improvement in the state of affairs there, but rather the reverse. The drain on the resources of the country arises from causes too powerful and too deeply seated to be easily counteracted. Large foreign speculations, a bad harvest, and a population already suffering and likely to suffer still more, are no trifles in a country where everything is uncertain, where a despotism based on the favour of the multitude is in the ascendant, where the mercantile community is unused to the true commercial remedies, where the omnipotent ruler does not acknowledge the efficacy of those remedies.

The following account shows at a glance the condition of the Bank of France:—

Dr.	£
Capital	7,300,000
Reserve	1,136,890
Notes	30,657,589
Bank drafts	403,568
Public deposits	2,302,745
Private deposits, &c.	6,635,838
	48,436 630

Cr.	£
Cash	12,190,448
Commercial Bills	23,225,101
Advances	5,952,102
Government stock	5,597,091
Bank property	1,471,888
	48,436,630

Since that return was issued, it is said that the reserve has been much impaired, and it is known that the Bank is seeking resources in very refined expedients. As we last week observed, there could be little objection, in the peculiar circumstances of the Bank of France, to the use of anomalous palliatives, if they were accompanied by the simultaneous use of effectual remedies. In an irritable state of the public mind, and in an uninstructed state of public opinion, there would be much excuse even for something singular

if it were accompanied by the steady use of well-tried cures. But from the events of the last week, it would rather seem that these strange palliatives are to be used, not in aid of but in lieu of better treatment. It is said that the Bank of France is keeping up two rates of exchange in one market; that it is limiting the amount of such bills which it will give to any house,—and most certainly it has not raised the rate of discount. It is, therefore, we fear, relying on the exclusive use of heterogeneous quackery instead of the plain remedies of acknowledged science. We showed last week that great allowances should be made for the very peculiar position of the Bank of France; but allowances have their limits, and the events of this week show that it is easy to approach, if not to overpass them.

At the same time we should not permit ourselves to give way to any extravagant alarm. The state of the Bank of France is not good certainly; its resources are diminishing, and the claims upon it are augmenting; but the state of the Bank of England has frequently been worse. In 1839 it stood thus:—

	£
Circulation	17,827,930
Deposits	7,804,430
Total	25,632,360

and its reserve of bullion was only 2,404,540*l.* The Bank of France still has a very large sum in its coffers, and with even decent management there is no ground for wild apprehension, though real ground for true caution.

It is to be noticed that the private deposits of the Bank of France have fallen about 2,800,000*l.*, or nearly 30 per cent., within the year, showing how severe even now has been the pressure of the times upon the resources of the country.

THE CASE OF MEXICO.

We can all of us remember to have read in our boyhood the story of the young Cyrus who, being called in as arbiter, disregarded the claims of *property* in favour of those of *propriety*, and adjudged the big coat to the big boy, and the little coat to the little boy,—and was walloped by his tutor for thus deciding according to the unsophisticated dictates of an equitable but unphilosophic temper. *We* now are all trained to see the mistake of the award; inasmuch as the big coat *belonged* to the little boy, though it *fitted* the large one; but the same disposition to act and judge according to the fitness of things, rather than according to the abstract demands of *meum* and *tuum*,—the same rude instinct of innate and uncultivated justice, which prompts us on the first blush of every business to order matters as we think Providence would wish them ordered,—still survives in nearly every mind, and can only be kept in check by much subtle ratiocination and a reference to ultimate moral laws. To go on, in obedience to general principles, putting round men into square holes and square men into round holes, demands a civilisation as recondite, and official training as sedulous, as our own. To abstain from setting matters right where they are flagrantly and obstinately wrong, simply because it is not our business;—to refrain from taking the management of their affairs out of the hands of men or nations who are obviously incompetent to manage them for themselves, simply because the affairs *are* theirs and not ours;—to allow a fine country to be ruined by its rascally and incapable inhabitants when it is in our power to save it and govern it and develop its magnificent resources, not only without injury to any one but with manifest benefit to all,—these acts of self-control and forbearance are so repugnant to the first best instincts of "the natural man," that the reasons for them require every now and then to be repassed under consideration, in order that their real cogency may be tested and made apparent. A word in season about Mexico may not be unnecessary.

Perhaps there never was an instance in modern history in which the arguments in favour of peremptory, despotic, and extreme intervention in the affairs of a foreign country were so strong or so unopposed. If Mexico could be replaced (or placed) under a vigorous, wise, and just Government, no nation in the world would have any reason to regret or complain—unless perhaps the Southern States of North America, whose sinister designs would be frustrated thereby. Most nations would be directly and enormously benefited by such a proceeding; and no nation would be so much or instantly benefited as Mexico itself. Such intervention would be justified alike by the purest feelings of enlightened benevolence and by the most warrantable sentiments of retributive equity. Such intervention would be prohibited by none of the ordinary considerations which are urged against foreign interferences, for there is no Government to be deposed, no party to be aided against another party, no Sovereign fighting to oppress his people, no people gallantly contending for their freedom:—there is simple anarchy, ceaseless civil war, a helpless carcass of a country, fought over by murderers and marauders; so that the State has become a curse to itself and to its neighbours. Its condition, too, is such as to invite and almost to excuse encroachments and aggressions from an adjoining Power, whose designs it is desirable in the highest interests of humanity and civilisation to baffle and forestall. If a strong Government and a permanent self-supporting State be not founded in Mexico,—and that ere long,—it will inevitably become the prey of the Slave Confederation of the South. No one can allege that intervention would be hasty or premature; since the present state of anarchy has lasted for a quarter of a century, has rapidly grown from bad to worse, and would appear utterly hopeless of remedy or termination from within. There is no *Power* in Mexico—not even a capable military chief—from the efforts of which rescue can be expected. It is not a nation; it is not a State; it is not a Government at all;—it is simply a vast territory, overrun by armed bands, and in which the very elements of society seem to be dissolved. Even if not a single Englishman or Frenchman had settled in Mexico, even if not a single English or French claim were in question, the mere kind and compassionate interest of human by-standers would appear irresistibly to dictate interposition.

Then, again, Mexico is such a magnificent country. It has a population estimated at seven millions, and an area of 1,600,000 square miles. All Europe has only twice as much. It lies within the tropics; but owing to the peculiar configuration of the land and the high mountains in the interior, a great proportion of the territory enjoys a deliciously temperate climate. The consequence is that it can produce anything—from wheat and flax, to sugar, cotton, and tobacco. Its gold and silver mines were the most productive in the world before the Californian and Australian discoveries. When America was first discovered, the civilisation of Mexico was of a nature to amaze and dazzle the rude Spaniards who conquered it; and for centuries afterwards it was the richest and most important of all the Spanish colonies. Since the days of Montezuma it has never sunk to so low an ebb as now. In good hands it might become almost anything. With such an administration as France could establish, with such industry and capital as England could supply, the country would in twenty years become as peaceful, happy, and productive as Kentucky or Brazil; and every Mexican, of whatever race, would have reason to bless the day when the higher civilisation of Europe interposed to rescue him from the gulf of barbarism into which he was plunged by native incapacity and native vice. Under a just, strong, and enlightened Government, every indigenous wealth would be developed, and every indigenous talent fostered and brought forward. That is what might be: we know what is.

But this is not all:—another though an ulterior benefit looms in the early future. If a strong State be established in Mexico, capable of holding its own, and of repelling all aggressions, the Slave Confederacy of America will be hemmed in between two Powers and two civilisations, each distinct and racy, but both free and well disposed for an alliance. The proximity would do wonders for the new Republic, whose expansion would be checked and whose errors would be shamed. Slavery, unable to inundate fresh territories and compressed at home, would have to be dealt with as a social problem, for which, on peril of destruction, a solution must be found. The extinction of that deplorable institution would be far more effectually and far more speedily ensured by the establishment of a powerful State in Mexico, than by the completest conquest and re-incorporation of the Secessionists by the North. In fact, and in fine, it would be difficult to name any single exercise of areopagitic authority by the presiding Powers of Europe, which would confer such indisputable benefits, immediate and ultimate, upon the commonalty of nations and the progressive civilisation of the world, and would do this (so far as can be fore-

seen) at so trifling a cost and with so slight a risk,—as the establishment of a strong and suitable (*not* indigenous) Government in Mexico.

This is one side of the picture,—drawn strongly, though we cannot say unfairly, by the sanguine advocates of decisive intervention. Let us turn the shield.

In the first place, we cannot and must not undertake any permanent or protracted responsibilities. We do not want another *Turkey* on the further side of the Atlantic. We must have no more "protectorates," joint or single. It will never answer to establish any Government in Mexico which cannot maintain itself without our assistance, or which cannot be trusted to behave itself without our interference. If we set up a weak Ruler, we shall be bound to support him. If we set up a bad Ruler, we shall be bound to control him. We are not prepared to enter into any engagements of the sort, either alone or in conjunction with our allies. Whatever Government, therefore, we did set up, must be one that could satisfy us that it would be self-supporting, and that it would be capable and just. It is perfectly obvious, therefore, that it must not be a native Government. It must be a foreign rule, maintained, in the first instance at least, by foreign troops.—*What and whom must we establish?* Is there any eligible candidate or any even moderately promising arrangement that can be suggested?

There can be no doubt that a British Prince, backed by 10,000 British troops, aided by a moderate subsidy of British money, and surrounded by British Counsellors and British Generals, would soon restore order, establish justice, and inaugurate prosperity in Mexico. Such a Government would perhaps never be popular, but at least it would be strong, beneficent, and equitable. But it is, of course and on the face of it, absolutely out of the question. It would excite the fiercest rage of the United States; it would be rendered impossible by the jealousy of France; and the proposal would be almost unanimously rejected as soon as proposed to Parliament. The Puritans among us would feel that it *looked* grasping; the Economists would denounce it as costly and unrepaying; and statesmen generally would condemn it as vastly and gratuitously troublesome. Moreover, our hands are full, our taxes are heavy, and our liabilities are immense. *That* scheme, then, may be put aside as impossible, even if it were desirable.

There can be no doubt that a French Prince, with Frenchf troops and French administrators, would do the work perhaps even better and more speedily than we should do. They would be less scrupulous, less formal, less merciful, and more prompt than ourselves. They are used to such work, and would soon transform the whole face of the country. They would keep the Yankees in check, too, for the rest of the century at least. There are French Princes enough also, out of employ, and of very competent ability. The Duke de Nemours, the Prince de Joinville, the Duke d'Aumale, would any of them do capitally, and are not likely under any circumstances to be required in France. But then, even if Louis Napoleon were willing to aid in or to permit such an elevation of the House of Orleans, there would be other difficulties in the way. We could not trust Frenchmen to govern Mexico for the benefit and salvation of the Mexicans. We should feel that we could not thoroughly trust them to govern righteously, and yet that we could not meddle with them if disposed to govern selfishly and oppressively. We should always have a painful sense of responsibility for their sins and shortcomings. The old traditional statesmen of Great Britain, moreover, would be horrified at such an aggrandisement of our hereditary rival. For ourselves, indeed, we entertain no such sentiments of alarm or jealousy. We do not think that the possession of Mexico would really strengthen France much, and we are sure it would employ her well. It would gratify her vanity, occupy her energies, and task her resources both of men and money for a time;—and though we do not hold French civilisation to be the most perfect or improving in the world, yet it is unquestionably and immeasurably superior to the civilisation of the Spanish Creoles and half-breeds. A more serious objection is that the French are peculiarly and inherently antipathic to Spaniards, and to all of Spanish origin; and in Mexico just now they are, we believe, even more unpopular than Englishmen. Still, if we could, conscientiously and with security for the results, connive at France governing Mexico, we have no doubt that Mexico would be incalculably the better, and that we should be none the worse.

The third alternative of allowing and perhaps assisting Spain to reconquer, or rather to repossess, her old colony, is perhaps open to less objection than either of the preceding. The Spaniards would appear likely to assimilate better with the Mexicans than either the English or the French. They would have more comprehension of their manners, more tolerance of their follies, more sympathy with their religion. Previous occupation, too, would seem to give them a sort of undefinable prior claim to undertake the task—*if they are competent to fulfil it well.* But this is just the question, and herein lies the difficulty. Spain formerly lost many of her colonies by misgovernment, and she has never been famous either for the energy, the purity, or the advanced sagacity of even her home administration. She has indeed the form, and to a considerable extent the reality, of free institutions; but her finances are not prosperous, her political economy is not advanced, and her officials are often incapable and usually corrupt. She has not always paid her debts much more punctually or willingly than Mexico itself; and Spanish bonds are not in much better marketable repute than Mexican ones. Moreover, Spain, though no doubt greatly improved and having of late shown unmistakeable symptoms of reviving spirit and vigour, is by no means *certainly* a match for all probable assailants. She might not, therefore, be able either to hold the country without assistance, or be trusted to govern it honestly and wisely without interference. Now the necessity for future interference either to sustain or to control the Government which may be set up, is precisely what it is most imperative upon us to avoid.

It appears, then, as the result of a consideration of the whole case, that a joint occupation of Mexico is particularly undesirable; that there are very grave if not insurmountable objections to every one of the only three feasible single occupations; and that the precedent which occupation would establish is one which is almost appalling.

It may surprise our readers that we have not noticed the objection to any taking possession of the Government of Mexico at all, which springs first and most naturally to the mind,—grounded on the consideration that *the country does not belong to any of us.* The truth is that we do not *feel* this objection: we even go so far as to question its validity. But this is too grave and difficult a matter to be disposed of by a few sentences at the end of a long article.

THE AMPLE POWERS GIVEN TO THE CREDITORS BY THE NEW BANKRUPTCY ACT.

THE New Bankruptcy Act is now in operation, and the general orders which the Court of Bankruptcy is empowered to make under it have been issued. We, therefore, think it may be well to state summarily the more important respects in which men of business will find that they are affected by the present law. Lawyers are affected in a great variety of minute ways, and we do not propose to endeavour to instruct them upon matters with which they are doubtless sufficiently familiar. Our object is only to inform mercantile men of the recent changes which in real business they may find it necessary or convenient to know.

The critical question which most men of business will ask is, "What am I to do when my debtor fails?" They may like to know other details from curiosity or from peculiar circumstances; but, upon the whole, and regarding men of business *en masse*, this is what they most desire to be acquainted with.

Hitherto the complaint has been loud and frequent that the mercantile classes retained no control over their own affairs so soon as their debtors became insolvent, and so so on, as the Court of Bankruptcy intervened. After that it has been always said that the lawyers decide everything and manage everything; men of business have nothing to do with it, cannot effectually watch it, and are wasting their time if they attend to it. The object of the present Act is to remove or to lessen, as far as possible, the principal reasons for this accusation.

There are two courses which the creditors of an insolvent debtor may take;—they may either make him a bankrupt, or they may wind up his estate without the intervention of the

Court of Bankruptcy by a deed of private arrangement. In either case, the evident intention of the framers of the Act was that the creditors should have effectual means of management and control, and we think there is ground to hope that the enactment they have now made will in this respect be successful.

If the creditors choose to make the insolvent a bankrupt, it will no longer be necessary that the whole management and direction of the estate should permanently vest in the official assignee, who is a mere legal functionary, not caring specially for any individual transactions, knowing nothing in particular of the individual bankrupt, not conversant in the least with the trade in which the losses of the bankrupt have probably been made, and in the technicalities of which at any rate all his remaining property is nearly always inextricably embedded. It will now be competent to the creditors to appoint a *creditors' assignee*, who will have full power to act in all matters relating to the estate, in whom all the property of the bankrupt will exclusively be vested, who will be omnipotent over all matters of business, and manage them as if they were his own. This provision gives to the mercantile part of the public the largest conceivable power of obtaining the practical direction of their own affairs. The creditors cannot, in the nature of things, manage an estate themselves; for they are a numerous body, often resident in different parts of the country, and always occupied in absorbing affairs of their own. They must select some one to manage for them, and this clause gives them an unfettered capacity of choice. The creditors' assignee may be either a creditor or not a creditor; he may be *any one* the creditors please.

If, moreover, the creditors do not like to give indefinite powers to a single individual, they may appoint several assignees—who may work as a committee and who will have all the powers of the single assignee, who will be joint trustees of all the bankrupt's property, who will be able to act as they please in the matter of his estate, to make what contracts and arrangements respecting it they may deem expedient, to administer it in all respects and in all its minutest details to the best of their judgment. For this purpose they may appoint a manager, who will be empowered to carry out in detail their general resolutions, to report to them, and to act for all necessary purposes in subordination to them. This manager, likewise, may be any one whatever; the law leaves it to the parties interested to decide; he may even be the bankrupt himself.

Some objectors to the recent enactment are fearful that no one will be ready to accept the onerous duties and the severe responsibilities of the creditors' assignee. They believe that the new law will fail, because the trading community will not take the necessary pains to work it effectually. Even if so, the failure of this legislative experiment would by no means prove that it was not a wise experiment to try. The trading classes have undeniably been murmuring for many years at their practical exclusion from the management of affairs which were substantially their own. They have now the opportunity given to them by the law to undertake the entire management of these affairs, and if they in practice neglect to do so, they must in mere consistency at any rate cease to complain. We do not, however, at all expect any such result. Unless there are some latent legal difficulties in the new law which experience only can detect, we believe that it will work effectually and beneficially, and that the business classes will really attend to their own business. It is not needful, as we have explained, that any one of the creditors should himself act as creditors' assignee, and we believe it will be generally found to be better that he should not do so. We wish to see the management of bankrupts' estates grow into a distinct profession, of which there have been many beginnings of late, though the state of the law has hitherto hindered them. All private arrangements of any magnitude have practically fallen for a long period into the management of professional accountants, who might more justly be called professional liquidators, for they transact all which is transacted, recommend the greater part of what is decided upon, and very much guide the *policy* of the estate from the moment of the bankrupt's failure to the final dividend. By experience this class of persons are daily acquiring a most valuable acquaintance with the best method of dealing with such matters. As yet it has not been sufficiently understood that the business of insolvent estates is a very special kind of business, requiring peculiar training, peculiar kowledge, and peculiar practice. Most creditors who have acted upon a trust know this practically and vaguely, but it has never been steadily adopted as a principle, or made the basis of legislation. Now it will be possible for professional liquidators, under the direction of a committee of creditors (if that should be thought proper), to manage affairs that are *in* bankruptcy, as well as those which are taken *out* of bankruptcy and made the subject of a private arrangement. We believe that they will show themselves as efficient in their new sphere as they did in their old one. They will know readily and at once what to do when a bankrupt's stock, a bankrupt's debts, and a bankrupt's confused accounts are thrown on a sudden in their hands. Most men of business who have been placed in such circumstances, have on such occasions at first felt hopelessly puzzled; and few prosperous men have so large an experience of such unprofitable matters as to make their knowledge valuable or their decisions prompt and just.

Such are the ample powers which are given to the creditors by the present law in the winding up of estates in the Court of Bankruptcy. In addition to these, they have greater facilities than formerly in winding up estates by private arrangement and out of Court. The consent of only three-fourths of the creditors in number and value, instead of five-sixths as heretofore, is now necessary to the validity of such an arrangement; and much care has evidently been taken, we will hope effectually, to simplify the rather cumbrous machinery with which such agreements have hitherto been impeded.

A fear is evidently felt in some quarters that these ample powers so given to the creditors at large may easily be misused for fraudulent purposes. And, no doubt, there is such a danger. Whenever power is really given, the power of misuse is given also; every *trust* implies the possibility of a breach of trust. Care is, indeed, taken for the periodical production of accounts by the creditors' assignee at very short intervals, and for his prompt removal in case of delinquency or incapacity. But the real reliance must be in the creditors themselves. If they will not watch the estate, no one else will. The entire efficacy of the new law depends on the industry and discretion of the parties interested, and if they are negligent or foolish, the result will be bad. No doubt this will sometimes happen. No doubt the creditors' assignee will sometimes defraud the creditors largely,—no doubt he will much more often commit many mean breaches of trust. But if we look to the whole number of bankruptcies, the proportion of such frauds to that whole will probably be very small,—only an insignificant percentage. And surely this is better for the creditors at large than the old rule of the official assignee, who did nothing which he could well help—who collected but little—who divided much less—who was as inefficient as he was incorruptible.

THE UNIVERSITY OF ST PETERSBURG ON ITS DEFENCE.

THE Duke of Modena's objections to University learning appear to be infectious. Not only have they made a complete conquest of the Marquis of Normanby and roused that venerative nobleman to a campaign in their favour, but they seem to have been eagerly taken up by the highest authorities at St Petersburg, in the absence of the Emperor in the Crimea. Hitherto the Universities have been the principal centres of free thought in Russia. Like the students of the German Universities, the men who end in being submissive bureaucrats, begin life in the centre of the most extreme and fiery democracy of theory, and yet the Russian Government cannot apparently see the worldly prudence of leaving this safety-valve of liberal youthful feeling free. In 1848, the University of Moscow, which had been, till then, the stronghold of ultra-liberalism, was passed through the same deteriorating changes which the *Times* correspondent is now so ably and graphically portraying for us as taking place in the University of St Petersburg. This new rigour is one ultimately to be lamented, we believe, only by the despotic party. General Bustrom, who has taken a prominent part in quelling the University, must be an unusually obtuse man, if he

cannot see that his reasons for chastising the students are really reasons for letting them alone. "My children," he is reported to have said to his Finland regiment, "you will "have to-day to bring some disorderly young men to rea- "son. These students who are so unruly now, will, when "they are a little older, become functionaries, and you know "how the functionaries rob you and every one they come "in contact with. We must chastise them, and "perhaps when they rise to be clerks, they will not "plunder you so much." That the students are the embryo bureaucracy is true, but is exactly the truth which should induce the Government to be lenient with them. The depraving power of official interests is found sufficient to extinguish the seeds of radicalism in all minds when it has been permitted to bloom fully in the years when it is most ardent and sentimental. But if rigidly repressed, then it is likely enough to take a more formidable form, and to grow into mature revolutionary purposes where otherwise it would have flowered and died. Experience shows that very free and democratic Universities are one of the safest outlets for social discontent in despotic countries. When young men have had their say without let or hindrance, they easily become aware of its extravagance; a reaction sets in, and if backed by the power of a corrupting official self-interest, only too surely obliterates all the elements of revolutionary enthusiasm. It is the men who are permitted no freedom in their youth whose democratic sentiments condense to sterner stuff as they grow older. We hear that all our more sceptical writers are eagerly devoured by the Russian students. Mill's elaborate volumes on "Political Economy" pays at the trivial price of 2 roubles (about 6s). "Buckle's second volume on Civilization "was circulating in St Petersburg the week after its pub- "lication in London. His first volume was criticised, de- "fended, and lauded in every possible tone by the reviews, in "which, moreover, translations of entire chapters have ap- "peared. A complete Russian version is said to be in the "press." That a wide-spread scepticism and spirit of resistance to authority has taken possession of the educated youth of Russia seems to be established on the clearest evidence. If the Government were as cunning as despotic Governments usually are, they would not discourage the scepticism, while they would trust to self-interest to bribe out all the smouldering dislike to authority.

However, in the absence of the Emperor, a different and less subtle policy has been pursued. The efforts of the Government have been twofold,—directed first to diminishing, after the fashion of Lord Normanby's ducal patron, the number of students, by exacting a payment of 50 roubles (about 8*l*); and next to suppressing all the freedom of discussion, and indeed all meetings of the students except for lectures. We must remember that the Russians themselves resemble the Germans far more than the English. A great number of the learners are exceedingly poor, and are even *maintained* at the expense of their richer fellow-students. There are not a few who are the children of Crown-serfs. There are a great many from the families of the poorer tradesmen; many again from among the richer bourgeois class, and not a few of the hereditary nobles. All these meet on terms of perfect equality. The *Times* correspondent relates a story of a Prince who said that he had always been distanced by the son of a boot-maker,—a result which, if it had not taught the boot-maker to think better of Princes, had at least given him a much greater respect for boot-makers. This is the kind of social influence which,—existing as it does during the first bloom of intellectual life,—rather tends to temper the intolerable side of despotism by softening the social relations of different classes, than to subvert and upset it. Yet the Russian Government have not only attempted to enforce the new tax on all, with a view of diminishing the number of students, but to prevent the meeting of the students' benevolent society which exists for the sake of assisting the poorer students. The Professors seem to have stood nobly by the students, and they are themselves insulted as a consequence. A police officer has been put over them as Proctor; as if Sir Richard Mayne were to send down an active sergeant to Cambridge or Oxford, there to administer the police law with the help of the Fellows. The University of St Petersburg has been closed for an indefinite period, and it seems that the other Russian Universities who sympathise too eagerly with their recalcitrant sister are now closed also. In St Petersburg a speculative but harmless body of young men are now turned into elements of such danger and discord that regiments are daily brought out against them. It may be that the return of the Emperor from Tiflis will undo all these foolish proceedings; but if it be not so, and the mental life of the nation is to be closely curbed, we believe the time is not far distant when the discontented peasants will gain an alliance in the fretted intellect of Russia which the rulers of Russia may long have reason to regret.

THE RESULT OF THE FINANCIAL HALF-YEAR AND MR GLADSTONE'S ANTICIPATIONS.

The quarter's revenue returns have naturally given rise to a little discussion, and they are frequently compared with the returns of last year, or of some other period, until the most irrelevant results are educed. It is clear, however, that there is only one standard, at once fair to the Chancellor of the Exchequer and accessible to the general public, by which the national accounts can be justly tested. The Chancellor of the Exchequer in every year anticipates in his Budget a certain revenue, and all we have to look for in the quarter's returns is an answer to the simple question, "Is he getting that revenue?"

Mr Gladstone made an estimate of the revenue of the year (the property tax excluded), which would be equivalent to the following for the half-year:—

	£
Customs	11,797,000
Excise	9,731,000
Stamps	4,230,000
Taxes	1,575,000
Post Office	1,750,000
Crown Lands	147,000
Miscellaneous	710,000
Chinese Indemnity	375,000
	30,315,000

The reality has been:—

	£
Customs	11,803,000
Excise	9,392,000
Stamps	4,199,000
Taxes	1,523,000
Post Office	1,695,000
Crown lands	133,000
Miscellaneous	675,000
	29,420,000

This gives an apparent deficiency of 900,000*l*, but 375,000*l* is caused by the Chinese indemnity, which is not yet paid, and nearly a half by the diminution in the Excise, which is attributable to the bad barley harvest of last year, and will probably be in part made up by the good barley harvest of the present year. A great deal, however, must be so made up, because during next half-year we fear the receipts of the revenue from the ordinary prosperity and general consumption of the country will not be so great as have been brought to the credit of the account during this half-year.

The income of the property tax is also less than it should be for the present half-year, in consequence of some anomalies in the mode of collection, which will be made up, it is anticipated, during the next half-year.

It will be seen from these figures that, though in the face of a deficiency of cotton, a slackened trade, a bad harvest in Ireland and in Scotland, it might have been wished (as we at the time suggested) that Mr Gladstone should have kept a more ample balance, and should not have reduced the taxation of the country so much as he did in fact; yet that, nevertheless, there is no ground for the extravagant alarm or the vague anticipation to which mistaken calculations have given rise.

Agriculture.

AUTUMN CULTIVATION.

STEAM PLOUGHING.

Nothing attracts farmers so strongly towards steam ploughing as the conviction now become so general amongst them that autumn culture is indispensable to successful farming on strong land. Indeed, it is valuable upon all land, except perhaps very light lands. But with a considerable breadth of strong arable land, the farmer finds it difficult to execute the wheat sowing and other necessary autumnal works, and also to break up his stubbles, without employing such an extra portion of team labour as must involve a

formidable amount of outlay. Hence his desire for steam ploughing, which will enable him in a short time to break up deeply a great breadth of land. In Mr Morton's edition of "Arthur Young's Farmers' Calendar," now in course of publication, in the Calendar for September he treats the subject of autumn culture very effectively. Thus he says, most justly, that there is no part of the skill which a clay-land farmer can exercise more valuable than that which "times the operations of tillage to the fit condition of the soil." There can be no positive rule laid down that at such and such a time defined acts of tillage must be done. The atmosphere and the state of the soil must be carefully regarded. Tillage operations which will benefit at one time, will do mischief at another; and too much activity to get on with ploughing when the land is wet soon leads the farmer to lament his precipitancy. The strong-land farmer must watch and wait, and at the right time must work quickly and vigorously. This constitutes the great difficulty—a main objection to farming strong land. "There is great need of fitting what is done in the field to the actual weather of the day; but there is an even greater need, especially on clay soils, of fitting the great tillage operations of the year to the average weather of the seasons.....There seems to be an advantage on clay soils in the deep and thorough tillage of the stubbles when dry in autumn, which is so remarkably greater than the advantage of the same process at any other season as almost to require some special explanation." Mr Morton, however, conceives that such explanation "is no other than that which ordinary tillage and its influence on fertility receive; the greater effect arising from its being done in the dry weather and followed by the frost." But the actual benefit is unquestionable, "and any means of cheapening and rendering more effective a thorough autumn tillage, and of increasing our power of carrying it out, will be welcome to all clay-land farmers."

Hence the great value of a long period of dry weather after harvest. In such a season as the present all ordinary means of cultivation must be set to work energetically immediately after harvest, "and they will be better in their influence and cheaper in their cost than all that ingenuity and capital can devise or furnish for the assistance of the farmer in ordinary or difficult times. .....In the neighbourhood of Edinburgh nothing strikes the spectator more during a walk over the fallows in winter than the great depth of the ploughing which has been given to the land since harvest. And in instances nearer home, where the practice has been transplanted or adopted further South, the same advantage seems to follow a deep autumnal ploughing." Even on the chalk soils, where no special advantage could be thought likely to result from deep autumnal ploughing, it has been found to be followed by like advantages.

Cultivators, broad share ploughs, and other machines of that class, should be set to work for the purpose of cutting off that thin surface of the soil in which the roots of creeping weeds luxuriate. This is soon acted on by the sun, and, if necessary, easily burned, and then, all the rubbish having been harrowed together and burnt, the whole soil may be turned over deeply with the plough. The preliminary use of the paring plough and cultivator is a great economy. If plough and harrows only are used, numerous ploughings and harrowings become necessary to disentangle the rubbish from the soil; and should the weather become wet, the autumn cleaning then is impossible.

Mr Morton cites the following from the valuation of the acts of husbandry on a Hampshire farm, in which the old system had been pursued:—"Forest coppice (in rape)—ploughed once, eight times harrowed, twice dragged. Another part of the same field (in turnips)—ploughed three times, four times dragged, six times harrowed, three times rolled, twice harrowed after the plant was up." Is there any wonder that valuations of this kind so often absorb so much of the tenants' capital as to leave them insufficient means for ordinary cultivation? Now, a scarifying or broad-sharing, with some harrowing and burning immediately after harvest, followed by a good deep ploughing, would have been a much better preparation than the elaborate operations the incoming Hampshire tenant had to pay for. When a field has been well ploughed in autumn, it should never be ploughed again in the spring; the cultivator or grubber, properly used, will do all that is then needed.

The same part of the Calendar gives some details as to the cost of steam ploughing, and the saving in horse labour effected by it. We may note, however, what appears to be a defect in the comparison, and that in favour of steam. Now there can be no greater mistake than in overestimating the saving of money effected by the use of such new machinery as the steam plough, as it impedes its improvement as well interferes with its adoption.

Thus it is said that on Bourton Farm, near Shrivenham, Berks, eighteen horses were kept and several teams of oxen were taken *out during the autumn months*; and the estimated saving by the introduction of the steam plough is of nine horses for six months, and six oxen during three months of the year. The money saving, direct and indirect, from this is stated at 419*l* 11s 6d. On the other hand, the cost of steam and its accompaniments is estimated at 256*l*. But in making this estimate, the machine is assumed to be working 100 days in the year, and the cost of wages of engineer and other workmen employed on the steam machinery are taken as payable only during that period. But unless the farmer hires instead of purchasing the steam plough, which the larger farmers will not do, the engineer and other workmen must be paid, though not engaged in ploughing. Perhaps the explanation of this is, that the steam machine is to be taken to pay its own cost and employ its attendants profitably in other work when not engaged in steam ploughing.

Literature.

JAVA; OR, HOW TO MANAGE A COLONY: Showing a Practical Solution of the Questions now affecting British India. By J. W. B. MONEY, Barrister-at-law. In Two Volumes. London: Hurst and Blackett. 1861.

[SECOND NOTICE.]

IN regard to questions of police and judicial administration, civil justice, and the employment of native agency, we consider Mr Money's opinions to be of the highest value. The government of Java may, to a great extent, be truly described as a Government by Dutchmen, carried on through the instrumentality of a *native aristocracy*. But just as the success of the culture system was in so great a degree owing to the exceptional fact that the land belonged to the State, of which the population were mere tenants, without any proprietary rights,—so the success of the judicial and police administration has been mainly owing to another exceptional fact, viz., that the native aristocracy are not landowners. They are stipendiaries of the Government, and are employed wholly in administering police and justice; but never come into contact with the people as rivals, competitors, and opponents. In India, the very planter or landowner whom it is proposed to invest with magisterial and fiscal powers, is actually interested, directly or indirectly, or is suspected of being interested, in every case that comes before him. But this in Java would be impossible.

The advantage to the mass of the people, to the native aristocracy, and to the Dutch Government, has been immense. The people have had justice brought to their own doors, and through the medium of their own chiefs, who understand the people, their customs and motives, in a way no European can ever do, and whom the people like to have over them in a position of influence and dignity; the native aristocracy, instead of falling into the corruption, sloth, and poverty which have been the lot of the Indian aristocracy, are rising in worth and character, year by year, by having an *occupation* worthy of their ambition and social status; and, lastly, the Government are able to employ an agency which is tenfold more numerous than the revenues could possibly support if they tried to govern by European agency alone. The administration is therefore popular and greatly secured against the chances of conspiracy and rebellion. In India we have tried to govern without the people, or by the agency of mere subordinates who have neither the remuneration nor the parentage and rank in native society which is so necessary to secure respect and attachment on the part of an Oriental population.

We proceed to give a slight sketch of the system of administration. The village communities are grouped into Sub-Districts: these again into Districts: these into Regencies (divisions, the area of which is about 30 square miles); and the last into Residencies. To begin with the villages. Each of these is governed by a Village-Chief, appointed by the Resident on the *free election of the villagers* for one year, with the power of re-election. He must be a villager himself, and during his year of office receives 8 per cent. on the land tax of the village (for which he is responsible), and a percentage on the Government culture to give him an interest in its success. He keeps a roster of the one-seventh gratuitous labour. He is responsible for everything in his village, and is specially charged with the administration of the police. He has, like every other official, large powers of conciliation, and every quarrel must first go to him and to the council of village elders. "If he fails to settle any quarrel amicably, the complainant proceeds to institute his suit, at the trial of which the Village-Chief has to bring up the witnesses, and to speak to the character of each of his villagers, so as to enable the court to estimate the credit due to each witness." This power and emolument make the post most desirable, and his election is therefore most wisely left in the hands of the community, and his re-election depends on his good conduct, while the final ratification of their choice by the Resident is a security against their choosing an improper person. We know nothing more admirably calculated than this provison to interest the whole of the population in the right administration of justice and police. We know nothing which would so certainly bring about a healthy state of feeling in respect to the detection and punishment of crime in our Bengal villages,—and correct the frightfully corrupt and corrupting system of the Bengal police.

A group of villages constitutes a Sub-District, which is placed in charge of an officer called a Mantrie. The Mantries are relatives of the various chiefs, and are appointed by them to act as their *aides*, to carry messages, and see their orders executed. All natives of rank begin their career in this capacity and without salary. From this class, the head of the sub-district is also elected by the native community, and he thereupon receives a regular salary.

The several sub-districts are grouped into a large division called

a District, the administration of which is placed in the hands of a Wedana, under whose orders the Mantries perform their duties, more especially those of police. The Mantries, says Mr Money, "are the companions, the followers, and the supporters of the Wedana, who prides himself on their number and appearance, and on his Mantries bearing a higher reputation than those of other Wedanas. The consequence is that a public opinion has gradually grown up among them, and any Mantrie's conviction of tyranny or extortion reflects disgrace on his Wedana and on his fellow Mantries, as well as on himself." "These are the men who are constantly looking up the villagers, and who contrive to rouse them from their indolence, not only to the proper cultivation of their own and of the contractors' crop, but to the maintenance of the terracing and irrigation works necessary for the cultivation of a large part of the island. These are the men who, mounted on the best horses of the Regent of Bandong and of the neighbouring Wedanas, outrode the Europeans at the great autumn stag-hunt which I saw, and carried off for themselves the heads and necks of all the deer. These are also the men who, thus educated, have gradually come to form a class of gentlemanly officials, neither cringing while Mantries, nor presuming when appointed Regent or Wedana. With full knowledge of the wants and wishes of the locality, they thus become competent to associate with Europeans on pleasant terms, and help to carry on the administration of the country with submission, but at the same time with respectful independence." This is indeed a cheering picture of what can be made of a native aristocracy; but one hardly to be contemplated with patience by those acquainted with the condition to which we have brought the native aristocracy of our Indian dominions. In our earlier possessions the old families have almost died out. With no worthy object of ambition to live for, and ashamed or too indolent to engage in trade or look after their estates, they died out under the combined effects of debauchery and poverty. The persons who have taken their estates are the usurers who lent them money, or sharp-witted attorneys and bazaar dealers, who are neither respected nor liked by the people at large. These latter bitterly regret the disappearance of their old aristocracy, and feel no small degree of bitterness towards the alien rulers whose system led to their extinction. In Oude, at all events, we shall avoid this miserable error.

Like the Village-Chief and the Mantrie, the Wedana, also an officer of high family, is chosen by the native community, subject to the approval of the Resident. As a police officer, he is responsible for the discovery of crime, and is also chief of a court for the trial of petty offences and civil claims; also carrying out the orders of the officer immediately above him in rank, the Regent. The Wedana, when trying cases, sits with two or three other native chiefs, and the decision is by a majority of voices,—an arrangement which, in an Eastern community, affords, we think, greatly increased security for substantial justice. The proceedings are sent to the Regent, who forwards them with his remarks to the Dutch Resident, thus enabling the latter to exercise an indirect control over them.

The five or six districts form a Regency, at the head of which is the highest native official in the country,—the Regent. He is always a member of the chief family of nobles who were rulers of the particular district under the former Sovereigns, and is vested with a rank and emoluments equal to the higher Dutch officials. He sits in court with other chiefs for the decision of minor offences.

The last and most important of the territorial divisions is the "Residency," at the head of which are two Dutch civil servants, a Resident and his Secretary. The Resident's duties are judicial, administrative, and financial. He has his own Residency court, with the powers of a police and committing magistrate, and he also sits in the chief provincial court, where more serious cases are tried, with the Regent and other native judges;—the decision, as in the lower courts, depending on a majority of voices.

Before we conclude this notice, we must mention two very interesting and peculiar features in the administration of justice, which have a very important bearing on the state of things in British India.

It is well known to our readers that for many years past an angry controversy has been going on in Bengal between the English non-official and the official classes on the subject of *equality before the law*. British-born subjects have had a special exemption from liability to the courts established in the Interior, on the ground that they had a right to be tried by English law, and legally educated judges in the Supreme Court at Calcutta. The officials have for many years endeavoured to abolish this privilege, on the general ground that any such exclusive privilege in favour of Englishmen was opposed to the first principles of equity, and was calculated to create distrust towards our Government in the minds of the native population. It was also objected specially that such a system inevitably secured immunity from punishment to an English defendant whenever the plaintiff was a poor man and the place, where the offence was committed, was at a distance (perhaps of several hundred miles) from the capital.

Another difficulty has always been felt in India connected with this same principle of equality before the law. While we have suffered the inequality just described to exist between Englishmen and natives, we have never allowed any such inequality to exist between different ranks and classes of natives. But, as Mr Money truly says, "our present ideas of justice imply equality, and are therefore so distasteful to a people whose lives are based on distinctions, and whose ideas of justice require distinctive treatment for different classes." He declares that, to make a peasant and a noble subject alike to the lowest courts, equally liable to be arrested by "the dirtiest and meanest thief-catcher," and "equally stuck up at the same bar," is hateful to the whole people, and he very properly calls attention to the fact that this was one of the most prominent charges brought against us in the Lucknow appeal of 1858.

We have no doubt whatever that, in consulting the intensely strong sentiment which prevails on this subject in Java, as in all Oriental countries, the Dutch have acted most wisely, as far as the popularity of their administration is concerned. But, then, the question arises,—ought a European, civilised, and Christian Government, in administering an Oriental, semi-barbarous, ignorant, and heathen people, to adopt their own or their subjects' standard of right and wrong? Surely the main object is not, as with the Dutch, mere security, quiet, and a fat revenue. *They* profess no higher objects, but *we* do; and it would be to desert our national creed, constantly avowed in the face of the world, to establish the principle of one law, one court, one process for the rich,—another law, another court, and another process for the poor. Let us go on educating the people scholastically and socially until we have brought them up to our point of view on this and other matters, bearing, as we may, the unpopularity of ruling from a high standard, instead of their lower standard.

The Dutch having a special mode of proceeding in their courts whenever natives of rank are concerned, either as parties or witnesses, there has been no difficulty in having special privileges and special tribunals for Europeans. The distinction and privilege is not, as in India, based on mere difference of *race*,—and all in favour of the alien and ruling race,—but on difference of *rank*, applicable alike to Europeans and to natives.

The next feature in their administration of justice to which we would call attention is the provision made for securing trustworthy evidence. It is well known how constant a failure of justice there is in our Eastern dominions through the utterly untrustworthy nature of all evidence. By our system of equality before the law, and many other circumstances which we cannot now enter into, natives of respectability will suffer anything rather than the fancied disgrace of appearing in court to give evidence. Hence, only the lowest and least trustworthy witnesses are to be had, as a general rule. Witnesses are to be purchased at so much a head with as much ease as if they were sheep at a market. The consequence is that while our judges and magistrates profess to decide mainly by direct evidence, they really base their decisions on all the indirect evidence they can scrape together.

In Java, the giving of testimony in a court of justice is not considered disgraceful, and to enable the judge to know the value of each man's evidence, they have adopted the plan of causing the witness to be attended by his immediate official superior, who vouches for his identity and speaks to his general character and credibility. This superior is not, as he would be in India, some untrustworthy policeman, but the Village-Chief, whose reputation and whose chance of re-election would be forfeited by his allowing personation, or by his accrediting notoriously false testimony. Moreover, "the local knowledge possessed by the judges of the court both as to persons and things in their Regency, is avowedly used in Java to weigh the evidence and to estimate the probabilities of the case."

In India, the difficulty of getting at the truth is enhanced by the enormous size of our police and judicial districts, so that the English civilian is necessarily much in the dark as to a thousand things which he ought to know. In Java, the extended use made of a trustworthy native agency has enabled the Government to introduce such a minute system of supervision and control, that the highest official may know every man's name, residence, character, and movements. We certainly must admit that we have been beaten by the Dutch in administration, partly by their ruling from an oriental point of view, partly from the comparatively small area on which the experiment has been tried, partly by their having an official aristocracy who are not landowners, and greatly by the financial success of their culture system, which gives them a surplus revenue, and such wealth to the people at large that it has destroyed crime and diffused content among all classes.

GOOD WORDS. September. Edinburgh: Strahan. *London:* Groombridge.

THE current number of this rather washy periodical is not remarkable in any way. Dr Whately contributes a short and very poor paper on "Love and Liking." Dr Tulloch makes a few interesting gleanings from Dr Maitland's "Church in the Catacombs." Dr John Brown delivers a "Lay Sermon to Working People" on Health, the sanitary part of which is excellent; and the Rev. J. Inglis gives a sketch of the "South Sea Islands, as they were Twenty Years ago," in relation to missionary enterprise, which he describes in glowing colours. There are also sundry tales, verses, and Scripture dissertations of the average character which belongs to "religious" periodicals.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

As the drain on the Bank of France continues to be severe,—it has amounted, according to some authorities, to about 20,000,000f within the past week,—the expectation was entertained that the Directors, in their meeting of to-day, would increase the rate of discount; but, up to the present moment, no notification of their having done so has been made. An increase is, however, considered inevitable, if not immediately, at least in a few days. But it is thought not unlikely that instead of adopting a uniform augmentation, the Bank may fix different rates according to the periods bills have to run—6 per cent. for those of one month, 7 per cent. for those of two, and 8 per cent. for those of three months. So severe is the pressure on the Bank, that in addition to the accommodation it has obtained at London, it has, it is said, been under the necessity of selling some of its *rente*, doing so of course as quietly as possible to avoid creating alarm. In this pressure there is one circumstance which has not yet attracted the attention it deserves; namely, that it has been caused more by the demand for large sums of money which always exists at this season of the year, than by the necessity of paying for grain, foreign loans, &c. The calculation is, in fact, made, that of the 80 and odd millions of francs taken from the Bank last month, 60 must be set down for the usual demands of the autumnal season, and only 20 for paying for grain and meeting foreign obligations. It follows from this, that the Bank is destined to encounter a more severe pressure than it has yet sustained.

The Italian loan suffers dreadfully from the prevailing crisis. It was quoted last week at 70f 85c, and is to-day at 68f 85c. A further decline is to be expected, if it be true, as alleged, that the Italian Government has declined to grant delay for paying the calls, which will next become due. Fears are also entertained that certain firms have subscribed to the loan to an extent which, under the present circumstances, they cannot fulfil.

The following account (in round figures) of the principal items of the Bank of France returns for the last year may not be uninteresting at the present moment: the figures given represent *millions of francs*, and 25,000,000f make 1,000,000*l* sterling:—

	Specie.	Discounts.	Advances on Public Deposits.	Advances on Railway Shares and Bonds.	Advances to the Treasury.	Notes in Circulation.	Accounts Current of the Treasury.	Accounts Current of Private Persons.

From the very first outbreak of the conflict between the Northern and Southern States of America, the leaning of the French Government has been towards a prompt recognition of the independence of the latter, partly from the political reasons that a diminution of the power of the United States was desirable to Europe, but principally and above all from the fact that France cannot allow to be suspended that supply of cotton which she needs to keep employed her manufacturing populations of Rouen, Mulhouse, and other towns. If your readers have paid any attention to your reports of the French markets, they will have observed that for weeks past the sales of cotton have greatly exceeded the arrivals, and that, consequently, an enormous increase has taken place in price. This circumstance has naturally created a profound impression on the French Government, and has rendered it more disposed than ever to hasten the recognition of the Southern States. In this disposition it has been encouraged by the prayers of certain Chambers of Commerce; also by the recommendations of Prince Napoleon (he has just returned from America), who, though personally favourable to the North, is of opinion that the South can neither be subdued nor reconciled. I have reason to believe that communications between the French and English Governments on the subject of the recognition are taking place, and that the two will probably act in concert.

Some of the newspapers are making merry at the fact that many shopkeepers, especially in Lyons, Rouen, and other provincial towns, have advertised their old wares as English, and have obtained for them a ready sale. In Paris, also, something of the same kind has been attempted, though not on a very extensive scale. Many persons are indignant at this sort of thing, and some good English people express fears that it may be almost a death-blow to the treaty, inasmuch as it will create a prejudice against English goods. But really the matter is not worth notice. What has occurred was in fact inevitable on the introduction of a new commercial régime, and is, as Mr Disraeli would (not very elegantly) say, a "mere flea-bite." What in my humble opinion is to be regretted (as I have already said) is, that English importers have not made arrangements with French traders to have *real* English goods presented on a large scale to the public at their *real* prices. Their negligence on this point, however, will only have the effect of preventing English articles from coming into use among the French at a less early period than they otherwise would have done, and of thereby causing a certain amount of loss.

The quarterly returns of the direct and indirect taxes have been published. Of the direct taxes, the amount paid up to the end of September was 366,864,000f, out of 492,074,000f due. The sum paid exceeded by 38,815,000f that which could legally have been exacted. At the corresponding date of last year the amount paid in advance was only 37,395,000f; but greater severity appears to have been displayed this year in the collection of the impost, inasmuch as the legal expenses to enforce payment are in the proportion of 96c the 1,000f, whereas up to the corresponding period of last year they were only 94c. As to the indirect taxes, they amounted to 794,456,000f for the first nine months of the present year, an increase of 6,322,000f compared with the corresponding period of last year, and a decrease of 4,738,000f compared with that of 1859. From the detailed account given below, it will be perceived that registration and mortgage duties are this year less than they were last, but considerably more than in 1859; that the stamp duties present an increase; that Customs duties, which had been affected by the abolition or reduction of duties on all articles, show a marked improvement; that the tax on wines, spirits, &c., has increased in productiveness, whilst that on the manufacture of native sugar has declined; that the consumption of tobacco has augmented in an extraordinary manner; and that the figures relative to the Post Office are satisfactory:—

	Nine Months of 1861.		Nine Months of 1860.		Nine Months of 1859.

The question having arisen whether the reduction of the import duty on "Swedish iron," enacted by a decree of the 24th June last, is applicable to the iron of Norway, the Board of Customs has just issued a circular to the Directors of Custom-

houses, declaring that Norwegian iron being of the same composition as Swedish, must be admitted on the same terms.

The railways naturally profit by the large conveyance of grain and flour they have to make, and that compensates them for the falling off in other descriptions of merchandise. The receipts of the Northern line, in the week ending the 30th September were nearly 11¼ per cent. per kilometre more than the corresponding week of last year; the Western upwards of 14½ more; the Eastern nearly 14½; the Mediterranean 16½; the Southern more than 22¼; the Lyons and Geneva more than 3⅝; the Dauphiné more than 12; and the Ardennes more than 1. The Orleans presented a decline, but it was very insignificant, being less than ⅛th per cent.

As recommended by several Councils-General of departments, an Imperial decree has been issued, suspending from the 15th of this month to the 30th September, 1862, the navigation duties levied in canals and rivers, on flour, grain, rice, potatoes, and pulse. The decree also enacts that foreign vessels and boats carrying cargoes of such articles shall likewise be free from the said duties.

Accounts from Lyons say that a slight improvement has taken place in the silk manufacture, owing chiefly to the importance of orders from England, but that "thousands of workmen" continue to be either altogether unemployed, or to work short time, or for less than the ordinary wages.

Subjoined is the weekly report of the markets:—

FLOUR.—Business at *Paris* has not been very active, and yesterday the quotation was 84f to 90f the sack of 159 kilogs; American of inferior quality was 90f, Spanish first quality 88f. Four marks were 87f 50c to 87f 75c for the current month, and 88f for other epochs.

WHEAT.—At *Paris*, yesterday, no great business was done, and the variations in prices were not important. Wheat of the Centre and the Bourbonnais was offered at 44f to 45f 50c the sack of 120 kilogrammes, and new Burgundy at 48f, but nothing was done. Superior Burgundy, however, went at 47f 50c to 48f, and even 48f 50c. The demand made by *la culture* was 45f to 50f, and as that price was not accepted, it preferred hot to sell. In English the demand at first was 48f 50c and 49f, but sales were made at 48f; California went at 48f and 48f 50c. Chili was offered at 50f, but not taken; Canada went at 44f and 44f 50c; America was offered at 43f to 47f, but not taken; Dantzic first quality went at 47f 50c to 48f 50c; Hungarian, 48f. As to the French provincial markets, 24 present a rise of from 5c to 75c the hectolitre, 55 a fall of from 25c to 1f 33c, 10 are reported firm, 45 without variation.

COTTON.—At *Havre*, in the week ending Friday, business was animated, and prices rose. The sales were 16,566 bales, and the arrivals 630. The closing prices were 4f higher for the very low qualities, 5f to 6f for low, 3f to 5f for very ordinary, 4f to 5f for ordinary, 5f to 6f for other sorts. Consequently, very low New Orleans was 129f the 50 kilogs; low ditto, 139f; very ordinary, 144f. The stock on Friday was 170,000 bales, against 152,920 at the same date in 1860, and 52,250 in 1859. This week, prices have made a new advance, low New Orleans having yesterday been quoted at 141f.

COFFEE.—At *Havre*, last week, business was a little more animated, and prices improved. The sales were 600 sacks Hayti Port-au-Prince, isposable, at 82f 75c to 84f the 50 kilogs, in bond; 455 Rio not washed, disposable, 75f; 7,150 ditto for delivery, 73f to 80f; 586 ditto washed, for delivery, 90f to 92f; 100 Padang, 115f, duty paid; 200 Macassar, 109f, duty paid; 650 sacks and 132 casks Ceylon plantation, at prices kept secret. By auction, the following damaged lots: 632 sacks Hayti Port-au-Prince, 21 Cape, and 149 Rio, not washed, were also disposed of. The arrivals were above 4,000 sacks. This week, Hayti has been at 83f 50c and 84f; Cape, 86f. At *Nantes*, last week, there were no sales, and this week there have been none. At *Bordeaux*, last week, there was not much demand. 220 sacks Java went at 116f; 2,395 Costa Rica damaged were also disposed of. This week, no business has been done. At *Marseilles*, last week, business was active. 2,200 Rio at 76f; 200 Rio green, 80f; 2,000 ditto, 66f to 76f; 600 Rio damaged were also disposed of by auction; also 270 sacks Santiago, at 100f. This week, 586 Rio damaged were sold by auction

SUGAR.—At *Havre*, in the week ending Friday, business was dull, the sales consisting only of 780 casks French West India, at 46f the 50 kilogs. The arrivals were nearly 450 casks. This week, French West India has been at 46f; Trinidad, 46f; Havana, 34f 50c to 35f; Bahia, 30f 50c. At *Nantes*, last week, the sales were 7,293 sacks Reunion, at 51f 75c; 1,356 ditto, 51f 25c; 500 ditto, 52f 50c; 800 ditto, 48f 50c; 445 casks French West India, 46f to 51f 75c; 140 Trinidad, 47f. This week, French West India has been at 46f; Havana, 51f; Java, 51f; Reunion, 48f 50c to 52f 50c. At *Bordeaux*, last week, the sales were 120 casks French West India, at 47f; 624 Santiago, 45f 50c; 126 ditto, 45f 75c; 32 ditto, 46f. This week, Reunion has been at 50f; French West India, 46f 50c to 46f 75c; Santiago, 46f; Mauritius, 54f. At *Marseilles*, last week, some sales of French West India were made.

INDIGO.—At *Havre*, last week, business was almost null. The sales were only 4 chests Bengal, at prices not stated, and the arrivals 42. This week, no business. At *Bordeaux*, last week, the sales were 10 chests Madras, 62 Bengal, and 16 Kurpah, at prices not stated, but firm. This week, a small lot of Kurpah has been disposed of.

HIDES.—At *Havre*, in the week ending Friday, business was very animated, and prices firm. The sales were 9,150 La Plata dry, at 105f to 140f the 50 kilogs in bond; this last price for a small lot of fine ox: 3,250 ditto salted Saladeros, 67f 50c for 500 pieces a little damaged, and 70f to 71f for the rest in ox; 1,050 Rio Grande salted, 66f to 67f for cow, and 66f for ox; 2,800 Pernambuco salted for delivery, 55f; 3,560 Valparaiso salted, 64f for ox, and 60f for cow; 557 New York salted, 47f 50c; 1,510 horse salted Monte Video, 83f 50c the 100 kilogs. The arrivals were 23,834. This week, Buenos Aryes salted horse has been at 83f 50c; Buenos Ayres salted dry, 105f; ditto cow, 110f; Monte Video ditto, 112f; Monte Video salted, 70f to 73f; Rio Janeiro salted, 50f; Rio Grande, 70f. A lot of Maracaibo damaged was also disposed of. New York salted, 48f 75c.

WOOL.—At *Havre*, in the week ending Friday, business consisted only in the sale of 60 bales: Buenos Ayres and Monte Video not washed, at 2f 5c to 2f 52½c the kilog. The arrivals were 62 bales. This week, Cape unwashed has been at 1f 1c to 2f 45c; Buenos Ayres unwashed, 85c to 2f 60c; Cape washed, 4f 95c to 5f 75c; Donskoy, 2f 5c. Some lots of Russian and Cape damaged were also disposed of.

TALLOW.—At *Havre*, last week, business was somewhat animated; the sales being 100 casks New York at secret prices; 21 ditto, 62f 50c Buenos Ayres, 63f. The arrivals were 259 casks. This week, New York has been at 63f; Buenos Ayres, 61f. At *Paris*, yesterday, the 100 kilogs were at 126f 50c to 127f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was at 87f to 88f the hectolitre; Montpellier disposable, of 86 deg, at 115f. At *Bordeaux*, the day before yesterday, Languedoc was at 110f; and beet-root, first quality, 92f.

TURIN, Oct. 15.

Owing to the large sums which have been transmitted to this city on account of the Italian loan, chiefly from Paris, the National Bank yesterday was in possession of a much greater stock of specie than it generally holds,—about 1,600,000*l*, instead of some 800,000*l*. The position of the Treasury, with regard to the Bank is also, for the same reason, satisfactory, it presenting a credit of 42,000,000f. In commerce also there is no lack of specie.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a copy of a despatch from Her Majesty's Consul at Santo Domingo, stating that, by an order of the Spanish Government, extended by the Captain-General of Cuba to that island, ordinary biscuits may be imported free of duty, and corn, corn meal, potatoes, and beans, on payment of half the duty charged by the tariff, during a period of 14 months from the 13th July last.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday se'nnight. The corresponding figures of last month and of the corresponding period in 1860 are added:—

DEBTOR.	Oct., 1861.	Sept., 1861.	Oct., 1860.

The following commercial news is dated Calcutta, Sept. 7:—Sugar—A fair amount of business has been done in this staple since our last, at a further advance in price. Saltpetre—A large business has been effected for England and America, at steady rates. Rice—A limited business has been transacted in table sorts for both sifted and gross, at about previous rates, with a tendency to decline. Raw Silk—The last accounts from home being still more discouraging than preceding ones, a general cessation in business may be said to have taken place. Silk Piece Goods—Accounts from the home markets continuing favourable for these goods, and the future holding out a fair prospect, those who had entered the market are gradually extending their operations in desirable qualities at previous prices, and in some instances at an advance. Stocks which had accumulated in the hands of the dealers are fast decreasing, chiefly in medium

and fine sorts. Jute—The demand for this article has improved, and a large business has been done since our last, at advanced rates. Shellac and Lac Dye—Demand active, market moderately supplied, and full prices obtainable.

Statement of business at the United States Assay Office at New York, for the month ending Sept. 30, 1861 :—

The following commercial news has come to hand by the last West India mail :—At Trinidad the growing crops were suffering from excessive moisture, the cane pieces looking thin and yellow, and all field operations carried on under most discouraging and trying difficulties. The amount of produce shipped to date amounted to—Sugar 31,813 hhds 6,479 tcs 2,191 brls, molasses 7,520 puns 418 tcs, rum 2,421 puns, cocoa 7,044,792 lbs, coffee 3,246 lbs, cotton 216 bales 44 serons. At Demerara the wet weather had retarded manufacturing operations upon the estates. Dry weather was much needed to mature the saccharine properties of the canes. Should fine weather set in, the amount of sugar manufactured before the end of the year will be very large, making the aggregate yield for the year considerably in excess of 1860. In the market, breadstuffs of all kinds were ample and imports abundant; and numerous cargoes having been reported on the way had checked sales, even at reduced rates. Exports were moving freely forward, and some speculative demand for sugars had advanced prices. Rum entirely neglected. No molasses offering. Trade continued exceedingly dull. The weather at Barbadoes had been more favourable; the heat, however, continued oppressive. The crops were nearly all finished; few estates were converting their remaining canes into rum. About 2,000 hogsheads sugar remained to be shipped, which would bring up the total export crop of the year to over 50,000 hogsheads. The shipments to date amounted to—Sugar 46,036 hogsheads 3,289 tierces 9,208 barrels, molasses 10,516 puncheons 393 hogsheads 768 barrels, rum 115 puncheons 564 hogsheads.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 5.—There has prevailed an active demand for the better grades of State and Western flour since our last, and the transactions have been heavy at full previous prices. The inquiry from the local trade has also been tolerably active, and a fair proportion of the sales have been to meet the requirements for consumption. The sales for the three days comprise 84,000 bbls, including 17,500 yesterday, the market closing steadily at an advance of 5c to 10c per bbl. Canada flour has also been in good request, and better prices have been realised. The demand for Southern flour has been more active, and the market is firmer.

Export from 1st to 30th September.

	1861. barrels	1860. barrels
Wheat Flour	215,832	273,084

Export from Jan. 1 to Sept. 30.

	bbls		bbls
1861	2,004,864	1860	1,230,129

The demand for wheat for export to Great Britain and France continues unabated, and the market has ruled very firm since our last, while nearly all kinds have appreciated 3 to 5 cents. per bushel. The receipts have been moderate, and do not equal the sales, which comprise 720,000 bushels, of which 292,000 changed owners yesterday, including 125,000 Milwaukee Club at 1.23 dol to 1.26 dol; 8,500 red State, 1.29 dol to 1.32 dol; 16,000 amber Iowa, 1.26 dol to 1.27 dol; 400 white St. Louis, 1.48 dol; 87,000 winter red Western, 1.30 dol to 1.38 dol; 8,000 white Michigan, 1.38 dol to 1.45 dol; 6,700 mixed Western, 1.28 dol; 1,400 red Southern, 1.39 dol; 13,000 Racine spring, 1.21 dol to 1.23 dol; 17,400 Chicago spring, 1.18 dol to 1.21 dol; 6,000 white Kentucky, 1.37½ dol to 1.45 dol; and 2,000 amber Green Bay, 1.28 dol. The demand for corn has also been active, and full prices have been realised.

Export from 1st to 30th September.

	1861. bushels	1860 bushels
Wheat	3,008,077	2,260,354

COTTON.

NEW YORK, Oct. 5.—The demand is very light, but there is nevertheless rather more tone to the market. The sales are small,

not exceeding 1,500 bales, included in which are 10 bales Surat at 16c, Liverpool weight. We quote :—

We have again to report an excited and advancing cotton market for the week. The trade do not appear inclined to add much to their stocks, but a large business is still doing by speculators and exporters. Our quotations are raised ⅜d to ½d per lb in American. The useful and better grades of Egyptian have been in great request, and have advanced fully ½d per lb; sales are indeed reported at a much greater advance; the low qualities are, however, unsaleable. Brazils must also be quoted ½d per lb higher. The better qualities of East India, which are in increased demand for the trade, have advanced ⅜d per lb, while inferior grades are only ⅛d to ¼d higher. The sales to-day are 20,000 bales. An advancing market. The reported export amounts to 11,190 bales, consisting of 2,330 American, 290 Brazil, and 8,570 East India.

IMPORTS OF FOREIGN AND COLONIAL WOOL.

COLONIAL and FOREIGN WOOL imported into London, Liverpool, and Hull, from Jan. 1 to Sept. 30, 1860 and 1861, and the total imports, including Bristol, Leith, Grimsby, and Hartlepool.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand from India being of a more favourable character, increased firmness has been apparent in most of the markets, and prices, generally, have been well supported. The stocks of goods have not increased. Iron has changed hands slowly; but there has been a fair demand for coals, at very full prices.

MANCHESTER, Oct. 17.—This market has continued to harden all the week, and, indeed, in its leading departments to advance by rapid stages, so far as the nominally existing quotations of sellers are concerned; for the prices ruling have no reference whatever to the requisitions of the body of buyers at home or abroad, but are governed entirely by the actual cost and prospective want of material. And the result has been that the articles which form the main lines of the trade, those in which most traders deal, and which have always the easiest sale at a price, have been raised by speculation greatly higher than the markets for consumption are thought likely to sustain by those most closely connected with them. Shirtings, madapollams, and current makes of printers, T'cloths, and jacconets, have been still taken by speculators, and at more than the rates of last week. The effect has been shown in the rates for home yarn, which have risen against manufacturers enormously, but still not so as quite to prevent them from buying, —32's cop twist, which may be called the leading number, having reached 13¼d per lb, a price per lb at which many cloths made out of the same yarn were sold not a fortnight ago. Yarn exporters have been more cautious, hardly exceeding in their moderate purchases ¼d over last week. The India letters were received to-day, and though reporting considerable sales at losing prices, were also full of the gloomiest forebodings that should this market ascend to the rates it has even now attained, the native weavers would again outstrip us in textile fabrics, favoured as they are by such high protective duties, and a most promising yield of cotton at their own doors.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Wool quiet, but firm. Spinners appear to have generally satisfied their requirements a fortnight ago; and there being an entire absence of any speculative demand, we may expect a few quiet market days until their necessities bring them again into the market. Prices continue very firm. The yarn market is in no respect changed from last week. There is a very quiet business doing for home consumption, nor is the demand for export much more brisk. The season for pieces is so far advanced that business naturally assumes a quieter aspect, nevertheless the demand for fancies continues, and merchants are apparently anticipating their wants in plain goods, for some pretty good orders have been given in plain Orleans and mixed and mottled lustres for future delivery.

LEEDS.—Extreme caution continues to be manifested, and the trade partakes much of what is well described as being of a hand-to-mouth character. In both halls a few sales of ordinary cloth were made, but the chief trade was in winter goods, plain and fancy.

ROCHDALE.—There has again been an inanimate market for both wools and flannels, and the general tone of both branches remains much the same as last week. Prices of wool show no material change.

LEICESTER.—There continues to be a tolerable demand for useful goods, and workmen in these branches are well employed. Some patterns of fancies are also in demand, and, on the whole, business is active. In the country districts, also, there is in some departments a fair amount of business doing. Yarns are selling at full prices, and worsted spinners are well engaged. The wool market remains firm, and extreme prices are maintained.

NOTTINGHAM.—There is quite as much doing in most descriptions of cotton goods this week as last; the demand for muslin edgings has, however, fallen off considerably. There is a little doing in plain nets and Mechlin quillings, but the buyers who come into the market do not purchase largely. In some sorts of silk goods there has been a shade of improvement; still, business generally may be considered dull, and much valuable machinery is standing. Several branches of the hosiery trade are tolerably active, and more might be done if manufacturers would accept the prices offered; these, however, are not in proportion to the advancing state of the yarn market. There is a little doing for export

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 16th day of October, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,754,755	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,104,755
		Silver Bullion	..
	27,754,755		27,754,755

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	12,153,001
Rest	3,119,329	Other Securities	16,884,816
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3 568,765	Notes	6,632,690
Other Deposits	14,411,153	Gold and Silver Coin	790,332
Seven Day and other Bills	808,592		
	36,460,839		36,460,839

Dated the 17th October, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,930,657	Securities	29,154,817
Public Deposits	3,568,765	Coin and Bullion	13,895,087
Private Deposits	14,411,153		
	39,910,575		43,029,904

The balance of Assets above Liabilities being 3,119,329*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£256,094
A DECREASE of Public Deposits of	1,325,149
An INCREASE of Other Deposits of	2,382,318
An INCREASE of Government Securities of	1,419,878
A DECREASE of Other Securities of	555,547
A DECREASE of Bullion of	246,432
A DECREASE of Rest of	695.364
A DECREASE of Reserve of	436.612

In consequence of the payment of the dividends, the public deposits show a considerable falling off, the diminution in the bullion being also attributable to the same cause. On the other hand, a very large increase has taken place in the other deposits. The augmentation in the Government securities we believe represents deficiency bills. The decrease in the other securities arises from the moderate demand for money.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,944,113	£ 22,385,630	£ 23 427,831	£ 22,569,885	£ 21,930,657
Public deposits	5,396,169	5,531,558	5,491,651	3,254,109	3,568,765
Other deposits	10,399,401	13 803,346	14,014,448	14,344,869	14,411,153
Government securities	13,241,768	10,809,467	10,875,157	9,490,273	12,153,001
Other securities	13,083 883	14,815,120	13,324,730	19.294.037	15,884 816

Price of Consols	97⅞	98⅜	96	93	92½
Average price of wheat	36s 0d	42s 4d	42s 6d	61s 1d	56s 3d
Exchange on Paris (shrt)	25. 25 30	25 10 14	25 10 15	25 15 . 22½	25 30 37½
— Amsterdam ditto	11 18¼ 18⅝	11 15	11 14⅛ 14⅜	11 14¼ 14⅜	11 18⅛ 19
— Hamburg (3months)	13 10⅜	13 7 7½	13 5½ 5⅝	13 5⅛ 6¼	13 10 10½

In the corresponding week of 1851, the Great Exhibition had been finally closed, after a career of unexampled success. From Vienna official intelligence had arrived of the success of the new loan of 85,000,000 florins; but, in point of fact, the distrust respecting Austrian finance was unabated, and the real subscriptions had only been for about two-thirds of the amount, a great number of which were exacted by a system of compulsion. The Government of Naples had published a reply to Mr Gladstone's charges, but it did not receive the slightest credit in any quarter. In Germany the admission into the Bund of the non-German provinces of Austria was being agitated. From the United States news had been received of the holding of a large secession meeting at Charleston, South Carolina, but no disruption of the Union was expected at that period, the other Southern States being for the time averse to a general separation.

In 1858, the French Three per Cent. Rentes, though somewhat prejudiced by the Imperial dictation at Lisbon, commanded 73¼; Consols, 98⅛; the new Turkish loan, 1¼ prem. (it stands now at about 11 to 12 discount); and the Indian Four per Cent. debentures, 99¾. Bills were negotiated in Lombard street as low as 2⅛ to 2¼ per cent., the Bank rate being 3.

In 1859, money was also abundant, being in the general discount market ¼ per cent. under the Bank rate of 2½. Large shipments of specie had been resumed to the East. In the railway market there had been remarkable buoyancy.

In 1860, the Queen had just returned to England from a visit to the Prince Regent of Prussia at Coblentz. Intelligence had been received of the arrival at the Peiho of the allied forces, and the gaining of some unimportant successes over the Chinese. An attack on the Taku forts was imminent. At home the proceedings in the Court of Bankruptcy with reference to the failures in the leather trade continued to occupy attention. The London money market was showing less ease, and a rise in the Bank rate was generally looked for.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,744,482*l*; in 1858, a deficiency of 1,006,774*l*; in 1859, a deficiency of 4,310,282*l*; and in 1860, a deficiency of 5,287,726*l*. In 1861, the deficiency is 2,473,663*l*.

DISCOUNT AND MONEY MARKET.—Owing to the release of the dividends, the supply of capital in the discount market has been more abundant, and the best bills are negotiated at 3⅛ to ¼ per cent., and in the case of very choice paper on even lower terms. The Bank have done a moderate business only from regular customers, except this afternoon, when, probably from exceptional causes, there was some increase in the applications. On the Stock Exchange there is undiminished ease, and for loans from day to day only 1½ per cent. is charged, while the terms from account to account are not more than 2 to 2½ per cent.

The Bank of France are said to have commenced to-day to draw on Messrs Rothschild and Baring for the 2,000,000*l* they have arranged to take under the agreement announced last week. Funds are also about to be attracted to Paris from other quarters, the Bank of France having just arranged to draw for 400,000*l* upon Hamburg.

The Government of Victoria intend shortly to issue 250,000*l* of their guaranteed railway bonds in the colony, where they have the power to place 1,000,000*l* out of the 8,000,000*l* authorised. The effect of this course will probably be to defer any further issues for the present on the London money market.

The Spanish Government have given notice of the issue of about 2,000,000*l* in Treasury bonds, under the provisions of the law of the 1st of April, 1859, authorising the outlay of 20,000,000*l* in eight years for special purposes. The price will be 98, and they will bear 5 per cent. interest. Although the official notice inviting subscriptions has appeared in the English press, it is to be hoped that no portion of this loan will be taken here as long as the Spanish Government refuse to make any compensation for the arrears of interest confiscated some years ago. It is as well to point out that, without some such arrangement, the bonds will not be allowed to be quoted on the London Stock Exchange.

The Bay of Havana and Matanzas Railroad Company in the Island of Cuba invite subscriptions for 250,000*l* in 7 per cent. debentures, which will be secured by a first mortgage on the whole property of the undertaking. The line has for some time been opened throughout, and the receipts have hitherto been very satisfactory. A sinking fund will be formed for paying off the debentures at par at the rate of 25,000*l* a year, commencing from the 15th June, 1867. The agents of the Company, Messrs Schröder and Co., formerly brought out the Matanzas and Sabanilla Railway loan of 200,000*l*, which now stands in the Stock Exchange at above par, and of which about 85,000*l* has already been redeemed.

The following are the rates of discount in the principal cities of the Continent. The chief alteration is a rise of about 1 per cent. at Frankfort:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	6	6
Vienna	6	5
Berlin	4	3
Frankfort	4	4
Amsterdam	3	3
Turin	6½	6½
Brussels	4	3¾
Hamburg	...	3¾
St Petersburg	7	...

ENGLISH FUNDS.—Consols have again shown a flat tendency, although a partial recovery has taken place from the lowest prices of the week. The final quotation last Friday for the account was 92¾, whence a steady decline ensued to 92¼ to ⅜. From this point, however, there was a rally to 92⅝ to ½. For money, the last price is 92¼ to ⅜. Sales have again been pressed, partly speculative on the state of financial affairs in France, and partly *bonâ fide* for reinvestment in other securities. On the other hand, the market is in some degree strengthened by the purchases customary after the payment of the dividends and the continued influx of gold into the Bank. Reduced and New Three per Cents. have been more in demand than Consols, and the prices of the former are now relatively less unfavourable than last week.

Exchequer bills have been rather more in request, and show a slight improvement in the March issue, leaving off at 1s to 4s premium, and the June 7s to 9s premium. India bonds are quiet at 10s to 14s premium.

In marked contrast with the heaviness in Consols, India Five per Cents. have risen steadily, the closing quotations this afternoon being 104⅛ to ¾. Numerous investments continue to be effected in this stock, many of the purchases being exchanges from Consols.

FOREIGN STOCKS.—Business in the foreign market has been rather limited, and the changes that have occurred have been generally unimportant. Turkish Six per Cents. have again advanced, especially the 1858 loan, on the appointment of the committee to secure the more steady transmission to England of the revenue appropriated for the interest and sinking fund of this stock. Spanish bonds are also firmer. There has been a renewed inquiry for Russian descriptions, especially the Four-and-a-half per Cents. Mexican has experienced some small fluctuations, and closed a fraction higher than last Friday. Spanish American bonds generally have been rather more in favour. Peruvian descriptions, however, were dull.

The closing price of French Three per Cents. on the Paris Bourse this evening was 67f 95c, showing a decline on the week of three-eighths per cent., but a recovery of nearly a quarter from the lowest point touched.

The annexed memorandum is from the Committee of Mexican Bondholders:—

The Committee have received advices from Mr White head, dated Mexico, the 6th ult. Congress had been called together again, and had sat two days in secret session, the opposition having a majority of 9 or 10. It was thought that Senor Juarez and his Cabinet would be overthrown. They have required statements from the Minister of Finance about the working of the law of the 17th July last, &c. Some negotiations seemed to be going on between the American Minister in Mexico and the Government about the waste lands which the bondholders had required as a collateral security for the debt.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The railway market continues to be mainly influenced by the traffic returns, which, proving more satisfactory than had been expected, have caused a rise in several stocks. Midland and Lancashire and Yorkshire have been especially firm. Great Northern also experienced a considerable rise, but subsequently showed a tendency to give way. Caledonian advanced in the earlier part of the week, but this afternoon has likewise been less steady: after official hours, the price declined to 105. Eastern Counties has been in some demand. The general business of the week has been unusually limited, but the appearance of the market at the close was generally favourable.

In the colonial department, the rise in India Five per Cents. has partly extended to Indian guaranteed stocks, and in several cases an improvement has taken place. Canadian descriptions this afternoon were rather firmer.

Foreign railways have shown renewed buoyancy, particularly Great Luxembourg. San Paulo (Brazilian), Dutch-Rhenish, and several other smaller descriptions are also higher. Lombardo-Venetian closed at ⅝ to ¾ prem., being rather weaker than last week. American securities have generally advanced, except Virginia Six per Cents., which exhibit a decline.

In the miscellaneous department, joint stock bank shares have been in demand, particularly Bank of London and London and Westminster. Red Sea Telegraph shares, which bear a 4½ per cent. guarantee from the Imperial Government, are also higher.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—There has been no alteration of importance in the rates this week, but the tendency is still in favour of this country.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, on the transactions in bullion during the week, and the operations in Indian rupee paper:—

Gold.—We have to report the following arrivals since our circular of the 10th instant:—The Atrato, from the West Indies, with 36,500*l*; the Lincolnshire, from Melbourne, with 207,000*l*. Some amounts of foreign gold coin have also been received from the Continent. The demand for export is not active, and a portion of the above may probably be disposed of to the Bank of England, who have bought, during the last week, about 192,000*l*. The shipments comprise—3,320*l* to New York, per Africa; 56,200*l* to New York, per City of Baltimore; 1,500*l* to West Indies, per La Plata; 15,500*l* to Alexandria, per Euxine; 13,100*l* to Bombay, per Euxine. The only Australian shipments advised are—per James Wilson, sailed 13th July, 76,232*l*; per Anglesea, sailed 11th Aug., 291,000*l*. The first-named vessel is now due. About 35,000*l* may be expected by overland route in about a week. The Australian mail, received this day, states that the Roxburgh Castle had about 40,000*l* on board at Melbourne; further shipments would probably be made by this vessel.

Silver.—Our market is inactive, but the price is steady at our quotation of last week, viz. 60¾d per oz standard. The Atrato, from the West Indies, brought 149,000*l* in bar silver and dollars, but this has not yet been disposed of. The shipments are 106,430*l*, per Euxine, to Bombay, and 5,000*l*, per La Plata, to West Indies.

Mexican Dollars.—There is but little demand for Mexican dollars; the price, however, still remains 59¼d per oz.

Exchange, for Banks' drafts at 60 days' sight, on Bombay is 1s 11⅜d per rupee; on Calcutta, 1s 11⅜d; bills with documents, 1s 11⅛d to 1s 11⅜d; Madras, 1s 11⅛d to 1s 11⅜d.

India Government Loan Notes continue as last quoted by us,

viz., 5 per Cents., 96 to 96⅜; 5½ per Cents., 103 to 103½. The 4 per Cents. range from 79 to 81.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 75s 6d to 76s, nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, 76s 5d per oz. Silver—Bar silver, 5s 0¾d per oz std, last price; bar silver, containing 5 grs gold, 5s 1d per oz std; fine cake silver, 5s 5⅜d to 5s 5½d per oz; Mexican dollars, 4s 11¼d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 65,000*l* in gold was taken to the Bank to-day, and 144,000*l* yesterday, making a total of 209,000*l* since making up the last return. These supplies have been chiefly Australian, by the Lincolnshire.

The amount of specie that will be sent by the next steamer for the East is 72,041*l*, all silver, except 1,090*l* in gold, of which 34,669*l* is for India, and 37,372*l* for China.

Failures and Mercantile Embarrassments. — The suspension has taken place of Mr W. Harryman, hop factor, with liabilities for about 40,000*l*. The estate is expected to yield a satisfactory dividend. Messrs Clarke, Ford, and Co. are the accountants employed in the case.

The trustees of the estate of Messrs D. Yorke and Co., bankers, of Peterborough and Oundle, who stopped payment last May, have just announced a first dividend of 4s in the pound. It is understood that good grounds exist for the expectation that the original estimate of 5s in the pound will be fully realised. The total claims entitled to dividend as at present ascertained, amount to about 164,000*l*. The early period at which the trustees have been enabled to make the above division shows that the affairs of the concern have been managed with much activity and skill.

A meeting of creditors of Messrs Sowerby, Tatton, and Co., silk mercers, of Regent Circus and Hull, was held yesterday, when a balance-sheet was presented, showing liabilities 42,150*l*, and assets estimated to produce 13,267*l*. There is thus a deficiency of about 29,000*l*. The trading has hitherto been alleged to have yielded a fair profit, and so lately as the stock-taking in February last a surplus was shown of about 2,000*l*. In order to account for the present loss, the partners were separately examined before the meeting, but failed to give any satisfactory explanations. A portion of the deficiency was ascribed to a heavy reduction in the value of the goods sent to Hull, the bad state of trade in the past six months, and the expenses. Some of the stock books are missing, and others were destroyed by Mr Sowerby in a moment of anger on the London business being seized on behalf of the creditors. Another unfavourable feature in the case was the fictitious augmentation of the sums paid into the bankers' as the daily takings, the object being to maintain the credit of the house by concealing the falling off in their business. Advances have also been made to a private individual, and bonds to the amount of 38,000*l* have been received, and are now held at the disposal of the creditors, but their value is little more than nominal. It was ultimately decided that the only mode of dealing with such an estate was in the Court of Bankruptcy, and the necessary proceedings were accordingly taken.

The advices from Sydney mention the failure of Mr William Barnett, general storekeeper, with liabilities of about 25,000*l*. The assets are stated to show a surplus. Mr Barnett has executed an assignment for the benefit of his creditors.

Public Companies.—The Directors of the Bank of Turkey have just issued a report recommending the dissolution of the Company, the modifications of the original concession proposed by the Ottoman Government being considered inadmissible. This undertaking has now been formed nearly two years, and has never done any business. A portion of the shareholders have repeatedly attempted to obtain a return of their deposits, or some satisfactory explanation as to the future course of the Board, but hitherto without success. One condition before the Bank was to commence operations was the withdrawal of the paper money, but this has long been seen to be indefinitely postponed. In the fresh proposals of the Turkish Government the above condition was altered, but it was accompanied by other regulations, especially those relating to the privilege of the note issue, which were felt to be a departure from the principles upon which the Bank was founded, and to leave no alternative but to wind up. For the original concession, which now turns out to be valueless, 30,000*l* was paid to the concessionaires, Messrs Gladstone and Rodoconachi, who are also two out of the four English directors. The financial statement of the Board shows that the total deposits were 121,800*l*, being 3*l* per share on 40,600 shares,—the 5,000 shares guaranteed by the Government and the 4,400 reserved for the Directors and Censors at Constantinople not having been taken up. Out of this amount, 30,000*l* has been given to the concessionaires, expenses have been incurred for salaries, &c., of 7,455*l* and 13,400*l* was paid for 20,000*l* Turkish Six per Cents. deposited in the Bank of England as caution money. The remainder, with the interest realised, amounts to 80,318*l*, which will enable an immediate division of 2*l* per share, and a further dividend will be made when the caution money shall have been withdrawn. The Directors will endeavour to obtain a return of the 30,000*l* paid for a valueless concession, but do not venture to hold out the slightest hopes of success. In the meantime, a large body of the shareholders have expressed considerable dissatisfaction, and legal proceedings have been taken to compel the return of the entire deposit of 3*l* per share, with interest.

At a meeting of the London and Provincial Discount Company, on Wednesday, it was resolved to increase the capital to 300,000*l*.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.30 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 3-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 429 per mark, and the short exchange on London is 13.8 per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 4-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107 to 108 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, although at the close of the market a portion of the small supply of English wheat on offer was left unsold, the trade ruled firm in the extreme, and, in several instances, a further advance of 1s per quarter took place in the quotations. In foreign wheat, the business doing was by no means extensive; nevertheless, late prices were fully supported, if not occasionally exceeded. Barley was firm in value; but the demand for it ruled inactive. Oats, beans, and peas changed hands at extreme currencies. The flour trade was firm, and prices were well maintained. This week's imports amount to 11,900 quarters of wheat, 750 of barley; 7,970 of oats; and 1,480 barrels of flour.

The wheat trade at Liverpool, this morning, was firm, and the late advance in prices was quite supported. Flour was rather dearer; and maize sold freely, at rather enhanced rates.

Advices from Alexandria to Oct. 8 are to the effect that, owing to the damage done to the cereal crops, in consequence of the overflowing of the Nile, an advance of 2s per quarter had taken place in the value of wheat, and of 6d to 1s per quarter in that of beans. The sales for the week ending Oct. 4 were as follows:—Saide wheat, private trade produce, 20,980 quarters, 31s 6d to 32s 6d; Beheireh wheat, private trade produce, 23,100 quarters, 29s 6d to 31s; Beheireh wheat, Pasha's produce, 940 quarters, 30s 10d; Beheireh wheat, private trade produce (white and Buhi), 3,300 quarters, 30s 6d to 34s; Saide beans, private trade produce, 18,415 quarters, 25s 6d to 26s 6d; Beheireh beans, private trade produce, 1,800 quarters, 24s 6d to 25s 6d; barley, 10,750 quarters, 17s 6d to 19s 2d; lentils, 1,820 quarters, 24s 6d to 25s 6d; peas, 175 quarters, 25s 6d to 26s; linseed, 820 quarters, 45s 6d to 47s 6d per quarter, free on board. Freights—Owing to the absence of shipping, quotations for freight are well nigh altogether nominal, say at 7s 6d to 7s 9d per quarter for beans to the United Kingdom for orders, and other descriptions in proportion. The rate by steamer to Liverpool rose to 6s 6d per quarter, but has again declined to 5s 6d per quarter.

EXPORTS of GRAIN in quarters from ALEXANDRIA, from April 19 to Oct. 2.

	1860.		1861.
Wheat	165,532		177,675
Beans	120,617		271,241
Barley	12,083		67,574

The news from America continuing to point to a prolongation of the war, the excitement of the Liverpool cotton market increases daily. The sales this week amount to 117,000 bales, including 50,000 to spinners, 66,000 on speculation, and 11,000 for export. Quotations are for the inferior qualities of American cotton ¼d to ⅜d, for middle qualities ⅜d to ½d, and for the finer descriptions ½d to ⅝d above those of last Friday. Surat also has risen ¼d to ½d. Not only speculators but spinners also buy with confidence, thinking it prudent to keep themselves well provided. To-day the sales are 25,000 bales, prices advancing.

The cotton trade of Alexandria to October 4 is thus reported by Messrs Briggs and Co.:—We have to report a continued rise in the value of cotton, which is likely to be increased by two causes,—the very favourable position of the article in the European markets, and the damage done to the growing crop here by the overflow of the Nile. The transactions for the past week have been:—12 bales sweepings to low ordinary, at 6.82d to 7.67d; 85 bales ordinary to middling, 7.95d to 8.72d; 86 bales good middling to fair, 8.86d to 9.14d; 2 bales good fair, 9.28d; 3 bales good, 10d; 188 bales crop 1860-61, and 215 bales crop 1861-62, 9.43d to 12.20d per lb, free on board. Freights by steamers are at ¼d per lb. Exchange—95 tariff piastres to 95¼ per £ sterling. Export of cotton in bales from the 19th of September to the 3rd of October, 1861:—To Great Britain, 878; Austria, 133; total, 1,011.

EXPORT of COTTON in bales for Twelve Months ending on the 3rd October, being a whole year's crop.

80 bales Java, New Orleans seed, 52¾c to 53c, Java seed, 36c to 40c per half-kilog

The public sales of tea held this week have gone off steadily, at fully previous quotations. By private contract, a fair business has been transacted at full currencies.

The annexed intelligence, in reference to tea and silk, is dated Hong Kong, Aug. 28 :—

Canton Silk—Stock in the market, 150 piculs; sales, 15 picule. Prices remain very high. Tea—At the commencement of the fortnight some settlements were made at lower rates, but latterly, in consequence of the small stock and few arrivals, prices have again advanced to fully previous rates. Scented teas have been in request, and may be quoted one tael dearer for medium kinds. Common descriptions are in large stock. Tayshan congou is still neglected. Country Green Teas—The small stock has been settled at full prices. Freights to London and Liverpool, 3*l* 10s. Macao.—Three vessels have left for London. About 5,000 half-chests of tea are on the market, for which 16½ to 18 taels are asked. Amoy advices are to the 19th of August. Tea—Settlements during the fortnight comprise 5,547 half-chests Oolong, at 17 taels to 21 taels; 1,646 half-chests Ankoi, 9½ taels to 17 taels; 270 half-chests orange pekoe, 12 taels to 17 taels. Stock, about 41,000 packages. Two vessels had sailed for New York. Foochow advices are to the 16th inst. Tea—Settlements during the past fortnight have been on a smaller scale. Prices for all descriptions of congou, except ordinary, remain without change, and the extreme firmness of the holders, in the face of large stocks, had prevented business. Arrivals had been moderate, but in excess of sales, and the stock was daily increasing. It comprised, however, only a small portion of medium quality, the bulk being ordinary to common. Late accounts from the country report prices as keeping up, and teamen holding off. The great want of rain was having a prejudicial effect on the third crop, both as to quantity and quality. Souchong—Small sales of common to fair, at easier rates. No fine sold. Oolong—A few parcels had been taken for England. The American firms are still holding off. About 10,000 half-chests had been sent to the North, and it was believed were intended for California. Pekoe—Purchases had been made to some extent at previous rates for finest; medium kinds were 1 to 3 taels lower. Scented Teas—Moderate sales at former prices. The sales from the 1st to the 14th of August are as follows :—13,631 chests congou, from 5 to 25 taels short, for low siftings to Kaison kinds; 2,124 chests souchong, from 18½ to 24 taels short, for fair to medium; 1,824 half-chests Oolong, from 18 to 26 taels short, for fair to fine; 886 chests pekoe, from 26 to 46 taels short, for medium to finest; 3,388 boxes scented teas, from 20 to 32 taels short, for fair to fine. Stocks—87,925 chests congou, 11,547 chests souchong, 77,277 half-chests Oolong, 1,402 chests pekoe, and 2,738 boxes scented teas. Shanghai advices are to the 17th inst. Silk—Purchases during the fortnight amount to 3,000 bales, making the total settlements for the season 12,500 bales. Stocks increasing, and were estimated at 16,000 bales, exclusive of 2,000 bales at Ningpo. Quotations are:—Teatlee, Nos. 1 and 2, none; No. 3, 415 to 420 taels; No. 4, 390 taels; inferior, 330 to 370 taels. Taysaam, No. 1, 360 taels; No. 2, 330 taels; No. 3, 300 taels; No. 4, 270 taels; inferior, 240 to 260 taels. Total export of silk from China to Europe is 8,722 bales, against 11,517 bales last year, or a decrease of 2,795 bales for this season. Tea.—Black—A fair business has been done at an advance of 1 to 2 taels on Oopeih teas brought from Hankow. Twelve chops, mostly second and third crop, had been settled at prices ranging from 28½ to 34½ taels. Five chops contract tea had arrived and been shipped off. Sales are as follows:—6,900 chests Oopeih congou, at 28½ to 34½ taels; 2,300 chests flowery pekoe (new), 34½ to 41 taels; 200 half-chests Oolong (Japan), 28 taels. Stocks—3,500 chests Oopeih congou, 3,500 chests Shanghai-packed congou, 2,000 chests pekoe. Greens—3,300 half-chests Moyune and Fychow had been taken at firm rates; 3,200 packages Pingsueys at an advance of 1 to 2 taels; 300 half-chests Hoochow, and 1,000 half-chests Japan. Stocks—4,750 packages of all descriptions. At Ningpo the stock was reported as 6,000 half-chests Moyune and Fychow, and 6,000 packages Pingsueys, but which could not then be sent up to Shanghai on account of the extortions of the custom house. The total export of tea from China to Great Britain is 18,194,300 lbs, against 13,482,800 lbs at the same time last year, showing an increase of 4,711,500 lbs for the present season. To the United States the export is 1,822,200 lbs, against 3,834,300 lbs last year, or a decrease of 2,012,100 lbs for 1861-62.

In the demand for raw sugar, rather less activity has been observed. The late advance in prices, however, has been fully maintained. Refined goods have sold steadily on former terms.

The supply of coffee on sale being small, the market has continued firm at the full prices of last week to 1s per cwt advance.

Messrs Fryer, Schultze, and Co., writing from Colombo, Sept. 17, thus allude to the coffee trade of that port:—

We have again to report a dull fortnight for shipments, our exports of this season's coffee to date being as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	413,015	against last year, cwts	418,220
Foreign Ports	23,814	— —	30,391
Australia and India.....	15,293	— —	10,870
	452,122		460,481

NATIVE COFFEE.

To Great Britain.....cwts	75,301	against last year, cwts	85,143
Foreign Ports.....	50,769	— —	67,269
Australia and India.....	7,975	— —	3,640
	134,945		156,052

There are still purchasers of plantation coffee for early delivery, but crops being late, very little has been done in this description. The supply of labour is more than sufficient for present wants, gatherings not having actively commenced even in low districts. The demand for the Southern colonies maintains native coffee at extreme rates, though not at quite such high figures as noticed in our last. The new Kandy crop, which promises to be of fair extent, is already offering at 38s to 39s. Freights—Several of the vessels in port are still discharging inward cargoes, and those available for shippers have been able to maintain rates at 4*l* 10s to 4*l* 15s for coffee in casks, and 3*l* in bags.

Cocoa has changed hands more freely, at higher rates. In rice, an average business has been done, and, in some instances, prices have slightly improved. The dry fruit trade has ruled steady, at former currencies.

Rum has moved off slowly, yet no change has taken place in its value. Brandy has met a retail inquiry, on former terms.

The last series of public sales of colonial wool for the present year, are announced to commence on the 7th proximo. The imports since the close of last sales, together with the stock then remaining unsold, consist of the following:—Sydney, 15,175 bales; Port Philip, 12,287; Tasmania, 1,744; Adelaide, 1,538; Cape, 22,316; Swan River, 31; New Zealand, 9,286 bales—total, 62,377.

The amount of business doing in English wool is still limited, yet the quotations rule firm. The Liverpool sales are progressing with considerable animation, at, in some instances, a further advance on the opening rates. Hemp is firm, at full prices.

The quarterly public sales of indigo were brought to a close on Tuesday. Annexed is the report for the series:—

The sales opened with much spirit, the attendance of both home and foreign buyers was good; amongst the latter the French being by far the most numerous. The first few parcels were offered almost without reserve, but the advance previously obtainable was fully maintained, being, as compared with July prices, 1s to 1s 3d on Bengal, and 1s to 1s 6d on Oude and plant Oude, which prices remained unchanged to the close. Fine Bengal has been in limited request; the Russian orders being small, the bulk of that sort has been consequently either withdrawn or bought in. Kurpah—The quantity offered being small has experienced a like improvement: all qualities have sold very readily at 1s to 1s 6d advance. Dry leaf Madras has again met with little demand: ordinary and low sorts have been held for about 3d advance, a few chests of good bringing 9d to 1s above July value. Of the quantity put up (10,066 chests), 4,764 have been withdrawn, and 1,176 bought in, leaving 4,126 chests sold in the room, to which must be added about 1,750 chests of the withdrawn and bought in, making a total sold of 6,000 chests. The following are the prices:—Bengal—Fine blue, none sold; fine purple and blue, 9s 3d to 9s 6d; fine violet, 9s to 9s 2d; good violet and red violet, 8s 9d to 8s 11d; middling ditto, 8s 4d to 8s 8d; ordinary ditto, 7s 5d to 8s 3d; good violet and copper, 8s to 8s 3d: middling ditto, 7s 6d to 7s 10d; consuming, good and fine, 8s 1d to 8s 7d; ditto, middling, 7s to 8s; ditto, ordinary and low, 5s 8d to 6s 11d; trash and washings, 3s 6d to 5s 4d. Madras—Good and fine, 5s 6d to 6s 6d; middling to good middling, 4s 8d to 5s 4d; good ordinary to middling, 3s to 4s 6d; low to ordinary, 1s 9d to 2s 10d. Kurpah—Good and fine, 7s 3d to 8s 6d; middling to good middling, 6s 3d to 7s 2d; good ordinary to middling, 5s 8d to 6s 4d; very low to ordinary, 3s to 5s 7d. Oude—Middling and good (plant Oude), 5s 9d to 7s 6d; ordinary and low (decided Oude), 3s 9d to 5s 8d.

The following remarks are from Messrs Thomas and Co.'s indigo circular, dated Calcutta, Sept. 7 :—

Our accounts from Tirhoot are to the effect that the weather was fine, but the estimates sent to us of the probable result of the season's outturn show a slight falling off as compared to the figures we printed when we last addressed you; we have, however, thought it better not to alter our estimate. From the Benares districts we hear that the Khoontee manufacture has been brought to a close rather quicker than was expected, and the out-turn is said to be about 25 per cent. less than was expected. The Nowdah is still small, but not looking as unhealthy as it was a fortnight ago. From the Doab our accounts are rather conflicting, some planters representing the prospects generally as being good, whilst others say they are bad. As far as we can understand, it would appear that at the factories lying between the Ganges and Jumna the produce is indifferent, but at the factories on the Bareilly side of the Ganges the produce is good. This morning we received the following telegram from Benares, dated the 5th inst.:—"Khoontee closed in all districts with 25 per cent. under estimate. Heavy rain, river rising, prospect here and above very poor." Annexed we beg to hand you a memorandum of our present estimate of the crop:—Doab and Benares, 32,000; Tirhoot, 15,000; Bengal, 17,760; total, 64,760 factory maunds.

The market for Scotch pig iron is firmer, at 49s 9d cash, mixed numbers. In other metals, no material change has taken place.

The oil trade has continued firm, and, in some instances, prices have improved. Linseed oil is worth 35s per cwt on the spot; and the best foreign refined rape, 48s per cwt. Turpentine is dearer, 63s being the value of American spirits.

The receipts and exports of turpentine, &c., at New York, from January 1 to October 5, were as follows:—

	Receipts.		Exports.	
	bbls 1861.	bbls 1860.	bbls 1861.	bbls 1860.
Turpentine	32,089	49,492	19,465	44,771
Spirits of turpentine	44,747	120,694	20,092	57,864
Rosin	192,130	530,079	198,799	414,331
Tar	48,907	43,588	25,536	25,142

P. Y. C. has sold steadily, and the quotation is now 51s 6d per cwt on the spot. Town tallow is 50s 6d, net cash.

"There is nothing new," observes the New York *Shipping List* of the 5th inst., "or particularly interesting in the position of financial and commercial affairs. The dry goods trade has been comparatively dull since our last, and there is little movement in any department. In the money market, the aspect of things is wholly unchanged. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9
First-class single signatures	7 ...
Other good bills	... ...

In the rates of discount on bank notes, there is little or no change to note. The following is a summary of the condition of the banks of the three cities named, as shown by their last weekly statements:—

	Loans. dols	Deposits. dols
New York, Sept. 28	126,128,326	96,551,898
Boston, Sept. 30	62,262,728	20,042,678

Last year	31,230,897	19,558,761"

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

Notwithstanding that the demand for France has wholly subsided, the trade in the whole of the leading markets held this week has been somewhat active for home-grown wheats, at a further advance in the quotations of from 1s to 2s per quarter. The amount of business doing, however, has been only moderate. Foreign wheat has commanded more attention, and the currencies have had an upward tendency. For all kinds of barley, the inquiry has continued much restricted, and, in some instances, prices have ruled the turn in favour of buyers. We have no change to notice in the value of malt, in which article the transactions have been on a moderate scale. Oats have commanded more attention, and the best samples have produced rather more money. Both beans and peas have changed hands steadily. Flour has further improved in value.

The continuance of remarkably fine weather has enabled our farmers to progress somewhat rapidly with out-door labours. Thrashing is progressing freely; but the yield of the new wheats, though very fine in quality, has disappointed the growers as to quantity. Barley and oats are turning out heavy crops.

The French markets, under the influence of the late heavy importations, have become much less active, on easier terms; but, in America, a steady export business has been passing in wheat, flour, and maize, on rather higher terms. The arrivals of produce from the interior still continue on an average scale.

The Scotch markets have been steady for wheat, at advanced rates, but barley and oats have met a dull inquiry.

In Ireland, produce generally has moved off slowly; nevertheless, the currencies have been well supported.

The arrivals of English wheat fresh up to this morning's market were very limited, and the trade ruled firm, both for red and white qualities, at, in some instances, a further advance of 1s per quarter. Foreign wheat sold steadily, at extreme rates. Barley sold somewhat slowly, yet prices were well maintained. Oats, beans, and peas were quite as dear as on Monday. The flour trade was firm, and the quotations were fully supported.

Mr Ed. Rainford reports a fair business doing in floating cargoes of grain, on higher terms. The arrivals off coast have amounted to 32 vessels.

The London averages announced this day are:—

	qrs	s	d
Wheat	3274 at	60	2
Barley	1118	39	0
Oats	909	21	10
Rye	4	38	0
Beans	275	39	6
Peas	77	35	7

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—No further general advance has been paid this week, partly attributable to the liberal supplies brought forward, but the demand continues steady. Two floating cargoes of Cuba have, however, sold for the United Kingdom at higher rates. The supply of West India is materially reduced, and about 2,350 casks had sold to yesterday (Thursday), including 1,000 casks 700 barrels offered by auction: Barbadoes, 34s to 43s; St Lucia, 33s to 39s; Jamaica, 34s to 40s per cwt. The landings last week were only 1,900 tons, and the deliveries 4,950 tons; consequently the stock has decreased to 87,700 tons, against 71,150 tons in 1861 at the same period.

Mauritius.—8,061 bags in the sales were above three-fourths disposed of as follows: black and low brown, 30s to 31s 6d; middling to good brown, 32s to 34s 6d; low to middling grey, 35s to 38s; yellow, 38s to 41s; strong refining, 40s 6d to 42s 6d; crystallised, 43s 6d to 46s per cwt. Business has also been done privately.

Bengal.—3,680 bags were about one-fourth part sold: Gurpatta date, 36s 6d to 38s 6d; bright grainy yellow, 35s 6d to 36s 6d; low soft brown date sort bought in at 30s per cwt, and withdrawn.

Madras.—1,337 bags grocery sold at 42s 6d to 44s 6d for grainy, and 39s to 41s 6d for soft yellow. 1,157 bags native partly sold at 31s 6d to 33s per cwt for brown and yellow.

Penang.—1,712 bags chiefly sold as follows: brown, 32s 6d to 34s 6d; grey and yellow, 35s to 39s; good to fine yellow, 40s 6d to 42s 6d per cwt.

Foreign.—216 casks 150 barrels Porto Rico found buyers at full prices: brown, 35s to 36s 6d; low to fine yellow, 37s to 45s 6d. 2,694 boxes Havana were mostly bought in at higher prices; a few lots selling at 39s to 44s, washed florettes at 45s to 46s, and white at 50s. 227 cases Bahia partly sold: grey, 40s to 44s 6d; brown, 34s to 36s 6d. Of 846 casks 163 barrels Cuba, a large portion sold: brown, 35s 6d to 37s; low to fine yellow, 37s 6d to 42s 6d. About 22,000 bags clayed Manilla have sold at 36s to 37s; 5,000 bags unclayed at 30s 9d. About 1,000 casks foreign muscovado and 1,500 boxes Havana are reported at the quota-

tions. Two cargoes of Cuba have sold for the United Kingdom, consisting of muscovado and clayed at 25s; one muscovado at 24s 9d; one of clayed Manilla at 25s in bond for Liverpool.

China.—100 bags dull soft white of indirect import sold at 43s to 43s 6d. 270 bags soft brown were held at 34s per cwt.

Refined.—The market is quiet, dry goods barely maintaining the recent advance. Ccommon grocery sorts command 49s 6d; crushed, 47s to 48s per cwt.

MELADO.—A few parcels have sold on previous terms.

MOLASSES.—About 500 puncheons and casks of various kinds have found buyers, including Antigua at 16s. A floating cargo of clayed Cuba sold at 15s per cwt for the United Kingdom.

RUM.—The market is rather quiet, but quotations unaltered. Leewards, 1s 7d to 1s 7½d; Demerara, 1s 8d to 1s 9d proof; common Jamaica, 2s 9d to 3s 2d per gallon. The total stock of rum now exceeds that of last year by 4,412 puns 620 hhds, and there was some improvement in the deliveries last week.

COCOA.—485 bags Trinidad sold at 2s advance: very fine, 95s; common mixed grey to good, 59s to 73s 6d per cwt. There are now few sellers unless at very high prices. Guayaquil last realised 61s 6d to 62s per cwt.

TEA.—At the public sales, on Tuesday, 7,243 packages were about one-third part sold, at full prices for green teas. Some medium Foo-Chow scented orange pekoe rather dusty realised 1s 5¾d to 1s 6d per lb. Privately, there is a good deal of inquiry for flowery pekoe. In other respects the market remains unchanged. Common green sorts are still very scarce.

COFFEE.—The small quantity brought forward has been sold at full prices, and the market keeps very firm, although less excited than of late. 955 bags native brought 69s to 70s for good ordinary to good; with small berry, 66s 6d to 67s. A few lots of plantation realised 73s to 81s. Beyond a small parcel of Rio sold privately, nothing of importance has transpired. A floating cargo of Rio has sold for a near port at 54s per cwt.

SAGO.—550 boxes good to fine small grain have sold at 22s 6d to 23s 6d per cwt, partly for cash.

RICE.—Transactions have been upon a very extensive scale, generally at 3d to 6d higher rates, and the demand is still active. On the spot, pinky Madras has sold at 11s 3d to 12s; new Necrancie Arracan, 11s 6d to 11s 9d; old, 10s to 11s; new Rangoon, 11s 6d; old, 9s 9d to 10s 7½d; Bassein, 11s; fine new Moulmein, 12s 6d; Ballam, 10s 6d to 10s 9d; white Bengal, 11s 6d to 15s. 2,000 bags 838 packets, by auction, partly found buyers at 11s 6d to 12s for low middling rather small and mixed with reds. 13,514 bags common Necrancie Arracan were bought in at 11s per cwt. Five floating cargoes of Necrancie Arracan and Rangoon have sold at 11s 6d to 11s 7½d per cwt, without guarantee.

IMPORTS and DELIVERIES of RICE to October 12, with STOCKS on hand.

SPICES.—3,650 bags common to fair Penang pepper sold at 3⅜d to 3⅝d; a few lots Tranq being held at 4d. 1,075 bags Alleppy, 4⅜d to 4½d; siftings, 3⅜d to 3⅝d. 167 bags common dull white Penang were bought in at 6½d. 39 cases brown Penang nutmegs, 1s to 2s 7d; 4 cases inferior limed, 11d. 11 cases mace, 9d to 11d per lb. 1,400 boxes cassia lignea partly sold at 84s to 90s for common coarse and mouldy to middling mixed quality. 256 cases wormy Cochin sold at 50s to 53s. 276 barrels Jamaica, 54s to 141s per cwt for very ordinary to good bold.

SALTPETRE.—A limited business has been done in Bengal this week, including fine quality at 33s 6d to 33s 9d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to October 12, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	9250	10400	14800	7530
Delivered	9300	10150	14100	11400
Stock	3300	4100	3630	2270

The deliveries last week were 200 tons.

NITRATE OF SODA.—A cargo has sold at 13s 7½d. The quotation on the spot is 13s 6d to 14s per cwt, with a steady demand.

DYESTUFFS.—Good Bengal safflower is firm, and prices looking up. Gambier has sold more readily at 17s 6d per cwt. 500 bags Cutch sold at 22s 6d, and low at 21s. Turmeric bought in at 13s 6d to 14s 6d. Bombay madder root bought in at 30s per cwt.

SHELLAC.—Quotations are without material alteration: livery to good orange sold by auction at 10*l* to 10*l* 12s 6d; garnet, 8*l* 10s to 8*l* 12s 6d per cwt.

LOGWOOD.—100 tons Laguna sold at 9*l* 12s 6d per ton.

METALS.—Copper is very firm, the standard of British ore being higher this week. Burra Burra quoted 99*l* to 100*l* per ton. English tin steady from the same cause, but foreign has been rather quiet: Straits, 116s 6d to 117s; Banca, 118s. Tin plates have been dull. A large business is reported in spelter, at 19*l* to 19*l* 2s 6d, and recently 19*l* 5s to 19*l* 7s 6d paid for arrival. British iron keeps steady in price. Scotch pig firmer, the last transactions being at 49s 6d to 49s 9d per ton for mixed numbers.

LINSEED.—Quotations have further advanced, being now 62s to 64s for Calcutta, and 67s for Bombay. Afloat, 58s to 62s 6d paid for the former, and 60s to 60s 6d per quarter for Taganrog and Berdianski.

OIL.—Fish oils are quiet. Olive remains steady: Gallipoli, 60*l*; other sorts, 55*l* 10s to 58*l* 10s per tun. Linseed, owing to its scarcity and the high price of seed, has advanced to 34s 9d on the spot; 34s to the end of the year. Rape remains firm: foreign refined, 47s 6d to 48s; brown, 44s to 44s 6d. Cocoa-nut is in moderate demand; Cochin, 50s to 50s 6d; Ceylon, 49s to 49s 6d. The market for palm remains firm: fine Lagos, 44s 6d to 45s per cwt; rather less for arrival.

HEMP is firm at the advance lately established. 2,540 bales Manilla by auction, party sold at 23*l* 5s to 24*l* 15s. Petersburg clean remains firm at 34*l* per ton.

SPIRITS OF TURPENTINE advanced to 63s per cwt for American drawn.

TALLOW.—Foreign has continued firm during the week, with an upward tendency in value. This morning, 1st sort Petersburg Y.C. is 51s 6d to 51s 9d on the spot and to the end of the year, 52s 9d to 53s for the first three months of next, and 50s 6d to 50s 9d per cwt for old.

PARTICULARS OF TALLOW.—Monday, October 14.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—There was less animation in the demand to-day. 248 casks Barbadoes, 16 casks 431 barrels Barbadoes, and 3,113 bags Mauritius, in the public sales, went off at about previous rates. 1,883 bags Bengal were withdrawn above the value. 400 casks sugar and melado were taken in at 25s 6d to 30s 6d. The week's business in West India amounts to 3,212 casks.

COFFEE.—37 casks Jamaica realised 74s to 104s. 115 bags native, 69s to 69s 6d. 446 bags Rio were bought in at 55s per cwt., since sold.

RICE.—10,000 bags found buyers privately: Rangoon, 11s 9d; Ballam, 11s per cwt. White Bengal as previously quoted.

PIMENTO.—405 bags went at 2⅞d to 3d per lb.

SALTPETRE.—1,965 bags Bengal, refraction 5½ to 2, were bought in at 33s 9d to 34s. 983 bags Bombay, refraction 46¾, sold at 30s 3d per cwt. Fine Bengal has sold privately at 33s 6d per cwt.

RUBBER.—452 baskets East India were bought in above the value.

LAC DYE.—177 chests part sold: S, 1s 2d; low and common, 2d to 5½d.

TURMERIC.—Bengal was taken in at 13s to 18s.

TALLOW.—243 casks South American sold at 45s to 53s. 274 casks Australian, 45s 9d to 52s 6d, being 1s to 1s 6d dearer. Town advanced to 54s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues quiet for dry goods; fine pieces and wet crushed are in good demand. For export, no transactions worth noting. Dutch crushed remains firm at previous quotations.

GREEN FRUIT.—Market good, with better supplies. Malaga grapes and lemons of the new crop have arrived, per steamer; the quality of the former of middling character. A parcel of the latter, sold by Keeling and Hunt at public sale, went at a reduction of 2s per package. New Messina lemons shortly expected. Barcelona nuts further advanced 2s per bag, with a limited stock on hand. The advices from the Azores give a more favourable account of the crop of oranges, which are likely to be shipped earlier than hitherto.

DRY FRUIT.—The activity lately prevailing in currants has for the past few days died away, and great firmness is shown. Transactions are limited. Buyers at 28s for low rained fruit cannot supply their requirements, 29s being the lowest figure in the market. Old fruit continues neglected, and in some instances is lower. Valentia raisins are in very limited demand, at 46s, the market transactions reported being more scanty than for many seasons past. New red Smyrna sell freely at 41s to 43s, and a few new Chesme were placed at 44s early in the week. Sultanas are looking firmer, large parcels having been sold at 54s to 56s. Fine would fetch 60s if it could be got. Figs in great demand, at a long range of price.

ENGLISH WOOL.—Rather more demand for low wools.

COLONIAL WOOL.—The public sales of colonial wool will commence on Thursday, 7th November. The quantity arrived to date is from Sydney, 14,875 bales; Port Philip, 8,287; Van Diemen's Land, 744; Adelaide, 1,138; Cape of Good Hope, 22,016; New Zealand, 8,286; Swan River, 34—total 55,377 bales, besides about 7,000 bales held over from last sales. The market is without change.

FLAX.—Market quiet.

HEMP.—Market firm at our quotations, but little remains at St Petersburg for shipment this season; supply short.

COTTON.—Sales of cotton from Friday, 11th October, to Thursday, 17th October, inclusive:—4,600 bales Surat, 9¾d for good fair sawginned Dharwar; 7⅞d to 8⅛d fair to good new Broach; 7 7-16d to 7¼d fair to good fair new Dhollera; 7d fair old ditto; 6½d to 7¼d very middling to good Oomrawatty; 5¾d to 6⅝d ordinary seedy to good fair Compta: 800 bales Tinnevelly, 7 3-16d to 7⅜d for fair to fully fair. Total, 5,400 bales. An active and general demand has been experienced throughout the week, and considering the small quantity offering, a comparatively large business has been transacted at an advance on Surat and Tinnevelly of ⅛d to ¼d per lb. There has been much inquiry for Western Madras, but there are none on the market. Yesterday, at public sale, 62 bales fully fair to good fair Cariacou were sold at 11½d to 11¾d, also 33 Surat at 6⅜d to 6⅝d, and 15 middling sawginned at 8½d. The following sales have been made for arrival:—200 bales sawginned Broach, 8d to 8⅜d, guaranteed good fair; 400 bales new Broach, 8⅛d ditto; 1,200 bales Dhollera, 7¼d ditto fair; 650 bales Tinnevelly, 7 7-16d to 7½d ditto good fair; 800 bales Western Madras, 6¼d ditto fair. P.S.—Market active. Sales 1,500 bales, mostly Surat, at advancing prices.

SILK.—The silk market rather quieter than last week. Prices unchanged.

TOBACCO.—Sales for home trade have been mostly confined to small lots for immediate use. For exportation, a fair demand has existed, and sales effected to some extent. The market continues firm at outside quotations.

LEATHER AND HIDES.—The leather trade has been rather limited in extent during the past week, almost all articles having met only a moderate inquiry. At Leadenhall, on Tuesday, there was a small attendance of buyers. The supplies were generally adequate to the demand; the

chief exceptions were prime crop hides, 45 lbs and upwards, best heavy English butts, and heavy harness hides, which were in good request. Prices remain unaltered.

METALS.—Our market for copper continues dull, although prices are steady. In iron rather more is doing, without any advance in price. Lead has been active, at a further advance of fully 5s per ton. Spelter has fully maintained the advanced prices, and a good business has been done. Tin plates are also in better demand at rather improving rates.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	6
Fat by ditto	2	9
Yellow Russian	3	0
Melted stuff	40	6
Rough ditto	23	6
Greaves	18	0
Good dregs	7	0

Imports this week 4,997 casks.

PROVISIONS.

The supply of bacon very short this week; only a few bales in, via Milford. The cure mostly very imperfect, owing to the extreme warm weather. What little there was has been picked up at advanced prices. Butter market more buoyant this week, most sorts moving off very freely. Large quantities of American butter on the market; some parcels very fine.

METROPOLITAN CATTLE MARKET.

THURSDAY, Oct 17.—To-day,s market was somewhat scantily supplied with beasts, and all breeds commanded a steady sale, at, in some instances, a further advance in the quotations of 2d per 8 lbs. A few very superior Scots realised 5s per 8 lbs. Sheep—the show of which was limited, were firm, and 2d per 8 lbs dearer than on Monday. A few old Downs sold as high as 5s 10d per 8 lbs. There was a good consumptive inquiry for calves, at 2d per 8 lbs more money. The top price was 5s 2d per 8 lbs. Pigs moved off freely at extreme rates; but milch cows were a dull inquiry.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	0	3	4	Prime Southdown sheep	5	6	5	10
Second quality ditto	3	6	3	10	Large coarse calves	4	2	4	8
Prime large oxen	4	0	4	6	Prime small ditto	4	10	5	2
Prime Scots, &c.	4	8	5	0	Large hogs	4	0	4	6
Coarse and inferior sheep	3	4	3	8	Small porkers	4	8	5	0
Second quality ditto	3	10	4	4	Suckling calves.....each	21	0	30	0
Prime coarse-woolled do.	4	6	5	4	Quarter old store pigs	22	0	32	0

Total supply—Beasts, 810; sheep and calves, 5,440; calves, 170; pigs, 500.
Foreign supply—Beasts, 210; sheep, 1,500; calves, 105.

NEWGATE AND LEADENHALL

FRIDAY, Oct. 18.—Only moderate supplies of meat have been on sale here. For all descriptions the trade is firm, and prices are on the advance.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d

Large Pork	4	2	4	10	Lamb	0	0	0	0
Inferior mutton	3	4	3	8					

HOP MARKET.

FRIDAY, Oct. 18.—The best samples of hops are in fair request, at full prices; but all other kinds are dull, and the quotations have a downward tendency.

HOPS.—An account of the duty on hops at 1½d per lb, the growth of the year 1861, from returns received up to the 18th October, 1861:—Canterbury, 23,468*l* 11s 10½d; Gloucester, 5*l* 5s 7½d; Grantham, 8*l* 14s 4½d; Isle of Wight, 2,421*l* 5s 1½d; Lincoln, 105*l* 1s 10½d; Lynn, 2*l* 6s 7½d; Middlesex, 1*l* 8s; Northampton, 3*l* 1s 6d; Nottingham, 75*l* 8s 1½d; Oxford, 4*l* 5s 6d; Reading, 10*l* 7s 4½d; Rochester, 78,229*l* 7s 9d; Sheffield, 14*l*,15s 6d; Stourbridge, 5,617*l* 7s 4½d; Suffolk, 344*l* 11s 7d; Surrey, 8*l* 8s; Sussex, 10,684*l* 14s 4½d; Wales, Middle, 98*l* 8s; Worcester, 4,283*l* 2s. Total—125,386*l* 10s 7½d.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Oct. 14.—The receipts of home-grown potatoes since our last report have been only moderate. Generally speaking, the trade has ruled firm, though by no means active, and prices have been supported. Scarcely any foreign potatoes are on offer. York Regents, 95s to 105s; Scotch ditto, 90s to 100s; Kent and Essex, 85s to 110s per ton.

FRIDAY, Oct. 18.—The supplies of potatoes are very moderate, and the trade rules firm at quite previous quotations.

HAY MARKETS —THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 9s to 1*l* 16s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 8s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Trade slow.

COAL MARKET.

FRIDAY, Oct. 18.—Hetton 19s 3d—Lambton 18s 9d—Hartlepool 18s —Byron 17s 6d—Harton 16s 9d—Davison's 16s 6d—Lambert's 16s 3d—Wylam 14s 6d—Tanfield Butes 13s 3d. Ships at market, 120; sold, 109.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 18.—The public sales of East India are progressing satisfactorily, and the advance at which they opened has not only been fully maintained, but in several instances enhanced rates have been obtained, owing to the great competition for some descriptions suited for the American army requirement. Sales of miscellaneous kinds of low wools will be held from the 21st to 23rd inst.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 18.—Good attendance at to-day's market. Wheat in good consumptive demand at the extreme rates of Tuesday. Flour, 6d per barrel and sack dearer, with a free sale. Indian corn in healthy demand; mixed, 34s to 34s 3d. Egyptian beans, good inquiry; Saide, 37s. No change in other articles.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, Oct. 18.—The market for manufactured iron has a very quiet appearance, and the business has been limited during the past week. Scotch pig iron remains almost unaltered. Copper is little inquired for, and prices are nominally without change. Lead is firmer, and demand has improved. Little doing in most other metals.

The Gazette.

TUESDAY, Oct. 15.

BANKRUPTS.

G. F. Rauch, Huggin lane, Wood street, warehouseman.
E. Nicholson, Cornhill, stockbroker.
J. Eusden, Ely, Cambridgeshire, builder.
C. T. Ingram, Gloucester street, Pimlico, merchant.
J. Ullmann, Great Russell street, Bloomsbury, and Walbrook, merchant.
W. Curtis, late of Great Berkhampstead, rag cutter.
T. P. Hesketh, Newman's row, Lincoln's inn fields.
F. R. Partridge and H. Edward, King's Lynn, attorneys.
R. Hicks, Mortimer street, Cavendish square, and Simes villas, Lewisham house agent.
J. Mason, Ware, maltster.
G. Hadley, Birmingham, fruiterer.
W. Large, Tunstall, grocer.
F. Ormond, Ouston, Leicestershire, cattle jobber.
W. Hirst, Huddersfield, woollen manufacturer.
E. Jenkins, Stroud, Gloucestershire, outfitter.

SCOTCH SEQUESTRATIONS.

J. Laird, Glasgow, paint manufacturer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 5th of October amounted to 585,730*l*, and for the corresponding week of last year to 575,975*l*, showing an increase of 9,755*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 279,475*l*, and for the corresponding week of 1860 to 269,989*l*, showing an increase of 9,486*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct. 14.—In the railway market to-day the preparations for the approaching settlement chiefly occupied attention, and the general business was unimportant. Lancashire and Yorkshire was scarce for delivery, and improved fully 1 per cent. Eastern Counties, Midland, and Sheffield also advanced. London and North-Western, on the other hand, was more supplied, and closed slightly lower. South-Eastern receded this afternoon on the unfavourable traffic return. No change of importance occurred in the colonial department. In foreign descriptions, San Paulo and Lombardo-Venetian were quoted a fraction lower. American securities showed increased firmness, especially United States Five per Cents, Illinois Central, and New York Central shares. Virginia Sixes, however, again declined. Mines were rather dull, and in some instances exhibited a reduction.

TUESDAY, Oct. 15.—The railway market to-day opened steadily, and, after some fluctuations, closed at a nearly general improvement. Great Northern advanced 2 per cent., Midland about 1, Caledonian ⅝, and other descriptions ¼ to ½. Apart from the settlement, there was not much business doing. Midland and Lancashire and Yorkshire remained scarce for delivery. In the colonial market, Buffalo and Lake Huron shares were quoted higher. Great Western of Canada, on the other hand, were rather dull. Grand Trunk closed, without alteration, at 19 to ½. In foreign descriptions, Lombardo-Venetian declined to ¼ to ⅝ pm. during official hours, but subsequently rallied to ¼ to ⅝ pm. Dutch-Rhenish shares were firmer. Nova Scotia bonds receded ½ per cent. American securities showed increased strength; United States Five per Cents., Virginia Sixes, Erie ordinary and preference shares, Illinois Central, and New York Central having advanced. Mines were in fair demand at an occasional improvement. In joint stock banks, Oriental shares were less steady. Miscellaneous descriptions closed about the same as yesterday.

WEDNESDAY, Oct. 16.—The railway market to-day showed increased firmness. The stocks chiefly in demand were Caledonian, at an advance of 1 per cent., and Midland and Lancashire and Yorkshire, at an advance of ¼ to ½. North-Eastern descriptions, Sheffield, and Eastern Counties were also higher, while South-Eastern slightly declined. London and North-Western likewise receded in the afternoon, owing to the falling off in the traffic. In the colonial market, Great Western of Canada shares recovered to 9¼ to ½, while Grand Trunk stock remains rather dull at 19 to ½. Foreign descriptions were in more request, Bahia, Dutch-Rhenish, and Great Luxembourg in particular showing a fractional advance. Lombardo-Venetian left off the same as yesterday, at ⅜ to ½ pm. No change occurred in American securities. Mines experienced little alteration. Joint stock banks were firm, London and Westminster being especially in demand. In miscellaneous descriptions, Peninsular and Oriental Steam and Red Sea Telegraph shares were quoted higher.

THURSDAY, Oct. 17.—The railway market this morning opened steadily, and remained firm until just before the close, when the tendency was rather less favourable. Midland improved to 126⅝ on the satisfactory traffic return, but subsequently relapsed to 125¾ to 126. Great Northern A stock receded 1 per cent., to 110 to 111, the increase in the receipts being rather less than had been anticipated. Compared with yesterday, London and North-Western, Midland, Lancashire and Yorkshire, South-Eastern, and Eastern Counties showed a slight decline, while Great Western and North-Eastern descriptions advanced. In the colonial market there was a better demand for Indian guaranteed stocks. Foreign descriptions were generally firm. The principal changes in mines were in foreign adventures, some of which were quoted rather lower.

FRIDAY, Oct. 18.—Except as regards Caledonian stock, which receded ¼ per cent., the railway market to-day was firm. South-Eastern stock rose ¼ per cent., and one or two of the other principal lines ⅛. Business was limited. Lombardo-Venetian Railway shares remained dull, at ⅛ to ¾ prem. Great Luxembourg were firm, at yesterday's rise. The Indian, Canadian, and Brazilian lines were steady.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

A WELCOME ANNOUNCEMENT.

E. MOSES AND SON beg respectfully to acquaint the public that they have made preparations, on an unprecedentedly large scale, for the Autumn and Winter Seasons. Their stock of OVERCOATS comprises every modern style in all kinds of seasonable and serviceable materials, with the latest improvements in workmanship. The Eversley and Shelburne overcoats are particularly recommended.

Their general stock includes every description of attire for all classes, all ages, and all occupations; the articles are too numerous to particularise, but may be gathered from their several trades of—

READY-MADE AND BESPOKE TAILORS, HABIT MAKERS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Their BESPOKE CLOTHING DEPARTMENT is too important a branch of their business to be passed over without a special notice. It offers a perfect fit, combined with the most fashionable and comfortable styles, and the most elegant workmanship.

E. MOSES and SON need scarcely remind the public that in every department of all their establishments the Highest Degree of Excellence is associated with Prices the Most Moderate.

Any article not approved of will be exchanged or the money returned.

Rules for self-measurement and lists of prices post free.

E. MOSES and SON'S establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.

E. MOSES and SON.
London Houses:—
City Establishment—Corner of MINORIES and ALDGATE, 154, 155, 156, 157, Minories; 83, 84, 85, 86, Aldgate.

506, 507, 508, New Oxford street; 1, 2, 3, Hart street.
Tottenham Court road Branch—Corner of TOTTENHAM COURT ROAD and EUSTON ROAD,
137, 138, Tottenham Court road; 283 Euston road.
Country Establishments:—
BRADFORD, YORKSHIRE, and FARGATE, SHEFFIELD.

N.B.—Our Celebrated "INDISPENSABLE SUIT," adapted equally for walking, riding, travelling, or business, may be had in a large variety of seasonable and fashionable materials, from 30s to 70s.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr LANKESTER, F.R.S., Superintendent of the Food Collection, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

KENTISH TOWN COLLEGIATE SCHOOL, N.W.—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable apply to Head Master, Leighton House, Kentish town.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer,

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

DR CURTIS'S MEDICAL WORK "MANHOOD," An Essay on Nervous and Generative Diseases.
The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman:"—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

GLENFIELD PATENT STARCH, USED in the ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

HOLLOWAY'S OINTMENT AND PILLS.—Indisputable Remedies.—In the use of these medicaments there need be no hesitation or doubt; by their cooling, healing, and purifying properties, Holloway's preparations must always do good. Both find a place in every household. The Ointment stands unrivalled for the facility it displays in relieving, healing, and thoroughly curing the most inveterate sores, ulcers, and all other skin affections. The Pills, by purifying, stimulating, and regulating every organ, greatly assist the remedial virtues of this excellent Ointment. They cannot possibly do any harm. Even if used at haphazard, without attention to the directions accompanying each packet, no ill consequences would ensue: they would still operate beneficially according to the strict necessity of the case.

FRAMPTON'S PILL OF HEALTH,
Price 1s 1½d and 2s 9d per box
This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.

Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.

These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

DR MARSTON'S LECTURES—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St. Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

THE GREAT FIRE.—Destructive Fire at the Jarrow Docks Station, on the North-Eastern Railway.—"Collector's office, Tyne Dock, South Shields, 28th Jan., 1861. Gentlemen,—In reply to your favour of the 25th inst., respecting the state and contents of one of your Safes after the fire at this office on the 31st ult., I have to inform you that it was subjected to a very hot fire for three or four hours, and must at one time have been nearly red hot, as the workmen were not able to touch it for two or three hours after the fire was extinguished. On the Safe being opened, the books and cash were found to be in good condition. The cash boxes contained both notes and cheques, the whole of which were quite safe. I am, gentlemen, yours respectfully, R. THUBRON. Messrs Milner and Son, Phœnix Safe Works, Liverpool, and 47A Moorgate street, City, London." Note.—Another party says, 'I have seen the Safe, and it has had a regular roasting. There was a large amount in bank notes and several bags of gold in the drawers, and the principal books above. Everything else in the building was entirely destroyed; nothing left but the bare walls."

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

MARGATE and RAMSGATE—From London Bridge Wharf, daily until 26 h, at 10 morning, (Sundays excepted) calling at Blackwall and Tilbury Piers.

HERNE BAY — Wednesday and Saturday at 10 morning.

Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street; and St Katharine Wharf.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

FIRST MORTGAGE LOAN OF

£250,000, in bonds of £100, bearing interest at 7 per cent. per annum, payable in London.—BAY of HAVANA and MATANZAS RAILROAD COMPANY, in the Island of Cuba.

DIRECTION.

H. E Count de O'Reilly, Marquis of St Felipe and Santiago, planter—President.
Edward Fesser, Esq., Managing Director of the Bank of Commerce, merchant.
Don Pedro Sontolonga, merchant.
Don Miguel Antonio Herrera, merchant.
Don Manuel Bulnes, planter.
Don Gabriel de Cardenas, planter.
Don Manuel Ramos Izquierdo, planter.
Don Jose Pedroso, planter.

Agents in London—Messrs J. Henry Schröder and Co.
In Havana—Messrs Fesser and Co.
Brokers—Messrs Mullens, Marshall, and Daniell.

This Railroad commences at Regla on the Bay of Havana, runs eastward through the island, and passing Las Minas, Campo Florida, San Miguel, Jaruco, Baynoa, Aguacate, Ceiba Mochs, terminates at Matanzas, traversing a distance of 54 miles.

It possesses also a branch line, from Regla to Guanabacoa, three and a quarter miles in length.

The communication between Havana and Regla is effected by steam ferries, owned and worked by the Railway Company.

The concession was granted to this Company in 1857.

The branch line to Guanabacoa was opened in August, 1858.

The main line gradually opened from station to station, was completed, in the most solid manner, to Matanzas on the 14th June, 1861.

At either terminus of the main line the Company owns a large area of land, and extensive quays at Havana and Regla.

At Regla the terminus is at the Regla warehouses, belonging to the Bank of Commerce, of which Mr Edward Fesser is the Managing Director. Here upwards of 800,000 boxes of sugar are annually warehoused; and imported produce, flour, wine, oil, provisions, &c., stored to a large extent, will be distributed in the island by means of this railroad.

At Matanzas the terminus adjoins those of the Coliseo and Sabanilla Railroads, in the former of which some of the Directors of this line are extensively interested, and with which it is contemplated to effect a junction.

The receipts of the branch line of 3¼ miles and the ferry service, from the opening in August, 1858, to May, 1861, amounted to 606,186 dols.

From the main line, opened throughout for traffic in June last, the receipts are very satisfactory.

The amount expended on the Railroad, in the purchase of land, the construction of the line, the rolling stock, ferries, and all appurtenances,—amounts to about 3,800,000 dols. Of this, 2,239,000 dols has been realised by the subscriptions of the most influential parties residing in the island.

For reimbursement of the balance which has been raised from individuals, it is now proposed to raise a loan in London of £250,000, to be secured by a mortgage of the railroad and its appurtenances, rolling stock, and ferry boats; in fact, of the entire property of the Company; and will be the first and only lien thereon.

The Bonds with Coupons will be issued in sums of £100 each, bearing interest at the rate of seven per cent. per annum, payable half-yearly in London, on the 15th June and 15th of December, at the counting house of Messrs J. Henry Schröder and Co.

The subscription price will be £95 per bond, with interest from 15th December, 1861.

The payments to be made as follows:—

£5 will be required to be paid on application, and a further sum of
£20 upon the allotment of bonds.
£35 to be paid on 15th December.
£35 on the delivery of the bonds upon their arrival from Cuba.

Interest at seven per cent. per annum to be allowed on the calls until 15th December.

A sinking fund will be formed for paying off the loan at par, within fifteen years from this time. Its operation will commence on the 15th June, 1867, £25,000 being redeemed in that year, either by purchase or public drawing, and every year afterwards until the final extinction of the debt.

Applications for allotments to be made to Messrs J. Henry Schröder and Co., 145 Leadenhall street; or to the brokers, Messrs Mullens, Marshall, and Co., 3 Lombard street.

In the event of the applications exceeding the amount of the bonds to be issued by the agents, each application will be subject to a pro rata diminution.

No. 145 Leadenhall street, London, Oct. 16, 1861.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

65 Moorgate street, London.

BRITISH AND FOREIGN INVESTMENT.

Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT COMPANY.

The Directors are prepared to comply with all applications for their Debentures at par. They are issued in sums of £50, £100, £500, and £1,000, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in mortgages of improved freehold land of very ample value, the Company by its charter being in every case first mortgagee.

Individuals and public institutions, who usually lend on mortgage, are offered a higher class security than is afforded by the old mortgage system.

The interest is payable by coupons, on the 1st January and 1st July, at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, and the same is receivable through any of the country banks.

The last half-yearly statement and the Debentures may be had at the Company's brokers, Messrs Brunton and Son, Auction Mart chambers, Bartholomew lane, London, E.C.

THE LANDS IMPROVEMENT COMPANY

(incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

MANCHESTER COTTON COMPANY (LIMITED).

Notice is hereby given, that at a Meeting of the Directors, held this day, at the Company's office, in Manchester, a Second Call of Two Pounds per Share was duly made. The amount of such call is required to be paid on or before the 1st day of November next, into the Manchester and Salford Bank, or the Manchester and Liverpool District Bank, or any of its branches, and in default of such payment interest at the rate of £5 per cent. per annum will be charged on the amount of such unpaid call until payment.

JOHN PLATT, Chairman.
DAVID CHADWICK, Interim Secretary.
Manchester, Sept. 24th, 1861.

THE LONDON AND PROVINCIAL AGRICULTURAL COMPANY (Limited).

Registered under the Act of Parliament which limits the liability to the amount of shares taken.
Capital, £100,000, in shares of £1 each; 2s 6d deposit to be paid.

DIRECTORS.

Major-General Pemberton, York house, Chertsey, Surrey.
Henry Wetton, Esq., Chertsey, Surrey.

Mr J. Retigan, Secretary, pro. tem.

OFFICES.

Chief Office—40 Mark lane, London.

Manufactories—Albert Works, Nightingale street, Strangeways, Manchester, and Carlisle Works, Abbey Town, near Carlisle.

The above Company has been established for the more extended manufacture of the Royal Patent Compound Oil Cake for Cattle, the Compound Feeding Meal, the original economic food for cattle, and patented, superphosphate, and other standard chemical manures.

To manufacture these reliable articles at a remunerative profit, and afford to all consumers an opportunity of participation,—to reduce price and carriage so as to increase demand and facilitate it,—and to effect this by reciprocal benefit to consumer and Company, are objects which furnish a claim on public attention and public support.

By means of local manufactories in certain districts, this will be effected, and the daily augmenting demand which has made them necessary, supplied.

The Company starts with possession of two manufactories fitted with machinery,—one at Manchester, and one at Carlisle,—a large, lucrative, and established business,—an existing staff of 500 agents to extend it, and has secured practical management in their Directory.

It is estimated that the Manchester mill can produce a gross return in cake, meal, and food alone of £800 a week, and that the Carlisle mill can return about £560 a week, making a total of £1,360 per week; the profits upon which—necessarily private, from the nature of the business—will provide an ample margin for a dividend of from 20 to 30 per cent. upon the capital invested. The erection of wooden sheds adjacent to these mills will be all that is necessary to enable them to make a sale of 1,000 tons (say £5,000 worth) of manure per annum, a mere moiety of the demand of these districts.

In anticipating the results of the operations of the Company on the wide basis on which it rests, it has been calculated that with the 500 agents now connected with the Company, and exclusive of a London trade, supposing them to average a return of only half a cwt of food and half a ton of cake per week each, the gross returns of the Company will be, in round numbers, £182,000 per annum. Assuming they double that return, you have £364,000 per annum; and we may be allowed to observe, that at this average return falls far short of what the working agents, during the late proprietors' experience, effected. The United Kingdom cannot be well covered under 1,000 agents; and assuming their return to be but on the basis of the first calculation, you still have £364,000 per annum income, while this latter calculation may be considerably increased by additions to the business which the agents can effect, or which may be received from direct customers.

The cost of production and working expenses would, of course, be much less upon this return than on a smaller one. And it would be but a moderate expectation that a return of 5000 tons of manure, which, at £5 per ton, would be £25,000 per annum, could certainly be effected through the same connection.

Sufficient has now been stated, in the limited space of a prospectus, to prove that an exceptional opportunity is presented for effecting a certain and profitable investment in a commercial business, which possesses every element of secure prosperity, and offers an unprecedented advantage to the investor. And the Directors are confident in the belief that the undertaking will receive that support to which it is entitled by the objects it has in view, from all persons interested in agricultural matters, as well as from those whose only desire is to make a successful investment.

The full prospectus, testimonial circulars, and share application forms can be obtained rom all the local agents, the brokers, auditors, bankers, and solicitors; and from the secretary, at the chief offices of the Company.

TO BANKERS.—A GRADUATE

of Oxford wishes to enter a first-class Banking House for such period as may be agreed upon.—Address C., care of Mr Williams, 400 Euston road, Fitzroy square.

THREE VISITS TO MADAGASCAR,

in 1853-56, including a Journey to the Capital, with Notices of the Natural History, and of the Present Civilisation of the People.

By Rev. W. ELLIS,
Author of "Polynesian Researches."

"In the revived interest attached to Madagascar by the important changes that have taken place in that island, we should urge those who have not read the Rev. Wm. Ellis's most interesting volume to turn to it at once for the sake of making themselves acquainted with the history of civilisation and Christianity there."—PATRIOT.

"What Dr Livingstone has done for Central Africa, Mr Ellis has, accomplished for Madagascar. He has brought to light the interior of an unknown region, and laid open a new field of vast importance for European and transatlantic enterprise. That Madagascar will very soon be accessible to our trade and commerce it is impossible to doubt, after the recent instances of China and Japan."—CHRISTIAN OBSERVER.

William Blackwood and Sons, Edinburgh and London

NEW GENERAL ATLAS.

Dedicated by Special Permission to Her Majesty.

THE ROYAL ATLAS OF MODERN GEOGRAPHY.

In a series of Entirely Original and Authentic Maps.

By A. KEITH JOHNSTON, F.R.S.E., F.R.G.S., Author of the Physical Atlas, &c.

With a complete Index of easy reference to each Map, comprising upwards of 150,000 places contained in this Atlas.

Imperial Folio, half-bound in russia or morocco, price £5 15s 6d.

"Of the many noble atlases prepared by Mr Johnston and published by Messrs Blackwood and Sons, this 'Royal Atlas' will be the most useful to the public, and will deserve to be the most popular."—ATHENÆUM, August 10, 1861.

"We know no series of maps which we can more warmly recommend. The accuracy, wherever we have attempted to put it to the test, is really astonishing."—SATURDAY REVIEW.

"The culmination of all attempts to depict the face of the world appears in the 'Royal Atlas,' than which it is impossible to conceive anything more perfect."—MORNING HERALD.

"This is, beyond question, the most splendid and luxurious, as well as the most useful and complete, of all existing atlases."—GUARDIAN.

"There has not, we believe, been produced for general public use a body of maps equal in beauty and completeness to the 'Royal Atlas' just issued by Mr A. K. Johnston."—EXAMINER.

"In comparing this beautiful and valuable atlas with previous collections, every one must be struck, not only by the immense advances in geographical knowledge, but by the greatly increased power of representing that knowledge to the eye in the course of the last thirty years."—ECONOMIST.

"An almost daily reference to, and comparison of it with others, since the publication of the first part some two years ago until now, enables us to say, without the slightest hesitation, that this is by far the most complete and authentic atlas that has yet been issued."—SCOTSMAN.

W. Blackwood and Sons, Edinburgh and London.

THE STRUGGLES OF BROWN, JONES, AND ROBINSON.
BY ONE OF THE FIRM.
In the CORNHILL MAGAZINE.

"Mr Trollope appears with a new story, in which he seems to have tapped a new vein."—SPECTATOR.
"Mr Trollope, we are glad to see, commences a new tale, the opening chapters of which are interesting from their quaintness.—ENGLISH CHURCHMAN.

SMITH, ELDER, AND CO., 65 CORNHILL.

In course of publication,

AGNES OF SORRENTO.
In the CORNHILL MAGAZINE.

"In England the pen of Mrs Harriet Beecher Stowe will, we trust, ever find and deserve a welcome. She fixes the colours of the external earth with the firm and faithful hand of a severe and keen-eyed observer..... 'Agnes of Sorrento' is a sweet prose poem—an uninterrupted burst of beauty, organic and inanimate. There is not one ill-chosen word, not an incongruous or uncouth thought from beginning to end."—WEEKLY DISPATCH.

SMITH, ELDER, AND CO., 65 CORNHILL.

THE CORNHILL MAGAZINE.

Three volumes of this popular and entertaining Miscellany, each volume containing 768 pages of Letterpress, consisting of Stories, Essays, and Papers on various subjects by writers of eminence, and Twelve Illustrations, besides numerous Vignettes and Diagrams, are now published, price 7s 6d each, in ornamental cloth binding.

BY ORDER OF THE ASSIGNEES,
By MR BRANCH,

ON MONDAY, THE 4TH DAY OF NOVEMBER next, at HALF-PAST ONE for TWO o'clock precisely, at the Public Sale room, Liverpool and London chambers, Exchange, Liverpool, subject to the conditions then and there to be produced, the LIFE INTEREST in possession of a gentleman, who is in his sixty-ninth year, in property comprised in a marriage settlement, and now consisting of a Messuage and Nine Acres of Land, statute measure, situate on Woolton hill, near Liverpool, let at a rental of £350 per annum.

And also in a Leasehold Warehouse, situate at the Waterloo dock, the estimated annual rent of which is now £400, or thereabouts, and in which there is a term of 47 years, or thereabouts, unexpired.

Further particulars may be obtained on application to Charles Turner, Esq., Official Assignee; or Messrs Lowndes, Bateson, Lowndes, and Robinson, Solicitors, 3 Brunswick street, Liverpool.

RESIDENTIAL PROPERTIES NEAR LONDON.

MESSRS DEBENHAM AND TEWSON beg to call the especial attention of gentlemen seeking Residences within easy distance of the City to the following Properties, for sale by them at the Mart, on Tuesday, Nov. 12th (unless previously disposed of by private contract).

1. Sutton, Surrey.—A handsome modern detached FREEHOLD RESIDENCE, with large Garden, within 5 minutes' walk of the station.

2. Near Denmark Hill.—A detached FREEHOLD VILLA, with coach house, stabling, and large Garden, close to the summit of Champion Hill.

3. Stoke Newington.—An excellent long leasehold detached RESIDENCE, with grounds of an acre and a half, capital stabling and coach house; the whole in perfect order, having been occupied for many years by the Proprietor.

4. Malda Hill.—One of the capital MODERN RESIDENCES in Clifton Gardens, with right of access to beautiful pleasure grounds in the rear, held by a long lease on the Bishop of London's estate.

Printed particulars and cards to view can be had of Messrs Debenham and Tewson, Estate Agents and Auctioneers, 80 Cheapside.

A YOUNG SWISS GENTLEMAN, at present employed in a first-class Commercial House in Italy, who is fully acquainted with general office business, and who writes a beautiful hand, wishes to meet with an Engagement in England. References unexceptionable.—Address K., Post Office, Leghorn, Tuscany.

PARTNERSHIP.—A GENTLEMAN, aged 35, of nineteen years' Mercantile experience (the latter ten as principal), wishes to join a well-established firm. Speaks five languages. Can introduce about £3,000, and give the highest references.—Address M., care of Messrs Pearson and Son, 35 Bishopsgate street, E.

PARTNERSHIP.—A GENTLEMAN already in business, and having a moderate capital at command, wishes to extend his business by connecting himself with a House already established, or with a Partner who could bring a good connection either home or foreign. Principals or their Solicitors only to apply.—Address Z., care of T. Edgcombe Parsons, Esq., Solicitor, 61 Gracechurch street, E.C.

TO BANKS AND PUBLIC COMPANIES.—A Gentleman who has had during the last six years charge of Branches of a Bank of Issue doing a large discount and general business, wishes an appointment as Manager or Secretary. No objection to go to any place not in the Tropics. Can give references of the most unexceptional character.—Address D., care of Messrs Pearson and Son, 35 Bishopsgate street, E.

TO CAPITALISTS.—The Proprietors of a first-class Slate Quarry in North Wales, in full work and making large returns, desire an additional capital of about £3,000 for its complete development. The most satisfactory references will be given as to the position and responsibility of the present Proprietors, who have invested £20,000 in the concern, which promises to be one of the most lucrative in the district. The additional capital might be secured if desired.—Principals or Solicitors can obtain introductions of Mr H. Salter, 17 Abchurch lane, E.C.

TO BANKERS, RAILWAY AND OTHER COMPANIES.

BANK NOTES, BILLS OF EXCHANGE, LETTERS OF CREDIT, BONDS, CHEQUES, SHARES CERTIFICATES, &c.

HENRY BRADBURY, WILKINSON, AND CO.

devote their attention exclusively to the production of

BANK NOTES AND ALL DOCUMENTS OF SECURITY,

in which are combined all recent discoveries for the prevention of successful Forgery. A Specimen Book showing the character of work recommended will be submitted, upon application.

12 AND 13 FETTER LANE, LONDON, E.C.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

ANNUITIES.

NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION.

3 Pall Mall East, London.

Empowered by Special Act of Parliament, 17 Vic. cap. 43. Established A.D. 1844.

IMMEDIATE ANNUITIES granted on very favourable terms.

The Tables for Reversionary and Deferred Annuities are particularly deserving of attention, whether regarded as a means of providing for a particular individual, or as a resource against the casualties of age and the uncertainties of health and fortune.

PETER MORRISON, Managing Director.

Prospectuses sent free on application.

STANDARD LIFE ASSURANCE

COMPANY, Established in 1825.

PROGRESS OF THE COMPANY'S BUSINESS.

The business of the Company has increased steadily year by year, until it has attained its present large amount.

THE STANDARD has transacted a larger amount of business during the last fifteen years than any other Office.

	£	s	d
From 1845 to 1850 the amount of Assurances effected was	2,146,641	12	9
From 1850 to 1855 the amount of Assurances effected was	2,492,988	6	7
From 1855 to 1860 the amount of Assurances effected was	2,815,455	3	0
	7,455,085	2	4

This is all first-class home business, the Assurances being almost entirely, as stated in the Proposals for Assurance, effected in connection with Family Provisions and Marriage Settlements.

		£	s	d
The Revenue of the Company was in 1845		103,371	3	5
—	— 1850	169,151	16	4
—	— 1855	237,450	1	9
—	— 1860	304,161	13	7

The Funds at the date of last investigation (1860) amounted to £1 856,302 19s 4d, showing an increase of £700,000 since 1855; while during the same period the CLAIMS under Policies in consequence of death were upwards of Half a Million Sterling.

SPECIAL NOTICE.

ADVANTAGE OF ASSURING BEFORE 15TH NOVEMBER, 1861.

A Policy effected before 15th November next will not only participate in the 7th Division of Profits to be made in 1865, but will secure one year's additional Bonus, at all future Divisions, over Policies of later date.

THE PROFITS OF THE COMPANY have been divided on six occasions—in 1835, 1840, 1845, 1850, 1855, and 1860, when large additions were made to Policies under the peculiar mode of division adopted by the Company, which is essentially Tontine, affording very important advantages to Assurers.

EXAMPLES OF BONUS ADDITIONS.

Date of Policy.	Sums in Policies. £	Bonus Additions to 1860. £	s	Sums in Policies with Bonus Additions. £	s
Nov. 15, 1830...	1000 ...	1115	0 ...	2115	0

Joseph Underwood, Esq. (Hills and Underwood).
John Kemp Welch, Esq. (Orlando Jones and Co.)

MANAGER—Henry Thomson, Esq.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification; adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the Commercial community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust they will be supported by the public to enable them to carry out this system with success.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.
W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

NATIONAL PROVIDENT INSTITUTION, 48 Gracechurch street, London, for Mutual Assurance on Lives, Annuities, &c. Established December, 1835.

DIRECTORS.

CHAIRMAN—Samuel Hayhurst Lucas, Esq.
DEPUTY-CHAIRMAN—Charles Lushington, Esq.

John Bradbury, Esq.
Thomas Castle, Esq.
Richard Fall, Esq.
John Feltham, Esq.
Joseph Freeman, Esq.
Charles Gilpin, Esq., M.P.
Charles Good, Esq.
Robert Ingham, Esq., M.P.

BANKERS.
Messrs Brown, Janson, and Co., and Bank of England.

SOLICITOR—Septimus Davidson, Esq.

CONSULTING ACTUARY—Charles Ansell, Esq., F.R.S.

MUTUAL ASSURANCE WITHOUT INDIVIDUAL LIABILITY.

Extracts from the Report of the Directors for the year 1860:—

	£	s	d
Number of new policies issued during the year 988			
Assuring the sum of.....	481,231	1	10
Producing an annual income of.....	16,053	15	7
Making the total annual income, after deducting £50,112 annual abatement in premium.....	298,251	10	4
Total number of policies issued... 26,573			
Amount paid in claims by the decease of members, from the commencement of the institution in December, 1835...	1,034,368	5	4
Amount of accumulated fund.....	1,898,895	14	11

The effect of the successful operation of the society during the whole period of its existence may be best exhibited by recapitulating the declared surpluses at the four investigations made up to this time.

		£	s	d
For the 7 years ending 1842 the surplus was		32,074	11	5
— 5 years — 1847	—	86,122	8	3
— 5 years — 1852	—	232,061	18	4
— 5 years — 1857	—	345,034	5	11

The next division of profits will be made up to the 20th November, 1862. Policies effected prior to that date, if subsisting at the time of division, will participate in such profit for the time they may have been in force.

The Prospectus, with the last report of the Directors, and with illustrations of the profits for the five years ending the 20th November, 1857, may be had on application, by which it will be seen that the reductions on the premiums range from 11 per cent. to 98½ per cent., and that in one instance the premium is extinct. Instances of the bonuses are also shown.

Members whose premiums fall due on the 1st of October are reminded that the same must be paid within 30 days from that date.

September, 1861. JOSEPH MARSH, Secretary.

THE GENERAL TRAM RAILROAD COMPANY (Limited).

In consequence of certain misapprehensions which appear to prevail as to this Company and its objects,—the Directors think it necessary to inform the public that this Company has no connection whatever either directly or indirectly with the existing London Street Rail Companies nor with the promoters thereof, nor do they propose to adopt the same system of Rail or Carriage. This Company is established for the object of constructing Horse Railways for Branch Lines to serve as feeders to Locomotive Railways, also for supplying a cheap and convenient means of communication between towns and districts where the amount of traffic and nature of the country will not admit of Locomotive Railways.

The Rails will be laid along and level with the existing roads. The Rail proposed to be adopted will be the grooved Rail, such as is now used by the Horse Railway Companies in the United States and France. Each rail being on both sides level with the road, there is no depression of the roadway between the rails, consequently no obstruction or inconvenience is presented to the ordinary traffic on the road; a description of carriage will also be adopted which can travel on the common road as well as on the rail, and can pass from one to the other at the will of the driver,—so that the system will not interfere in any way with the rights or convenience of the general public using the road on which the Company's carriages will run.

Prospectuses can be obtained of the Secretaries, 82 Gresham House, Old Broad street, London, to whom application for the remaining Shares should be addressed.—By order,

JOSEPH KAINES, Sec., pro. tem.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

The Political Economist.

A Supplement, containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 6th of April last, will be issued this day fortnight.

THE PREREQUISITES AND THE CONSEQUENCES OF AN EFFECTUAL BLOCKADE.

AT the present moment, no legal question is nearly so important to those of our merchants and shipowners who are employed, or who think of being employed, in the American trade as these two:—

1. What are the conditions under which one belligerent can by international law establish a blockade over the ports of its opponent?

2. What are the practical effects of such blockade when it is established?

We will endeavour to give concise answers to both these questions, premising that what we say is in accordance with the dicta of the highest *American* authorities, as well as with those of our own lawyers.

The first practical condition of a blockade is, that there shall be a blockading force; and by this is meant not only that there shall be some ship or ships of war lurking about or near to the port in question, but, emphatically, that there should be in its vicinity such a naval force as would be "competent to cut off all communication with the interdicted "port or place" under ordinary circumstances. Upon this point, the United States authorities are full and express:—"A blockade," they say, "must be existing in point of fact; and, in order to constitute that existence, there must be a power present to enforce it. All decrees and orders, declaring extensive coasts and whole countries in a state of blockade, without the presence of an adequate naval force to support it, are manifestly illegal and void, and have no sanction in public law.....The Government of the United States has uniformly insisted that the blockade should be effective by the presence of a competent force stationed, and present, at or near the entrance of the port; and they have protested with great energy against the application of the right of seizure and confiscation to ineffectual or fictitious blockades."

These are the words of Mr Justice Kent, the highest American authority on this subject, and they are confirmed by a consistent course of judicial decisions. It will not, therefore, be possible for the Government at Washington to deny that it is necessary to maintain at the mouth of each closed port a large coercive force. The American law is significantly distinct upon the subject. Hitherto the United States have been the great neutral nation. They have been, by distance from other equal States, exempt from great wars of interest; they have been, by a traditional principle of non-interference, exempt from all wars of moral obligation. In consequence, their authorities have been always disposed to extend to the utmost limit the right of the neutral, and to confine within the narrowest limit the right of the belligerent. They are now in the reverse position. They are the belligerents, and the rest of the world is neutral. They must not attempt, for it will not be permitted now, to call in question the salutary regulations for enforcing the reality of a blockade of which they have themselves obtained the recognition.

Of course it is not requisite, for it would be on the very face of it absurd that the blockading fleet shall, in all weathers and under every accident, keep absolute command over the entire access of the port which it professes to blockade. The nature of seafaring life forbids such continuity. If the blockading squadron is driven off for a brief period by a storm, no neutral nation has a right to avail itself of such an accident; and if its ships attempt it, they do so at the peril of capture.

How great a force is necessary to maintain a blockade in each case is a question of fact of which the Prize Court must judge in every specific case. Generally speaking, any *bonâ fide* and considerable force will be adjudged sufficient, since the questions to be decided are questions suggested by the capture of a particular vessel, and that capture is in itself some evidence of the sufficiency of the blockading force.

The second condition of a legal blockade is, that it shall have been duly notified to neutral ships. No particular form of notice is requisite—actual *knowledge* is the material point. If the captain really knew that there was a blockade, he is bound not to violate it; and even without actual knowledge he may be liable to capture in certain cases; for if the blockade have been duly notified to his own Government, that Government was bound to inform him and all its other subjects of the fact within a reasonable time; and if it have omitted so to do, it has not, by such neglect, invalidated the blockade.

These are the two preliminaries to the effectual establishment of a legal blockade—first, a sufficient force; next, notification to the neutral. What, then, are its consequences?

First, that no vessel can go in and out of the port blockaded. The object is to cut off all communication between that port and other nations for the time. Egress and ingress are, therefore, on a par. The port is to be cut off from the commerce of the world. No vessel can be permitted to enter or leave it, and any one discovered in the act of doing so, will be seized and condemned.

Secondly, no neutral ship must lie in the vicinity of a blockaded port, in the hope of slipping in by some casual accident. If a vessel should be detected in the neighbourhood, and should be unable to give distinct and intelligible reasons for its being there, it will be liable to condemnation. Such is the general rule, and there is much to be said for it on general grounds if the legality of a blockade is to be recognised. It seems absurd to prohibit the ingress of a

vessel, and yet permit it to lie in wait close at hand, obviously for the sole purpose of running in when it can. Yet it is certain that in the present case this rule will be attended with great hardship to shipowners, and great risk of dispute between the United States and and other nations. The American Government is about to blockade a whole coast of many hundred miles, with numerous large ports and innumerable petty creeks and bays. How, then, is the rule to be applied? Is it to be said that any English ship that is found any where on the whole coast, from the most Northern point on the coast of Virginia to the most Southern point on the coast of Texas, is lurking there to break the blockade? Is any such ship to be subject to immediate capture? Is any such ship to be liable to give reasons for its being there that shall seem valid to a naval officer of the Federal Government, who is probably angry with England, and who is certainly anxious for prize money? We see no way in which the strict rule of law can be evaded, but we shrink from the terrible consequences that may at no distant period arise from it.

Nor is this all. Any ship *sailing for* the blockaded coast is liable to capture. The intent of the vessel must, of course, be proved to the satisfaction of the adjudicating Court, but if it is proved, the capture was legal, and its condemnation will be certain. The serious danger of this right in the present case is evident. It is awful to imagine that an English ship is liable to capture in any case in which an American captain may fancy she is going to some part on the immense coast of the South. Doubtless it is the court of law which decides whether any captures are legal; but, on the other hand, it is the captain who decides whether he will capture or not. It will be but poor compensation to a shipowner, when, after many months, his ship is restored to him, that he has succeeded in a difficult litigation in a foreign Prize Court, and has proved that she ought never to have been interfered with at all. The safety of vessels, and perhaps the peace of the two countries, is at the mercy of the discretion of an American captain, who may determine the possible intention of an English ship according to rules of evidence best known to himself—who will certainly lean to the side of aggression, since he may gain prize money if his act is adjudged to be right, and will lose nothing if his act is adjudged to be wrong.

It is to be observed, too, that the risk is not the risk of our shipowners exclusively. It is the risk of our merchants likewise. If a vessel is captured and condemned, her cargo is condemned and captured with her. The law presumes the vessel to be sailing for the delivery of the cargo and for the benefit of the merchant. If, therefore, the voyage was an illegal one, the merchant is the original criminal—the party principally to blame; and, consistently, the law confiscates the cargo as well as the ship. The logical deduction is perfect, but the practical hardship is also extreme. The cargoes of our merchants are as much exposed as our vessels to the arbitrary fancies, and possibly the covetous intentions, of American captains *at this moment*, when the fleet of America is in confusion,—when many of its officers are gone to their own homes in the South,—when their places are supplied partly from political motives in the midst of a revolution.

In these circumstances, the course for our Government is a plain, though not an easy one. They are bound to see that the legal prerequisites of a valid blockade exist in each case of capture, and that the powers given by such blockade are in no instance misused by fraud or violence. They are especially bound to see that an effectual force is maintained by the United States at each blockaded port. This is the primary and pressing difficulty. The United States, with a navy which never was of first magnitude, are endeavouring to blockade an extent of coast such as never was before closed by the armed navy of any Power however great. The Government at Washington, too, has a war by land, close to its capital, which absorbs most of its energies, most of its money, and all the enthusiasm of its people. It has added hastily to its fleet, if report may be trusted, not always wisely or even uncorruptly; it has bought not always the best vessels, but sometimes the vessels of its best supporters; it is more or less applying to its fleet the same corrupt and incompetent management of which the bad effects by land were exemplified at Bull's Run; it is buying stores as well as ships from party motives, and giving commands from party motives; and with a fleet thus composed and thus manned, it is endeavouring to establish the greatest blockade ever known or contemplated since navigation has been an art. We cannot believe that it will succeed; we have no faith that such a blockade can be effectual; and upon our Government will lie the difficult, the delicate, but the pressing duty of enabling our ships to disregard it with impunity so long as it is ineffectual.

We have not noticed hitherto the two points suggested in the case of the Hiawatha, because, though in themselves curious, they are, in our judgment, of subordinate importance. That vessel was seized by the Federal cruisers in open breach of the blockade, and to prevent her condemnation in the Admiralty Court her ingenious advocate raised two curious legal difficulties. He first alleged that the President of the United States had no power under the Constitution to declare a port blockaded; and there is certainly considerable difficulty in showing that he has such a power. The Federal Government is not an ordinary Sovereign Government with the usual rights, powers, and position: it is only a Sovereign Government to a certain specific extent, and has only a strictly defined authority. What the States gave by the Federal Constitution the Federal Government possesses; but it possesses no further power. The difficulties of this strict definition in an anomalous war are endless. For instance, we have heard it contended that if the Federal Government were compelled to leave Washington, it would, *ipso facto*, become an illegal and usurping Government. The Federal Constitution only gives powers to a Federal Government, at a certain place to be fixed in a peculiar prescribed manner. According to that manner, it has been fixed at Washington, in the district of Columbia, which is for that express purpose removed from the jurisdiction of any States, and appropriated to the Federal Government. If Mr Lincoln were to be expelled from Washington, his Government would become an *itinerant* Government dependent for its reception on the hospitality of some subordinate local authority. The legality of its acts would in strict law be questionable, for Congress would not meet at the only place at which by law it can meet, or where its acts would be valid. This is, perhaps, a monster instance of a technical difficulty; but lesser ones will occur perpetually, whenever sovereignty, which is essentially an indefinable power varying with changing exigencies, is hedged and limited by the clauses of a written document. Thus, in the case of the Hiawatha, it is not certain that in strict law the President of the United States has the power to declare a port blockaded, though the Court has decided for the present that he has such a power.

This technicality is not, as respects foreign nations, very important. It would not be possible for England to say to the United States:—'We know the Federal 'Constitution better than you do. Though a Court of 'yours with competent jurisdiction pronounces the 'President to have such a power, we assert the Court 'to be mistaken, and maintain that he has no such 'power.' We should not permit France or any other foreign nation to question the understanding of English law, and, therefore, we must not claim for ourselves peculiar skill in construing any foreign law.

The second point raised in the case of the Hiawatha is far more important. It amounts to saying that there is no war, and, therefore, no blockade. A war presupposes two belligerents, and the United States have not yet allowed their Southern neighbours to be belligerents. As yet, they are in the eye of the law mere rioters and casual disturbers of the public peace. Mr Lincoln has protested against the recognition of the Southern States by ourselves and by France,—and if logic is to go for anything, he cannot claim the right of blockade so long as he adheres to the language of that protest. The right of blockading a port is an extreme right, only conceded by international law in cases of war. The law permits the lesser evil of a blockade solely to terminate the greater evil of a war. So long, therefore, as Mr Lincoln denies that he has a belligerent, he cannot consistently claim the rights which are only conferred on him by the recognised law of nations to overcome a belligerent.

We admit, however, that we should think this too technical

and too lawyer-like a reason to be sufficient to justify a breach of a blockade by this country. It would savour of a war from special pleading, and might be answered by the concession to the Southern States of the *name* belligerents, which is all they want to be so. But the existence of this flaw in the abstract legality of the American case, unquestionably gives great opportunities to any Power which may be desirous of *any* decent escape from an extreme difficulty. There is no saying what use the French Emperor might, it so disposed, make of such a plea. Unquestionably he has very frequently used many which are worse.

Since the above was written, we have received the letter from our American correspondent, giving the judgment of Judge Ware in the case of the William Arthur, in which the right of blockade is called and justified as a municipal right. A more extraordinary, and, in the case of the United States, a more *dangerous* doctrine was never advanced by any court of justice.

THE EXCISE REVENUE.

The comparison contained in our last number of the half-year's revenue with Mr Gladstone's calculations was, as sufficiently appeared upon the face of it, approximate only. It is not possible to discuss such subjects with perfect accuracy, except on the annual occasions upon which official reserve is removed by the resolutions of the Chancellor of the Exchequer on his Budget. At all other times it is necessary to resort to less detailed calculations, which, though true as far as they go, must in some respects be insufficient.

We showed in our last number that the calculations of the Chancellor of the Exchequer were not in general so erroneous as some of our Conservative contemporaries were induced to believe. On the other hand, certain of these contemporaries have alleged that an account of the malt duty did not enter sufficiently into detail. We beg, therefore, their attention to the following observations from a quarter which even they would be likely to respect;—

"TO THE EDITOR OF THE ECONOMIST.

"Sir,—In the remarks you make upon the quarterly statement of the revenue recently published, I think that you, as well as most of your contemporaries, overlook a material circumstance affecting the malt duty.

"The malt duty is not like a Customs duty, of which we may say that one-twelfth comes to hand every month; it is a duty which accrues at particular seasons of the year. If you refer to the parliamentary paper printed last session by order of the House of Commons (No. 221), you will see that the amount of malt brought to charge in the 2nd, 3rd, and 4th Excise rounds every year is exceedingly small as compared with the amount brought to charge in the 6th, 7th, and 8th, or even in the 1st and 5th rounds.

"Now, owing to the change which Mr Gladstone has made in the term of malt credit, the Excise officers must have been collecting, in the six months ending September 30, 1861, the duty on malt brought to charge in the 7th, 8th, 1st, and 2nd rounds, instead of on that brought to charge in 6th, 7th, 8th, and 1st rounds as they did in the corresponding half-year in 1860. The unproductive 2nd round (averaging about 200,000*l*) thus comes into comparison with the highly productive 6th round (averaging nearly 1,200,000*l*); and this circumstance alone accounts for the great apparent loss which is shown by the return of our Excise revenue.

"To put the matter in a less technical form, you will see that while in the half-year ending September 30th, 1860, we collected the duty on malt made between the 16th November and the 16th May, in the corresponding period in 1861 we collected the duty on malt made between the 1st of January and the 1st of July; and, as much more malt comes forward in November and December than in May and June, it would be absurd to expect as large a revenue from this source in the half-year just past as in the corresponding half-year in 1860. The new arrangement has told against the first half of the financial year, but will tell greatly in favour of the second half.—Yours obediently, N.

"October 21, 1861."

It follows that Mr Gladstone's calculations would be as correct in the Excise revenue as we last week showed them to be in the other branches of the national income. The present anomalous circumstances—consequent upon the American crisis may affect them all, but that is a different consideration.

M. GUIZOT ON THE PAPAL QUESTION.

The secular dominion of the Papal See has found no less eminent an advocate than M. Guizot. This aged statesman has long been known to entertain the profoundest jealousy towards Italy, and to have sympathised heart and soul with the gallant efforts of Lamoricière and his little army. We were nevertheless scarcely prepared for the position which he actually assumes. We could have understood him had he merely argued that the means adopted by the Italian King were so unscrupulous that the end ought to meet with no success. We could have understood him had he merely developed the view which he took in the French Academy in January last. M. Guizot quotes his own words:—"We be-"held, now nearly fifty years ago, Italy a prey to troubles, "to invasions, to revolutions, similar to those which are "even now bursting over her; but then, at least, they ap-"peared in their true character, and under their true form. "One who enjoyed a great popular renown, and whom the "Liberals called their publicist (Benjamin Constant), in speak-"ing of these events and so many like them, characterised "them as marked by *the spirit of usurpation and of conquest*, "and he wrote under this title, a book, to denounce them. Do "not the same events any longer deserve the same name? "Have they changed their nature because it is no longer "France who openly enacts them on her own account, and "appropriates the fruits? Or would these acts of violence "become legitimate because to-day it is in the name of "democracy, and by virtue of what is called its will, that "they are executed?" Now, this is intelligible if it be not very wise. But M. Guizot retains too much of the traditions of the statesman to rest his apology for the temporal power on the mere ground that it exists, and that all encroachment on it is therefore wrongful. He felt that some one would say that unless it could be proved to have some more claim to exist than the mere fact of existence would establish, even a "spirit of "usurpation and conquest" might be welcome as relieving the earth from a burdensome anomaly. In answer, therefore, to the thanks of Catholics, and the remonstrances of Protestants, M. Guizot has written a book to prove not only that the secular authority of the Pope was wrongfully assailed, but that it was a blessing to Europe, and ought to be restored. Monsignor Liverani and Father Passaglia, who respect profoundly the spiritual and ecclesiastical power of the Pope, are anxious that it should be severed from the temporal power; and they are not safe in Rome, whence Father Passaglia has just taken an ignominious flight. M. Guizot, who has no personal belief in the Papal system at all, and declares himself as good a Protestant as in his earliest days, is overcome with horror at the danger imminent over the Holy See,—and has declared for a line of policy which will gain for him the warmest gratitude of Antonelli, and the most cordial welcome from the feeble ruler at the Vatican. It is an ill day for the Roman See when pious believers are its most dangerous and most persecuted enemies,—while philosophical spectators are its only friends.

But what is the general drift of the argument by which so practised a politician as M. Guizot persuades himself that the Pope's temporal authority is of vital consequence to the interests of Europe? It is one of the most curious specimens of the philosophy of timidity of which we have ever heard. M. Guizot persuades himself that all the Christian religions of Europe are bound up in a common destiny. If one is sapped, all are likely to be sapped. If one is overthrown, all are likely to topple after it. Unbelief is abroad. The supernatural is openly defied. "Essays and Reviews" have mined the faith of England and the Protestantism of France. German sceptics without number have long been at work on the faith which Luther bequeathed to his successors, as well as on that which he overthrew. If Catholicism falls, it is not only Catholicism, but the *principle* of supernatural authority which will go with it. The revolutionary spirit is the demon which all good men ought to oppose in Church and State. Let it once triumph over Catholicism, and there will be no arresting its progress. Everything will be swept away before it. It is not true that Catholicism is co-ex-

tensive with Christianity; but if you shake the foundations, you cannot stay the ruin. Such is the deplorable logic of the venerable thinker and statesman, put forth in the name of faith, but imagined in the true interests of the worst and most corrupting scepticism. It is scarcely possible to conceive that a man who, not believing the Papal Church to be the true Church, still holds that any injury to her will cause the collapse of all other Churches, has any true faith at all. Why not extend the argument beyond the bounds of Christianity, and say that if Mahometanism, if Brahminism, if Buddhism be touched,—every faith will collapse at once? It is but a house of cards on this hypothesis at best. Touch Romanism and you knock down Protestantism;—touch falsehood and you dethrone truth. Why not say then,—touch Buddhism in China, and you strike at Buddhism in India; strike at Buddhism in India, and you strike at Brahminism and Mahometanism also; undermine Mahometanism in India, and you undermine it in Persia,—in Persia, and you spread unbelief to Constantinople. Let the Turks become infidels, and the Greeks will not long be Christians; with infidel Greeks, you will soon have infidel Italians, Germans, French, and English; and so your first rude touch in China will overthrow the faith of the world. If it be faith of this calibre,—the sooner it is overthrown the better.

M. Guizot has become quite a fanatic for the principle of authority. This is the root of all good, as revolution of all evil. "It is not only," he says, "in the home-government "of States that this hesitation, this inconsequence, this "feebleness of the natural guardians of order, reign; the evil "has penetrated into foreign politics: it enervates and cor- "rupts the conduct and the language of the great European "Governments in presence of the great troubles which are "bursting over Europe:—some of them,—Russia and Prus- "sia, for example,—stand still as if surprised and stupefied, "either unable or not daring to discern in such events "what is just and what unjust, natural or factitious, sound or "impracticable; and they abdicate their duty of judging and "acting, as if they had only to await and submit to the "decrees of fate:—the others—England above all—partly "perhaps hurried away, or possibly moved by foolishly inte- "rested views, give to foreign revolutions an indistinct adhe- "sion, and accept in a mass their acts of violence and their re- "forms, their usurpations and their conspiracies against the "right of nations, equally with their most legitimate demands "and enterprises." There is nothing for it, M. Guizot thinks, but a stern policy repressive of all revolutions both in Church and State. This policy he regrets that he was himself too confiding to adopt; but this he urges on all nations as essential to religion at the present crisis, when everything threatens to topple down along with the secular power of the Pope. When the Holy See is reduced to such advocacy as this, we may well trust that the end is nigh.

In truth, if the Emperor is waiting,—as we may still hope,—till the death of Pius the Ninth, together with the gradual change of opinion in France, shall excuse or even justify his withdrawal from Rome,—then no better friend of Italy has yet appeared than M. Guizot. The friends of his Papacy will read his work and almost blush to contrast his shrinking Protestant scepticism with the calm faith of such men as Passaglia and Liverani. And M. Guizot will have had the satisfaction,—not perhaps for the first time,—of giving the clearest expression to the class of arguments which are best calculated to injure his cause.

THE EFFECT OF THE NEW BANKRUPTCY ACT UPON THE *LONDON GAZETTE*.

SOME of our contemporaries appear to be rather frightened by the long list of bankrupts in the last two *London Gazettes*. They have ascribed its magnitude to the unsatisfactory state of the retail trade of the country, which is in many parts doubtless unfavourably affected by the general slackness of business and diminution of trade. But this length of the recent *Gazettes* is not due to this cause, but to one far less lamentable.

The recent Act, since the legal operation of which the two last *Gazettes* only have been issued, tends to augment the list of bankrupts in no less than four ways.

First,—It gives creditors under a bankruptcy that entire power and full control of their own affairs which before they only enjoyed under a private arrangement. Bankruptcy, moreover, is not now irrevocable. It may be superseded at the pleasure of the creditors, and the estate wound up privately, if they think fit, at any moment. This great advantage will necessarily swell the list of bankrupts.

Secondly,—It deprives private arrangements of that secrecy which before led not unfrequently to their being preferred to a bankruptcy. All arrangements which are to be binding on non-signing creditors must now be advertised in the *London Gazette*.

Thirdly.—The Bankrupt Law now includes non-traders as well as traders. It is true that the acts for which a non-trader can be made a bankrupt are not so numerous as those for which a trader can be so made; yet still a non-trader can now be made a bankrupt, which he could not before.

Fourthly,—The diminished cost of Bankruptcy proceedings will, it is to be hoped, bring within the scope of the law many little estates which before were wholly beneath its reach.

These four causes are quite sufficient to account for the augmented number of bankrupts, without any aid from the imagination that the trade of the country has upon a sudden become unsound.

AMERICA.

(FROM OUR SPECIAL AMERICAN CORRESPONDENT.)

NEW YORK, 12th October, 1861.

When I arrived from England a few days ago, after a fortnight's voyage, my knowledge of events in this country was of course a month behindhand; and as it requires pretty hard work even to keep pace with the daily current of news, it is of course still more difficult to recover a month which has been lapsed, and to sift for oneself "the wheat from the chaff," without the light usually derived from the knowledge and conversation of the hour. For so far, therefore, I am groping about, if not in the dark, at least in a dim twilight. I therefore take up my pen with considerable diffidence to give you my first impressions, and must reserve to myself liberty to modify them, if necessary, upon further knowledge hereafter.

I may here state that I do not propose to fill my letters with "news" properly so called. That is well enough supplied by the daily papers. To events of any importance I shall of course refer, but my main object will be to inquire into the probable duration of a war which so seriously affects the commerce of England,—to form, if it be possible, a definite opinion on this point, and to lay it and the considerations which lead me to it before your readers. Whatever has any perceptible bearing on this point, proximate or remote, I shall consider within my province, and also anything affecting the finances, the general trade, or the chief staples of the country; but, above all, anything touching upon the great question of cotton supply.

The first point to attract my attention on arrival was of course the military situation. The line of attack or defence is certainly sufficiently extended to satisfy the most enlarged ideas. It stretches, with intervals of greater or less importance, from Norfolk on the Atlantic, to Lexington far up the Missouri river, a range of 18 degrees of longitude, or over 1,000 miles. Now, considering the vast preponderance of men and money in the North, and the readiness with which they have been voting, the unbounded enthusiasm which has been manifested—the population rising, as we have often been told, "as one man," with a determination to make the war "short, sharp, and decisive"—it is certainly a very remarkable circumstance, that along this entire line the Federal forces have for so far failed to obtain any important advantage. On the contrary, in the three engagements at Bull Run, Springfield, and Lexington, they have been completely defeated, and their early advantages in Western Virginia have been subsequently in a great measure lost. At this very moment, indeed, they are closely pressed along the entire line, and the few intelligent men here, who are not so carried away by overweening confidence as to be unable to see things as they are, admit that the position of the Union force is exceedingly critical, both in Kentucky and Missouri. In the former, the Confederates are admitted to have a force of 40,000 to 50,000 men, with more vouring in daily, large numbers of Kentuckians flocking to join them, and Johnston, who is perhaps the best of the Confederate Generals, about to assume the command. To oppose these, it is doubted if the Unionists have 30,000 men under arms, while the contiguous free States—Ohio and Indiana—have been almost denuded of troops for the defence of Washington. Nor is the prospect much brighter in Missouri. The drill, discipline, and equipments of Fremont's army are, no doubt, superior to those of the Confederates under Price and McCullough, which are said to consist largely of marauding bands who live mainly by levying contributions from the people where ever they go. But their numbers are probably one-half greater—perhaps double—Fremont's force; they are flushed with their

successes in the action at Springfield and the siege of Lexington, and they are commanded by brave and clever tacticians, who possess the confidence of their men, although they doubtless fall very far short of European ideas of what Generals ought to be. The painful position, too, of General Fremont, against whom a number of serious complaints have just been formally lodged by his subordinate, Colonel Blair, is a bad feature. In Western Virginia there are probably about 20,000 men on either side; and while the majority of the inhabitants are doubtless loyal to the Union, it is difficult to say on which side the military preponderance lies. There only remains Eastern Virginia to examine. There the Federal army now amounts to about 160,000 men, the majority of whom are at last—under the strict command of General McClellan—pretty well disciplined, and likely to behave better in their next action than three months ago at Bull Run. It is generally supposed that the Confederate army in that section is about equally large. But on this point no authentic information can be obtained. It may be, that their numbers have been increased to 200,000 as stated by some, or perhaps, under the cover of certain mysterious movements of recent occurrence, a considerable portion of the army may have been taken away to strike a sudden and severe blow at Northern interests in Kentucky, leaving in Virginia only sufficient force to maintain a strong defensive position. Should the enforced armistice of the coming winter lead to negotiations, as has doubtless been anticipated by the Confederate leaders, it would be a most important point for them to have possession of Kentucky and Missouri, for the *status-quo* would probably be the basis of settlement, and this is no doubt one of the principal motives for the activity they are now manifesting in both of those States. In the aggregate, I estimate that the Government have about 250,000 men in the field, and perhaps 50,000 more all over the country, composed of regiments only partially made up, and as yet not half equipped or drilled. The Southern forces probably amount to 270,000 in the field, and to 80,000 home guards retained for the defence of the ports, regiments forming, &c, these being also only about half drilled or equipped. As to arms, both small and large, the Southern troops are probably still about as well off as the Northern; but the scale is now supposed to be turning against them in this respect, from the large numbers of rifles and rifled cannon being manufactured and imported for the Union army. In their Generals and subordinate officers, the Southerners have the advantage, and likewise in their patriotic devotion to their cause and contempt for the enemy. And here their preponderance ceases. Whether we look at the navy, the finances, or the reserve population (as yet but slightly drawn upon), there is no comparison whatever, so much stronger is the North in these elements. But these advantages on the Northern side are perhaps more than counterbalanced by the fact that the Southerners fight on the defensive and on their own territory, the almost unlimited extent and enormous physical difficulties of which are their surest allies.

A very important maritime expedition is now being prepared at this port and at Fortress Munroe. All the available ocean-going mercantile steamers have been chartered for it, including the Atlantic and Baltic of the extinct Collins' line, the Vanderbilt and Ocean Queen of the Vanderbilt line, and several others less known in Europe. There will also be some ships of war and gunboats, and, it is said, 25,000 men; but I doubt if the transport yet engaged will carry more than 10,000 to 15,000. The destination of this expedition is kept a profound secret; but it is probably intended to land a little army with all its *materiel* in one of the minor harbours in the neighbourhood of Charleston or Savannah, for the purpose mainly of establishing a sore place in the territory of the enemy and in the rear of his army, which would require a large force to watch it, and by so much, and by all the troops retained at other points where it may be thought by the Confederates there is danger of a landing being effected, weaken the army of Beauregard. If 10,000 to 15,000 men are shipped, it is quite probable that 30,000 may be retained at various points by the Confederates to watch them till their destination be ascertained. Some people say that it is intended to capture one of the Southern ports; but I do not think the expedition will be large enough for this. Certainly not to render a successful attempt on Charleston or New Orleans probable. Savannah or Mobile would be less difficult. It has been supposed by some that the possession of one of the Southern ports by the Northern Government would create an outlet for the cotton crop. On this point, I am sorry that I cannot afford much hope to our English manufacturers. On the contrary, I fear that the presence of the Northern troops would only the more closely seal up the crops. At present there is so *large* a margin for profit in running the blockade,—importing coffee, for instance, which would pay 300 per cent. profit, and exporting cotton at a profit of 150 per cent.,—that it is natural to suppose some of this trade will be done. But should Savannah, for example, be occupied by Union troops, they would find little there but the bare walls, and there would, probably, be no more communication between the town and country than there is at present between Washington and the plantations of Virginia. Mr Lincoln's old theory that the disturbance is a sort of riot to be quelled by a proclamation and the presence of the police, will, it is to be feared, not be confirmed by an experiment upon any Southern port.

In its financial arrangements the Government has for so far been as successful as it has been unfortunate in military matters. Old America in his counting house is doing his work a great deal better than Young America in the field. And, strange as it may appear, his heart is more in it. Of the 150,000,000 dols loan offered to the public in August in Treasury bonds, with three years to run, paying 7.30 per cent. per annum interest, the banks of New York, Philadelphia, and Boston, as every one knows, took 50,000,000 dols promptly at par, in amounts proportionate to their capital, and with the option of taking 50,000,000 dols more in October, and the final 50,000,000 dols in December. Having found the first instalment not very burdensome, they had accepted the second, and Mr Chase will be entitled to call for such sums as he requires on account, on and after the 15th instant. He is pledged to let the money lie with the banks as long as his convenience will permit, and to sell as many of the bonds as he can out of each instalment to the outside public, only calling on the banks for the differences to make up the fifty millions. The banks, too, and money-dealers all over the country are pushing sales of them in amounts from 50 dols upwards, at par. By these means, nearly 30,000,000 dols have already been disposed of to the public, the banks being thus left with only about 20,000,000 dols of the first instalment on hand; and I understand that the sale to the public is rather increasing than otherwise, and that it now amounts to considerably over a million of dollars per day or fully as much as the daily Government expenditure, which is estimated at 1,250,000 dols. At the same time, Mr Chase is now issuing Treasury notes payable *on demand* in sums of from 5 dols upwards, on account of the 50,000,000 dols of this description of paper authorised by the last Congress at its extra session. Of these, only about 6,000,000 dols have yet been issued, as it is thought desirable to proceed with caution, for fear of an undue inflation of the currency. There is, I believe, no legal incumbency on the Secretary of the Treasury as to the amount of gold which he is to retain for the purpose of meeting these notes in case of presentation, but he has assured the Committee of Bankers with whom his financial arrangements have been made, that he intends always to have on hand, at the Treasury at Washington, or the Sub-Treasury at New York, an amount equal to at least one-fourth of the issue. This currency will be a great boon to most of the Western States, where an indubitably safe paper currency is unknown, a very large proportion of the notes in circulation not being worth fifty per cent. of their nominal amounts. And they will be a vast convenience to travellers passing from one State to another, who, in the absence of a national bank, have hitherto had to change their local currency into that of the State they were entering, generally at a considerable loss in exchange. The financial scheme of the Government has for so far worked admirably,—better than its warmest supporters anticipated. There is, therefore, a growing confidence in the ability of the country to meet the enormous expenses of the war; and a strong hopeful feeling now prevails in mercantile circles, widely different, I am told, from the gloom which existed till about a month ago.

The revival of confidence has been largely stimulated by the renewed demand for breadstuffs for both England and France, particularly the latter. For the last few weeks the export business in this department has, I understand, been on an unprecedented scale; and as the ramifications of this trade extend from the seaboard even to the furthest West, the impulse it has given to business has been widely felt. And simultaneously with this, a great effect upon trade is being produced by the heavy payments which the Government is now making. The difference in the extent of business done now and three weeks ago in the large retail establishments of this city is, I am told, something marvellous; and it is now showing itself conspicuously in the wholesale and manufacturing establishments. In the war expenditure the country has found a new California, but unfortunately its produce is *paper* and not *gold*, and the day of retribution will undoubtedly come, sooner or later. Not, however, in all probability for a long time. The spendthrift has a valuable estate and good credit, and while he is squandering his money the shopkeepers of the whole country side will prosper. Those who sell for cash will do well; those only who give him credit will share in his downfall. I begin to think that, even despite the Morrill tariff, your manufacturers may yet find that there is a large trade to be done with this country. Stocks must be running low and need replenishing.

The cotton crop of the Southern States has suffered severely for the last two months from an excess of rain, and the yield will undoubtedly be cut down very far below the early estimates—how far, it is impossible to say. As yet, I cannot hear of any of the new crop having been received. Up to this date last year the receipts at all the Southern ports (known by telegraph) amounted to 402,000 bales, and the year previous to 463,000 bales. Prospects look exceedingly blank for Manchester. Any other Government in the world would, under the circumstances in which England is now placed, prohibit the export of cotton, and secure a month or two longer of employment for the people. I am a free-trader, see objection to this course, and do not *advise*

it; but I merely put the question—May not even the most fearful emergency justify the temporary setting aside of the principles of free trade, just as such emergencies have often been held to justify the suspension of *habeas corpus*—a still dearer right? If it may, then I say the occasion has now arisen; for the prospect of any supply of cotton coming from this country, or of an adequate supply from other countries, is vague, distant, and not to be relied upon.

The following notice has been issued by Governor Moore, of Louisiana, and will no doubt be acted upon and imitated in other States. It is apparent that if any quantity of cotton is to escape the blockade, it will be from the small outports, bays, and creeks, and not from the larger ports:—

"Concurring entirely in the views expressed by the cotton factors of New Orleans in the annexed communication and petition from business men here, praying that no cotton be sent to New Orleans during the existence of the blockade, I have determined to take the most decided means to prevent the landing of any cotton in this city. Notice is therefore hereby given to all masters and owners of steamboats and other water craft, that from and after the 10th of October, no cotton must be brought to New Orleans, or within the lines embracing that section of the country between Carlton, and those below the city and extending back to the Lake. All steamboats or other watercraft arriving within the prescribed limits will be forthwith placed in charge of an armed force, and escorted above the point indicated. This course will be adopted in all cases, whether the quantity of cotton brought be large or small. The railroad companies have already issued orders in furtherance of the object of this proclamation, and no violation of them will be permitted. (Signed)

"Thomas O. Moore, Governor of Louisiana."

To this the General in command adds the following:—

"I shall co-operate with Governor Moore in the enforcement of the above order. (Signed) D. E. Twiggs,

"Major-General Commanding."

An important legal decision with regard to the blockade has just been given by Judge Ware, in the case of the William Arthur. This vessel was seized in August last, as she was leaving Portland, Maine, having cleared for St Thomas's, but in fact bound for Wilmington, North Carolina, with the intention of running the blockade. The Judge, regarding the allegation as proved, condemns the vessel and cargo, delivering the following extraordinary opinion:—

"A blockade, as that word is understood by the law of nations, is an investment of a town of one belligerent by the forces of another.

"Every nation of common rights may declare what shall be ports of entry and delivery, and participate in trade by law, and enforce those laws by such *means* and *penalties* as she pleases. If she places armed ships before them, this does not constitute a blockade, as understood by public law; but is a mere municipal regulation, though familiarly called a blockade.

"A neutral, or neutrality, always implies three parties, two belligerents, and a third, a common friend, all acknowledged as independent nations But in a civil war there is only one party. Insurgents are not acknowledged as a nation, but to foreigners they are mere malefactors.

"The laws of the United States of July 13th, and August 6th, 1861, are purely municipal regulations, with which foreigners have no concern.

"Where an intent is charged in a statute as constituting part of a crime, it must be proved as a fact.

"The words *aid, abet, and promote*, used in the law of August 6, 1861, are words of uncertain meaning as to their intent, and in this law are to be taken in their largest extent.

"These cases are stated with sufficient clearness to be understood in the opinion of the Court. They were urged by Talbot, District Attorney, on the part of the United States, and G. F. Shepley for the claimants."

It appears, then, that there is no blockade after all,—only a "municipal regulation." But query—Can a neutral ship and cargo be seized and confiscated for entering or attempting to enter a harbour in contravention of a "municipal regulation," of the existence of which the owners may know nothing? A blockade under a state of war is supposed by the law of nations to be known everywhere, but is it so with municipal regulations?

The Morrill tariff does not work well for the revenue. When adopted, it was expected to produce 60 millions of dollars per annum. Owing to the war, Mr Chase reduced the estimate to 30 millions. It is found to produce only 20 millions.

Agriculture.

AGRICULTURAL MEETINGS.

THEIR INDICATIONS AND DISCLOSURES.

For some years past most of the local—so-called—agricultural meetings have been chiefly remarkable for the omission or the crying down of all real and serious discussions of agricultural topics at such gatherings. A nobleman or gentleman, of large acreage, after stating he knows nothing of practical agriculture, may perhaps deign to congratulate the meeting upon a good, though small, show of stock, or may compliment the farmers of the district on the progress in husbandry they have, could, should, or might have made, and then dropping the subject, as if it might burn or soil his fingers, he prances off upon the latest phantasm which has haunted the minds of "rose-water" politicians, thankful, no doubt, to have escaped any blunt or vulgar observation from farmers about game damage, want of security, or other rural grievances.

Formerly the great men attended these local agricultural meetings, indeed they were for the most part got up, with a purpose, a one bad it is true, but still a purpose; *i.e.*, to defend "protection" against the assaults of the Free-traders. That object having ceased to exist, and there being usually men in the districts who desire to keep up the societies for genuine agricultural purposes, the problem with the magnates seems to be, how to escape any real expression of the wants and wishes of the genuine agriculturists. And it requires some hardihood, or a favourable personal standing with the landed magnates present to break through the fences they draw around the subdued agricultural mind. Yet opportunities have been seized or made for utterances of much useful import at several of the local agricultural meetings of the present autumn. Foremost stands that of Wolverhampton. There Mr Weguelin, the recently elected member for the borough, exhibited a hardy, perhaps desperate courage in his effort to grapple with a somewhat silly, though unquestionably mischievous speech made on a previous occasion by Mr Newdegate, who advocated a sort of patriarchal despotism for the management of tenant-farmers. We farmers well know what that means. We have long learned that such twaddle means yearly tenancies, no improvement, game preserves, and the like. Mr Weguelin, however, being a commercial man and a capitalist, and having probably more acquaintance with sound economical principles affecting landed property than with the practical management—or mismanagement—to which it is commonly subject in England, laid his lance in rest and charged, by name, Mr Newdegate's figment. The result was an uproar at the high table, and valuable as were Mr Weguelin's remarks, he has not since been supported by the press, especially the agricultural press, as he ought to have been. Perhaps he was too abstract. Adopting the large views of his predecessor in the representation of Wolverhampton, the present Lord Chancellor, Lord Westbury, he seems to have supposed that an agricultural meeting presented a good opportunity for advocating amendments in the law of real property; amendments which would be alike beneficial to the owners and occupiers of land. There could be no greater mistake. It is only by attacking in detail the ills under which the landlords and tenants of England labour, that there is the least hope of being heard at agricultural meetings when the landowners are present. The farmers must be enlisted in favour of the speaker, and amendment in the law of real property is perhaps too large and general a topic to arouse their sympathies. At all events, such general views must be offered by a landowner to be accepted.

Mr Weguelin belongs to a class which of all others the landowners most dread. Conscious that, under the burdens of settlements and mortgages and mismanagement, the land is slipping from their own grasp, they are animated with sentiments of jealousy towards the great commercial and manufacturing capitalists, who so often become the purchasers of estates which the landowners can no longer retain. Hence, remarks from a capitalist, and a representative of capitalists and manufacturers, like Mr Weguelin, on increasing facilities for the transfer of land, were sure to be received by landed magnates with high displeasure. They regarded such remarks as insult added to injury, and bellowed accordingly.

Now, at the meeting of the South Staffordshire Agricultural Society, held at Wolverhampton, after the President Lord Dartmouth, Lord Shrewsbury, and others, had indulged in the usual fanfaronade about volunteers, iron ships, and the Emperor of the French—matters wholly foreign to agricultural meetings,—Mr Weguelin attempted to say something adapted to the business of the day. It seems he was suspected of being in earnest, for no sooner had he attempted to speak than the Lords and Squires who had for hours been talking nothing but politics—and to any rational man most offensive and absurd politics—assailed him with cries of "no politics," "silence," and the like. At last, however, Mr Weguelin, referring to Mr Newdegate's praises of the principle of "family," said "he was not there to combat it, but to say that that principle when carried to excess led to the accumulation of land in large estates, which remained in the hands of few." This was a simple and very obvious truism, but it produced such an uproar amongst the Tory landowners of South Staffordshire as is seldom heard at public meetings in this country. After a time Mr Weguelin contrived to add, "that there was a counteracting principle in all classes, and especially in the commercial class, to counterbalance any inconvenience likely to arise from the 'family principle' being carried to excess." He then said "that the promise from the throne last session for an act to facilitate the transfer of land had gone to that limbo where all things lost on earth are treasured. He was desirous that such a measure should be carried—a measure of social and political progress, in which all parties might have been expected to agree." Here a torrent of "hisses" and "groans" is said to have rendered the speaker for some time inaudible. And he finally filled the full measure of his offences in eyes aristocratic

by saying he liked to see the "stately homes" of England "accompanied by the cottage homes of England. He should, therefore, rejoice in promoting any measure to increase the number, the comfort, and the perpetuity of the abodes of the humbler classes in England." Beyond this not another word was Mr Weguelin allowed to utter.

It is a rural proverb that "one man may steal a horse with more impunity than another can look over the hedge," and something of this sort seems to have attended Mr Weguelin's effort to bring the advantages of facilitating the transfer of land under the notice of a meeting of landowners and their tenants. The object he had in view is approved by all our most eminent statesmen, lawyers, and economists, but such men appear to have had no representatives at the South Staffordshire dinner.

Yet so long ago as May, 1853, Mr Fisher Hobbs, a well-known and intelligent agriculturist—himself a landowner and we believe a Conservative in politics—read to the London Farmers' Club a paper on "the many difficulties which oppose the transfer of land, and the improvements which would result from facilitating the process." And the spirit in which he proceeded towards the landowners may be seen from the following passage:—"If in discussing this question I may happen at all to direct my observations against the present position of landowners, it must be understood that I speak with no bias against the English country gentlemen, *but rather on the conviction that an alteration is required, which would work as much to their benefit as it would to that of their tenantry and the country at large.*" He then said: "It seems only consistent that if we are to have free trade in the produce, we should have it in the land itself. To the farmer the land is simply the raw material, and it is only common justice that he should be able to procure it on the easiest and most advantageous terms. This can never be accomplished without a strong demonstration on the part of the agricultural body. In other countries, such as France, Belgium, and Prussia, land is almost as marketable a commodity as stock in the funds; its disposal is simple and economical. With us, on the other hand, we are told it takes occasionally months and even years to effect a transfer." Then, after referring to numerous authorities in favour of the amelioration he advocated, including a recommendation by a Committee of the House of Lords in 1846 for "the improvement of the law of real property, the simplification of titles and of forms of conveyance, and the establishment of some effective system for the registration of deeds," Mr Hobbs proposed these resolutions:—

"1. That the difficulties attending the transfer of land have generally become so many and embarrassing as to demand the serious attention of the Legislature with a view to remove them.

"2. That the effect of these difficulties is in the highest degree injurious,—to the *owners* of land, who, encumbered with them, can seldom make the most of their property; to the *cultivators* of it, who are thus often denied that aid and encouragement in the way of permanent improvement—such as buildings and draining—that should properly come from the landlord; and to the public at large, who are consequently deprived of those opportunities for investment and the advantages of increased production they would otherwise enjoy.

"3. That the first and most direct means for removing these difficulties would be the improvement of the law of real property, the simplification of titles and forms of conveyance, together with the establishment of some effective system for the registration of deeds."

And the resolutions, the last of which is a transcript of the recommendations of the Lords' Committee, was adopted by the Club. Here we have the same thing said by Mr Fisher Hobbs, at the Central Farmers' Club, which, when attempted to be said by Mr Weguelin at the South Staffordshire Agricultural Society, produced such an explosion of after-dinner fury. Would it not be charitable to suppose that Mr Weguelin attempted to talk common sense too late in the evening?—that the wit had been displaced by the wine? At all events we can appeal to the remarks of numerous other landowners, made at other agricultural meetings held during the present autumn, for more rational and sober views in reference to the present position and the means of improving landed property. From the landowning Phillips of South Staffordshire, whether drunk with wine or prejudice, we shall next week appeal to landowners of sense and sobriety.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The Bank of France has not made any change in its rate of discount, though its Directors have held more than one meeting to deliberate on the matter. It cannot be assumed from this that the pressure on the Bank has declined, or that its general position has been less serious; for the Government does not always allow the Directors to act in accordance with sound economic principles, or with the requirements of the situation. But, though the Bank is not virtually free, the Government is said to be preparing a plan to subject it to more direct and more complete control—to make it, in fact, little better than a dependency on the Treasury.

Whilst the Bank keeps for the moment its discount unaltered, the Treasury has decided that a new augmentation (one was made on the 7th) in the interest on Treasury bills shall be made from yesterday; the rates established being 4 per cent. for bills of from three to five months, 4½ per cent. for those of from six to eleven months, and 5 for those of a year.

The embarrassed situation of the Bank of France has given rise to many propositions, and among them to one by a writer in the *Presse*, that the great financial establishment shall allow interest on deposits. He affirms that if interest were paid, almost all the sums that are now kept idle by private individuals, notaries, *avoués*, trades, &c., would be deposited in the Bank, and that the result would be advantageous alike to the Bank, to depositors, and the public. In support of his views he quotes a high authority,—that of the Right Hon. James Wilson, who, in his "Capital, Currency, and Banking," spoke favourably of that system as practised by the Scotch banks. But he omits to mention that the payment of interest on deposits is already adopted by certain establishments in Paris,—the Credit Industriel, the Credit Mobilier, &c.,—and that, from the supineness and want of intelligence of the public, it has thus far obtained small success. The truth is, that banking in France is at present in its infancy, and that it consequently has vast progress to make before it attains the Scotch and English level. Another proposition made is in an article by M. J. E. Horn in the *Journal des Debats*, and is to the effect that the Russian Government and the Bank of France shall come to an arrangement, by which the former shall supply France with 100,000,000f worth of grain, and that the latter shall pay the sum in *Russian* coin to be made in France. The writer urges that Russia is in want of small silver coin, and that it could be made for her cheaper in France than at home; whilst as it could only be produced gradually in a space not less than a year, the Bank would be able to provide the funds by instalments, which would be a great relief to it. He says, moreover, that whilst French 5f pieces sent to Russia are soon drained away, Russian coin, being of less than the nominal value, would remain in the country; and he thinks this an additional reason in favour of his proposition.

A decree in the *Moniteur* removes a grievance of which French shipowners have for some time past been rather loudly complaining, and destroys an advantage which foreign shipowners would have been glad to continue to enjoy. "Considering," says the decree, "that it is important as regards the surtaxes on navigation to place sugar imported from the French colonies of the Ile de la Reunion, Martinique, and Guadeloupe by foreign vessels in the same conditions as those reserved to foreign sugar by the decree of the 24th June last, and to Belgian sugar by the treaty of 1st of May,—it is decreed that sugar imported from the Ile de la Reunion, Martinique, and Guadeloupe by foreign vessels shall be, in conformity with the stipulations of article 6 of the law of the 3rd July, 1861, subjected if from the former island to a surtax of 30f a ton, and if from the two latter of 20f,—*decime* included."

In one of the journals of Brittany I read that the dock yards of Brest and L'Orient now obtain from the interior of the country, instead of from England, the supplies of coal needed for the screw vessels of the Imperial navy; and that, consequently, "French eyes are no longer saddened by seeing the colours of Albion floating in those ports from coal-laden vessels." If this be true, it is a fact not without importance to English exporters, as hitherto the belief in France has been that French coal was in no respect suitable for steam vessels. The journal referred to affirms that Count de Las Cases has obtained a contract for conveying from Nantes to the two ports in question the large quantity of 21,000 tons of coal annually.

In an economic point of view, France is, in many respects, a strange country. Saying nothing of her having maintained prohibitions and prohibitive tariffs long after such things had been abolished almost everywhere else, she has still in force a set of municipal regulations of the most extraordinary character,—such as those which require a "granary of abundance" to be kept up in Paris and other large towns, and others which, according to M. Cochut, an excellent authority, "render stationary the baking trade, so that it is not possible for that trade to modify its manner of making and selling bread," &c., &c. These municipal regulations have led to a singular incident in the town of Laval, department of the Mayenne. Some time back two traders of that place imported a quantity of American flour, and they sold it to the bakers, who made bread of it. But the mayor of the town, a M. Toutain by name, conceived in his wise head the notion that American flour was unwholesome, and he prohibited the dealers from selling any more of it until it could be examined by chemists. An examination having been made by scientific men, they reported that not only was American flour wholesome, but that it was even more nutritious than that of France. But until their report was presented,—and before it was ready, weeks of course elapsed,—the dealers were unable to make any sale! From this it follows that a foolish mayor may prevent the sale of an article of general consumption at the very time at which the public has the greatest need thereof; and that his prohibition may, consequently, create dearness, and lead to the utter ruin of respectable merchants who endeavour to supply a public want at an opportune moment.

A telegraphic despatch from Turin, announcing that the Italian

Government has consented to grant delay in the payment by French subscribers to its last loan, has caused a good impression on the market. This loan, which last Thursday was at 68f 85c, is to-day at 69f 45c. What the Italian Government has decided is, that the two-fifths which fall due on the 1st November shall be paid in four instalments, the 1st November, the 1st December, the 1st January, and the 1st February.

Subjoined is an account of the markets:—

FLOUR.—At *Paris*, yesterday, the quotation was 84f to 90f the sack of 159 kilogs. The last price of the four marks was 87f for the current month, and 87f 75c for November and December.

WHEAT.—Business at *Paris*, yesterday, was not active. Centre and Burgundy qualities were 44f to 46f 50c the sack of 120 kilogs. Old wheat of different parts of the country was offered at 40f to 42f, but not taken. English was 48f 50c and 49f; Dantzic, 47f 50c and 48f; Hungary was offered at 44f; American was taken at 41f and 42f. As to the provincial markets, 29 present a rise of from 11c to 1f 50c the hectolitre, 38 a fall of from 12c to 1f 70c, 15 are reported firm, 44 without variation, 13 calm.

COTTON.—At *Havre*, in the week ending Friday, the demand was regular, and prices rose. The sales were 12,361 bales, and the arrivals 2,125. The closing prices were 3f higher for the very low qualities; 2f to 4f for low; 3f to 4f for very ordinary; 3f for ordinary; and 2f to 3f for other sorts. Consequently, very low New Orleans was at 132f the 50 kilogs; low ditto, 142f; and very ordinary ditto, 147f. The stock, on Friday, was 165,750 bales, against 140,000 at the same date in 1860, and 48,950 in 1859. This week, business has been very animated, and prices have increased considerably. The very low went yesterday at 139f, and low 149f to 150f.

COFFEE.—At *Havre*, in the week ending Friday, the sales were 483 sacks Hayti Port-au-Prince, disposable, at 83f 50c to 84f the 50 kilogs, in bond; 1,000 ditto for delivery, 82f 50c; 400 Cape, 86f; 1,100 Rio not washed, for delivery, 73f to 73f 50c. By auction, 436 Hayti damaged were disposed of; also some Porto Cabello sound, 79f to 80f. The arrivals were above 280 sacks. This week, Rio not washed has been at 70f; Macassar, 109f to 109f 50c; Gonaives, 86f; Laguayra at prices kept secret. At *Nantes*, last week, no sales were made. This week, no business. At *Bordeaux*, last week, no business done. This week, Rio washed has been at 100f to 102f 50c; Rio, not washed, 79f 25c. At *Marseilles*, last week, 200 bales Mocha went at 107f; 120 casks Santiago, 100f; 1,500 sacks Rio, 65f to 76f. By auction, 585 Rio damaged were disposed of. This week, no business.

SUGAR.—At *Havre*, in the week ending Friday, business was regular, and prices firm. 310 casks French West India disposable went at 46f the 50 kilogs, duty paid; 50 ditto "usine," 58f; 684 Trinidad and Porto Rico, 45f 75c to 46f; 400 Havana, 34f 50c to 35f, in bond; 200 Bahia, 30f 50c. The arrivals were about 5,000 casks. This week, business has been almost null, and consisted only in the sale by auction of some lots of Havana damaged. At *Nantes*, last week, business was considerable; however, prices remained calm. 167 sacks Reunion, 42f; 17,165 ditto, 49f 25c; 2,357 ditto, 48f 50c; 2,194 ditto, gros grain, 52f 50c; 2,200 casks Havana, 51f; 693 French West India, 45f 75c to 46f; 130 ditto, 48f. This week, Reunion was at 53f. At *Bordeaux*, last week, the sales were 2,200 bales Reunion at 50f; 510 casks French West India, 47f; 72 ditto, for delivery, 46f 75c; 454 Santiago, 46f to 46f 50c; 692 Havana, 35f. This week, Santiago has been at 48f 50c. At *Marseilles*,

last week, business was almost insignificant, and consisted only in the sale of 100 casks French West India.

INDIGO.—At *Havre*, last week, business null. The arrivals consisted only of 10 chests. This week, no business. At *Bordeaux*, last week, the sales were 48 chests Kurpah, 6 chests Madras, 28 chests Bengal; these latter sold at 3f 75c above the established prices. This week, no business.

HIDES.—At *Havre*, in the week ending Friday, business was active, and prices improved. The sales were 3,900 La Plata dry at 105f to 112f the 50 kilogs; 3,500 ditto, salted Saladeros, 70f to 73f; 300 Rio Grande, salted, 70f; 5,000 Rio Janeiro salted, old, 48f; 1,900 ditto, 50f; 1,000 Para, salted, 53f 75c; 250 Valparaiso ditto, 61f for cow, and 65f for ox; 2,414 South Sea salted, damaged, 42f 50c; 1,800 New York salted, 48f 75c. By auction, 120 Maracaibo drysalted, damaged, were disposed of. Sales were also made of 320 La Plata horse, salted, at 83f 50c to 84f the 100 kilogs; 250 ditto, dry, 5f 37½c to 6f each; 4 bales calf Buenos Ayres damaged were also disposed of. The arrivals were above 28,000. This week, La Plata horse has been at 90f to 100f. Yesterday, the stock was 60,248 dry La Plata; 79,828 salted ditto; Rio Grande, 165 dry; ditto, 31,205 salted; 13,312 dry horse La Plata; 22,933 salted Monte Video; and 75,881 drysalted Monte Video.

WOOL.—At *Havre*, in the week ending Friday, business was not very active. The sales were 24 bales Buenos Ayres, not washed, at 1f 55c to 2f 12½c the kilog; 10 ditto *pelade*, 1f 30c; 5 Donskoy, 2f 3c; 4 Buenos Ayres sheepskin, not washed, 1f 22c. By auction, 31 Buenos Ayres, 58 Cape, 4 Russia washed, 86 ditto not washed, 1 Buenos Ayres sheepskin, the whole damaged, were also disposed of; as were likewise 8 bales Buenos Ayres sound, at 1f 23c. The arrivals were 1,128 bales in wool, and 307 bales in sheepskins. This week, 547 bales La Plata have been sold by auction at 1f to 2f 80c.

TALLOW.—At *Havre*, last week, there was a demand, and prices increased. 60 casks New York, disposable, went at 62f to 62f 25c the 50 kilogs; a small lot at 63f; 9 Buenos Ayres, 61f; 100 Australia, at prices kept secret. The arrivals were 694 casks. This week, no business. At *Paris*, yesterday, the 100 kilogs were at 126f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was at 87f the hectolitre; *Montpelier*, disposable, of 86 deg., 110f. At *Bordeaux*, the day before yesterday, Languedoc was at 110f; and beetroot, first quality, at 94f.

Correspondence.

FOOD RESOURCES OF THE CONFEDERATE STATES OF AMERICA.

TO THE EDITOR OF THE ECONOMIST.

SIR,—So much has been said about starving out the South, that persons uninformed as to the relative resources of the Northern and Southern States are led into the erroneous belief that the project is feasible. A glance at facts and figures will show its utter absurdity.

The little State of South Carolina produces five-sixths of the rice crop of America, and more wheat than all the New England States together. She produces as much Indian corn as New York and more than all the New England States.

In 1860, South Carolina's production of corn was 20,000,000 bushels. Her potatoes, bean and pea crops are very large, usually exceeding by 1,000,000 bushels that of Maine. According to the latest statistics, South Carolina further produces more peas and beans by 180,000 bushels than all the Northern States together, New York alone excepted,—more beef cattle than Pennsylvania by 1,740, and almost as many as all the New England States together,—more sheep than Iowa and Wisconsin by 10,699,—more hogs than New York by 17,254, more hogs than Pennsylvania by 25,137, and 86,000 more than all the New England States, and New Jersey, Michigan, and Wisconsin together. She produces 10,000 more horses and mules than Maine, New Hampshire, Massachusetts, and Rhode Island together.

So much for the food resources of South Carolina alone.

According to the last Census (the returns of which, although for several months in the possession of the Government at Washington, are withheld from the public), Virginia and North Carolina together produce 241,000 bushels of wheat more than the great wheat-growing State of New York. Virginia, North Carolina, and Tennessee produce 115,471,593 bushels of wheat, a quantity exceeding by 300,000 bushels the aggregate production of New York, Pennsylvania, Ohio, New Jersey, Connecticut, Massachusetts, New Hampshire, Vermont, and Maine. Tennessee alone produces 16,506 more hogs than all the six New England States, along with New York, Pennsylvania, New Jersey, Iowa, and Michigan; for that State (Tennessee) produces 3,104,010 hogs, while the eleven above-mentioned Northern States produce but 3,087,504.

Many people have supposed that the North was the great hog-producing section of the States, but such is *not* the fact. The whole number of hogs produced in 1850 was 30,316,608, of which the slave-holding States furnished 20,770,730, *or more than two-thirds of the entire swine production.*

Another equally remarkable fact is, that the cotton States produced in 1850 more beef cattle than the six New England States, New York, Pennsylvania, Ohio, New Jersey, Indiana, Michigan, and Wisconsin together.

Lastly, in 1860, all the slave-holding States produced 1,782,887 more beef cattle than all the non-slave-holding States, and 260,000 more horses and mules.

The foregoing facts and figures should materially modify the erroneous impression which too generally prevails as to the food resources of the Confederate States.—I am, Sir,

A PERSON WELL ACQUAINTED WITH THE CONFEDERATE STATES.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade and Plantations have received from the Secretary of State for Foreign Affairs a copy of a Portuguese Decree authorising, until the end of next April, the importation of wheat, rye, barley, and oats, at the same duty as national grain when cleared for consumption. The same Decree further states that after expiration of the prescribed time the grain referred to may be still admitted, provided it be shown to the satisfaction of the Government that such grain left direct for the ports of the Kingdom with the reasonable expectation of arriving within the period in question.

The commercial letters from Calcutta report very favourably on the prospects of the revenue and the general condition of the country. The rains and floods in Bengal had been beyond any experience since 1838, when similar events followed the famine of 1836 and 1837; but it was thought their beneficial effects upon the crops of the next season will more than compensate for any present damage.

The following commercial news is dated Bombay, Sept. 26:—Our import market still continues active, and prices for many staple articles are slowly but steadily advancing, and, as the busy season advances, prices are likely still further to improve. Piece Goods—Throughout the fortnight the demand for this staple has been very active, and a large business has been done at rates slightly in advance of those of the previous fortnight. Transactions, however, are very much circumscribed by the firm attitude of holders, who are now apparently very averse to sell anything that will not cover cost. Exports—In cotton very little business has been done since the date of our last report, since the arrival of the English mail reporting an advance in this staple at Liverpool. A few transactions took place at advanced prices.

The annexed commercial news is dated Quebec, Oct. 11:—During the past fortnight there has been an active demand for square white pine, and large sales have been made at full prices. 80 to 90 feet of good quality had fetched 9½d per foot measured off. Smaller averages 55 to 65 feet have sold readily at 6½d to 7½d per foot. A few sales of Waney have been made at 9d to 10½d; the stock of the latter is heavy, but a large proportion of it would not pass as board wood. Common wood is very scarce. Red pine has sold freely at about 10d per foot for 40 to 45 feet average. Elm—We have a fair stock of large wood, which sells at 12d to 13d; but small is very scarce. Oak of prime quality 16 in. and up has been sold at 19d in shipping order. Birch very dull. Staves—Some 2½-inch pipe fetched 47*l* 10s; W.I. pun, 13*l*. The stock will be light. Deals—Bright are plentiful, but sales are not forced. Really good specifications are held at 15*l*. Coals—Considerable sales at 17s 6d to 21s 3d per chaldron. Salt—Arrivals light: bag is worth 50c. Exchange has fallen 1½ per cent. 90 days, 6 per cent.

In regard to the Louisiana sugar crop, the *Cincinnati Enquirer* says:—"From all sections of the South where the sugar cane is grown, the reports for a large crop never in the history of the country promised a more abundant yield. One sugar planter writes that never since he became a grower of the cane, now thirty-five years, has there been anything like the prospect now opening. The largest crop ever grown was in 1853, when it reached 449,324 hhds; the yield subsequently fell off, through the effects of drought and frost, until 1856, when the crop was only 73,976 hhds; in 1859 it was 221,840 hhds, and last year it reached 228,753 hhds. The promise for the ensuing year is said to be about 600,000 hhds."

Advices from Pernambuco are to the 30th ult. The following commercial news is to that date:—Sugar—The sugars belonging to the new crop (commencing Oct. 1) are already coming forward freely, and the prospects of a large supply are very favourable both in this and the neighbouring provinces. Prices of new (unclayed) browns, usually shipped to the Channel for orders, have been opened at 1.940 to 2.000 per arroba; but the receipts of yellow descriptions, suitable for the French market, have been on a more limited scale. Stocks are already accumulating in the stores, as only few vessels are in port waiting cargoes. The entries since the sailing of the Oneida have been 1,228 tons. Cotton—Entries for the fortnight have been 981 bags, which were purchased at 9.800 per arroba for fine, and 9.600 per ditto for regular quality. Paraiba and Maceio cotton—Former sold at 10.500 and 10.400 per arroba, and latter at 10.200 per ditto f.o.b. Hides—Price of drysalted at 175 reis per lb; shipments to Liverpool have been 1,000.

The culture of the tobacco plant in the flourishing State of California, we learn, has been attended with entire success. Both on the Mokelumne and in Los Angeles County, where the experiment has been made, says a San Francisco contemporary, the result has been satisfactory, and agriculturists in those regions design extending the cultivation of this crop, which, they say, can be done more successful than in the most favoured localities on the Atlantic side. The plant grows thrifty, is not infested with the worm, and has apparently fewer drawbacks here, where the soil is properly chosen, than in Virginia itself. The present is considered a very favourable moment for prosecuting the enterprise, while the production in those States which have hitherto been the great source of supply is largely curtailed, and their stocks shut off from the markets of the world. It is stated that this has been an excellent season in Connecticut for tobacco, and that the crop will amount to more than a million dollars in Hartford county alone.

During September the total exports of coal from all the ports in the United Kingdom amounted to 601,211 tons, being a decrease, compared with the same period last year, of 56,170 tons. The decrease is represented thus:—Northern ports, 60,920 tons; Yorkshire ports, 3,843; and Severn ports, 21,157 tons. From Liverpool there was an increase of 16,309 tons as compared with the corresponding period of last year, and from the Scotch ports an increase of 12,941 tons.

An account of the importations and exportations of bullion and specie registered in the week ended 23rd October, 1861:—

COTTON.

New York, Oct. 9.—On Saturday and Monday the market was dull and heavy, but on the receipt of the more favourable advices from the Liverpool market yesterday, the market was buoyant and somewhat excited, while better prices were realised. The sales since our last comprise 3,300 bales, nearly all yesterday, the market closing firm, and with an upward tendency.

The arrivals have been from Liverpool, 1,211 bales; New Orleans, 140; Baltimore, 1; Providence, 129—total, 1,481 bales. Total import since 1st inst., 1,699 bales. Total import since 1st September, 5,941 bales. Export from 1st to 8th October, none; against 3,191 in 1860.

New York, Oct. 12.—The market maintains the firmness previously mentioned, and, with a moderate demand, full prices have been realised. The sales aggregate 3,500 bales, of which 1,000 were for export. We quote:—

New York Classification.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	18	18	18	18
Good ordinary	19¼	19¼	19¼	19½
Middling	21¼	21¾	21¾	22
Good middling	22	22¼	22½	23
Middling fair	...	...	...	...

The arrivals have been from Liverpool, 903 bales; Providence, 4 bales; by railroad since 1st September, 15 bales—total, 922 bales. Total import since 1st inst., 2,621 bales; total import since 1st September, 6,833 bales. Export of cotton from 1st to 8th October, 1861, none, against 3,121 bales in 1860.

MARKETS IN THE MANUFACTURING DISTRICTS.

Owing to the continuous upward movement in the value of the raw material, cotton goods have further advanced in price this week; but the amount of business doing has been by no means extensive. All other articles have sold slowly, at about previous rates. Iron has changed hands to a fair extent, and coals have commanded rather more money.

Manchester, Oct. 24.—Yarns have this week nominally risen about 1d per lb on the average, but little business has been done either for manufacture or export. A considerable, almost large business has been done in printing cloths, which had hitherto not been so much affected by the speculative movement as either shirtings or yarns; but now printers find that if their works are to be kept even partially employed for their spring demand, they must secure some reliable makes in time. Stocks have accordingly been reduced, and prices raised about 6d per piece. Shirtings and other plain goods have continued to rise about 3d per piece, and speculation has still not been entirely withdrawn from them; but few sellers name prices at which to sell, since at to-day's value of cotton they would cost the producer, as a rule, about 1s 5d per lb, or about 5d per lb more than the bulk of the heavy stocks now held in India cost the merchant. In these circumstances, notices for the closing of mills have increased in number, and some few spinners have been returning their surplus cotton to Liverpool for resale.

Bradford.—Wool—There is a very slow and dragging trade doing, and no animation shown in any branch. Prices of good wools remain tolerably firm, but there is generally a little more willingness to sell. Down wools must be again quoted as exceedingly flat. Every kind of yarn is reported as very quiet. The

Russian trade—at no period this year very brisk—is now nearly closing for the season, and we hear of spinning frames being stopped. Prices of worsted yarns remain without alteration. Cotton warps are rapidly rising in price. Pieces—We have had a quieter market, notwithstanding the presence of several continental buyers. The orders given out have been mostly for new styles of fancy mohair and yarn dyed.

LEEDS.—Sales are confined chiefly to small parcels of winter goods and a few ordinary broadcloths. Wools remain without any material alteration in price, but the demands made upon the local brokers are only of a hand-to-mouth character.

ROCHDALE.—Sales of both flannels and Yorkshire goods, as also those of wool, have been comparatively small, and the market has been a dull one.

LEICESTER.—There is no material change in the state of trade; the demand for useful articles continues tolerably good, and the business doing at the warehouses is steady. In the country districts there is a fair business doing in some branches. Wools are not materially changed in price, but are little less firm. Yarns are realising high prices, and the market continues firm, spinners being well employed.

NOTTINGHAM.—Most branches of the lace trade continue extremely dull. The demand for cotton goods is very quiet, there being a few small orders for plain stiffs and "whip," and plain Mechlins in the market. The cotton fancy trade remains quiet. In the silk branch there is no material change to report. Black silk laces are selling, and will in all probability continue in request for some time. There is very little stock on hand of any description of goods. In hosiery there is a fair business doing for the home market. There are also a few shipping orders in. Yarns are advancing in price, and manufacturers are unwilling to place orders, except on terms in proportion to the advance of the raw material.

HUDDERSFIELD.—A few low-priced woollens and unions have been sold out at lower rates, but the general demand for these descriptions has not improved since our last report. The supply of regular market goods of all kinds is still in excess of the demand; and should the present depression continue, a further resort to short time must be the consequence. There is a slight improvement in the country trade.

BELFAST.—The Linen Trade—There has been a steady turn-out of goods from the bleachfields. This large addition to the stocks already in the warehouses makes the aggregate of finished linens very considerable. Exports from this harbour continue to average about 5,000,000 yards each month. A great proportion of this month's transactions has been on continental account. There is more doing in the home market, principally in medium goods.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 9.—The market for State and Western flour remained buoyant on Saturday, when the demand was active, and the transactions heavy, at a slight advance upon our previous quotations. The week opened under less favourable circumstances, however, and, with a considerable abatement in the export demand, prices receded 5c to 10c per bbl, closing with still a downward tendency. The sales for the three days comprise 55,000 bbls, including 12,500 yesterday. Canada flour was also in better request, and better prices were realised until yesterday, when the market ruled dull at our previous quotations. Southern flour is steady, with a fair demand at previous quotations; the sales for the three days comprise 5,050 bbls.

EXPORT from 1st to 8th October.

	1861. barrels	1860. barrels
Wheat Flour	71,918	68,039

The demand for wheat for export continued very active on Saturday and Monday, when full prices were realised, and the transactions were heavy. The European advices were of an adverse tenour, and exerted an unfavourable influence on 'Change, causing a decline of about 2c per bushel. The sales for the three days comprise 775,000 bushels, of which about 150,000 changed owners yesterday, including 28,000 Milwaukee Club, at 1.21 dol to 1.23 dol; 27,600 amber Iowa, 1.23 dol to 1.24 dol; 10,800 white Kentucky, 1.42 dol to 1.44 dol; 18,200 white Western, 1.36 dol to 1.39 dol; 33,000 winter red Western, 1.28 dol to 1.34 dol; 13,600 Chicago Spring, 1.14 dol to 1.19 dol; and 18,100 red State, 1.30 dol to 1.33 dol, the market at the close being heavy and unsettled. With an active demand the market for corn was very buoyant on Saturday and Monday, when better prices were obtained, but the market subsequently reacted and the advance was lost; the sales comprise 527,000 bushels, including 143,000 yesterday, closing quiet at our previous quotations.

EXPORT from 1st to 8th October.

	1861. bushels	1860. bushels
Wheat	330,550	591 062
Corn	310,253	14,740

NEW YORK, Oct. 12.—The flour market was heavy, and State and Western common and medium grades closed at a decline of 5c to 10c per barrel. Canadian flour was dull and heavy. Southern flour was scarce, and prices were steady. Wheat was irregular, especially for common qualities. Prime white was steady and in good milling demand. Corn was rather easier, though in fair demand, with sales for the day of 145,000 bushels.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1861.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the leading markets held this week have been but moderately supplied with home-grown wheat, in which a fair average business has been transacted, at a further advance in quotations of from 1s to 2s per quarter, and at which good clearances have been effected. Foreign wheat, the arrivals of which have not increased, has moved off steadily, and prices have had an upward tendency. No quotable change has taken place in the value of barley, but the inquiry for most kinds has become rather more extensive. The malt trade has continued inactive, at late currencies. Oats have moved off steadily, at very full prices, whilst both beans and peas have realised 1s advance. Flour has sold readily on rather higher terms.

Advices from France state that wheat and flour have commanded rather more attention, at very full prices. On other parts of the Continent, the grain trade generally is in a healthy state. In America, no change of importance has taken place in the value of produce

The fineness of the weather has enabled our farmers to progress somewhat rapidly with outdoor labours. Already a good portion of the land has been sown with wheat.

In Scotland, there has been a fair demand for wheat, on higher terms, and most of the markets have been somewhat scantily supplied. Barley and all other articles have come slowly to hand, and the sale for them has ruled steady, at very full prices.

The Irish markets have exhibited only moderate supplies of wheat, chiefly in poor condition. Most descriptions have risen 1s to 2s per quarter. Barley and all other articles have been held for more money. The exports to England have continued limited.

At Mark lane, to day, there was a moderate supply of English wheat on sale, for which the demand ruled slow, at barely the late advance in prices. Foreign wheat was a slow sale, at late rates. Barley, beans, and peas, realised extreme currencies. Oats were a slow inquiry, on former terms. The flour trade was steady, at previous quotations.

With regard to the floating trade, Mr E. Rainford observes that a moderate business has been transacted since Friday last, with a slight downward tendency in the value of maize. The arrivals off coast have amounted to 43 cargoes, of which 11 were wheat, 19 maize, and 13 miscellaneous.

The London averages announced this day are:—

	qrs	s	d
Wheat	5504 at	61	8
Barley	1485	39	8
Oats	1281	22	4
Rye	3	40	0

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.32½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 3-10ths per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days' sight is about 107 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

INDIA EXCHANGES.—OCTOBER 26.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 23rd day of October, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,921,435	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,271,435
		Silver Bullion	..
	27,921,435		27,921,435

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	12,153,061
Rest	3,123,887	Other Securities	16,726,417
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3,685,302	Notes	7,106,885
Other Deposits	14,678,264	Gold and Silver Coin	885,226
Seven Day and other Bills	791,076		
	36,831,529		36,831,529

Dated the 24th October, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,605,626	Securities	28,986,418
Public Deposits	3,685,302	Coin and Bullion	14,106,661
Private Deposits	14,678,264		
	39,969,192		43,093,079

The balance of Assets above Liabilities being 3,123,887*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£325,031
An INCREASE of Public Deposits of	116,537
An INCREASE of Other Deposits of	267,111
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	148,399
An INCREASE of Bullion of	211,574
An INCREASE of Rest of	4,558
An INCREASE of Reserve of	519,089

The above return is satisfactory, the decrease in the reserve and bullion consequent upon the payment of the dividends having been more than regained. The increase in the other deposits and the falling off in the other securities indicate the continued low demand for money.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,963,602	£ 22,033,824	£ 23 173 660	£ 22,241,279	£ 21,605,626
Public deposits	5,175,358	6,130,265	5,590,545	3,412,745	3,685,302
Other deposits	10,474,704	13,381,292	13,921,452	14,786,598	14,678,264
Government securities	13,241,768	10,809,467	10,875,157	9,490,273	12,153,061

,, Hamburg (3months)	13 10¼ 11	13 7	13 5 5¼	13 5¼ 6¼	13 9¼ 10

In the corresponding week of 1851, the future state of our trade with the Continent was exciting some uneasiness, owing to the political ferment in France, the financial embarrassments of various countries, and especially of Austria, and the failure of the crops in Germany. It was also stated that, in apprehension of the expected crisis in France in 1852, on the expiration of the term of office of the President and Assembly, the troops of all the German States were to be put upon a full war establishment, to be ready for any emergency. From the United States it was announced that the Union candidate for the Governorship of Georgia had received a majority of 12,000 votes. The Vigilance Committee in California was entirely overriding the legal authorities. At home, few events of importance had taken place. Kossuth had arrived from Turkey at Southampton, where he had met with an enthusiastic reception.

In 1858, the anticipation of a reduction in the Bank of England rate of discount from 3 to 2½ per cent. had not been realised, although the best bills were taken in Lombard street at 2¼. Consols had risen to 98½, and the Indian Four per Cent. Debentures, the second batch of which had just been issued, to 100.

In 1859, the rate of money was easy at 2⅝ to 2½ per cent., and Consols ranged about 96. The only political feature was the pending war between Spain and Morocco. The biddings for 423,600*l* Victoria Six per Cent. Debentures had taken place; the minimum price fixed was 108, and the whole were subscribed for at about 108⅛, the quotation immediately after rising to 1¼ to ⅜ premium.

In 1860, news had arrived from the United States that the Presidential election for the next year was virtually decided, and a dissolution of the Union was threatened, but the general belief in the North was against any such step being really contemplated. The Prince of Wales was being publicly entertained at New York. Some rather large failures were reported in Brazil and Australia. Diplomatic relations had been broken off between Russia and Sardinia. The new Austrian charter for Hungary had been promulgated, but was received with little favour. The Warsaw conferences had commenced between the Emperors of Russia and Austria and the Prince Regent of Prussia. At home, a good deal of attention was being directed in commercial circles to the affairs of the Grand Trunk of Canada Railway Company. Messrs Robert Davies and Co., the Shoreditch bankers, had stopped payment.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,369,134*l*; in 1858, a deficiency of 1,451,145*l*; in 1859, a deficiency of 4,171,711*l*; and in 1860, a deficiency of 4,938,051*l*. In 1861, the deficiency is 2,058,153*l*.

DISCOUNT AND MONEY MARKET.—In the money market this week there has been increased ease, the supply of capital being abundant, while the commercial bills offering remain unusually moderate. The stagnation in trade, consequent chiefly upon the great American crisis, becomes every week more marked. In the open discount market to-day, the best paper was readily taken at 2⅝ per cent., and there was some disposition to accept even lower terms. At the Bank, the applications have been mostly limited to old customers, and little or no general business has been done. On the Stock Exchange, the supply of money seeking employment continues large, and loans on Government securities are offered at 1½ to 2 per cent.

In consequence of the financial pressure in Paris, the Italian Government are said to have postponed for a month the payment of half the instalment falling due in November on the new loan. The amount is about 15 per cent.

Notice has appeared in the *Moniteur* that the French Minister of Finance has raised the rate of interest on Treasury bonds to 4 per cent. for bonds from three to five months, 4½ per cent. from six to eleven months, and 5 per cent. for bonds for one year.

The Government of the island of Ceylon are about to issue 100,000*l* 6 per Cent. Debentures, under an Act authorising the purchase of the Ceylon Railway. The total sum authorised was 400,000*l*, but of this amount 300,000*l* has been obtained from the Colonial Exchequer, which possessed a considerable sum in hand. For the last seven years, the revenue of the island has shown an average surplus of 50,000*l* a year. The Railway Company was actually paid off last August, all their property being transferred to the Agents-General for Crown Colonies, and the present 100,000*l* is therefore required to replace a temporary loan. The debentures will be of 100*l*, 200*l*, and 500*l* each, and will be paid off at par at the end of seven years from the 15th of next month. The Ceylon Government have taken possession of the railway, and intend either to arrange with a contractor for its completion between Colombo and Kandy, or, if it should be more desirable, to carry out the works under their own supervision.

The advices from Alexandria state that the negotiations for relieving the Pacha of Egypt from his pecuniary difficulties, and for the regulation of the finance of the country, were about to be successful, but have since been defeated by the interference of the French Consul.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	6	5½
Vienna	6	5
Berlin	4	3
Frankfort	4	3½
Amsterdam	3	3
Turin	6½	6½
Brussels	4	3½
Hamburg	...	3
St Petersburg	7	...

ENGLISH FUNDS.—The ease in the discount market and the abundant supply of capital have caused a steady rise in Consols, the closing price this evening being 93 to ⅛ both for money and for the account, or about three-quarters per cent. higher than last Friday. Most of the other Government securities have also participated in the improvement, particularly Indian rupee paper, the Five per Cents. leaving off at 97½ to 98, and the Five-and-a-Half per Cents. 104½ to 105. Political considerations have received little attention, although uneasiness continues to be felt respecting the American war and the cotton question. On the other hand, gold is flowing into this country from Russia, and the state of the exchanges appears to preclude the probability of our sending any considerable portion of our incoming supplies from Australia and elsewhere to the Continent.

Exchequer bills have been in demand, with a very short supply, and have risen the March issue to 4s to 7s premium, and the June to 12s to 15s premium. India bonds are steady, at 11s to 15s premium.

India Five per Cents. have again been in demand for investment, and have experienced a further rise of three-quarters per cent., the last price being 104⅞ to 105⅛.

FOREIGN STOCKS.—The transactions in the foreign market this week have again been on rather a moderate scale, and few variations of any importance have taken place. Turkish Six per Cents. declined rather considerably on Monday and Tuesday on the unsatisfactory advices from Constantinople, but have since partially rallied. Mexican has remained almost stationary in price, but exhibits rather a stronger appearance than last Friday. Spanish and Russian bonds have again been inquired for. Owing to the decline in Paris, the new Italian loan has experienced a corresponding movement on this side, which has been assisted by some realisations believed to be on French account. Brazilian Four-and-a-Half per Cents. have been in somewhat better demand.

The closing price of French Three per Cents. on the Paris Bourse this evening was 68f 20c, showing a recovery of a quarter per cent. from the decline of last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	Consols, Money.		Consols, Account.		Exchequer Bills

RAILWAYS AND OTHER SHARES.—The market for British railway stock has been well supported throughout the week, the traffic returns in most cases continuing favourable. Midland and Lancashire and Yorkshire have been prominently firm, the latter being assisted by the large open speculative account for a fall in this stock. Great Western and Eastern Counties have also been in demand. South-Eastern, on the other hand, has receded, the traffic in this instance being unsatisfactory, owing, it is believed, partly to the competition of the London, Chatham, and Dover. Great Northern is also flatter, the augmentation in the receipts being less than had been expected. Speculation in this department continues almost at a standstill. The public also operate to a very limited extent, but rather buy than sell on the anticipated increase in railway earnings next year through the Great Exhibition.

In the colonial market, the general rise in Indian securities has had a favourable effect on Indian guaranteed railway stocks, most of which show an advance. Canadian descriptions have also improved, but the highest prices have not been maintained.

Foreign shares have been in good demand, and in many descriptions an improvement has taken place. Great Luxembourg, Bahia, and San Paulo have been chiefly purchased. The two last, however, are still at a discount, notwithstanding they bear a Brazilian Government guarantee of 7 per cent. American securities improved in the earlier part of the week, on the higher prices from New York, but to-day showed a tendency to reaction.

In the miscellaneous market, St John del Rey Mining shares have risen steadily. An improvement has also taken place in Red Sea Telegraph, on the new proposition (appearing below) from the Government respecting the guarantee. The new Mercantile Fire Insurance left off this evening at ⅛ to ¼ prem.; and Commercial Union ⅛ discount to par.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—The rates this week have again been in favour of this country, a slight rise having generally been established.

BULLION.—Annexed is the weekly circular of Messrs. Pixley, Abell, and Langley, on the transactions in bullion during the week, and the operations in Indian rupee paper:—

Gold.—The arrivals have been 85,000*l* Russian; 182,000*l*, per Indus, from Australia; and 4,000*l*, per Bohemian, from Quebec. The exports have been 21,200*l* to New York, per City of New York; 34,000*l* in gold and silver, to New York, per Borussia. Larger amounts to the States would have followed the above, but for the rise in the New York exchange to 107½. About 160,000*l* has been purchased by the Bank of England since the date of our last.

Silver has been in active demand for Bombay, the last shipping day being to-morrow; the demand has been met from supplies out of the last two packets. The market is now bare, and will continue so for the next few days. About 250,000*l* has been bought, all at 60¾d per oz standard, at which rate the silver per last West India steamer (the Atrato) has been sold.

Mexican dollars continue quite nominal in price at 59½d per oz, at which rate a few have been taken for the States. The demand for China is almost suspended.

Exchange on India remains firm, at 1s 11⅝d for Banks' drafts on Bombay, and 1s 11⅝d Calcutta, 60 days' sight. Bills with documents, 1s 11½d to ⅝d. Banks' bills on Madras 1s 11½d to 1s 11⅝d.

India Government loan notes have improved yesterday and to-day, on receipt of news from Bombay. We quote 5½ per Cents. 103¾ to 104¼, and 5 per Cents. 96¾ to 97¼.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 75s 6d to 76s, nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, 76s 5d per oz. Silver—Bar silver, 5s 0¾d per oz std, last price; bar silver, containing 5 grs gold, 5s 1d per oz std; fine cake silver, 5s 5⅜d to 5s 5½d per oz; Mexican dollars, 4s 11¼d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 5,000*l* in gold was taken to the Bank to-day.

The outgoing steamer with the Bombay mail will tak e 239,030*l*, of which 1,250*l* is in gold for Alexandria, and 7*l*00,5in gold and 230,280*l* in silver are for Bombay.

Failures and Mercantile Embarrvssment.s—From Montevideo, the suspension is announced of Francisco Terna, with large liabilities. The estate of the late bankrupts, Messrs Cruzel and Fernandes, is expected to turn out badly, the dividend being calculated to be not more than 5 per cent.

A large failure in the corn trade is reported from Paris.

Public Companies.—The half-yearly meeting of the Royal Mail Steam Company (West India) was held on Wednesday, when the report, recommending a dividend of 2*l* per share free of income tax, was carried after a short discussion. It appears that the working of the past six months has been satisfactory, the receipts showing an increase of 8,510*l*, and the working expenses a diminution of 4,662*l*. In the latter case, the decrease has been under nearly every head, an apparent increase in the salaries being attributable to an adjustment of account. In the current half-year the business has thus far progressed favourably. In the last six months there has been a considerable falling off in the outward passage money and freight, chiefly arising from the competition of the new French line to Brazil; but this deficiency has been more than made up in the homeward receipts. An arrangement has been effected with the Panama Railway which will tend to develop the through traffic, and further concessions, it is hoped, will be granted. The repair and renewal account, for the first time since 1855, shows a surplus of 1,882*l*, and this saving has not been effected at the cost of the fleet, which has been maintained in excellent order. The amount at which the ships and engines stand in the Company's books is 8*l* 15s per ton, and the premises, which originally cost 45,545*l*, are now brought down to 18,000*l*. The question respecting the Australian contract is still pending. The Company's fleet at present numbers 23 steamers, of an aggregate tonnage of 43,715 tons.

The Government have sent the following communication to the Directors of the Red Sea Telegraph Company, with the view to convert the present 800,000*l* capital, bearing an imperial 4½ per cent. guarantee, into an annuity payable at the Bank of England. A special meeting of the Company is to be held on the 5th of next month, when this proposition will be formally recommended for approval:—

Treasury Chambers, Oct. 15, 1861.

Gentlemen,—The Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 9th inst., and I am desired by their Lordships to state to you in reply that they have given the best consideration to the proposition of Sir Macdonald Stephenson of which the shortness of the time since the receipt of your letter would allow, and are prepared to agree to the following terms:—

1. To divest the existing Company of all further responsibility in respect to the affairs of the Red Sea and India Telegraph, with a view to transferring the entire concern to the hands of a new Company, on suitable terms and conditions, should any such Company be formed with an amount of capital sufficient to justify a reasonable hope of the success of its object.

2. To convert the present guarantee into a Government annuity of like amount, payable at the Bank of England, as in the case of other Government annuities.

It would follow from this conversion that all expenses of disbursements would be defrayed by the Government.

3. To reserve power to the Government to redeem this annuity at any time hereafter, on payment of a capital sum in proportion to the unexpired period which the annuity may then have to run.

Your Board is of course aware that no final step can be taken in such a matter without the approval of Parliament; but my Lords undertake, on the part of Her Majesty's Government, in the event of such new Company being established, to have a Bill introduced into Parliament early in the ensuing Session, for carrying into effect the foregoing terms.

Their Lordships abstain, on the present occasion, from entering into details connected with the proceedings of the new Company, leaving them for future discussion and arrangement.—I am, &c.,

G. A. Hamilton.

The Directors of the Red Sea and India Telegraph Company.

The Telegraph to India Company, the undertaking alluded to above, have just issued their prospectus. They state that, although the total line worked but a few days after completion, the various sections had been for some time in operation, and a conviction is expressed that the faults are unimportant and can easily be repaired, especially on the part from Aden to Kurrachee. One section of the latter of 500 miles has never shown any fault. The cost of re-establishing this portion is not expected to exceed 50,000*l*, and the first efforts of the Company will be directed to that end. The remainder between Suez and Aden, it is believed, can easily be made good, while in many portions alternative land lines can be formed. The capital of the Company is fixed at 100,000*l*, and operations will be commenced as soon as sufficient shall have been subscribed to send a steamer with 200 miles of new cable to complete the communication to Kurrachee, which it is expected would be done early in 1862. The conditions are that the Government shall hand over the whole of the property of the old Company as soon as two-thirds of the capital shall have been taken, and a steamer sent as above; that the new Company shall be entitled to all profits not exceeding a dividend of 25 per cent., any surplus beyond to be devoted to reimbursing the Government on their old guarantee, and afterwards to the creation of a reserve; that the Government shall have the right to purchase the line at the end of 30 years for the capital laid out; and lastly, that in the event of failure on the part of the present Company, the Government may take the line out of their hands on repayment of the capital expended.

The Australian Mining Company has announced a further return of capital of 2s 6d per share.

At a meeting of the North Rhine Copper Mining Company of South Australia, yesterday, the report stated that the expenditure in the past year was 6,835*l*, or 3,899*l* less than in the preceding year. The balance in hand was 3,071*l*. The following extract describes the principal operations now being conducted:—

The chief work now being prosecuted is the sinking of the engine shaft to the 60 fathom level; and on attaining that depth, both Captain Paskoe and Captain Barkla are sanguine of good results. In confirmation of these views, Captain Barkla writes from the mine, 18th July, as follows:—"The strata of ground in the shaft are good, and likely to continue for some depth, and I expect the shaft-men will strike the main lode in sinking the shaft about three fathoms further, and f the strata of ground continue there is every reason to expect a good orey lode when cut, for there is every indication of ore in the strata of ground that the men are now sinking through." The machinery on the mine is in the best order, and works most efficiently, and the supply of mining labour continues ample.

As important intelligence may therefore be expected before long, the Directors agreed to call a special meeting not later than the 24th of February.

The London and Lancashire Fire Insurance Company have issued a prospectus, in which they state that they wish to develop, both in Liverpool and in London, the increased facilities for Fire Insurance which recent circumstances have rendered desirable. In Liverpool, they consider that the rapid increase of insurable property gives them a particularly favourable opening. It is intended by this Company to extend the mutual principle to fire insurance, and to make the holders of the policies participators in the profits realised by the business.

The prospectus of the Roodee Iron Ship-Building Company (Limited) has been issued. The object of this Company is to purchase and extend the business of a large iron ship building establishment near Chester. That town is believed to be much cheaper than London in most of the materials and in the labour requisite for this trade. The present proprietor takes the whole purchase-money in shares of the Company and it is stated on authentic evidence that the work hithert, turned out from the yard has been of a very superior cha racter.

The Directors of the Labuan Coal Company have issued a report stating that the works have been steadily carried on, and that they have now reached a very satisfactory stage. A good supply of coal is expected to be ready in a few months, and an increased production will probably take place when the dry season commences at the beginning of the year.

MISCELLANEOUS.—It is stated that the 10,000*l* bales of cotton now stored at New Orleans are a *remanet* of last year's crop, which could not be shipped to Europe owing to the blockade. Little or none of the present year's crop has left the cotton plantations, nor is there believed to be the remotest prospect of any of it being forwarded to the seaports until the blockade is raised. At this date last year, the arrivals at New Orleans amounted to 155,000 bales.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of wheat at Mark lane, to-day, was somewhat on the increase; and the demand, both for red and white qualities, ruled less active, at barely the late advance in the quotations, Foreign wheat was in slow request, yet no change took place in its value. The show of barley was small, and all kinds sold somewhat freely, at extreme rates. Oats were a slow inquiry; nevertheless, prices were supported. Beans and peas were in limited supply, and Monday's advance in their value was fully maintained. The flour trade was steady, on former terms. This week's imports amount to 18,430 quarters of wheat, 3,250 barley, 13,590 oats, 40 sacks and 10,750 barrels of flour.

At Liverpool, this morning, the wheat trade was slow, at a decline of 3d per cental. Flour declined 6d to 9d per barrel; and maize fell 1s 6d to 1s 9d per quarter.

At Alexandria, the advance in the value of cereals, caused by the inundations of the Nile, had been fully supported to the 11th inst. The following were the sales for the week ending with the above date:—

Saide Wheat, private trade produce, 19,880 qrs, 32s to 33s; Beheireh ditto, ditto, 8,810 qrs, 30s 9d to 31s 7d; ditto, white, 2,490 qrs, 31s 6d to 33s; Saide beans, private trade produce, 13,860 qrs, 26s 3d to 26s 10d; Beheireh ditto, ditto, 720 qrs, 24s to 24s 6d; ditto, Pasha's produce, 1,250 qrs, 27s; barley, private trade produce, 7,040 qrs, 18s to 19s 10d; barley, Government (by auction), 3,175 qrs, 20s 4d to 21s; lentils, 530 qrs, 24s 7d; ceci, 220 qrs, 32s to 35s; linseed, 565 qrs, 48s to 49s 9d per quarter, free on board. Freights—The arrival of several vessels has produced a decline in our quotations, which may be stated at 6s 3d to 6s 6d for beans to the United Kingdom for orders, other grain or seed in proportion; to a direct port, 5s 9d to 6s nominal; by steamer to Liverpool, 5s 6d.

The excitement in the Liverpool cotton market is still on the increase, and prices are advancing daily. The total sales of the week amount to 146,000 bales, including 51,000 to spinners, 82,000 on speculation, and 13,000 for export; quotations for middling are ⅛d to 1d, for fair 1d, above those of last Friday. It appears that spinners have, as yet, curtailed their productions only in a very small proportion to the reduced stock; it is highly desirable that this measure should be adopted to a greater extent, this being the only means to prevent a sudden cessation of labour in the manufacturing districts.

Annexed are the exports of cotton from Bombay during August, as well as for the eight months ending August 31, the latter compared with the three previous years:—

	Great Britain. bales.	Cowes, &c., for orders. bales.	Foreign Europe. bales.	China, &c. bales.	Total. bales.
Total for August	39,738½	... ...	2,200 ...	... ...	41,938½

A full average business has been transacted in tea, by private contract, and, for some descriptions, an advance of from ½d to 1d per lb has been obtained. No public sales have been brought forward this week.

The market for raw sugar has exhibited less firmness, and, in some instances, prices have ruled the turn in favour of buyers. Refined goods have sold slowly, at about previous rates.

Somewhat increased supplies of coffee having been on sale, the market, generally speaking, has been inactive, and the quotations show an occasional reduction of 6d per cwt.

The following is dated Rio de Janeiro, Sept. 27:—The coffee market continued active from the 7th to the 18th inst., sales during the said period amounting to 72,000 bags, at an advance of 100 rs. Later news in general being of a very favourable character, business opened on the 19th at a further advance of 100 rs, but dealers raising their pretensions rapidly, the greater part of the transactions during the day, which embrace 50,000 bags, establish a rise of 400 to 500 on previous quotations. Since then, increased firmness on the part of sellers, and their great reluctance to allow selections, even at a high figure, have brought business to a stand; but receipts being moderate and stock light, dealers evince no disposition to accept lower offers. The total sales since 7th instant to date reach 132,000 bags, of which 33,000 are for the United States, 62,000 North of Europe, 32,000 Mediterranean, 5,000 Cape of Good Hope and sundry ports. We quote:—Ordinary quality, 41s 2d to 45s 9d; regular first, 48s 9d to 50s 3d; good first, 51s 9d to 53s 3d; prime good first and superior, 54s to 56s 3d; round lots, 48s to 51s 4d; the better selections, 52s 6d to 54s 9d per cwt, free on board, without freight. Stock, 125,000 bags.

Cocoa has sold freely, on higher terms. In rice, only a moderate business has been transacted, yet prices have been well supported. The dry fruit trade has continued steady.

RICE EXPORTED from RANGOON from January 1 to August 31.

	Europe. baskets.	Europe. tons.	Straits and China. baskets.	Straits and China. tons.

Rum has sold slowly, at previous rates; and the market for brandy has ruled inactive, but without leading to any change in the currencies.

The periodical public sales of silk have been held this week. The attendance of buyers was smaller than usual, yet rather more business was transacted, at full quotations.

	Imports Warehoused from Oct. 1 to 24, 1861. bales.	Deliveries from Oct. 1 to 24, 1861. bales.	Stock, Sold and Unsold on Oct. 24, 1860. bales.

The wool trade—owing to the approaching public sales—has been in a very inactive state, and prices have been with difficulty supported.

The Liverpool public sales of wool were brought to a close on Wednesday. Annexed is Messrs Ronald and Son's report of the series:—"Our fourth series of public sales, which commenced here on the 8th instant, was brought to a close on Wednesday. The total quantity brought forward comprised:—18,623 bales East India and Persian, 1,154 bales Egyptian and Syrian, 2,862 bales Oporto, Spanish, and Lisbon, 1,578 bales Buenos Ayres and Entre Rios, 870 bales Cordova and San Juan, 1,198 bales Mogadore, 1,221 bales Peru and Lima, 637 bales Russia, Turkey, &c., 110 bales Canadian fleece, 877 bales sundries, 1,193 sheets English fleece and skin; in all, 30,323 bales, &c. The East India wools were offered from the 8th till the 18th instant, and miscellaneous descriptions from the 21st to 23rd instant. The attendance of home as well as foreign buyers has been very good throughout, and a considerable portion of East India and some other low kinds have been taken for American account. The advance in East India on last July rates is on the average from 1d to 1½d per lb, being greatest on greys and yellows, particularly the former, namely, from 2d to 4d, which, being most eagerly competed for, brought increasingly enhanced rates as the sales progressed: white wools, however, did not undergo any material variation. About 1,600 bales were withdrawn, part being Persian, and these latter are said to have been sold since by private contract. The Egyptian wools brought about last sale rates, but the Syrian were principally withdrawn. The black and greasy Spanish did not command much attention, and, being held at too high limits, had to be withdrawn. A few lots of inferior Oporto fleece were sold at about current rates: the lower grades of this description were eagerly competed for and realised full value. Buenos Ayres and Entre Rios were in little or no request by either home or continental buyers, but the American demand took off the lower classes at an advance of from ½d to 1d per lb on late rates up to 8¾d, this being the figure for admitting them at the the lowest scale of duty. Cordova—Large quantities had already been taken previous to the sales for the States, and what was offered at auction found buyers at rather enhanced prices. Mogadore met with fair competition, and current rates were fully maintained. Peru and Lima were all disposed of. Canadian Fleece—A prime shipment was offered, which commanded a good deal of attention and brought high rates. English Fleece and Skin—The better class has fully supported last sale rates, while the medium and lower kinds have scarcely maintained their ground."

Hemp has been in steady request, at 34*l* for clean Russian. Saltpetre has been much neglected; but the prices realised for East India indigo, in the private contract market, show a further improvement of 4d to 6d per lb, in addition to that noticed at the quarterly public sales lately concluded.

Scotch pig iron is steady, at 49s 9d, cash, mixed numbers. In other metals, there is no material change to report.

Linseed oil has continued firm, and the quotation, on the spot, is 35s per cwt. Sperm is dull, but all other oils quite support previous rates.

The receipts and exports of naval stores at New York, from Jan. 1 to Oct. 7, were as follow :—

	Receipts.		Exports.	
	bbls 1861.	bbls 1860.	bbls 1861.	bbls 1860.

"There has been more activity in financial affairs," observes the New York *Shipping List* of the 9th inst., "during the past few days, consequent upon the more active prosecution of general trade. There is more demand for money for mercantile purposes, but as capital continues abundant, there are no important changes in the rates. There continues a steady demand for the new Treasury notes, and they are beginning to be used pretty freely for business purposes, as they answer the purpose of specie. The imports both of dry goods and general merchandise during the last week, though showing some gain, are behind the corresponding week of the past year :—

	1860. dols	1861 dols
Dry goods	1,662,619	547,949
General merchandise	2,041,162	1,142,403
Total for the week	3,703,781	1,690,352
Previously reported	181,411,187	97,920,820
Since January 1	185,114,968	99,611,172

The following shows the total value of dry goods imported at New York for *nine* months ending 30th ult. :—

	1860. dols	1861. dols
First quarter	34,673,000	23,575,900
Second quarter	15,978,400	6,462,200
Third quarter	34,439,500	7,115,300
Total nine months	85,090,900	37,153,400

The Bank statement of this week compares with the report of the previous week as follows :—

	Sept. 28. dols	Oct. 5. dols		dols
Loans	126,128,326	148,545,488	Inc.	22,417,162
Specie	38,123,552	39,809,901	Inc.	1,686,549
Circulation	8,638,780	8,804,056	Inc.	245,276

Do. net	96,551,898	120,607,549	Inc.	23,055,651

The same journal of the 12th inst. remarks :—"Although there cannot be said to be any very great activity in general trade, there is nevertheless a growing confidence and tendency towards improvement observable in almost every branch of general trade, and business is beginning to assume healthy proportions, while things may be said to be in a better condition generally than for a long time past. In view of the more active inquiry for money, a little more firmness is manifest, though we make no changes in the rates. We quote :—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9

Other good bills	... ..."

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The market opened without animation, and the increased supplies of foreign have since rather unsettled quotations, which are occasionally slightly in favour of the buyers. Strong dry descriptions and native Madras fully support their former value. The sales of muscovado on Wednesday and Thursday passed off flatly, and some of the lots went cheap. During the first three days 1,114 hhds West India had been disposed of, including some parcels brought to auction. 342 casks Barbadoes went at 35s 6d to 43s 6d. 334 casks Jamaica partly sold at 35s to 40s 6d per cwt for brown to good greyish yellow. The stock of sugar at this port is 84,800 tons, against 68,300 tons last year, and 79,600 tons in the preceding one. Delivered last week, 4,900 tons, but since the beginning of the year the deficiency for home use is 8,320 tons, when contrasted with 1860.

Mauritius.—2,484 bags offered on Tuesday were chiefly bought in above the value for crystallised sorts, some small lots of soft brown and grey selling upon former terms.

Bengal.—3,688 bags were mostly bought in at high prices. Gurpatta date, 38s to 43s; soft brown date kind, 30s to 31s; fine small grain yellow, 46s 6d per cwt.

Madras.—990 bags of the lower grades sold at fully previous rates. Native, 30s 6d to 32s 6d; soft brown date sort, 30s to 30s 6d. Jaggery sold rather under 30s per cwt privately.

Foreign.—281 cases 70 barrels 899 bags Bahia, offered by auction, were partly sold at 38s to 44s for low grey to fine greyish yellow. 2,500 boxes Havana were partially disposed of: low to good brown, 34s 6d to 38s; low to fine grey, 39s to 44s; one lot, 46s 6d (16s duty). 205 boxes grainy white in bond withdrawn at 32s. The large supplies of Porto Rico—viz., 1,600 casks—only partly found buyers at 37s to 44s. 3,430 bags low clayed Manilla were withdrawn. Of 924 casks Cuba, a large proportion sold: brown, 32s 6d to 35s; grey and yellow, 36s to 40s. 4,028 bags Maceio and 995 bags Pernambuco were bought in above the value, from 31s to 37s 6d per cwt for low brown to middling soft yellow. A portion since sold.

Refined.—The market is quiet, but no alteration in prices can be noticed this week.

Molasses and Melado are unaltered.

Rum.—The sales have been moderate this week, and prices do not show any alteration since last Friday.

Cocoa maintains the recent advance, with light supplies. 317 bags Trinidad, by auction, realised 60s to 66s for grey to middling mixed greyish red. 232 bags Grenada sold at 58s 6d to 64s; one lot superior, 70s 6d per cwt.

Coffee.—The recent advices from Brazil increased the inquiry for Rio descriptions, and 3,000 to 4,000 bags are reported sold by private contract. 3,500 to 5,000 bags in public sale were about one-fourth part disposed of at 53s to 63s, the remainder taken in above the value; also some washed at 74s to 76s. 76 cases Neilgherry sold at 75s to 80s 6d. A small parcel of Jamaica sold at 64s 6d to 71s. 428 casks 630 barrels and bags plantation Ceylon chiefly sold, some marks barely sustaining the late extreme prices; small berry to good, 75s to 81s per cwt.

Tea.—A good business has been done in many descriptions. New season's congous, of which further supplies have arrived, sold upon rather higher terms; also several other grades, including common shipping kinds. Flowery Pekoe supported the advance last quoted.

Rice.—The transactions have been of moderate extent this week, partly attributable to the high pretensions of holders. White Bengal sold by private contract at 11s 9d to 15s 6d; Ballam, 11s to 11s 6d; new Rangoon, 11s 6d, with short prompt; old, 11s; old Necrancie Arracan, 10s 9d. Contracts have been made in Ballam of next year's shipment, at 10s per cwt.

Imports and Deliveries of Rice to October 19, with Stocks on hand.

	1861. tons	1860. tons	1859. tons	1857. tons
Imports	64150	31900	27800	74600
Deliveries for home use	61350	50900	23500	29300
Exported	...	8600	17200	19000
Stock	32700	44200	72200	89300

Spices.—The market has been less freely supported this week. 37 packages brown nutmegs chiefly sold from 9d to 1s 9d. 14 cases limed, of indirect import, were bought in at 1s 2d. 5 cases low mace realised 8d to 9d. 1,002 bags fair quality Singapore black pepper realised 4d to 4¼d. Several parcels have sold for arrival at 4d. A steady business has been done by private contract. 127 barrels Jamaica ginger sold at 52s to 55s per cwt.

Sago.—100 boxes middling small grain sold at 22s to 22s 6d, and a parcel of fair quality by private contract, 23s per cwt.

Sago Flour.—1,200 bags have realised 16s 3d to 17s per cwt

Saltpetre.—The market has been more steady. About 2,000 bags Bengal have sold privately: refraction 5½ to 2, 33s 9d. 300 bags Bombay, 30s 6d per cwt.

Imports and Deliveries of Saltpetre to October 19, with Stocks on hand.

Delivered	9450	10400	14400	11600
Stock	3200	4100	3750	2350

The deliveries last week were 170 tons.

Cochineal.—The public sales held on Friday comprised 1,119 bags Honduras, 239 bags Teneriffe, and 207 bags Mexican, of which quantity barely half sold at 2d lower rates for Honduras silvers of low to common quality from 2s 1d to 2s 4d, and at a fall of 2d to 3d for foul pasty at 1s 3d to 2s. Middling to fine clean grain sold steadily at 2s 6d to 3s 6d; also some Mexican silver at 2s 4d to 2s 6d. Teneriffe silvers were cheaper, ranging from 2s 6d to 2s 8d; blacks, 2s 8d to 3s. Honduras blacks ranged from 2s 6d to 4s 3d per lb for low and pasty to good.

Metals.—There has been a steady demand this week, but the chief feature in the market to notice is still the business in spelter. The last transactions were at 19*l* to 19*l* 2s 6d, and 19*l* 5s for November shipment. Foreign tin is quiet: Straits, 116s 6d to 117s; Banca, 118s. No change to report in British. Scotch pig iron has recovered the late depression, and mixed numbers sold at 49s 9d to 50s per ton cash.

Hemp.—There seems to be less inquiry for Manilla than of late. 1,700 bales by auction was withdrawn at 22*l* 10s to 24*l*. Russian is steady at 34*l* for clean.

Jute.—This article has been firm, with a good demand. At the pub-

lic sales on Wednesday, which were limited in extent, viz., 2,530 bales' prices advanced 10s to 20s, ranging from 13*l* 10s to 21*l* 5s per ton.

HIDES.—The sales of East India held yesterday went off with spirit, and 121,000 hides principally sold at full rates to a slight advance.

OILS.—Fish oils remain quiet. Pale seal is dull at 90*l* to 91*l* per tun. The demand for olive has increased: Gallipoli, 60*l*; other kinds, 55*l* 10s to 58*l*. Several cargoes of olive have sold for spring shipment at 48*l* to 48*l* 10s f.o.b., and at 51*l* per tun to Cronstadt, giving buyers the option of the United Kingdom or continental ports at the customary reduction. For linseed oil on the spot, 35s has been paid, with a strong market, and there are sellers for future delivery at 33s 6d to 34s. Rape continues in good demand: foreign refined, 47s 6d to 48s; brown, 44s. Cocoa-nut is steady, with moderate transactions: Cochin, 50s to 51s; Ceylon, 49s to 49s 6d. The market for palm is firm. Several floating cargoes have sold at 45s 6d per cwt for fine, which is the price on the spot.

TURPENTINE.—Some rough of indirect import has sold at 18s. American spirits quoted 62s per cwt, and the market not very active.

LINSEED.—An extensive business has been done for arrival: Calcutta 58s 6d to 62s. Black Sea cargoes command 60s per quarter. On the spot, Calcutta is worth 62s to 63s; Bombay, 67s per quarter.

TALLOW.—In consequence of renewed speculative operations, prices of foreign had further advanced 1s 6d to 2s by Tuesday, viz., Petersburg Y.C., 53s to 53s 6d; delivered in the first three months of 1862, 54s to 54s 3d; old, 52s 3d to 52s 6d per cwt. Subsequently the market became quiet, and the quotations have receded about 1s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, October 14.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is very dull to-day. 459 casks Barbadoes and 622 boxes Havana, offered by auction, were principally bought in. 1,729 casks West India have sold during the week. Two floating cargoes of Cuba have sold at 24s to 24s 3d; and one of Havana, No. 9½ to 10, at 26s 3d per cwt for the United Kingdom.

COFFEE.—There were not any public sales to-day. A cargo of Santos sold for a near port; one of Rio at 60s 6d per cwt.

RICE.—2,028 bags Bengal, by auction, sold at 12s 6d to 13s 6d for dirty to good middling white.

SALPETRE.—1,122 bags Bengal, offered by auction to-day, were bought in at high prices: refraction 10⅛ to 3½, at 34s to 35s per cwt.

OILS.—317 casks palm, by auction, all sold at 43s 6d to 45s 3d per cwt. 107 tuns seal: yellow to pale, 33*l* to 40*l* 5s; brown, 30*l* 15s to 32*l* 10s. 34 tuns sperm and head matter bought in at 90*l*. 42 tuns Southern whale sold at 33*l* 10s to 36*l* per tun. 129 casks cocoa-nut part sold at previous rates.

TALLOW.—Y. C. has declined to 52s to 52s 3d, and 52s 6d spring delivery; town, 55s 9d, being 1s 6d higher than on Friday last. By auction, 387 casks Australian sold: sheep, 53s to 54s; beef, 49s to 51s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very quiet this week. No material alteration to make with respect to prices. 33s 6d asked for crushed for export. Some large sales of Dutch crushed are reported to have been made for delivery next month f.o.b. in Holland. Prices have not transpired.

DRY FRUIT.—Currants show but little animation, but a reduction of 1s on low would lead to large transactions. Holders will not give way, and have to-day refused 28s 6d in many quarters. Fine new are neglected for the present. Fine old in fair demand, at 37s to 38s. Raisins sell freely with the exception of Valentias, which are entirely neglected at present rates. Figs sell in large quantities, prices being tempting, though the quality is very inferior.

SEEDS.—The seed trade is a steady one this year, at advancing prices.

ENGLISH WOOL.—No alteration in anything except Down wools, which are a little easier.

COLONIAL WOOL.—In colonial wool no change. East India and low foreign continue in great demand, particularly the lower sorts for America and American orders for army purposes.

FLAX unaltered.

HEMP.—Market firm at our quotations.

COTTON.—Sales of cotton, from Friday, 18th October, to Thursday, 24th October, inclusive:—4,400 bales Surat, 8⅝d, 8½d and 8⅝d, for good fair and good new Broach; 6⅝d to 8d for very middling to good Oomrawatty; 6⅞d to 8d for middling to good Dhollera; 6⅜d to 7d for very middling to fair and good fair Compta: 700 bales Tinnevelly, 6⅞d to 7⅛d for very middling to good; total, 5,100 bales. The continued warlike accounts from America, and the prospects of hostilities being of a long continuance between the Northern and Southern States, have caused great excitement, and a large speculative business has been transacted both on the spot and for arrival, prices daily hardening, establishing an advance on last week's quotations of ⅛d to ⅜d per lb on Broach, ½d per lb on Dhollera, and ¼d to ⅜d per lb for all other descriptions of Surat, and fully ¼d per lb on Tinnevelly, the market closing with great firmness. The following sales have been made for arrival:—350 bales Oomrawatty, 7d for guaranteed middling fair; 2,550 bales Dhollera, 7d to 7⅛d for guaranteed middling fair to fair; 5,500 bales Tinnevelly, 7⅛, 7⅜d, to 7⅞d, for guaranteed good fair; 1,000 bales Western Madras, 6½d to 6⅝d for guaranteed fair, early shipment. P.S.—Market good, but not much done.

TOBACCO.—An improved demand has existed for home trade, and two or three parcels have found buyers at full prices. For export, considerable sales have been effected of middling descriptions.

TIMBER.—Large stocks of wood have accumulated during the autumn, and more has yet to come. Prices are generally low; and as the demand may now be expected to abate, no improvement can be looked for till the spring trade reopens.

LEATHER AND HIDES.—The leather trade remains without alteration. A moderate amount of business has been done during the week, but no extensive transactions have taken place. At Leadenhall, on Tuesday, the trade was also limited. There is still a short supply of good heavy crop hides, prime English butts 24 lbs and upwards, heavy harness hides, and kips of best quality, for which there is a good demand. Shaved hides have also met rather more inquiry. Prices remain stationary. At the public sale of foreign hides this week, which was large, and included the unusual number of 35,498 dry and drysalted South American hides, scarcely half of which were sold, and being of not first-rate qualities (with the exception of the Guatamalas, 2,000 of which brought 8⅛d to 9⅛d), at a proportionate decline of previous quotations. The heavy salted Australian sold freely at former rates; light were not much wanted Of the 118,000 E.I. kips offered, 98,000 were sold at prices differing little from those of the preceding sale. Those of the lower descriptions fully maintained former rates.

METALS.—Copper has been fairly firm at quotations, with quiet demand, but ores and foreign copper keeping high, and the former somewhat scarce, has unexpectedly led the English smelters to advance their quotations by ¼d per lb to-day. Iron is certainly a little more inquired for, and most markets are rather better off for orders. Scotch pig, however, is neglected. Tin is inanimate, and a very trifling relaxation of prices is obtainable in foreign. Spelter keeps steady at recent improvement. Lead has receded slightly from late advance in prices. Tin plates continue inactive.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	55	9
Fat by ditto	2	10
Yellow Russian	54	0
Melted stuff	40	6
Rough ditto	23	6
Greaves	18	0
Good dregs	7	0

Imports this week 1,148 casks.

PROVISIONS.

Bacon market steady, with a great scarcity. Very difficult to get any at all. Friesland butter higher in price; but quality not very good. Arrivals short. Jersey making from 108s to 112s. Not much doing in other provisions.

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 21.—The total imports of foreign stock into London, last week, amounted to 9,501 head. In the corresponding period in 1860, we received 12,558; in 1859, 8,395; in 1858, 8,609; in 1857, 8,154; in 1856, 4,210; and in 1855, 1,904 head.

There was a full average supply of foreign stock on offer in to-day's market, and its general quality was good. Sales progressed steadily at full prices. The arrivals of beasts fresh up this morning from our own grazing districts, as well as from Ireland, were considerably on the increase when compared with Monday last. The primest Scots, Shorthorns, Devons, and Herefords, were in steady request at full prices; but inferior stock moved off slowly at a decline in value of 2d per 8 lbs. The general quality of the beasts was only middling. From Lincolnshire, Leicestershire, and Northamptonshire we received about 3,000 Shorthorns and mixed breeds; from other parts of England, 500 various breeds; from Scotland, 12 Scots and crosses; and from Ireland, 1,300 oxen and heifers. With sheep we were fairly supplied as to number, but for the most part their quality was inferior. All breeds met a slow inquiry, and Thursday's advance in the quotations was not supported. The primest old Downs sold at 5s 6d per 8 lbs. Calves, the supply of which was limited, moved off steadily at full currencies, viz., from 4s to 5s per 8 lbs.

SUPPLIES.

	Oct. 22, 1860.	Oct. 21, 1861.
Beasts	5500	6650
Sheep	26700	24250
Calves	290	260
Pigs	450	370

THURSDAY, Oct. 24.—Our market to-day was but moderately supplied with beasts, both as to number and quality. The few prime Scots, &c., on offer were taken off readily, at Monday's prices; otherwise, the beef trade was in a sluggish state, on former terms. Sheep—the show of which was rather limited—were a dull inquiry, at barely previous currencies. The top quotation was 5s 6d per 8 lbs. We have to report a dull market for calves. In prices, however, no change took place. Pigs commanded extreme quotations; but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	4	5	6
Second quality ditto	3	4	3	8	Large coarse calves	4	0	4	6
Prime large oxen	3	10	4	4	Prime small ditto	4	8	5	0
Prime Scots, &c.	4	6	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	2	3	6	Small porkers	4	8	5	2
Second quality ditto	3	8	4	2	Suckling calves.....each	20	0	30	0
Prime coarse-woolled do.	4	4	5	2	Quarter old store pigs	20	0	31	0

Total supply—Beasts, 930; sheep and lambs, 7,450; calves, 350; pigs, 500.
Foreign supply—Beasts, 210; sheep, 1,240; calves, 210.

NEWGATE AND LEADENHALL

FRIDAY, Oct. 25.—The supply of meat is moderately extensive. The primest qualities move off steadily at full prices; otherwise, the trade is dull, and the quotations are rather drooping.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	8	3	4	Middling mutton	3	10	4	2
Middling ditto	3	6	3	8	Prime ditto	4	4	4	6
Prime large ditto	3	10	4	0	Veal	3	4	4	6
Prime small ditto	4	0	4	2	Small pork	5	2	5	6
Large Pork	4	2	5	0	Lamb	0	0	0	0
Inferior mutton	3	4	3	8					

HOP MARKET.

BOROUGH, Monday, Oct. 21.—We have a moderate trade doing in every description of the new growth, and our currency is well supported. Mid and East Kents, 180s to 195s, choice 220s; Weald of Kents, 147s to 165s, choice 180s; Sussex, 130s to 140s, choice 150s.

FRIDAY, Oct. 25.—Good and fine hops move off steadily at full prices; but other kinds—owing to the large supply of foreign hops on sale—are a dull inquiry.

An account of the duty charged on hops, at 1½d per lb, the growth of the year 1861:—Barnstaple, 17*l* 13s 10½d; Canterbury, 23,468*l* 11s 10½d; Cornwall, 3s; Essex, 88*l* 11s 9d; Gloucester, 5*l* 5s 7½d; Grantham, 8*l* 14s 4½d; Hants, 6,890*l* 6s 3d; Hereford, 17,220*l* 17s 3d; Isle of Wight, 2,421*l* 5s 1½d; Lincoln, 105*l* 1s 10½d; Lynn, 2*l* 6s 7½d; Middlesex, 1*l* 8s; Northampton, 3*l* 1s 6d; Nottingham, 75*l* 8s 1½d; Oxford, 4*l* 5s 6d; Reading, 16*l* 7s 4½d; Rochester, 78,235*l* 14s; Sheffield, 14*l* 15s 6d; Stourbridge, 5,617*l* 7s 4½d; Suffolk, 344*l* 11s 7½d; Surrey, 8*l* 8s; Sussex, 10,684*l* 14s 4½d; Wales (Middle), 98*l* 8s; Worcester, 4,283*l* 2s; total, 149,610*l* 9s.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Oct. 21.—The arrivals of home-grown potatoes continue on a very moderate scale, and the trade is firm at quite previous currencies. York Regents, 95s to 105s; Scotch ditto, 90s to 100s; Kent and Essex, 85s to 110s per ton.

FRIDAY, Oct. 25.—The supply of potatoes is only moderate. Good and fine qualities sell steadily at higher prices; but inferior parcels are in slow request on former terms. The best Essex and Kent Regents are worth 130s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Trade rather heavy.

COAL MARKET.

FRIDAY, Oct. 25.—Wall's-end:—South Hartlepool 18s 9d—South Kelloe 19s—Trimdon Thornley 16s 9d—Whitworth 15s 6d—Hartlepool West Hartley 16s 6d. 19 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 25.—The public sales of miscellaneous kinds of foreign and English wools took place here on the 21st inst., and closed on the 23rd inst. The total quantity of those wools amounted to 11,700 bales, the more current descriptions of which found ready buyers at full prices, especially such wools as are now in request for the States, and our market is left very bare of them at present.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 25.—The market to-day is rather quieter, and wheat and flour are a slow sale, at about 3d per cental and 6d to 9d per barrel reduction; the feeling, however, is better. Indian corn, 1s 6d to 1s 9d lower.

The Gazette.

TUESDAY, Oct. 22.

BANKRUPTS.

R. Cowtan, Lyon street, Caledonian road, grocer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 12th of October amounted to 565,420*l* and for the corresponding week of last year to 555,720*l*, showing a increase of 9,700*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 264,414*l*, and for the corresponding week of 1860 to 261,347*l*, showing an increase of 3,067*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct. 21.—The railway market to-day was rather dull. London and North-Western was especially heavy, at a decline of ½ per cent. Midland, Lancashire and Yorkshire, and South-Eastern also exhibited a fractional reduction. Sheffield, on the other hand, improved ½ per cent., and North British ¼. The transactions during the day were of little importance. In the colonial market, Grand Trunk of Canada improved to 20 to ½, and Great Western to 9⅝ to ¾. India guaranteed also presented an upward tendency, East Indian being last quoted 101½ to 102. Foreign shares again showed increased firmness. A renewed fall took place in Victoria debentures, the final quotation being 103¾ to 104¼. New South Wales bonds were also lower. American securities improved, especially United States Five per Cents., Erie ordinary and preference shares, and Illinois Central. Mines were rather dull, except St John del Rey, in which a fresh rise took place.

TUESDAY, Oct. 22.—The railway market to-day was steady, with little doing. Lancashire and Yorkshire and Midland showed the chief firmness among the heavier stocks, while London and North-Western remained heavy. Berwick, Caledonian, Sheffield, and Eastern Counties slightly improved. Colonial descriptions were without material change. East India left off at 101½ to 102; Grand Trunk, 20 to ½, and Great Western of Canada, 9½ to ⅝. In the foreign market, Great Luxembourg shares were again higher, while Lombardo-Venetian receded to ⅝ to ¾ prem. In American securities, Erie preference shares were lower. There were few transactions in mines, but in some cases, especially St John del Rey, an advance took place. Bank shares were rather dull, except London Joint Stock, which fractionally improved. In miscellaneous descriptions, there was a rise in Berlin Waterworks and Crystal Palace.

WEDNESDAY, Oct. 23.—The railway market to-day was generally firm on the increase in the traffic return of the London and North-Western, Midland, Lancashire and Yorkshire, and North-Eastern stocks improved ¼ to ½ per cent. South-Eastern, on the other hand, receded ⅜ per cent., and Sheffield, ¼. The general business continued limited. In the colonial market there was no movement of importance. East India left off at 101½ to 102; Grand Trunk, 20 to ½; and Great Western of Canada, 9⅝. Foreign descriptions continued steady, Belgian shares being chiefly in demand. Lombardo-Venetian closed at ⅝ premium. New South Wales and Victoria Government debentures again receded, the latter closing at 103½ to ¾. American securities were firmer, Erie and New York Central shares especially showing an improvement. Mines were rather dull, and in some cases a decline occurred. St John del Rey, however, continued to advance. In joint stock banks there was a rise in City shares.

THURSDAY, Oct. 24.—The railway market to-day opened buoyantly on the good traffic returns, but almost immediately relapsed, and closed rather lower than in the morning. Compared with yesterday, however, some stocks showed an advance, especially Great Western and Eastern Counties. Lancashire and Yorkshire and Midland were also in demand, and firm. Great Northern, on the other hand, receded to 111½ to 112½, and the A stock to 109½ to 110¼, being a respective decline of ½ and ¼ per cent. Caledonian and Sheffield likewise receded. The principal feature in the colonial market was an improvement in Indian guaranteed stocks. Foreign descriptions were firm, Bahia, Great Luxembourg, and San Paulo especially showing an advance. In American securities there was a decline in Erie ordinary and preference shares. Mines were inactive, but occasionally exhibited a slight rise.

FRIDAY, Oct. 25.—The railway share market to-day was firm. Great Western, Midland, and Lancashire and Yorkshire stocks advanced ½ to ¼ per cent. Other descriptions scarcely varied. Lombardo-Venetian Railway shares were quoted ⅝ to ¾ pm. In the mining share market, very few changes took place.

The Economist's Railway and Mining Share List.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT,

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON. PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

THE ONLY STOVE WITHOUT A FLUE.

JOYCE'S PATENT for warming Chapels, Halls, Shops, Conservatories, and all other places. Price from 12s 6d each.

JOYCE'S STOVES are portable and economical, and burn twelve hours with one supply of fuel, requiring no attention.

SWAN NASH, PATENTEE,
253 Oxford street;
AND JOYCE'S STOVE DEPOT,
119 Newgate street, London.
Illustrated Catalogue post free.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

FORD'S FLANNEL SHIRTS.—Patterns of all the newest designs in fancy wove and printed flannels sent per post free.
RICHARD FORD and CO., Patentees, 38 Poultry, London.

FORD'S EUREKA SHIRTS are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.
RICHARD FORD and CO., 38 Poultry, London, E.

LAMBERT BROTHERS,
Walsall, Staffordshire, (Established 1830,)
Manufacturers of
WROUGHT-IRON WELDED TUBES & FITTINGS,
Chandeliers, High Pressure Steam and Water Valves.
Patent Metallic Bedsteads for exportation.
*** Illustrated catalogues on application.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.
Oxford street, London.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

CURE OF A LONG-STANDING COUGH BY DR LOCOCK'S PULMONIC WAFERS. "Glasgow, No 2 Trongate. Sir,—Miss Jemima Livingstone, aged eighteen years, residing at the Calton Hill, Edinburgh, was for a long time afflicted with a very severe cough and irritation of the air passages. Both external and internal medicines were used, but with little effect, until as a last resource Dr Locock's Pulmonic Wafers were tried, and we are happy to say with best results. We may mention, as further recomendation, that the young lady's father is a medical man, and administered the wafers to her himself. Yours, &c., J. R. and M. ALLEN." DR LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To Singers and Public Speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."
Dr LANKESTER, F.R.S., Superintendent of the Food Collection, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

GLENFIELD PATENT STARCH,

USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR

GLENFIELD PATENT STARCH,

see that you get it, as inferior kinds are often substituted.

WOTHERSPOON and CO., Glasgow and London.

GREAT FIRES IN BELFAST,

in which nine of MILNER'S SAFES (six in the first and three in the last) have preserved their contents. The following is one of the certificates from all the owners:—

(Copy.)

"Messrs Thos. Milner and Son.

"Belfast, February 13, 1861.

"Gentlemen,—We beg to say that the block of buildings in Bedford street, in which our warehouses and offices were situated, was totally destroyed by fire on the 8th instant, but we are happy to say that all our books contained in two of your Safes were found, on forcing the Safes open, to be perfectly secure and the writing quite legible, though the edges and some leaves were stained by the steam, and some of the covers damaged by adhering to the sides of the Safes from the heat to which they were exposed.

"We are, Gentlemen, your obedient servants,

"J. B. RALSTON and Co."

Milner's Phœnix Safe Works, Windsor, Liverpool.

London Depot, 47A Moorgate street, City.

PROSPECTUS.

The London and Lancashire Insurance Company is established for the purpose of extending to Liverpool, as well as to London and elsewhere, that addition to the facilities for Fire Insurances which was recently demanded for the Metropolis, and which the extraordinary increase in the commerce of Liverpool constitutes an urgent necessity. In so doing the Directors propose to take advantage of the experience of existing institutions, to introduce new principles of practical utility, and, in addition, so to construct the Institution as to afford the greatest possible benefits to the shareholders, insurers, and to the public generally, consistent with the well-being of all concerned. The Directors do not profess to transact business at lower rates than those ascertained by experience to be remunerative; but, having thus provided for the security and profitableness of the business transactions of the office, they extend the Mutual principle to Fire Insurance, and make the holders of fire policies participators in the profits, after appropriating a sufficient sum for a reserve fund. When the certainty and extent of success that has attended every well-managed fire office are considered, it would appear that the present is a period when new institutions, based on the experience of time and observation, should be promoted for and supported by the public generally, for the purpose of preventing monopoly on the one hand, and for the development and progression of principle on the other.

In 1841 the total sum in Great Britain insured against fire was seven hundred and thirty-eight millions sterling; in 1851 it had increased to eight hundred and fifty-eight millions, eight hundred thousands; and in 1861 it is estimated to have advanced to twelve hundred millions, or to one-third more than the amount of the National Debt.

In the course of twenty years, therefore, the field occupied by fire insurance widened at the rate of twenty-three millions per annum.

As an illustration of this increase it may be mentioned that, in London alone, the inhabited houses which in 1851 numbered 305,933, had in 1861 increased to 362,890, showing an addition in ten years of no less than 56,957 houses, or an average increase of 5,695 houses per annum.

But although the value of property protected is of vast amount, the value remaining unprotected far exceeds it; and the difference between insured and uninsured is constantly augmenting.

The enormous business of fire insurance in the United Kingdom is confined to so few as fifty-two offices, of which two are in Ireland, six in Scotland, twenty-one in English country towns, and twenty-three in London.

The relative smallness of this number and the vast amount of insurance committed to each, on the average not less in value than £22,000,000, has led, in some cases, to excessive or capricious charges, want of confidence, and to a general lessening of the practice of Insurance.

Considerations of this description, in connection with the promised support of a very large number of the most influential merchants in London and Liverpool, have led to the formation of the "London and Lancashire Fire Insurance Company."

FIRE INSURANCE COMPANIES AS INVESTMENTS.

The following facts may not be uninteresting to those who, being desirous of meeting with good investments, are unacquainted with the true nature and value of shares in fire offices. The following table exhibits the names of twelve offices, the dates they were founded original cost and present value of the shares in each; perusal of which will enable the reader to form some estimate of the security attaching to fire insurance as a business.

Name of office.	When found-ed.	Original cost of shares.			Present value.			Increased value per cent.

A WELCOME ANNOUNCEMENT.

E. MOSES AND SON

beg respectfully to acquaint the public that they have made preparations, on an unprecedentedly large scale, for the Autumn and Winter Seasons. Their stock of OVERCOATS comprises every modern style in all kinds of seasonable and serviceable materials, with the latest improvements in workmanship. The Eversley and Shelburne overcoats are particularly recommended.

Their general stock includes every description of attire for all classes, all ages, and all occupations; the articles are too numerous to particularise, but may be gathered from their several trades of—

READY-MADE AND BESPOKE TAILORS, HABIT MAKERS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Their BESPOKE CLOTHING DEPARTMENT is too important a branch of their business to be passed over without a special notice. It offers a perfect fit, combined with the most fashionable and comfortable styles, and the most elegant workmanship.

E. MOSES and SON need scarcely remind the public that in every department of all their establishments the Highest Degree of Excellence is associated with Prices the Most Moderate.

Any article not approved of will be exchanged or the money returned.

Rules for self-measurement and lists of prices post free.

E. MOSES and SON'S establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.

BLAIR'S GOUT AND RHEUMATIC PILLS.

—Price 1s 1½d and 2s 9d per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

A very brief explanation is alone required of the objects of this Company.

1. The Red Sea and Indian Telegraph Company, upon the guarantee of Her Majesty's Government of 4½ per cent. per annum for fifty years, have expended £800,000 in laying a cable between Suez and Kurrachee.

2. Every section of this line worked satisfactorily for a period of several months, and the whole line carried through messages between Kurrachee and Suez for several days. Faults subsequently occurred in several of the sections, which have never been repaired.

3. The Government have agreed to transfer the line, stations, and property of the Company to a new Company, to be formed for the purpose, on very liberal terms. These are in substance—

1st. That the cables, land lines, instruments, stations, concessions, &c., belonging to the old Company, shall be made over to the new Company, free of charge.

2nd. That the new Company shall use their best endeavours to repair the line and to work it when completed, beginning with the line between Aden and Kurrachee; and are to have possession so soon as two-thirds of the capital is subscribed, and one-third paid up, and a suitable vessel despatched with not less than 200 miles of new cable on board.

3rd. That the new Company shall be entitled to a clear dividend out of the profits to 25 per cent. per annum on the money paid up; and the Government is to have the power to re-purchase the line on repaying the capital expended, at the expiration of 30 years.

4th. That any surplus profits shall be applied to reimburse the Government for the interest they have paid and will have to pay annually upon the original capital expended; after which any further profits which may accrue will be applied to the creation of a reserve fund.

5th. The accounts of the Company will be audited at the Treasury half-yearly. After the restoration of the line any outlay of capital to be subject to the approval of Government, and the Government is to have the right (subject to arbitration) of disallowing working expenditure which they may consider excessive.

6th. In the event of the failure of the Company to restore or maintain the line in working order, the Government are to have the power of taking it into their hands again, on repaying the capital actually expended by the new Company. Should the Government not exercise this right, the Company are to be at liberty to dispose of the property to reimburse their outlay; the balance, after defraying the actual expenditure, to be handed over to the Government. Failure is to be defined to be the non-working of the line from end to end, after reasonable allowance of time for restoration.

7th. All differences between the Government and the Company to be decided by arbitration.

8th. This arrangement presupposes the concurrence of the shareholders of the old Company in the terms proposed to them by Her Majesty's Government; any Parliamentary powers necessary to give effect to these arrangements are to be obtained by Her Majesty's Government.

4. Of the vast importance, in a national point of view, of telegraphic communication with the British dominions in India, there can be but one opinion; and now that the communication is complete from London to Suez, and throughout all India by Kurrachee, it is impossible that the matter can be left in its present condition, and the wanting link unsupplied.

5. The grounds which commend the subject as a speculation are these:—£800,000 has been expended in laying a line which for a time was perfectly successful. This line will be handed over to the Company, free of all charge or liability. No attempt has as yet been made to restore the communication between Aden and Kurrachee. On the other hand, the Company's Superintendent, Mr Brunton, has expressed a confident opinion that the faults are many of them very trifling, and all capable of repair. This view is confirmed by the opinions of Sir Charles Bright and Mr Latimer Clark, who have been consulted on the subject. In one of these sections, of nearly 500 miles, there has never been any fault, and those which do exist in the other sections are believed to be in shallow water. An estimate has been made by Messrs Bright and Clark of the cost of repairing the line between Aden and Kurrachee, which they consider can be effected for a sum not exceeding £50,000. The venture is small, while the returns will be on the scale of the original expenditure of £800,000.

6. It is proposed to limit the first operations to the repair of the line between Aden and Kurrachee. When this is effected, the period of a message to all parts of India will be abridged to five days. This will be not only a vast public object, but there is no doubt, from the experience of the line when partially open, that the number of messages will be very great.

7. When this Eastern division has been completed, there will remain only that between Suez and Aden, which can undoubtedly be made good by restoration of the existing cable, in whole or in part. If it should be decided to make any part of it a land line, it can be done at comparatively small cost.

8. The intention is, as soon as the capital or a sufficient amount has been subscribed, to despatch a steamer with 200 miles of new cable, so as to complete the communication up to Aden early in 1862.

Forms of Application for Shares and information may be obtained at the Offices, or from the Company's Brokers, Messrs Knight and Coleman, No. 1 Royal Exchange buildings.

TELEGRAPH TO INDIA COMPANY

(Limited).—Notice is hereby given, that in order to give time for the receipt of Applications for Shares from the country, the Lists will Remain Open till this day Saturday, the 26th inst., at Two o'clock, after which time no application will be received.—By order of the Board, C. L. PEEL, Secretary.

62 Moorgate street, Oct. 26, 1861.

BIRMINGHAM JOINT STOCK BANK (Limited).

To be incorporated under "The Joint Stock Banking Companies Act, 1857," the liability of each Shareholder being limited to the amount of his shares, by 21 and 22 Vict., c. 91.
Capital £500,000, in 5,000 shares of £100 each.
Deposit of £5 per share on allotment.

Mr Robert Wright (Wright and Hill), Temple row west.
With power to add to their number.

SOLICITORS:
Messrs Harding and Son, 32 Waterloo street, Birmingham.

Twenty-five years have elapsed since a Joint Stock Bank was established in Birmingham. During that period the population of the town and neighbourhood has nearly doubled, and its wealth and trading operations have increased in an equal or greater ratio. It has long been a matter of surprise that the requirements of this rapidly increasing manufacturing and trading community have not sooner been met by the formation of another Joint Stock Bank, a course obviously more desirable than that of allowing the want to be supplied by branches of Metropolitan establishments.

The restrictive provisions of the Act of 1844 have no doubt operated against the establishment of another Bank in this town, while the risk of Shareholders in Joint Stock Banks, formed on the principle of unlimited liability, has deterred many from investing their capital in such undertakings.

Both of these obstructions have been removed—the first by the repeal of the restrictive provisions of the Act of 1844, the second by the passing of an Act to limit the liability of Shareholders in Banks complying with its provisions to the amount of their subscribed capital.

It is proposed, therefore to establish the "Birmingham Joint Stock Bank" on this principle of limited liability, accompanied by such guarantees as shall ensure the confidence of the public and the interests of the Shareholders. With this view it is intended that not more than £25 per share of the entire capital of £500,000 shall be called up, so that there will remain a reserve of capital amounting to £375,000 available to meet the engagements of the Company. It is also determined that no Dividend beyond Five per Cent. per annum shall be paid until a Guarantee Fund shall have been created out of profits amounting to at least one-fifth of the paid-up capital. Provision will also be made that the Company shall be dissolved in the event of the Guarantee Fund and one-fourth part of the paid-up capital being lost.

No Director will be permitted to overdraw his account, or to be a holder of less than fifty shares.

The Provisional Committee will, after the allotment of shares, appoint the first Board of Directors, who will thereupon make the necessary arrangements with London and Provincial Agents, and also appoint the Manager and other officers.

The foregoing are the principle rules by which the "Birmingham Joint Stock Bank (Limited)" will be governed, and the promoters feel confident that with such guarantees for the stability of the Bank, and with prudent yet liberal management, the undertaking cannot fail to be profitable to the Shareholders and advantageous to the public.

Very suitable buildings have been secured in Temple row west (formerly occupied by the New Liberary), and it is hoped that arrangements may be made for commencing business in January next.

Five Pounds per Share must be paid on allotment, and any sum not exceeding £5 per share as soon thereafter as the Directors may think fit. No subsequent call will exceed £5 per Share, and not less than three months intervene between any two successive calls.

Applications for Shares, in the annexed form, to be made at the offices of the Solicitors, No 32 Waterloo street, Birmingham, from whom Prospectuses may be obtained.

FORM OF APPLICATION FOR SHARES.

To the Provisional Committee of the Birmingham Joint Stock Bank (Limited).

GENTLEMEN,—I request you will allot me shares in the above Company, subject to the Memorandum and Articles of Association of the said Company, and I accept such shares, or any less number that may be allotted to me, and agree to pay the sum of £5 per share on allotment, and the remaining calls when they become due, and I request to be registered for the shares allotted to me.—Your obedient servant,

SECRETARY AND ENGINEER—James Wright, Esq., E.C.
OFFICES—London, 42 Bridge street, Blackfriars.

ABRIDGED PROSPECTUS.

This Company is incorporated for the purpose of establishing a colliery, and raising the well-known Silkstone coal upon the estates of the Dukes of Devonshire and Rutland, at Sheepbridge, in the vicinity of Chesterfield.

From accurate surveys made by the most eminent mineral engineers, the Directors can with confidence predict that the returns upon the capital will, at the very least, be 21 per cent., while the facilities for winning the coal are such as to render it almost a certainty that dividends will be paid within twelve months from the commencement of the works.

The coal is the Silkstone, well known as the best suited for domestic use, and for which the demand, both in the locality of the works as well as in London, is almost unlimited, and at the highest prices.

From the reports given by different mineral surveyors, and taking the highest of their estimates, it will be seen that the coal can be raised, and put in the railway waggons at a cost not exceeding 4s 6d per ton (including all royalties, expense of management, and a fair allowance for the redemption of capital expended in opening the colliery). After deducting these from the lowest prices now ruling in the neighbourhood, there is left a clear average profit of 1s per ton, or an annual income of £8,750, being upwards of 22 per cent. on the total capital of £40,000, even should the whole be required.

Although the Directors have fixed the capital nominally at £40,000, it is almost certain that little over two-thirds of that amount will ever be required; hence it is thought probable that the total calls on each share will not exceed £3 10s at most; these will be asked for in 10s per share on application, £1 on allotment, and the remainder in calls of £1 each as required; and in no case will the calls be at less intervals than three months; and unless at least one-half of the capital be subscribed, all deposits will be returned in full.

Surveyor's reports, together with prospectuses and forms of application, may be had at the Company's office, 42 Bridge street, Blackfriars, London, E.C.

THE CHESTERFIELD AND MIDLAND SILKSTONE COLLIERY COMPANY (Limited).

All Applications for Shares in this Company must be made on or before the 26th inst., after which time the list will be closed, and the allocation of shares proceeded with according to priority of application.

EASTON'S PATENT BOILER FLUID

effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

HOLLOWAY'S PILLS.—

Fogs, Fevers, Influenza.—In all large and populous cities the air is more or less vitiated; and malaria always causing disease. To counteract the maladies arising from these pestiferous vapours, nothing is so safe and certain as Holloway's Pills. They act on the human blood as a filter acts on dirty water, and like it remove mechanically or chemically all gaseous or fluid impurities, and all noxious matters. These admirable Pills possess every attribute requisite for a purifying, preservative, or restorative remedy. They successfully grapple with indigestion and fever, and what is still more astonishing, while they thoroughly cleanse the entire system, they regulate and strengthen every individual organ. Holloway's Pills suit either sex, all ages, and every climate.

THE ROODEE IRON SHIP BUILDING COMPANY,

Incorporated under Limited Liability.

SECRETARY PRO TEM.—Mr H. W. Pearson.

OFFICES—12 Gresham House, Old Broad street, London, E.C.

This Company is formed for the purpose of purchasing the business, and extending, by means of additional capital, the well-known Roodee Iron Ship Building Establishment, on the banks of the Dee, at Chester, where the depth of water ranges from 17 to 20 feet, and vessels exceeding 2,000 tons have been already launched.

From the following statement it will be perceived that the locality possesses advantages in respect of iron, coal, labour, rent, &c., which places it in an unrivalled position in comparison with any establishment of a similar description in the United Kingdom.

					276 0 0	46 0 9
Rent and Taxes	£1,000	£120	£880			

Independent of the saving in rent, taxes, and management, this statement exhibits the important result of an actual gain of nearly 20 per cent. in favour of building iron ships at Chester; and it will be perceived upon analysis of the account, that for every £400 spent in wages per week, which would present a comparatively minimum scale of business, there would accrue a positive advantage to the shareholders of £72 3s, equivalent to £3,750 per annum. The saving in the cost of materials will be even larger.

At the present time the yard is in complete working order, and is capable of turning out £150,000 worth of work in a year, with the existing plant and machinery; but the contemplated erection of additional workshops, and the extension of the space necessary for laying down vessels, will enable this to be increased to £500,000, with, relatively, very little increased annual expense in management, rent, and taxes.

The Directors have been enabled to secure the whole property at a valuation, the proprietor receiving the whole of the purchase money in shares.

In all contracts for building ships it is usual to have the payments made according as the work proceeds, and to retain the security of the vessel until final payment is made; and it is on this account that a capital of £100,000, with proper management, will be ample to carry on a business to almost any extent, and as a minimum profit of 10 per cent. is calculated upon all estimates for work undertaken, the subscribers may confidently anticipate dividends of at least 20 per cent. per annum on the capital invested.

Iron is superseding wood in the construction of ships, and with our unlimited resources of that material, the cheapness and abundance of coal, and the natural skill of English artificers in iron, it may be correctly assumed that England, before the expiration of many years, will acquire almost the entire ship-building business of the world; and in the re-construction of our navy there is little doubt it will be found desirable to intrust the building of iron vessels to private yards possessing facilities or working in that material, which do not exist in the dockyards. Of the growing importance of Iron Ship Building, sufficient evidence exists in the following letter:—

"WOODEN WALLS AND IRON SIDES.

"To the Editor of the TIMES.

"Sir,—You have asked for an explanation of the recommendations of the 'Clarence Paget' of America to President Buchanan, on the subject of wooden walls. The explanation is the simplest possible. The entire Mercantile Steam Navy of Great Britain, with the exception only of some old vessels, is of iron. The entire Mercantile Steam Navy of America, without any exception known to me, is of wood. The reason is obvious. Timber is one of the staples of America, and we are obliged to import large quantities of it from America into England. Iron is the staple of England, and America is obliged to import large quantities of it from us. Hence, America builds timber vessels far cheaper than we can. We build iron vessels far cheaper than America can.

"With these facts before us, we can readily infer—first, that there are no establishments, manufactories, or skilled artificers in America, prepared for the business of iron ship building; secondly, that the introduction of iron in substitution for wood, gives to England (the country of iron) the means of attaining and maintaining an ascendancy over any other country in the matter of iron fleets; thirdly, we see why, in wooden ships, America had the advantage over us, and she had the wit to use it; fourthly, she now sees clearly that we have in future the advantage over her, and she waits to see if we have the wit to work it.—I am, &c.,

"Westminster, 12th July, 1861." "J. SCOTT RUSSELL.

The convenience of the position, and the ample space for the extension of the premises at a mere nominal rent, renders it a certainty that this establishment will become one of the most extensive and important Iron Ship-building Yards in the world.

It has been thought desirable to fix the head offices in London, in order to enable the Board of Directors to communicate directly with the agents of Foreign Governments who may be desirous of entering into contracts for the Supply of Iron Vessels from this Yard.

The accompanying letters afford a favourable testimony of the character of the work hitherto turned out from this Establishment:—

"Liverpool, 25th March, 1861.

"Dear Sir,—It gives us much pleasure to state that the iron ship Wayfarer, 1,329 tons, which you built for us, is considered to be the handsomest and best finished vessel ever yet seen in the Mersey; and, in point of strength and good workmanship, we think it reflects the highest credit on your works.—Yours most respectfully,

"To N. Cox, Esq., Roodee Ship-yard, Chester." "G. H. FLETCHER and CO.

"Liverpool, 27th March, 1861.

"Dear Sir,—We have much pleasure in stating, with reference to the new iron ship Gitana, 1,340 tons, which you have just finished for us, that we consider her, in material, workmanship, and finish, as fine a ship as can be built in this country, and for this reason we give you the order for a second nearly similar vessel. Having built a good many large first-class ships with eminent builders, our opinion of the work you turn out from the Roodee Ship-yard may be of service to you, and if we can give you a special recommendation to any of our friends, we shall be most happy to do so.—Yours most respectfully,

"To N. Cox, Esq., Roodee Ship-yard, Chester." "CHARLES MOORE and CO.

A large number of shares (independently of those taken by the present Proprietor in payment for the property) has been already subscribed for in Liverpool and the locality.

Prospectuses and Forms of Application for the remaining Shares may be obtained from the Secretary or the Brokers of the Company; but no application will be considered unless the deposit of 10s for each share applied for shall have been previously paid. This sum will be returned if no allotment is made to the applicants.

Oct. 22, 1861.

GOOD DIVIDENDS.—Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C., have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ¼, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

WHOLESALE HOUSES, Merchants, Shipers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 1½ Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

BRITISH AND FOREIGN INVESTMENT.

Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good pregressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

DENT, CHRONOMETER, Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Manufactories—Albert Works, Nightingale street, Strangeways, Manchester, and Carlisle Works, Abbey Town, near Carlisle.

The above Company has been established for the more extended manufacture of the Royal Patent Compound Oil Cake for Cattle, the Compound Feeding Meal, the original economic food for cattle, and patented, superphosphate, and other standard chemical manures.

To manufacture these reliable articles at a remunerative profit, and afford to all consumers an opportunity of participation,—to reduce price and carriage so as to increase demand and facilitate it,—and to effect this by reciprocal benefit to consumer and Company, are objects which furnish a claim on public attention and public support.

By means of local manufactories in certain districts, this will be effected, and the daily augmenting demand which has made them necessary, supplied.

The Company starts with possession of two manufactories fitted with machinery,—one at Manchester, and one at Carlisle,—a large, lucrative, and established business,—an existing staff of 500 agents to extend it, and has secured practical management in their Directory.

It is estimated that the Manchester mill can produce a gross return in cake, meal, and food alone of £800 a week, and that the Carlisle mill can return about £500 a week, making a total of £1,300 per week; the profits upon which—necessarily private, from the nature of the business—will provide an ample margin for a dividend of from 20 to 30 per cent. upon the capital invested. The erection of wooden sheds adjacent to these mills will be all that is necessary to enable them to make a sale of 1,000 tons (say £5,000 worth) of manure per annum, a mere moiety of the demand of these districts.

In anticipating the results of the operations of the Company on the wide basis on which it rests, it has been calculated that with the 500 agents now connected with the Company, and exclusive of a London trade, supposing them to average a return of only half a cwt of food and half a ton of cake per week each, the gross returns of the Company will be, in round numbers, £182,000 per annum. Assuming they double that return, you have £364,000 per annum; and we may be allowed to observe, that at this average return falls far short of what the working agents, during the late proprietors' experience, effected. The United Kingdom cannot be well covered under 1,000 agents; and assuming their return to be but on the basis of the first calculation, you still have £364,000 per annum income, while this latter calculation may be considerably increased by additions to the business which the agents can effect, or which may be received from direct customers.

The cost of production and working expenses would, of course, be much less upon this return than on a smaller one. And it would be but a moderate expectation that a return of 5,000 tons of manure, which, at £5 per ton, would be £25,000 per annum, could certainly be effected through the same connection.

Sufficient has now been stated, in the limited space of a prospectus, to prove that an exceptional opportunity is presented for effecting a certain and profitable investment in a commercial business, which possesses every element of secure prosperity, and offers an unprecedented advantage to the investor. And the Directors are confident in the belief that the undertaking will receive that support to which it is entitled by the objects it has in view, from all persons interested in agricultural matters, as well as from those whose only desire is to make a successful investment.

The full prospectus, testimonial circulars, and share application forms can be obtained from all the local agents, the brokers, auditors, bankers, and solicitors; and from the secretary, at the chief offices of the Company.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT COMPANY.

The Directors are prepared to comply with all applications for their Debentures at par. They are issued in sums of £50, £100, £500, and £1,000, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in mortgages of improved freehold land of very ample value, the Company by its charter being in every case first mortgagee.

Individuals and public institutions, who usually lend on mortgage, are offered a higher class security than is afforded by the old mortgage system.

The interest is payable by coupons, on the 1st January and 1st July, at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, and the same is receivable through any of the country banks.

The last half-yearly statement and the Debentures may be had at the Company's brokers, Messrs Brunton and Son, Auction Mart chambers, Bartholomew lane, London, E.C.

TO BANKERS, INSURANCE COMPANIES, BROKERS, AGENTS, and other CAPITALISTS, &c., &c.

LOANS OF MONEY.

The Corporation of Dublin, being empowered by "The Dublin Corporation Waterworks Act, 1861," to borrow on mortgage, for the purpose thereof, the sum of £300,000, on the security of the rates leviable under said Act, and being desirous of immediately raising a portion of said sum on such security, will, before the 11th day of November next, receive written tenders from all persons willing to advance the same, or any part or parts thereof, for such term or time as may be agreed on, at the rate of 4½ per cent. per annum, payable half-yearly.

To facilitate the sale, transfer, or other disposition of the securities, the Corporation will grant, at the option of the lenders, one or more mortgage or mortgages for the sums to be advanced by them respectively, but no instrument will be issued for any sum under £100 sterling.

For further particulars as to the nature and value of the security, and the statutable powers and provisions in reference to the same, apply to Alexander Farquhar, Town Clerk, City hall, Dublin.

All tenders to be under cover, and addressed to "The Waterworks Committee," City hall, Dublin.—By order,

ALEXANDER FARQUHAR, Town Clerk.

City hall, October 23, 1861.

BLACK BALL MONTHLY AUSTRALIAN CLIPPERS.

From LONDON direct.

SYDNEY packet for 10th November, the new Aberdeen clipper,

LIBERATOR, 1,200 tons, Martin, Commander.

This clipper, constructed by the famous builders Messrs A. Duthie and Co., of Aberdeen, with superb passenger accommodation, specially for the Sydney trade, has just returned from her first colonial voyage, and offers to persons embarking for this colony, and to shippers of fine and season goods, by far the best opportunity on the berth. To be followed, as

SYDNEY packet for 10th December, by the unrivalled CAIRNGORM, 1,800 tons, the fastest ship in the trade.

MELBOURNE packet for November, receiving goods in the London Dock until the 25th, unless previously full, the superb Black Ball clipper ship,

SOLWAY, 1,800 tons, Duguid, Commander.

This high class English-built clipper, A 1 at Lloyd's for 13 years, just returned from her third voyage, offers unsurpassed opportunities to shippers of fine and season goods, and superb accommodation for all classes of passengers. Victoria warrants taken in part payment.

QUEENSLAND packet for November, now loading, CLIFTON, 1,500 tons, Beasley commander, to embark passengers at Gravesend, on 15th November, and will call at Plymouth. This fine English-built clipper has proved capable of great speed, having made the run from Plymouth to Australia in 72 days; has superior accommodation for all classes of passengers, and will carry an experienced surgeon. To be followed, as

QUEENSLAND packet for December, by the Black Ball clipper,

MONTMORENCY, 1,500 tons, A 1 at Lloyd's (special survey).

For all particulars respecting freight or passage to Australia, apply to JAMES BAINES and CO., Liverpool; all Agents for the Black Ball Line; and to T. M. MACKAY and CO., 9 Leadenhall street, E.C.

THE MISSIONARY IN MADAGASCAR.

4th Thousand, with Map and Illustrations, 8vo, 16s,

THREE VISITS TO MADAGASCAR,

in 1853-56, including a Journey to the Capital, with Notices of the Natural History, and of the Present Civilisation of the People.

By Rev. W. ELLIS,

Author of "Polynesian Researches."

"In the revived interest attached to Madagascar by the important changes that have taken place in that Island, we should urge those who have not read the Rev. Wm. Ellis's most interesting volume to turn to it at once for the sake of making themselves acquainted with the history of civilisation and Christianity there."—PATRIOT.

"What Dr Livingstone has done for Central Africa, Mr Ellis has accomplished for Madagascar. He has brought to light the interior of an unknown region, and laid open a new field of vast importance for European and transatlantic enterprise. That Madagascar will very soon be accessible to our trade and commerce it is impossible to doubt, after the recent instances of China and Japan."—CHRISTIAN OBSERVER.

LUCRATIVE MERCANTILE BUSINESS, established upwards of 20 years, to be DISPOSED OF under peculiar circumstances. No Stock or Book Debts to be taken, but a considerable capital is necessary, and a suitable premium required, the payment of which may be deferred on terms to be arranged.—Principals only can obtain further particulars on personal application to Messrs DEBENHAM and TEWSON, 80 Cheapside.

TO CAPITALISTS AND OTHERS.—Occasional Discount of Bills—required from £100 to £500—at 8 per cent. Payment guaranteed independent of the drawers or acceptors.—Address A. Davis, care of Mr Bailey, 26 Skinner street, Snow hill, E. C.

TO BANKS AND PUBLIC COMPANIES.—A Gentleman who has had during the last six years charge of Branches of a Bank of issue doing a large discount and general business, wishes an appointment as Manager or Secretary. No objection to go to any place not in the Tropics. Can give references of the most unexceptional character.—Address D., care of Messrs Pearson and Son, 35 Bishopsgate street, E.

PARTNER.—WANTED, a Gentleman of business habits, and with a capital of £1,000, to join an old-established business in London. Principals only treated with. References exchanged.—Apply to Mr Bailey, 26 Skinner street, Snow hill, E.C.

PARTNER WANTED, with a capital of about £10,000, in a large and very old-established manufacturing concern, in Staffordshire, yielding steady and profitable returns—Apply to Mr W. H. Duignan, solicitor, Walsall.

PARTNERSHIP.—A GENTLEMAN, aged 35, of nineteen years' Mercantile experience (the latter ten as principal), wishes to join a well-established firm. Speaks five languages. Can introduce about £3,000, and give the highest references.—Address M., care of Messrs Pearson and Son, 35 Bishopsgate street, E.

WANTED, BY A GENTLEMAN of experience, a situation as Bookkeeper or in a similar capacity; corresponds in English, French, and German, and knows Spanish and Italian; age 26, married; no objection to go abroad. Good references and testimonial from his late employers.—Address A. H., care R. Dressel and Co., 146 Leadenhall street, E.C.

£1,000 WANTED, WITH AN active or silent partner, in the establishment of a manufactory of a leading staple which commands cash in market at all times, and can be demonstrated by an establishment now in operation to afford a large profit with little risk or disbursement in machinery or apparatus.—A conference can be had by addressing Staple, 100 Fleet street.

A THOROUGHLY ROUTINERY German Gentleman, 29, who has held for several years a prominent position in a London Import and Export House of Colonial and other Produce, who has a good knowledge of many leading articles, is an efficient bookkeeper by single and double entry, as well as a fluent correspondent in English, German, and French, is desirous of meeting with a suitable engagement. He could superintend an office or business. Best references. No objection to go abroad.—Address to A. Z., 84 Basinghall street, E.C.

TO BANKERS, INSURANCE COMPANIES, BROKERS, AGENTS, and other CAPITALISTS, &c., &c.

LOANS OF MONEY.

The Corporation of Dublin, being empowered by "The Dublin Corporation Waterworks Act, 1861," to borrow on mortgage, for the purpose thereof, the sum of £300,000, on the security of the rates leviable under said Act, and being desirous of immediately raising a portion of said sum on such security, will, before the 11th day of November next, receive written tenders from all persons willing to advance the same, or any part or parts thereof, for such term or time as may be agreed on, at the rate of 4½ per cent. per annum, payable half-yearly.

To facilitate the sale, transfer, or other disposition of the securities, the Corporation will grant, at the option of the lenders, one or more mortgage or mortgages for the sums to be advanced by them respectively, but no instrument will be issued for any sum under £100 sterling.

For further particulars as to the nature and value of the security, and the statutable powers and provisions in reference to the same, apply to Alexander Farquhar, Town Clerk, City hall, Dublin.

All tenders to be under cover, and addressed to "The Waterworks Committee," City hall, Dublin.—By order,
ALEXANDER FARQUHAR, Town Clerk.
City hall, October 23, 1861.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.		Amount payable up to Dec., 1854.	
£	£	s	£	s
5,000	1,987	10	6,987	10
1,000	397	10	1,397	10
100	39	15	139	15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification; adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the Commercial community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust they will be supported by the public to enable them to carry out this system with success.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

TAYLOR, WATT AND CO.,

Merchants, Auctioneers, Commission Land and Estate Agents, Wanganui, Province of Wellington, New Zealand.

London Agent:—BERNARD LEWIS, WINE and COLONIAL MERCHANT, St Michael's House, Cornhill.

Wanganui, 4th July, 1861.

No charge for storage on goods consigned for sale.

SWEDISH PROVINCIAL

MORTGAGE LOAN for £450,000 sterling, negotiated in 1852 by Messrs Palmer, Mackillop, Dent, and C., and Messrs Charles Tottie and Sons.—Notice is hereby given, that in conformity with the stipulations of the contract for the said Loan providing for the liquidation of the same, there were this day drawn by lot, in the presence of William Tottie, Esq., His Swedish and Norwegian Majesty's Vice-Consul, William Webb Venn, public notary, and two witnesses, the undermentioned Seventeen Bonds of the said Loan, amounting to the sum of £3,100 sterling, to be Paid Off at par on Monday, 2nd of December next, viz.:—

	£
1 Bond, A, No. 135, of £400	400
2 Bonds, B, Nos. 144, 166, of £300 each	600
7 Bonds, C, Nos. 28, 48, 136, 321, 340, 494, 563, of £200 each	1,400
7 Bonds, D, Nos. 75, 98, 105, 258, 327, 451, 456, of £100 each	700
17 Bonds.	3,100

And the Gothenburg Mortgage Association do hereby inform the holders of the said Bonds, that they will be prepared to pay off the same at par, upon presentation on that day or any succeeding day (except Saturday), at the counting-house of their agents, Messrs Dent, Palmer, and Co., 11 King's Arms yard, Moorgate street, London.

October 23, 1861.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT

COMPANY.

The Directors are prepared to comply with all applications for their Debentures at par. They are issued in sums of £50, £100, £500, and £1,000, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in mortgages of freehold land of very ample value, the Company by its charter being in every case first mortgagee.

Individuals and public institutions, who usually lend on mortgage, are offered a higher class security than is afforded by the old mortgage system.

The interest is payable by coupons, on the 1st January and 1st July, at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, and the same is receivable through any of the country banks.

The last half-yearly statement and the Debentures may be had at the Company's brokers, Messrs Brunton and Son, Auction Mart chambers, Bartholomew lane, London, E.C.

SEVEN PER CENT. DEBENTURES.

SUBMARINE TELEGRAPH

COMPANY, Incorporated by Royal Charter, and constituted under exclusive privileges from the French, Belgian, Danish, and Hanoverian Governments.

CHAIRMAN.—Sir James Carmichael, Bart.

DIRECTORS.

The Right Hon. Lord de Mauley.
J. W. Brett, Esq.
Samuel Gurney, Esq., M.P.
Captain J. Grant, R.A.
Francis Edwards, Esq.
Ch. Saunderson, Esq.
Geo. Scamell, Esq.

The Directors are prepared to receive proposals for the remaining Debentures of this Company, in sums of £50 and upwards, bearing interest at seven per cent. per annum, payable half-yearly.

The Debenture Debt of this Company is restricted to one-third of their paid-up capital, and these debentures form a first charge on the revenue of the Company.—By order, L. WALTER COURTENAY, Secretary.

Secretary's office, 58 Threadneedle street, London, E.C.

SUBMARINE TELEGRAPH

COMPANY, 58 Threadneedle street, London.

NOTICE.

OPENING of the LONDON, MALTA, and ALEXANDRIA TELEGRAPH.

Messages are now received by the Submarine Telegraph Company, 58 Threadneedle street, for Malta and Alexandria.

Charge for 20 words from London to Alexandria, £2 6s 9d.

Further particulars can be obtained on application at the Company's offices.—By order,

L. WALTER COURTENAY, Secretary.

November 1, 1861.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

The Political Economist.

A Supplement, containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 6th of April last, will be issued next week.

WHY GOLD DOES NOT GO TO FRANCE, AND WHY IT HAS A TENDENCY TO GO TO AMERICA.

Many persons have not unnaturally imagined that the immediate consequence of the anomalous operations of the Bank of France would be the withdrawal of gold from this country. They have seen that such was the immediate consequence upon former occasions, and they have hastily inferred that the present case would resemble the past in this respect. A little examination, however, shows that there was no ground for anticipating such a result.

The proceedings of the Bank of France only amount in substance to their obtaining a loan in England. They obtain a credit with certain great houses here. These great houses are drawn upon, and the bills so created in one form or another, form an item in the general exchange account between France and England. The *tendency* of every such transaction must be towards the withdrawal of gold from England to France; but whether gold will actually flow from England to France, depends not upon this one item, but upon the state of the entire account. The balance of international claims is settled in bullion, but those claims are of very various kinds.

The most important of all of them is now largely against France. The merchants of that country have bought corn largely in this market, and they have to pay for it. The balance of trade is consequently against France, and this is the primary and most considerable element in all exchange transactions. Large and sudden purchases for the food of a people always exercise a much greater influence upon exchange transactions than any other cause. They are an unexpected item of many millions in magnitude which necessarily deranges all previous anticipations, and makes the state of international accounts utterly different from what it would otherwise have been. It is certain, too, that France will have to settle with England not only for her purchases here, but for her purchases in America. The exchange market of France is usually limited, and now it is unusually contracted in its relations with America by the sudden annihilation of the export trade from France to that country. London is the great centre of transactions with America, and as France cannot pay America directly, she must do so by credits upon us. The balance of payments arising out of the ordinary transaction of purchase and sale is therefore much against France, and in favour of England. Under these circumstances, the loan which the Bank of France has procured in this country counteracts in some measure the inevitable tendency of gold to leave France and to come here. It cannot do more. It cannot cause gold to be exported from hence to France.

It may be alleged that, independently of any anomalous operation, the difference between the rates of interest in the two countries is enough to cause a transfer of capital from England to France. 'The Bank of England rate,' it may be said, 'is 3½ per cent.; the rate of the Bank of France is 6 per 'cent. This difference is sufficient to induce capital to migrate 'from England to France to secure the higher profits which it 'evidently obtains there.'

But would capital so exported really obtain the profits which would appear to be forthcoming? Certainly not. The sums remitted to France for investment would have to be invested in bills of exchange, or similar securities of a temporary nature. They can only be invested safely in securities becoming due at short periods, for the value of permanent securities never fluctuates in a degree proportioned to the temporary fluctuations in the momentary rate of interest. These securities in Paris do not now yield the full rate of the Bank of France, but often a less rate. The bankers of Paris are timid and inexperienced. They resemble certain country bankers in England, who continued to charge five per cent. when the Bank of England was charging eight per cent., and who gave only as much for money then as they do now. Accordingly, persons who are thinking of sending remittances to Paris could not be *sure* of getting six per cent. for it. It is the market rate which influences the transfer of capital from one country to another, for this is the rate which the capital so exported will in fact obtain.

There is another difficulty which recent events in England have brought strongly into view. There was at the time much controversy on the expediency of the course taken by the Bank of England early in the year, but it will now be generally conceded that the elevation of the rate of discount to eight per cent. had a far greater effect upon the movements of capital from other countries to this than previous steps in the same direction. This rate seemed to be effectual and sufficient, though previous rates had not seemed to be so. The reason is given in the following passage from a very excellent work on the "Foreign Exchanges," to which we recently drew the special attention of our readers:—

"Between the rates in London and Paris, the expense of sending gold to and fro having been reduced to a minimum between the two cities, the difference can never be very great; but it must not be forgotten that—the interest being taken at a percentage calculated per annum, and the probable profit having, when an operation in three-month bills is contemplated, to be divided by four, whereas the percentage of expense has to be wholly borne by the one transaction—a very slight expense becomes a great impediment. If the cost is only ½ per cent., there must be a profit of 2 per cent. in the rate of interest, or ½ per cent. on three months, before any advantage commences; and thus,

supposing that Paris capitalists calculate that they may send their gold over to England for ½ per cent. expense, and chance their being so favoured by the exchanges as to be able to draw it back without any cost at all, there must nevertheless be an excess of more than 2 per cent. in the London rate of interest over that in Paris, before the operation of sending gold over from France, merely for the sake of the higher interest, will pay. This is the simple explanation why a slight increase in the rate of discount is, under some circumstances, —that is to say, when there is not a great supply of bills upon England,—not sufficient to bring over gold from the Continent. It must reach a somewhat high point before the certain advantage begins; and hence it becomes clear that it is an error to allege that, if 6 per cent. will not bring over gold, 7 or 8 per cent., a mere fractional increase in an annual rate, will not have that effect any more. Yet the question was frequently asked, when the Bank rate of discount was advanced to 8 per cent,—Is it likely that if 7 per cent. failed to bring over the gold, such a result will be attained by charging 1 per cent. more? Yet the preceding observations place the matter, it is hoped, in a sufficiently intelligible light. The first few per cents. do little more than cover the possible expenses of the transmission of bullion itself, a difference of 4 per cent. per annum on three-month bills being necessary to cover 1 per cent. expense; but as soon as the charges (or the risk of charges), which are really almost identical with what is usually called the loss in exchange, are covered, then every additional per cent. which is granted as discount becomes an actual and certain profit; and accordingly, if gold is required, the rate of discount must be boldly advanced till that point is reached. To stop short of it may possibly be nugatory."

Expense of transmission is a very heavy charge, when it is to be measured against a mere temporary profit for two or three months.

There is, therefore, little cause for wondering why gold does not go to France from this country. The anomalous operations of the Bank of France have no magic power. They are at the best but a loan irregularly effected; and to obtain real supplies, or even to counteract the natural efflux of bullion from France at present, the Bank of France will again have to raise its rate, and the ordinary market must follow its movements and imitate its example.

Exactly the reverse phenomena are taking place in our international transactions with America. The exports from America to all the rest of the world continue very large, and its imports from all the rest of the world are become comparatively trifling. We have not statistics for the whole of America, but for New York we have very ample ones.

The exports of domestic produce from that port were in the first eight months of

	£
1859	8,667,981
1860	12,216,238
1861	18,153,369

—an increase of 5 per cent. over last year, and of more than 100 per cent. over 1859. It is true that this vast increase is partially compensated by the almost entire cessation in the export of specie and bullion. Taking all the necessary items into consideration, the entire account stands thus:—

Exports from New York to Foreign Ports for the Month of August.

	1859	1860	1861
	£	£	£
Domestic produce	1,158,910	1,802,883	2,171,768
Foreign merchandise (free)	84,309	17,118	13,042
Foreign merchandise (dutiable)	177,895	43,036	39,731
Specie and bullion	1,442,201	1,677,333	810
Total exports	2,863,315	3,540,370	2,225,351
Total, exclusive of specie	1,421,114	1,863,037	2,224,541

Exports from New York to Foreign Ports for Eight Months from Jan. 1.

	1859.	1860.	1861.
	£	£	£
Domestic produce	8,667,981	12,216,238	18,153,569
Foreign merchandise (free)	481,456	435,714	437,989
Foreign merchandise (dutiable)	632,821	791,174	872,081
Specie and bullion	11,173,224	8,009,674	734,413
Total exports	20,955,482	21,452,800	20,198,052
Total, exclusive of specie	9,782,258	13,443,126	19,463,639

But if we turn to the table of imports, we have a decrease even more remarkable than the increase we have just considered:—

Foreign Imports at New York in August.

	1859.	1860.	1861.
	£	£	£
Entered—For consumption	4,143,647	4,402,052	755,931
For warehousing	666,909	941,122	598,603
Free goods	657,207	461,399	408,650
Specie and bullion	78,394	31,669	236,149
Total entered	5,546,157	5,836,242	1,999,333

Foreign Imports at New York for Eight Months, from January 1.

	1859.	1860.	1861.
	£	£	£
Entered—For consumption	29,683,627	26,610,810	8,674,113
For warehousing	5,889,105	6,651,032	7,147,980
Free goods	4,803,762	4,458,652	4,966,693
Specie and bullion	371,137	200,686	7,640,037
Total entered	40,747,631	37,921,180	28,728,823

showing a reduction of more than 25 per cent. on the total imports.

If we look at the imports of manufactures the difference is even more striking:—

Imports of Foreign Dry Goods at New York for Eight Months.

For Consumption.

	1859.	1860.	1861.
	£	£	£
Manufactures of Wool	5,933,245	5,388,458	1,115,854
— Cotton	4,050,950	2,678,998	596,301
— Silk	5,732,567	5,960,566	1,573,758
— Flax	1,681,855	1,098,966	308,646
Miscellaneous	941,633	968,031	369,079
	18,340,250	16,095,019	4,263,638

The Northern States of America are, then, at present, selling more than heretofore, and the whole Union is buying less. If the matter rested there, it would seem evident that the balance must be paid by Europe in gold. But the very peculiar policy of the Southern States must also be included in the account. They will not ship us cotton as usual this year, and no bills are drawn in anticipation of it, according to ordinary custom. Although, therefore, America still continues to drain us of certain small quantities of gold, we must not suppose that she can deprive us of as much as she did last year, or of anything like it.

THE EDUCATIONAL CONTROVERSY.

The controversy as to the New Education Minute, which was at first conducted in a very unreasonable and pernicious manner, is now settling into a grave and discriminating temper very favourable to sound results. At first every one seemed to be opposed to the New Minute: there were objectors on behalf of the school, objectors on behalf of the Church, objectors on behalf of the training colleges, objectors—though these were rarer—on behalf of the public. At that period a witty Prelate is said to have described the eager controversy as "Lowe contra Mundum,"—but it has been now discovered that the system which now exists is capable of great improvements, and that the New Minute, though, as was natural, by no means perfect, is a great step towards those improvements.

The following results seem to be commonly assented to, not of course by all speakers or by all writers, but still by such a number of various persons of various kinds as to make it probable that their present judgment will be the ultimate judgment of the whole public.

First, it commends itself to common sense that payment for education, like payment for everything else, should, *if possible*, be tested by results and be proportioned to results. We all go upon that principle in all other matters; we like to pay little if we get little, and to pay much only when we get much. The natural presumption is that we should do so in the case of education also. It certainly seems not an extravagant thing to say that we will give considerable aid to a first-rate school, less to a second-rate, less again to a third-rate, and but very little to a ninth-rate. By careful inspection the real condition of each school can surely be ascertained with some approximation to correctness; and it is plainly expedient to make the payment by the State proportioned to the excellence of that condition.

As in every similar case, payment by results can be but distantly approximate. Elementary education is not a precisely measurable article; not a thing of yards or pound weights. General rules must be laid down for ascertaining it; and very often these rules will work imperfectly. In

some cases they must produce an error of excess, and in others an error of defect; they will give some schools too much, they will give other schools too little. When tested by extreme instances, they may even seem absurd. But the present question is not whether such rules are so perfect that we can find no error in them, but whether they are not much better than the coarse expedient which we are trying now of paying much the same to good schools and bad, and of scarcely attempting at all to apportion our payments to the intrinsic quality of what we are paying for.

Secondly, it is now generally agreed that the present system is one of great pecuniary complexity. The grants made to schools are of various kinds, and each of these has its own set of conditions which must be observed, or the grant will not be forthcoming from the office of the Privy Council. The Commissioners tell us that grants are made for at least fifteen objects to the schools of nine different denominations. A separate account has to be kept of what is due upon each account to each of these various schools, and of what has been received upon each account by them respectively; and, as every man of business will comprehend, the figures are difficult in proportion as they are petty.

The remedy proposed by the New Code is, that all sums of money shall be paid to the managers of schools in proportion to the education communicated. It is intended that the managers shall receive such pecuniary aid in a single sum, and be responsible to themselves only for its expenditure. If they make the school good, they will receive much; and if they make the school bad, they will receive but little. It is proposed—and we think very wisely—to clear away all the petty perplexities and technicalities caused by the numerous and various existing grants, and to substitute in their stead a single mode of payment, to be always made to the same payee.

Thirdly, it is quite universally agreed that the mode of training elementary teachers, of which we gave instances some weeks back, is entirely unsuited to its express purpose. The sort of education suited to such persons is a sound homely, practical, and plain one. It has nothing to do with the first or fourth councils, or with the details of history, secular or ecclesiastical, in the reign of Elizabeth. If any competent set of persons were to apply their minds to the formation of a good system of mental training for the teachers of the labouring poor in the simplest matters, there would be no difficulty in framing it, and it would be very different from that which is in use now.

It is a part of the intention of the New Minute to remedy the present curious disproportion between the preparatory training of elementary teachers and the employment of their lives; and in this point at least scarcely a voice is raised in condemnation of it.

Lastly, it is undeniably an advantage of the New Minute that its administration would be cheaper than that of the present system. It goes straight to its object, and squanders nothing by the way. At present much of the money expended is wasted by the manner of distributing it. The complexity consequent upon the multiplicity and variety of the existing grants necessarily entails a costliness of administration, and this entirely useless expenditure will be economised whenever the new regulations are put in force, and a more simple system is substituted for the present. The opponents of the New Minute have been anxious to describe its financial object as its main object, because they know that a pernicious economy in matters of education would be as unpopular as it is unwise. The English nation is quite able and is quite willing to pay whatever is necessary for educating its poor. But it is not disposed to pay what is not necessary. It is not disposed to throw away 800,000*l* in a capriciously expensive system, when under a better one a less sum would be probably more efficient.

On these great points the public verdict is clearly in favour of the Minute. On the other hand, on two important points most of those who have examined the subject seem to think it incomplete and defective. One of these is its incomplete provision for vested interests. Under the present system, certain rules are laid down, a certain tariff is prescribed for the payment of the certificated masters of various grades, and these can in no way be modified by the caprice of the managers. "The sum payable out of the Parliamentary "grant to a certificated teacher must be one of the sums set "opposite to the divisions in the following table":—

MASTERS.

Conditions to be fulfilled by the School Managers.

Degrees.	Where the Master has a house or suitable lodgings, rent-free. Minimum Salary to be paid by the Managers independently of the sum granted in Augmentation by the Committee of Council on Education.	Minimum part of School Income to be raised by Voluntary Contributions.	Rates of Augmentation by the Committee of Council.
Upper Degree:	£ s d	£ s d	£ s d
1st Division	60 0 0	30 0 0	30 0 0
2nd Division	55 0 0	27 10 0	27 10 0
3rd Division	50 0 0	25 0 0	25 0 0
Middle Degree:			
1st Division	46 0 0	23 0 0	23 0 0
2nd Division	43 0 4	21 10 0	21 10 0
3rd Division	40 0 0	20 0 0	20 0 0
Lower Degree:			
1st Division	36 0 0	18 0 0	18 0 0
2nd Division	33 0 0	16 10 0	16 10 0
3rd Division	30 5 0	15 0 0	15 0 0

If Masters be not provided with a house or suitable lodgings, rent free, a further sum of 10*l* must be added to every sum in each of these columns.

MISTRESSES.

Conditions to be fulfilled by the School Managers.

Degrees.	Where the Mistress has a house or suitable lodgings, rent-free. Minimum Salary to be paid by the Managers from Voluntary Contributions and School-pence, independently of the sum granted in Augmentation by the Committee of Council on Education.	Minimum part of School Income to be raised by Voluntary Contributions.	Rate of Augmentation by the Committee of Council.
Upper Degree:	£ s d	£ s d	£ s d
1st Division	40 0 0	20 0 0	20 0 0
2nd Division	36 0 0	18 0 0	18 0 0
3rd Division	32 0 0	16 0 0	16 0 0
Middle Degree:			
1st Division	30 0 0	15 0 0	15 0 0
2nd Division	28 0 0	14 0 0	14 0 0
3rd Division	26 0 0	13 0 0	13 0 0
Lower Degree			
1st Division	24 0 0	12 0 0	12 0 0
2nd Division	22 0 0	11 0 0	11 0 0
3rd Division	20 0 0	10 0 0	10 0 0

If the Mistress be not provided with a house, or suitable lodgings, rent free, a further sum of 6*l* must be added to every sum in each of these columns.

A certificated master of the third division would naturally infer that as long as he kept his school efficient, and the friends of the school maintained their prescribed payments, his salary would be secured to him. He would not doubt that he should receive 75*l* a year. Under the New Minute, however, such will not be the result. If the master teaches the school well, the managers will receive a large income, but they will not be bound to give any definite sum to the master. They may say, 'We shall not give you 75*l*, for it 'is more than the market value of your sort of labour; we 'can get another man who is quite your equal for 65*l*, and, 'therefore, that is all we shall give you.'

It is argued that there is no breach of faith in this,—first, because the present system of education is supported by grants payable annually; and, secondly, on the ground that the arrangement by which a certain portion of the grant is appropriated to the augmentation of the teacher's salary, is an arrangement between the State and the managers, not between the State and the teachers,—and is for the benefit of the school, not for the benefit of the teachers.

If the first of these arguments had not proceeded from the Royal Commissioners, we should not have been disposed to hear it with much respect. Is every one who has a contract with the English Government to be henceforth bound to examine its sources of income? Would it be possible to say to a schoolmaster who has been induced to engage in his occupation by the apparent promise of a stated augmentation from the Government to his salary from other sources,—'You 'have made a mistake. You should have purchased the finance 'accounts of the English Government, and compared them 'with the most authoritative treatises upon taxation. You 'should have mastered the primary distinction between 'charges upon the consolidated fund, and charges voted an-'nually. You would then have found that the vote for edu-'cation was a mere temporary vote, not to be relied on, and 'you would have abandoned your idea of becoming a school-

'master.' The mere statement of such an arrangement in its practical form shows that it is untenable.

The second argument may be in some sense true. The State may never have opened direct relations with the certificated teachers, but it does not touch the essential question. Does not such a clause as that we have quoted tend to excite reasonable and well-grounded expectations in the minds of the masters, and in matter of fact has it not excited them?

It is unnecessary to observe that the schoolmasters are a class with whom we should observe not legal faith, but moral faith. They cannot be expected to understand every refinement which an ingenious London lawyer may import into the arrangement between him and the State. A schoolmaster is, too, one of the most influential communicants between the English State and the labouring classes. It is of the utmost necessity to convince those classes of the good faith of the Government under which they live, and it is a difficult matter, for the poor do not easily credit honesty in money matters. It is, therefore, very dangerous to permit a considerable body of respectable persons just in contact with the poor to have even the semblance of a moral accusation against the Government.

The second point on which public opinion is opposed to or dubious upon the rules of the New Minute is their possible effect upon the well-being of the training colleges. On this subject there is much truth in the remarks of the Royal Commissioners:—"It may be asserted that though the "money is well spent, and though the relation between the "Government and the training colleges is satisfactory, the "assistance given discourages private liberality, and that the "withdrawal of a part of it would be compensated by an "increase of private subscriptions. We do not agree with "this opinion. It appears probable that considerable diffi- "culty would be found in obtaining subscriptions enough for "the support of these institutions. Private benevolence "usually operates rather to relieve the evils which directly "excite sympathy and attract attention, than to prevent "their occurrence by contributing to the removal of their "remote causes. It is possible to reckon with confidence on "the pity which persons of comparative wealth will feel for "gross and helpless ignorance, or for the sufferings produced "by disease or accident, when they are forced upon their "attention by their proximity. Hence arise the funds from "which churches, hospitals, and elementary schools are "built; but the education of clergymen, physicians, and "schoolmasters must be provided from other sources. An "institution which produces good teachers may be the most "efficient of all aids to education, but it appeals to no sym- "pathy, it relieves no immediate distress, and it accordingly "obtains subscriptions with difficulty. The early history of "the Borough Road and Battersea Training Colleges proves "this. Each of them languished till it could reckon on "permanent support from Government, and it was no wonder "that it did so."

It would be a grave subject for regret if these valuable institutions were seriously straitened. They may have erred to some extent in the kind of education they have given to the masters whom they were training; but, if so, they erred under the direction of the Committee of Council, which by its regulations and its examinations and its payments had a despotic authority over the whole system. Under improved regulations, these training schools would doubtless do good work as well as they now do rather questionable work. At any rate, let us be very careful how we destroy an elaborate and productive machinery, the only one which we possess for its peculiar purpose. It will be for the Training Colleges to explain their position by some competent advocate when Parliament meets.

MOTIVES OF THE FEDERALISTS IN COERCING THE SECESSIONISTS.

THERE may exist at the North much difference of opinion as to the desirability of continuing the present war, but there exists none as to the desirableness of the object for which that war was undertaken. Many persons doubt the possibility of coercing the South back into the Union, and the wisdom of attempting what is not possible; but no one there appears to doubt that if the South *could* be so re-annexed, it would be a consummation devoutly to be wished. With scarcely an exception the Northerners are passionately attached to the Union, even where anti-abolitionists and anti-belligerents. We have long been most anxious to obtain from them, or their advocates and spokesmen here, some precise and defined reasons for this passionate attachment, beyond the mere vague declamation about "right," "freedom," and "grandeur," which is so copiously indulged in,—some distinct statement *why* they so dread and abhor the idea of disruption that they are not only willing to avert it at the cost of a civil war, but are prepared to fight merely to make disruption difficult and costly, even when conscious that it is hopeless ultimately to prevent it. We have recently received several explanations of their feelings and resolute determinations on this head,—some private, some public—but all from thoughtful, capable, or authoritative respondents. We are beginning therefore to understand more clearly than we did the true motives of their sentiments and conduct;—and, though the various reasons assigned by no means convince us that the Unionists are right, or that it would be well they should succeed, they quite satisfy us that they now know what they intend and have strong incentives for the course they are pursuing. We will endeavour, this week and next, to give a respectful consideration to the representations which have been put forth,—beginning with the most influential.

There can be no question that the severance into two of the great American Republic materially diminishes its immediate grandeur, and impairs its prestige in the eyes of Europe. Its power is indisputably curtailed, and its empire, both over the territory of the New World and the imagination of the Old World, considerably shaken. It is one thing to reign over a whole continent, and another to reign over only half. It is one thing to command thirty millions, and another thing to command only twenty. It is a heavy blow and a great discouragement to lose a splendid territory, which is vast in extent even now, and which is capable of indefinite extension to the South. But this, we are assured, is not the real ground on which Secession is so vehemently dreaded and denounced by the citizens of the Free States,—and we credit the assurance. They fear that Secession once permitted will not stop short of wide and general dismemberment;—that severance between North and South if consummated—at least if consummated without a terrible and deterring conflict—will be speedily followed by severance between East and West, between Pacific and Atlantic States, perhaps even by indefinite and continuous separation;—and that, ultimately, in place of one great Republic—which was very grand and which every one dreaded and admired, America will present half a dozen moderate sized Republics—which will attain no marvellous dimensions, and which no one need adulate or fear. In a word, they apprehend the fate and the character of the South American revolted colonies of Spain. We take leave to say that the apprehension is not complimentary either to the moderation of their views or to the vigour of their nature.

Let us assume that in the course of time, as interests become discrepant and population increases, the anticipation of the alarmed Federalists are so far realised that the present area of the (lately) United States shall be ultimately divided into even *six* distinct Governments or nations;—we affirm that even then there will be extent and power enough for each; as much as is good for themselves—perhaps as much as is compatible with justice or tranquillity to others. Suppose that New England with New York and Pennsylvania, as comprising a district whose interests and character are tolerably homogeneous, should "slough off" and form one State. Its extent will be as follows:—

	Square Miles.
Maine	31,766
New Hampshire	9,280
Vermont	10,214
Massachusetts	7,800
Connecticut	4,674
New Jersey	8,320
Rhode Island	1,306
New York	47,000
Pennsylvania	46,000
	166,360

The *North-Eastern Confederation*, therefore, alone would be half as large again as the United Kingdom of Great Britain and Ireland, whose entire area is only 110,800 square miles.

The newer States of the West, the citizens of which are for the most part similar in character and habits, being all "backwoodsmen" and corn-growers, will probably sooner

or later form a Republic of their own, large enough in all conscience to satisfy any moderate ambition.

	Square Miles.
Ohio	40,000
Indiana	33,000
Michigan	56,000
Illinois	55,000
Wisconsin	54,000
Iowa	51,000
	289,000

The *Western Confederation* would thus be considerably larger than the entire Empire of Austria, which comprises only 248,000 square miles.

The Border States, in which slavery still lingers, but cannot, it is clear, maintain itself as a permanent institution, —one having recently become a free State, and the others employing both slave and free labour—are seven in number, and may probably hang together.

	Square Miles.
Kansas	115,000
Kentucky	37,700
Virginia	61,300
Maryland	11,100
Missouri	67,300
Tennessee	45,600
Delaware	2,100
	340,100

This *Central Confederation* would, therefore, be more than 50 per cent. larger than France, which has an area of only 212,300 square miles.

The territories which lie on the Pacific are so distant from the rest of the old Union that their ultimate independence can only be a question of time.

	Square Miles.
California contains	156,000
Washington	123,000
Oregon	185,000
	464,000

The *Pacific Confederation* formed of these three States would, therefore, be as large as Austria and France together, as large as Great Britain, Prussia, and Spain together, and more than four times the size of Prussia, which has only 107,300 square miles.

The comparatively unknown territory which lies between Missouri and California, the resources of which are as yet unexplored, comprises—

	Square Miles.
Nebraska, with	335,000
Minnesota	81,000
Utah	188,000
New Mexico	210,700
	814,700

and would constitute a State equal in extent to the combined territories of four out of the five great Monarchies of Europe, with Spain (176,000 square miles) added to them, —a State four times as large as France, and nearly eight times the size of Great Britain.

Finally, the Slave-States properly so called are as follows:—

	Square Miles.
Carolinas	80,000
Georgia	58,000
Florida	59,000
Mississippi	47,100
Louisiana	41,200
Alabama	50,700
Arkansas	52,200
Texas	237,500
	625,700

The *Southern Confederation* would thus be as large as England, France, and Austria together, and twice as large as England, Spain, and Prussia.

One would fancy that in this sketch are involved possibilities splendid enough to content the most grasping and gorgeous imagination. Why should all the six contingent independencies be ruled from one seat of Government? Why should all gravitate towards one Capitol? Why should the Continent of America be bound into a single State and nation, when the not larger Continent of Europe affords scope and verge enough for the development, prosperity, security, and independence of six or eight entirely distinct peoples, each with its own favourite institutions and its own specific civilisation? Why—when France and England, the two great luminaries of the Old World, have only 300,000 square miles between them, and have found this ample for all lawful aims,—should American Republics deem 3,000,000 scarcely enough to satisfy their longings? Why, in a word, should the dream of "universal dominion," long since banished from one hemisphere, be permitted to take refuge in the other?

THE BOARD OF TRADE RETURNS.

THE Board of Trade Returns of this month show in a more complete manner than any previous ones, the disastrous effects of the cessation of the American trade. The effect of it upon our export trade is shown by the following table:—

VALUE of EXPORTS to the UNITED STATES in the Nine Months ending September 30.

	1859	1860	1861
	£	£	£
Beer and ale	78,060	76,843	25,642
Coals and culm	144,556	156,665	200,244
Cottons	2,753,782	2,776,472	1,130,973
Earthenware and porcelain	448,661	518,778	191,606
Haberdashery and millinery	1,204,085	1,083,438	542,312
Hardwares and cutlery	865,066	776,772	446,095
Linens	1,486,276	1,337,778	493,654
Metals—Iron—Pig	205,947	165,052	79,086
Bar, bolt, and rod	642,822	546,493	148,587
Railway, of all kinds	744,505	665,619	168,657
Cast	16,489	17,056	9,239
Wrought, of all kinds	357,162	378,842	125,762
Steel, unwrought	372,465	457,490	216,246
Copper—Sheets and nails	99,422	44,971	10,005
Lead—Pig	53,451	66,015	1,451
Tin plates	935,692	833,644	274,488
Oil seed	122,570	72,915	1,680
Salt	63,876	84,818	59,809
Silk stuffs, handkerchiefs, and ribbons	197,605	192,393	88,360
Other silk articles	129,557	93,227	22,984
Soda	439,584	399,153	142,311
Spirits (British)	53,123	56,423	12,480
Woollens:—Cloths of all kinds, &c.	586,701	535,130	250,023
Mixed stuffs, flannels, blankets, &c.	1,732,224	1,612 284	652,399
Worsted stuffs	1,052,053	840,507	377,597
Totals	15,735,784	16,200,771	5,671,730

—a most remarkable diminution, which could not have resulted from any cause less momentous than the peculiar revolution which we are witnessing on the other side of the Atlantic.

Nor is this whole extent of the evil. The high price of cotton is telling on the sale of our cotton manufactures to all quarters, and this is especially remarkable when we compare the exports of this class.

As compared with the corresponding period of the two last years, the exports of cotton goods to all parts of the world have been during the month of

	£
September, 1859	3,185,540
— 1860	4,256,800
— 1861	2,846,953

The principal decline is in the exports to British India, to China, and to British North America; but there is, nevertheless, a certain general diminution, significant, if not considerable. There is likewise a considerable reduction in the export of cotton yarn. The figures are:—

EXPORT of COTTON YARN.

	£
September, 1859	841,034
— 1860	1,057,581
— 1861	829,677

The effect of the American crisis has not on the whole been effectually counterbalanced by any equal extension of trade in other directions, and consequently our exports are for the nine months:—

	£
1859	98,037,311
1860	101,724,346
1861	93,795,332

The table of the real value of our imports for the first *eight* months of the year at first sight suggests a singular conclusion. It would seem at first sight to show that we had received an unusual quantity of cotton this year. It shows for the eight months:—

REAL VALUE of COTTON IMPORTED.

	£
1859	24,039,197
1860	28,940,676
1861	30,809,279

But we must remember that price is an element in the table of first-rate importance. The real facts as to cotton are shown in the table of quantities which we have complete for the nine months of the year:—

QUANTITY of COTTON IMPORTED.

	cwts
1859	8,023,082
1860	10,616,347
1861	9,616,087

certainly indicating, as yet, no large diminution, but giving a different result from what a careless person would infer from a hasty perusal of the table of real values.

The general result of the latter table is as follows, for the first eight months of the corresponding years :—

REAL VALUE of IMPORTS.

	£
1859	88,993,762
1860	106,894,278
1861	114,588,107

—an increase principally caused by the great importations of wheat in the present year, as thus appears :—

IMPORT of WHEAT.

	£
First eight months of 1859	6,212,581
— — 1860	6,796,131
— — 1861	13,431,487

The following is an account of the quantities of the principal articles of food and drink received and retained for home consumption during the month of September :—

	Quantities Imported. 1860	1861	Quantities Retained for Home Consumption. 1860	1861
Cocoa ..... lbs	1,013,730	900,972	230,240	219,324
Coffee	7,615,979	7,519,222	2,736,730	2,759,007
Wheat ..... qrs	653,443	302,877	653,443	302,877
Barley, oats, beans, peas, and Indian corn	477,473	736,386	477,473	736,386
Wheatmeal and flour ..... cwts	537,960	221,863	537,960	221,863
Spirits :—Rum ..... gals	587,141	754,472	236,179	241,457
Brandy	31,907	136,127	115,299	143,352
Geneva	11,084	22 890	8,976	7,452
Sugar, unrefined ..... cwts	715,441	846,850	728,497	752,978
Tea ..... lbs	2,650,210	4,335,110	5,890,840	6,410,510
Wine ..... gals	552,314	681,397	662,310	709,894

Annexed are the quantities of raw materials received during the month of September :—

	1859	1860	1861
Cotton ..... cwts	608,372	573,109	710,394
Flax	284,327	181,725	278,931
Hemp	197,789	156,537	158,114
Jute, &c.	130,882	48,510	62,607
Silk, raw ..... lbs	587,327	469,085	561,890
Tallow ..... cwts	127,611	135,512	180,234
Wool ..... lbs	9,181,183	10,747,182	16,643,941

COTTON CROP OF THE UNITED STATES.

THE New York *Shipping List*, of the 9th inst., publishes the following statement in reference to the entire cotton crop of the United States, for the year ending Aug. 31, 1861 :—

	bales.	bales	Total. 1861.	1860.	1859.

* This we are unable to give this year.—(See General Statement.)

To which, if we add (for the past year) the stocks in the interior towns 1st September (say 6,200 bales), the quantity detained in the interior (say 25,000 bales), and that lost on its way to market (9,000 bales) to the crop as given above, received at the shipping ports, the aggregate will show, as near as may be, the amount raised in the United States the past season—say, in round numbers, 3,866,000 bales (after deducting 300 bales new crop received this year to 1st ult.), against

We herewith present, about three weeks later than usual, our annual statement of the cotton crop of the United States. Owing to the unsettled state of the country and the absence of our usual mail facilities, our labour has been prosecuted with more difficulty, and less satisfaction to ourselves, than ever before, but we take pleasure in stating that owing to a combination of favourable circumstances we are, with a few unimportant exceptions, enabled to present a statement which, we believe, in all its leading items, to approximate exactness, and one which, for all practical purposes, may be considered reliable. Some of the minor details usually given in our statement are of necessity omitted, owing to the causes alluded to, and some others are less complete than we could wish, but we feel assured that the statement, as a whole, will be found very nearly correct. It is well known that, owing to the disturbed state of the Southern section of the country, the commerce in cotton was hurried to a close some two months or more earlier than usual, and the results now given were more or less correctly known a month or two ago. It will be well, however, to observe here that our former (weekly) tables included as receipts all the shipments from Memphis; but to arrive at the commercial crop of the country, we have as usual deducted the amount consumed on the Ohio, &c., estimated by good judges at 25,000 bales, and on this account the aggregate crop will now appear less than was previously supposed it would be. The statement, however, must speak for itself; it is the best we could make, considering the serious embarrassments under which we have laboured.

An error in the Savannah statement last year (an excess of 6,000 bales in the coastwise shipments of Sea Island) is now corrected in the comparisons of crop, consumption, &c., which appear that much less than in our last year's account.

It may be well to observe that the preceding statement of the crop is that of the United States as a whole, and does not purport to be the crops of the States, though the shipments, stocks, &c., are necessarily arranged under the different leading shipping ports or States, as the case may be.

AMERICA.

(FROM OUR SPECIAL AMERICAN CORRESPONDENT.)

[As we are going to press we have received a long letter from our Special Correspondent, which is unfortunately too late for complete insertion, but from which we are able to give the following extract.]

NEW YORK, Oct. 15, 1861.

Friends of the Government are now holding out great expectations as to the result of maritime expeditions to seize the Southern ports, and the one about to be despatched from a point of rendezvous in the Chesapeake is assuming formidable proportions. Its destination is kept a profound secret, but it is supposed that the intention is to occupy the harbour of Beaufort, South Carolina, about forty miles from Charleston; and also, unless met by formidable opposition at that point, the harbour of Brunswick, Georgia, fifty miles from Savannah. It is not improbable that the expedition is to some extent a feint, made for the purpose of drawing off South Carolina, Georgia, and Louisiana troops from Beauregard's army, for the protection of their chief ports, and I shall not be surprised if McClellan will take the opportunity of giving battle. In that case, there may be stirring events to report in my next letter. This idea is confirmed by complaints I have just heard as coming from the General who is to take command of the land forces, to the effect that of the 15,000 men already ordered to embark all, except three regiments, are raw recruits. With such materials it would be absurd to attack any of the leading ports, and I, therefore, judge that the chief object is the effect to be produced on the main body of the Confederate army. It may also be convenient to secure harbours on the Southern coast of which the blockading ships could make use in case of need, and to which they could convey their prizes with facility. The idea which some have entertained that the effect would be to open a Southern port to commerce and for the shipment of cotton is absurd in the last degree. The great object of the Federal Government in the blockade is to seal up the cotton crop, and not to let it out; to prevent money or supplies reaching the rebels, not to aid them in procuring such. There can be no intercourse between the hostile camps unless under the protection of flags of truce, which have never been found to promote a very active interchange of commodities.

The expedition, so far as yet known, will consist of the following ships, the great majority of which have been fitted out and already sailed from this port for the Chesapeake:—Frigates—Wabash (50 guns), Powhattan (20 or 40). Screw Gunboats—Ottawa (14), Unadilla (14), Seneca (14), Pembina (14), W. G. Anderson (8), Kingfisher (8), Ethan Allen (8). Purchased Mercantile Paddle Steamers—Augusta (8), Alabama (8), James Adger (8), Florida (8), Rhode Island (8), Connecticut (8). Purchased Screw Steamers—St Jago de Cuba (8), Curlew (4). Tugboats—Mercury (2), O. M. Pettit (3). Total, 215 guns. Paddle Steam Transports, generally carrying a few guns—Atlantic, Baltic, Vanderbilt, Ocean Queen, Illinois, Ariel, Ericson, Cahawba, Eagle, Daniel Webster, Empire City, Marion, Coatzacolcos, Roanoke, Peerless, Philadelphia, City of Richmond. Screw Transports—Star of the South, Oriental, Locust Point, Parkersburg. Paddle Steam Ferryboats, armed with a few guns—Isaac Smith, Mayflower, Ethan Allen, Ellen, Commodore Perry, Stepping Stones, Whitehall. Small Screw Steamer—Narragansett. Armed Barks—Amanda, Brazalarina, Midnight, Gem of the Sea. Transport Ships—Great Republic, Courier, Ocean Express, Queen of the East. Store Ships—Release, Brandywine.

The first important naval operation of the Confederate States under Commodore Hollins (notorious for his bombardment of the defenceless little port of Greytown several years ago) appears to have been a success. It is stated, that with a sort of steam ram formed by building a prow sheathed with bars of railway iron upon a powerful tug-boat, he has succeeded in sinking the blockading sloop Preble, 16 guns, and forcing some other United States ships to run aground. The report has, for so far, only Confederate authority, but it will probably be found in the main correct.

Agriculture.

AGRICULTURAL MEETINGS.

THE PROGRESS OF OPINION.

THE agricultural meetings of the present autumn have been attended by a larger number of landowners and politicians than for several years past. Last year the landowners were especially shy of such meetings, for the state of the crops and the wretched season had rendered the farmers' mood by no means placable, and under such circumstances the landlords generally avoid these meetings. This year there has been plenty of sun, and—so far as regards quality—a good harvest, and, like butterflies, the landlords reappear. And though for the most part the speeches made at meetings of agricultural societies have had very little reference, direct or indirect, to agriculture, there have been exceptions, and such exceptions have indicated an improved and healthy progress of opinion amongst landowners. Foremost of these stands the meeting of the Worcestershire Agricultural Society. The Earl of Dudley occupied the chair, and on the toast of the county members being responded to, Lord Elmley made a feeble effort to talk political twaddle, but Mr Foley, more to the purpose, expressed a wish to see the Law of Settlement entirely abolished, as the means of freeing the rural labourers from impediments on their labour. Then Sir John Pakington began to speak as landowners should speak at agricultural meetings. He thought "they should confine their speeches to those objects for which they were specially assembled." The progress and proceedings of different agricultural societies proved "that the interest in agriculture was a growing feeling in the country." This of course referred to the classes amongst whom Sir John Pakington habitually moves; for with the farming classes there can be no need of any growth of interest in agriculture. It is their Alpha and Omega. After referring to the recent variations of season, and stating that even the natural variations of seasons might be greatly mitigated and influenced by agricultural science and skill, he said there was "no object which bore more directly on the happiness and prosperity of those connected with the land, either as owners or occupiers, than to devote their best efforts to the cultivation of the science of agriculture. For this reason he wished to see the owners and occupiers of land coming together on such occasions as these to exchange opinions and ideas."

Such meetings are unquestionably useful when there is a free exchange of opinions. But the conference must be free and open, and both sides should be genuine and rational. Each might, perchance, learn something from the other.

Sir John well did his part when he said "that when agricultural skill had been acquired and agricultural science exercised, and capital in proportion to that science brought to bear on the cultivation of the soil, the tenant was entitled to some better security than a mere yearly holding." This sentiment was very naturally received with much applause. He then went on to mention "two cases which had occurred to him the other day on his own estates as

bearing upon this point. He had recently let a large and excellent farm to a new tenant, and on going over it the other day he found the tenant had started in a way which gave him (Sir John) the greatest satisfaction. It was clear that his new tenant was a man of skill—a man of enterprise—and that he possessed and was expending capital upon the land. Accordingly, he (Sir John) inquired of his agent whether the new tenant had not asked for a lease. The reply was the tenant was aware that he (Sir John) never wished to part with a tenant without good reasons, and that he was quite willing to remain a yearly tenant. Now he (Sir John) would say that the tenant had made a great mistake."

No doubt the tenant had made a great mistake, but had not Sir John Pakington also made a mistake? Suppose he had inquired of the tenant himself instead of his own agent whether a lease was not desired, might he not have been told quite a different story? Or might he not have heard reasons why the new tenant, notwithstanding his enterprising commencement, did not wish to be absolutely bound for twenty-one years? Might not Sir John have heard something of game reservation and gamekeepers, about the effects of which the new tenant did not feel altogether at ease? Might there not be stipulations and restrictions in Sir John's leases by which the new tenant did not deem it prudent to be bound? We do not know that any such obstacles to a lease on the part of the tenant existed in this case, but we know that in a vast number of instances, tenant-farmers who are said not to desire leases are deterred from taking them mainly because their provisions are not such as come within the definition of a "rational lease." Let us also suggest to Sir John Pakington and to landowners in general, that as a matter of business and good management, the question of lease or no lease ought to have been fully considered between landlord and tenant before the latter engaged or entered upon the farm. It was then only that either party, and more especially the tenant, could make an equal bargain. Once entered on the farm, and having made the large outlays to which Sir John referred, the tenant must have been in a great degree at the landlord's mercy, and though a lease might even then have been granted to him, he could be in no position to object effectively to any stipulation or restriction which the landlord or his agent might think fit to impose. The security, whatever it might be, such a lease so granted might afford to him was an act of favour accorded by the landlord, not the result of a plain commercial bargain as it ought to be. But it may be said that though an offerer for a farm might prove himself to be possessed of capital, he might not be able to satisty the landlord or his agent that he possessed the requisite skill and enterprise. This would certainly be "putting too fine a point upon it," more especially when we look at the way in which farms are usually let on yearly holdings; but this even might be provided for without much difficulty. Let the farmer and the land agent arrange the terms of a lease, each party having fully discussed and settled all the terms by which he is willing to be bound for so long a period as twenty-one years, upon the assumption that the farmer is not only possessed of the requisite capital, but that he knows how to use it also. Practically, this is seldom of importance, for given the necessary capital, the required skill to use it advantageously—at all events as far as the landlord's interest is concerned—is not often wanting. Passing this, however, and on the hybothesis that out of an abundant caution the landlord desires to see that his new tenant starts in such a way as, to use Sir John Pakington's words, to give him "the greatest satisfaction," before he actually grants the lease that may be provided for. The terms of the lease having been arranged, let there be an agreement to grant on the part of the landlord, and to take on the part of the tenant, a lease of the farm, either upon certain defined acts being done by the tenant, or upon the certificate of a specified surveyor that the tenant had, during the first year's occupation, expended in a husbandlike manner a certain amount of capital in his farming operations and upon the land. Then the conditions, whatever they might be, having been complied with, the actual lease should be executed. Such are the precautions taken when land is let on building leases, and the principle is applicable without any great difficulty to the letting of land for farming purposes. We say, however, that they are wholly unnecessary, for if a tenant have sufficient capital and be not hampered by useless or injurious restrictions, the landlord's interest in the farm is usually quite safe. That any competent farmer would prefer to carry on his farm as a yearly tenant when he could obtain a reasonably fair lease, is so contrary to all experience, and to the ordinary dictates of self-interest, that when such an apparent case occurs, it may safely be treated as anomalous and to require special and further investigation. It can scarcely be doubted that Sir John Pakington has not obtained a complete knowledge of the case of his own tenant, who has, *apparently*, made the serious mistake of not requiring a lease when he could have one.

Sir John very justly added,—"It must be remembered that life was uncertain, that circumstances might change, and that the tenant ought to think of his own interests and the interest of his family, and to take some security for his investment." This is so obviously true that the tenant's non-demand of a lease—for it does not appear to amount to more—would seem to indicate that Sir John's leases do not afford that complete security which he admits is necessary for a tenant-farmer.

He then referred to the other case on his own property. "He had another tenant who lived with great respect and credit on his estate, and who a few years ago had expressed a great dislike to the leasing system. In fact, he had shared in that panic which had followed the repeal of the Corn Laws; but latterly he had expressed a wish to have a lease of the farm for twenty-one years." The last case is simple enough. The panic fears, baseless ones truly, under which the tenant suffered—fears created, be it noted, by the class and party to which Sir John belongs—having passed away, he naturally required the security of a lease. This case has a wide application, for the number of farmers affected by such panic fears was very considerable. That is now gone by for ever, and farmers understand that the ordinary variations of season and demand are the sole regulators of their business. Against these they have no difficulty in guarding themselves when secure in the possession of their farms. Sir John Pakington drew two inferences:—"First, with regard to the first case cited, that the opinion was gaining ground that farming to be successful must be made a science, and that if a man was to live by farming he must conduct his business on the same principle as other commercial pursuits. The inference which he would draw from the second case was, that we were growing wise by experience, that to do well in farming capital must be invested in the land, and that when once it was thrown into the land the tenant ought to have some security that he should get it out again." And Sir John concluded his excellent speech by saying "he believed the solution of the great agricultural problem was to be found in three conditions:—First, that no man should undertake a farm until he had made himself acquainted with his business; secondly, that no man should undertake a farm that was larger than the capital which he had to expend upon it; and, thirdly, that when he threw his skill and capital into the cultivation of the land, he should take care to stay there as long as his interests required. He believed that by promoting these societies, by attending the meetings, and by sending their stock and implements for competition, they were assisting their neighbours to comply with those conditions, and therefore it was he was always glad to attend them." That agricultural meetings at which such views are propounded by the landowners will greatly advance the progress of English agriculture there cannot be the slightest doubt. What is next wanted is that the tenant-farmers should fully and freely respond by stating their own side of the question, and by disclosing the practical obstacles which exist in carrying out the three conditions enumerated.

At the Hertfordshire Agricultural Society, after the county members who were present had indulged in long and irrelevant political disquisitions, the Vice-Chairman, Mr Robert Dimsdale, made some useful remarks on the existing demand for more and better cottages for rural labourers, in the course of which he said "the almost universal opinion seemed to be that it was more desirable to attach them (cottages) to the tenant than to the landlord, an opinion with which he agreed." At the same meeting, Mr E. Roberts, as a practical man, had no hesitation in saying that the soil of this country was capable of sustaining a very much larger population than the present, which must be effected by a "more general disposition amongst occupiers to embrace the services of improved machinery, and greater earnestness in laying hold of improved and constantly improving systems of management, both as regards the cultivation of the land, and the breeding, feeding, and management of stock."

Now the indispensable preliminary to the improved management by occupiers here indicated is that they should have the security afforded by leases as stated by Sir John Pakington. And of this opinion was Mr Roberts, for he said "the landlords as well as the tenants had much to do. There must be a greater leaning towards each other. While they, as occupiers, had much to learn, the landlords had need to become better acquainted with their various duties. They must study those duties as a profession." Then they might fairly call upon their tenants to exert themselves to the utmost. The truth, however, is that much of this talk about the duties of landlords and the duties of tenant-farmers is quite beside the real question, which is one of interest rather than of duty. The landlord has a property from which he may fairly and properly expect to obtain the best income the existing demand for farms will afford, while the tenant-farmer enters on his farm as a business by which he seeks to make the utmost profit his skill, his capital, and his opportunities will admit. A fair bargain, honestly carried out on both sides, is the sum of the duty reciprocally due as between landlord and tenant. To this result the relation of English landlord and tenant must come, and the sooner the fact is freely acknowledged and acted upon the better it will be for all parties.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday Evening.

The opinion expressed by many persons that the advance obtained by the Bank of France from London would afford only temporary relief is already proved to be true, the Bank being at the present moment in negotiation with the Bank of Prussia for the advance of a large sum,—2,250,000*l* English, or thereabouts,

is spoken of. With what success this negotiation will be attended remains to be seen; but even if the Bank of France should obtain the money, there is no certainty, from present appearances, that it would suffice to carry it thorough its difficulties.

The amount of bills which fell due to-day at the Bank is estimated at about 100,000,000f.

The report that the Government will very shortly have to make a loan is again current, and should M. Fould, as is thought not unlikely, become Minister of Finance, his first act would, it is believed, be to raise one. The amount required is generally estimated at from 16,000,000*l* to 20,000,000*l*; but some persons seem to think that as much as 24,000,000*l* may be asked for.

The Bourse continues very depressed, and the following are the quotations:—

	Thursday, Oct. 24. f c	Thursday, Oct. 31. f c
Threes	68 5	68 0

The following is an account of the declared value of the importation of Belgian and British merchandise made into France, from the 1st to the 10th October, under those clauses of the commercial treaties which came into operation on the first of the present month:—

	From Belgium. francs	From England. francs	Total. francs
Woollen fabrics, pure and mixed	38,602	4,827,691	4,866,293
Hosiery, lace, &c.	...	190,217	190,217
Printed cotton fabrics, &c.	16,791	525,453	542,244
Felt of all kinds	...	52,573	52,573
Cutlery	...	19,867	19,867
	55,393	5,615,801	5,671,194

In addition to the above were 129 tons of cotton fabrics, velvets, &c.—all taxed by weight. Moreover, from the 10th to the 18th of this month, 2,020,000f worth of goods taxed by value were presented at the Custom House of Paris. From the preceding figures it appears—first, that the French in dreading an "inundation" of Belgian and British cotton and woollen goods, and the English in expecting an immense demand to arise in France, were equally mistaken; secondly, that the English have apparently not much to fear from Belgian competition.

An agricultural journal makes a statement which would be important if it should turn out to be true. It is that the Prefect of the Seine contemplates letting loose the famous "municipal reserve" of flour. In this city the Government has always assumed that the bakers are a class of idiots, utterly incapable of exercising anything like foresight or prudence in their trade; and so it has imposed on them the obligation of keeping constantly in a certain huge building a reserve of flour which they cannot touch, except on condition of immediately replacing what they take away. Apart from the expenses, loss of time, and toil occasioned in carrying flour to that building and bringing it away again, the quantity locked up is so large as materially to affect the market. At the present moment for example, there are, according to the agricultural journal referred to, not fewer than 45,000 tons in custody, and evidently so large a quantity of an article of general consumption abstracted from the market must affect prices. That the Government would do well to release the flour held there would be no doubt, and it would do equally well never to make another reserve. At first glance it might seem that the letting loose of such a large quantity as 45,000 tons of flour could not fail to cause a grave perturbation in the market; but the opinion of the authorities appears to be that on account of the scarcity it would not have that effect, especially if, instead of being discharged all at once, the flour were let out by degrees.

In this country there exists a special commission, which is charged to fix annually the real value of goods imported and exported; and it has just presented,—rather late, it must be confessed,—its report for 1860. From this document it appears that in that year, compared with 1859, 400 articles fell in value, 381 increased, 798 remained unchanged. Grain, fruits, oleaginous seeds, oil, forage, and vegetables presented an augmentation of from 11 to 27 per cent.; hops one of 40; oxen and horses, 5 to 7. "The price of wines and vinegars," says the report, "rose 20 per cent. on an average, whilst those for export into England fell 45. This singular result is explained by the fact that many of the inferior qualities of wines, which it was believed would obtain a large sale in England, under the treaty of commerce, were not at all appreciated in that country, and had to undergo the fate of all abandoned merchandise." The price of timber increased 10 per cent., owing to the extensive building operations in Paris and other large towns. In coal there was a slight rise occasioned by an augmentation in the freights from England. "In textile materials and fabrics," says the report, "the value of 1860 is nearly the same as that of 1859, notwithstanding the fluctuation arising from various causes. The fears of war and the disquietude produced at the beginning of the year by the treaty of commerce with England caused," adds the document, "a restriction in production and a decline in consumption, and on that account prices were not affected." The report next makes these observations, which are not without interest:—

"Notwithstanding prices which generally speaking have hitherto been higher, and the inferiority of her markets, France has arrived at more than half of the colossal amount of the exports of England—a progress to which she is indebted in great part to the superiority of her taste and manufacture. She has, therefore, no serious fears to entertain as regards articles of luxury and fashion; but the consumption of those articles is restricted, and her manufacturers have had to make great efforts in order to take a larger place in the supply of foreign nations. The progress made is proved by a comparison of the exports of 1859 with those of preceding years since 1847,—a period during which they have almost tripled

"In consumption there has been a marked increase in the cheaper and less perfect sorts of fabrics. Moreover, the silks of France and Italy having become rarer, the dearness of them has led to materials of an inferior quality being employed in silk tissues. The result is a commoner sort of production, though good in appearance, and it tends to take the place in certain markets of foreign articles of a like kind. Such is the principal reason of the diminution which has occurred in the average value of tissues; but the average value is not absolutely the approximative value of such or such article.

"Value estimated on exportation does not always represent that of French merchandise. Merchandise in transit is counted in the values of export, and the difference between the value on entering the country and that on leaving it, proves in no respect that French manufactures present a relative degree of inferiority. The same denominations on the two sides of the Channel do not indicate articles which are identical; the difference of price may arise from difference of quality, from perfection of design; and French manufacturers ought not to be alarmed if an apparent cheapness should secure a certain degree of vogue to foreign fabrics, for that vogue can only be temporary.

"There can be no analogy between the exigencies of the French market and those of the consumers of Australia, India, and Morocco, for whom England works.

"From the efforts made by French manufacturers there will result, it is to be hoped, a larger export, but the value will necessarily undergo a new reduction. There will be no reason on that account to conclude that the French are relatively inferior; but, on the contrary, the fact must be admitted in a certain measure as a sign of their force and manufacturing activity."

The report next goes on to notice the changes in other articles. Native silk remained nearly stationary; foreign rose. Silk fabrics slightly declined, owing to the tendency to employ other materials than silk in them. Silk tulles rose. Ribbons underwent an extraordinary decline,—not less than 36 per cent. (This is what results from the returns presented, but there is reason to believe there is an error). Wool was rather higher; woollen yarn unchanged. Blankets fell 4 to 6 per cent. Carpets fell above 15 per cent., in consequence of the demand remaining stationary in presence of an increase in the quantity manufactured. Cloth was rather lower. Merinos declined about 4 per cent., owing to a falling off in the demand for South America. Flax fell on account of an increase in imports and in cultivation. Hemp fell about 8 per cent. The coarser sorts of flax and hemp yarn underwent no change, but the finer declined. Cotton was about 14 per cent. lower, but cotton yarn only fell about 5. Certain cotton fabrics declined 6 or 7 per cent., and for export 40c the kilogramme. Salt increased 25 per cent; soap fell 20 per cent.; bark for tanning rose 30 per cent.; glass, crystal, and porcelain underwent no change, but in looking glasses and mirrors Belgian competition occasioned a depreciation of 10 per cent. In certain sorts of paper there was a decline of 15 per cent.; a heavy decline in caoutchouc articles, and a decline of 20 per cent. in pianos. Such are the principal points in the report. It may be remarked that this document is not drawn up with the clearness and precision which generally distinguish French official publications on commercial matters.

Annexed is the weekly account of the markets:—

FLOUR.—Business at *Paris*, during the past week, has not been active, and yesterday the quotation was nominally only 82f to 88f the sack of 159 kilogs. In the four marks there was a sensible decline. At the beginning of business, the current month was offered at 84f, and November and December at 84f 50c; but in the evening the quotations were: current month and November, 83f 25c; December, 84f; January and February, 85f.

WHEAT.—At *Paris*, yesterday, offers were numerous and demands slack; the consequence was a decline in quotations, though little business was done. Lorraine, Burgundy, and Centre were offered at 43f to

44f 50c the sack of 120 kilogs. Superior qualities of those and other provinces 46f 50c to 47f 50c, and even 48f. English were offered at 46f, Dantzic 44f to 46f, but there were no purchasers. Some lots of Hamburg were taken at 44f, but others offered at that price and at 45f were not sold. American was offered at 40f to 41f; Hungarian, 42f; and Bavarian, fine quality, 45f 50c; but there were no purchasers. Of the provincial markets, 10 present a rise of from 18c to 75c the hectolitre, 70 a fall of from 9c to 2f 20c; 9 are reported firm, 35 without variation, 11 calm.

COTTON.—At *Havre*, in the week ending Friday, business was very animated and prices again rose considerably. The sales were 23,059 bales, and the arrivals 1,144. The closing prices were 7f higher for the very low qualities, 8f for low, 9f for very ordinary and ordinary, and 10f for other sorts; consequently, very low New Orleans was at 139f the 50 kilogs, low ditto 150f, and very ordinary 156f. The stock on Friday was 156,190 bales, against 136,200 at the same date in 1860, and 44,750 in 1859. This week, business has been much less animated, and prices, though not very regular, have manifested a downward tendency, without, however, actually declining.

COFFEE.—At *Havre*, last week, business was active, and prices were very firm. The sales were 300 sacks Hayti Port-au-Prince, disposable, at 83f 50c to 85f the 50 kilogs in bond; 800 ditto Port-au-Prince, Gonaives, and Saint Marc, 83f 50c for Port-au-Prince, and 86f for Gonaives and St Marc; 424 Rio, not washed, disposable, 70f in bond; 832 ditto, for delivery, 76f 50c to 79f; 5,700 Santos, for delivery, at prices kept secret; 2,793 La Guayra, disposable, 86f in bond; 350 Macassar, 109f to 109f 50c, duty paid. The arrivals were above 3,900 sacks. This week, Rio, in bond, has been at 67f to 72f; Gonaives at 87f; Rio, for delivery, 78f 50c; Hayti, in bond, 84f; ditto, 83f 50c; ditto, disposable, 85f; Cape ditto, 86f; Santos, washed, for delivery, 90f; Rio, for delivery, 75f. At *Nantes*, last week, no business was done, and there has been none this week. At *Bordeaux*, last week, business was very slack. The sales were 850 sacks Santiago, not washed, at 79f 25c to 81f; 748 Rio, not washed, 91f to 102f; 1,060 Mysore damaged were also disposed of. This week, Salem has been at 125f; Rio, not washed, 100f. At *Marseilles*, last week, business was active and prices firm. The sales were 3,200 sacks Rio, for delivery, 75f; 2,000 Rio, disposable, 76f; 1,800 Rio, 62f to 77c; 200 bales Mocha, 110f. This week, Rio has been 68f to 80f; Maracaibo, 85f to 87f; La Guayra, 90f to 95f; Santiago, 85f to 86f; Malabar, 111f.

SUGAR.—At *Havre*, in the week ending Friday, business was not active. 769 casks Trinidad, 46f the 50 kilogs, duty paid; 422 Havana, 34f 50c in bond. By auction, 307 Havana damaged were also disposed of. The arrivals were above 5,000 casks and 700 bales or sacks. This week, nothing done. At *Nantes*, last week, the sales were 667 sacks Reunion, 53f 50c; 687 ditto, 55f; 55 ditto, 47f 50c; 50 casks French West India usine, 53f; 60 ditto, 52f 60c; 27 ditto, 45f 50c. This week, Reunion has been at 49f; ditto common, 42f. At *Bordeaux*, last week, business was very calm: the sales were 400 bales Reunion, 50f; 386 casks French West India, 47f; 200 casks Santiago disposable, 48f 50c; 450 ditto Brazil, 52f 50c to 53f 50c; 7,200 bales Mauritius, 51f. This week, no sales have been made. At *Marseilles*, last week, the sales were 3,025 bales Reunion and 80 sacks Mauritius at secret prices. 250 casks French West India, 41f to 45f in bond.

INDIGO.—At *Havre*, in the week ending Friday, no sales were made, and the arrivals were unimportant. No sales have been made this week. At *Bordeaux*, last week, business was almost null: Bengal was 3f 25c to 3f 75c above late estimates. This week, 12 chests Bengal at prices not stated have been sold.

HIDES.—At *Havre*, in the week ending Friday, business was active, and prices were firm. 3,700 La Plata, dry, went at 90f to 102f the 50 kilogs; 400 ditto, salted Saladeros, 71f; and 1,750 Mazatlan at prices kept secret. The arrivals were 6,557. This week, Australian have been at 50f; Rio Grande, 70f; Calcutta, 76f; Buenos Ayres, 105f; ditto, 102f 50c; Monte Video salted, for cow, 67f.

WOOL.—At *Havre*, last week, considerable quantities of wool were sold by auction: viz., 1,585 bales La Plata, not washed, 87f 50c to 280f the 100 kilogs; 3 ditto, ditto, merinos, 405f to 445f; 2 ditto, washed, 240f to 302f 50c; 1,781 not washed, 95f to 382f 50c; 132 ditto, washed, 140f to 407f 50c; 995 ditto, not washed, 102f 50c to 300f; 28 ditto, 305f to 320f; 7 Australia, not washed, 230f to 300f; 1 Australia washed, 800f; 9 Germany, not washed, 202f 50c. In sheepskin, 60 bales Buenos Ayres, not washed, 105f to 132f 50c; 9 ditto Monte Video, washed, 175f to 205f; 14 ditto Buenos Ayres, not washed, 65f to 142f 50c. Apart from the auctions nothing was done. The arrivals were 45 bales wool. This week, Monte Video, not washed, has been at 1f 80c; Peru, not washed, 1f 40c; La Plata and Germany, at prices kept secret; Buenos Ayres, not washed, 1f 67c to 1f 90c. By auction, Buenos Ayres, not washed, have been at 75c to 2f 60c; Monte Video, not washed, 1f 5c to 2f 90c; Monte Video, washed, 1f 75c to 2f 90c; Bombay, 1f 67½c to 2f 87c. Some lots of Cape, Chili, and Mexico damaged have also been disposed of.

TALLOW.—At *Havre*, in the week ending Friday, the sales consisted only of 6 casks New York disposable, at 62f the 50 kilogs. The arrivals were 40 casks. This week, Rio Grande has been at 62f 50c; New York disposable, 64f; ditto for delivery, 63f. At *Paris*, yesterday, the 100 kilogs were at 133f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, were at 81f the hectolitre; Montpellier disposable, of 86 deg., 110f. At *Bordeaux*, the day before yesterday, Languedoc was at 108f; and beetroot, first quality, at 93f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Lords of the Committee of Privy Council for Trade have received a copy of a despatch from Her Majesty's Consul at San Domingo, reporting that the tariff established by the Dominican Government will continue in force, except in cases where the duties levied under it would be higher than those charged upon the same articles by the tariff of Cuba, in which cases the duties will be assimilated to the lower ones levied under the latter tariff.

The following is the latest commercial news from Calcutta:—Produce Market—The low rates at present ruling in freights have imparted considerable activity to this market, and, as supplies are by no means extensive, holders have been enabled to gain a slight advance in prices. Import Market—Demand has continued for most Manchester staples to about the same extent as at the date of our last report; but, as it has been generally freely met by importers, enhancement in values has only in a few instances taken place. Transactions have been on a full scale, news from the principal marts in the interior having been of a favourable nature, and purchases for local consumption are going on as before. Money Market—There is a plethora of money both in the bazaar and in outside channels, which is seeking employment at below bank rates without success. The business demand is below the supply, and that with little prospect of improvement for some time to come. Exchange—A moderate amount of business has been done for this opportunity in bills on London, chiefly in bank bills, as the supply of credit and document bills is limited. Bank bills have sold at from 2-0¼ to 2-0 5-16, closing at the former rate; for credits the quotations are 2-0⅜ to 2-0⅜ and 2-0½ to 2-0⅝d for documentary. On France, payable in London, the rates for six and three months' bills have been 2-0⅝ to 2-0½ respectively; payable in France, sales have been made at 253 to 260 for three months' sight, and 263 for six months' sight; on China the rate is 215; and on Mauritius, 52 for 30 days' sight, and 52½ for 60 days' sight. Freights—We have no change to report in our market for England; shipments of jute have been going on freely at previous quotations.

The following is dated Rangoon, Sept. 14:—Since our last there has been no material change in the rice market. Prices have throughout ranged from 82 to 83 rs, until late, when, supplies being checked by heavy rains, we have to quote the rates now ruling from 83 to 84 rs per 100 baskets. Supplies continue to meet the demand, which is not considerable, and the stock of paddy seems to be pretty fair as yet. We have had plenty of rain during August, and the crop in the fields is so far progressing favourably, and likely to yield a good harvest should no accident happen. Exports from the 1st of January to date amount to 63,333 tons, of which 48,676 tons to Europe, against 32,185 tons, of which 15,486 to Europe, last year. At Bassein, rice was worth from 67 to 68 rs per 100 baskets; and total exports were 21,794 tons. From Moulmein our last advices quote rice at 75 rs per 100 baskets. Exports had only amounted to 6,000 tons. There has been little doing in cutch, and our supplies are rather small. Lately purchases have been made for the Calcutta market at 19 rs per 100 viss. Exports up to date are 2,186 tons, against 3,247 tons last year.

From Akyab, we have intelligence to Sept. 18:—Previous quotations for rice have been steadily maintained throughout the last and the present month. Supplies continue to be small, but during the last fortnight, the weather having cleared up, the quantities coming to market have been increasing, and have found ready purchasers. The rice plantations are in good condition, and promise an average crop. Exports from June 21 last to this day. To Europe, 5,777 tons. Freights are not declining as yet.

The following commercial news has come to hand by the West India mail:—From Barbadoes the produce shipped to date amounted to:—Sugar, 46,295 hogsheads 3,332 tierces 9,484 barrels; molasses, 13,315 puncheons 877 hogsheads 1,029 barrels; rum, 122 puncheons 616 hogsheads. The market continued much depressed in imports. Bank bills, at 30 days, 490 dols; 60 days, 487½; 90 days, 480. At Demerara the weather continued hot and dry, and the canes rapidly maturing. Manufacturing operations were being carried on with increased activity, and were expected to continue to the end of the year. The exports of the colonial produce for the fortnight were:—Sugar, 1,812 hogsheads 79 tierces 566 barrels; rum, 762 puncheons 70 hogsheads 10 barrels; timber, 47,283 feet; charcoal, 1,155 barrels; shingles, 115,000. No improvement had taken place in business. Large importations had added to already ample stocks. At Jamaica the weather was exceedingly fine, and agriculture of every description in a very forward state. In the import market transactions were very limited, and trade, with few exceptions, restricted to retail operations. Sugar market bought up for shipment at 16s to 18s. Exchange, 90 days, ½ per cent. pm; 60 days, 1 per cent. pm; 30 days, 1½ per cent. pm.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending Sept. 18, 1861, compared with the previous month:—

	Aug. 24, 1861.	Sept. 21, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	20190372	19935500	...	254872
Private Banks	2974906	3035809	60903	...
Joint Stock Banks	2704611	2755327	50716	...
Total in England	25869889	25726636	...	143253
Scotland	4053808	4052388	...	1420
Ireland	5519428	5590370	70942	...
United Kingdom	35443125	35369394	...	73731

And as compared with the month ending the 22nd of Sept., 1860, the above returns show a decrease of 1,568,933*l* in the circulation of notes in England, and a decrease of 2,189,023*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,312,099*l*, the English joint stock banks are below their fixed issue 547,030*l*,—total below fixed issue in England 1,859,129*l*; the Scotch banks are above their fixed issue 1,303,117*l*, the Irish banks are below their fixed issue 764,124*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 18th of Sept. was 13,467,904*l*, being an increase of 958,381*l* as compared with the previous month, and a decrease of 2,706 436*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during

the month ending the 21st Sept.:—Gold and silver held by the Scotch banks, 2,482,594*l*; gold and silver held by the Irish banks, 2,107,862*l*; total, 4,590,456*l*; being an increase of 6,233*l* as compared with the previous return, and a decrease of 141,628*l* when compared with the corresponding period last year.

An Account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation and of coin held, during the four weeks ending Saturday, the 19ht day of October, 1861:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	300455	451134	256719

COTTON.

NEW YORK, Oct. 14.—The market was quiet, and sales confined to some 200 bales, in small lots, within the range of 21⅛c to 21¾c for middling uplands, chiefly at the latter figure.

NEW YORK, Oct. 22.—More firmness was observed in the cotton trade, and prices were well maintained.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand from the various markets held in the manufacturing districts during the present week are of a gloomy character. The demand for goods, both for home use and export, has fallen off considerably, and, in many instances, the quotations have ruled almost nominal. The iron trade is in a healthy state, and the transactions in coals have been extensive, at enhanced currencies.

MANCHESTER, Oct. 31.—A relapse having occurred in the cotton market through sheer stress of business, there has been as sudden and complete a cessation here from the demand which had been prevailing last week in a few departments. Trade buyers have withdrawn altogether, and some of those who of late had been most active in buying on speculation, have now been rather vainly attempting to resell at less than spinners' and manufacturers' rates. These rates have been modified where they were extreme; but, as a rule, the position of producers has been considered as bad as it can well be, and few attempts to press sales have been made by them. The great aim is to contract operations in every way.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

Raw Cotton.	Price Oct. 31, 1861	Price Oct. 1860	Price Oct. 1859	Price Oct. 1858	Price Oct. 1857	Price Oct. 1856

BRADFORD.—Very little activity prevails in the demand for wool, lustre wools being the only description that show any signs of life. Prices of these may be quoted very firm—almost firmer than a week ago—but all other sorts remain exceedingly quiet, and may be bought at prices fully as easy, but not lower. We can report no improvement and very little change among worsted yarns. The chief inquiry, both home and foreign, appears to be for lustre yarns; cobourg yarns and two-folds being exceedingly flat, and carded yarns becoming less in request. Pieces—Some considerable orders from France are in the market, which creates some animation, and manufacturers are well engaged for the home trade also.

ROCHDALE.—There has again been a flat market for wools and flannels. Prices are without change from last week. There is no improvement in Yorkshire goods.

LEEDS.—In the coloured hall only a small quantity of goods changed hands. There was very little call for coatings of any description; the principal inquiry was for light fancy mixed Meltons for the spring trade. Of the white hall we cannot report any more favourably. There was very little demand for white cloths, either ordinary cloths or mediums, and the sales effected were inconsiderable.

LEICESTER.—The hosiery trade has been by no means active, still a fair business is doing in some branches. Manufacturers, however, are extremely cautious, and for the most part produce only what is required. At Hinckley and Loughborough, business is quiet. The yarn market continues firm, and high prices are asked and obtained. Wools are not materially changed in value; the market is steady and extreme rates are maintained.

NOTTINGHAM.—The amount of business doing in the lace trade has been limited. Most departments are dull, and there is no immediate sign of a better state of things. A few plain goods are selling, but the demand for this class of goods is far below the average. In the silk department the chief goods selling are black lace. In hosiery goods there has been a fair business doing, but the market is still excited by the rising of the raw material, and manufacturers are asking higher prices. Stocks are very low.

HUDDERSFIELD.—Buyers, who are mostly from London and Bristol, are few, and their transactions are unimportant. They have principally been looking after the better class of goods in fancy trouserings and coatings, and even in these their purchases have been exceedingly sparing.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0*s*, at the works; best bars, 8*l* 0*s*; sheets, 8*l* 10*s*; doubles, 10*l* 0*s*; nail sheets, 8*l* 0*s*; latten, 11*l* 10*s*; boiler plates, 8*l* 10*s*; best and best best in proportion; common rods, 7*l* 0*s*; hoops, 8*l* 0*s*; gas strip, 7*l* 10*s*; Canada plates, 11*l* 10*s*; and all other sorts in proportion. Second and third-class makers are selling below these rates.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 14.—The demand for flour was tolerably active, with sales of about 22,000 bbls, closing within the range of the following quotations:—Superfine State, 5.20 dols to 5.30 dols; extra State, good to choice, 5.45 dols to 5.75 dols; superfine Western, 5.20 dols to 5.30 dols; common to choice, Western extra, 5.45 dols to 6.50 dols; extra Canada, 5.50 dols to 6.60 dols; mixed to straight Southern, 6 dols to 6.25 dols; straight to good extra ditto, 6.30 dols to 7.25 dols; choice extra family and bakers' brands, 7.25 dols to 8.05 dols; rye flour, 2 80 dols to 4 dols; corn meal, Jersey and Brandywine, 2.80 dols to 3.25 dols. Canada flour was in some better demand, and prices were firm, with sales of 1,200 bbls, closing within the above range of prices. Southern flour was steady, while the supply was moderate; the sales footed up about 1,500 to 1,800 bbls, within the range of our figures. Rye flour was firm and in fair demand at our figures, with sales of 350 bbls. Corn meal was steady at quotations, with sales of Jersey and Brandywine at the above prices. Wheat was steady, and most descriptions of good shipping qualities were firm at Saturday's quotations. The chief inquiry was for export to France. Corn was active, and about 1c per bushel higher, with a good Eastern and export demand.

NEW YORK, Oct. 22.—A very moderate business was doing in breadstuffs for export, but no change of importance had taken place in the quotations.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only moderate supplies of home-grown wheat have been on offer in the leading markets of consumption held this week, the demand for all kinds has fallen off, and prices have given way from 1s to 2s per quarter. Foreign wheat has changed hands slowly, at about previous rates. Both English and foreign barley has realised former terms, with a good consumptive inquiry. The malt trade, however, has not improved; nevertheless, the currencies have been supported. There has been a fair, but by no means active, sale for oats, at quite late quotations. Both beans and peas have commanded very full prices; but the inquiry for all sorts of flour has been less active.

Throughout the Continent, wheat has moved off slowly, at barely stationary prices. Spring corn, however, especially selected qualities of barley and oats, have commanded quite previous rates.

In America, no change of importance has taken place in the value of either wheat or flour. The shipments to England continue on a full average scale.

In Scotland, the wheat trade has been far from active, and prices have had a drooping tendency. Barley and most other articles have sold steadily at extreme rates. The crops generally are turning out inferior, compared with last year, both as to quantity and quality.

The Irish markets have been fairly supplied with wheat, which has ruled heavy. In prices, however, no change of importance has taken place. Most other articles have moved off steadily at late currencies.

At Mark lane, to-day, the show of samples of English wheat was small. More firmness was observed in the trade, and, in several instances, Monday's decline in the quotations was recovered. Foreign wheat was held at extreme rates. Barley, beans, and peas fully maintained previous rates. Oats were a slow sale, on former terms. The flour trade was steady, at full quotations.

Annexed are Mr E. Rainford's observations in reference to the floating trade:—The arrivals for orders reported up to last night since the 24th ult. are 33, comprising 8 cargoes of wheat, 15 maize, and 10 miscellaneous, viz.:—Wheat, 1 cargo from New York, 6 Taganrog, 1 Alexandria; wheat and flour, 2 New York; rye, 2 Taganrog; maize, 9 Sulina, 3 New York, 1 Montreal, 1 Odessa, 1 Galatz; barley, 1 Odessa; beans, 5 Alexandria. A considerable proportion of these were sold before arrival. The floating trade has been very dull this week, and maize slightly tending downward. For the few cargoes that have changed owners the following prices have been paid:—Wheat, arrived, per 492 lbs, hard Taganrog, to be delivered sound at Havre, equal to about 55s; Taganrog Ghirka, 54s 6d, for the United Kingdom. Flour, on passage, 5,000 barrels Philadelphia (B. L. October), 31s, for the United Kingdom. Maize, per 480 lbs, arrived, for the United Kingdom, Wallachian, partially imperfect, 33s 6d; mixed American, slightly imperfect, 32s 6d; Odessa, not perfect, 35s. Barley, per 400 lbs, for the United Kingdom, arrived, Galatz and Ibraila, some discolouration, supposed 25s; shipped or to be shipped, Egyptian, 27s 9d. Beans, per 480 lbs, arrived, for the United Kingdom, Barbary, slight dry warmth, about 35s 4d; Egyptian, slightly warm, 34s.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 30th day of October, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,082,190	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,432,190
		Silver Bullion	..
	28,082,190		28,082,190

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,953,001
Rest	3,128,195	Other Securities	16,655,416
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3,783,625	Notes	7,180,000
Other Deposits	14,329,182	Gold and Silver Coin	786,412
Seven Day and other Bills	780,827		
	36,574,829		36,574,829

Dated the 31st October, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,682,017	Securities	28,705,417
Public Deposits	3,783,625	Coin and Bullion	14,218,602
Private Deposits	14,329,182		
	39,795,824		42,924,019

The balance of Assets above Liabilities being 3,128,195*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

AN INCREASE of Circulation of	£77,391
AN INCREASE of Public Deposits of	98,323
A DECREASE of Other Deposits of	349,082
A DECREASE of Government Securities of	200,000
A DECREASE of Other Securities of	81,001
AN INCREASE of Bullion of	111,941
AN INCREASE of Rest of	4,308
AN INCREASE of Reserve of	24,301

The change in the above return are not very important, but they show a steady accumulation of the resources of the Bank. Both the bullion and the reserve have augmented, but a moderate increase has also taken place in the circulation. The other securities from the present stagnation in trade continue to diminish.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,738,581	£ 22,222,108	£ 23,226,627	£ 22,266,165	£ 21,682,017
Public deposits	5,437,553	6,576,441	5,512,538	4,156,309	3,783,625
Other deposits	10,387,251	12,242,726	14,571,619	13,736,933	14,329,182
Government securities	13,241,768	10,609,467	10,875,157	9,490,273	11,953,001
Other securities	12,688,022	14,805,909	13,809,026	19,758,226	16,655,416
Reserve of notes & coin	8,826,916	11,725,040	8,991,931	7,099,443	7,966,412
Coin and bullion	15,289,641	18,612,885	16,836,386	14,127,873	14,218,602
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	3½ p. c.
Price of Consols	98	98	96¼	93	93⅝
Average price of wheat	36s 6d	42s 10d	43s 1d	59s 11d	57s 9d
Exchange on Paris (shrt)	25 20 25	25 5 10	25 7½ 12½	25 12½ 20	25 27½ 35
— Amsterdam ditto	11 17½ 18	11 14 15	11 13 13½	11 14½ 14¾	11 18½ 19
— Hamburg (3months)	13 10¾ 11¼	13 6¼	13 5 5½	13 5¾ 6	13 9¼ 10

In the corresponding week of 1851, the only domestic event of any consequence was the public reception by the City of Kossuth. Some farewell entertainments had taken place in London, consequent on the closing of the Great Exhibition. From abroad, intelligence had arrived of the installation of a new Ministry in Paris, containing the name of no man of note. The *Constitutionnel* had published a semi-official article approving the policy of the President Louis Napoleon, and intimating in distinct terms his intention to submit the differences between himself and the Assembly to the arbitration of the people. Accounts from Italy had been received, representing the inundations of the Adige as having caused immense ravages. The last advices from New York stated that the commerical panic in the United States had subsided considerably. The London money market remained very easy.

In 1858, the demand for money showed a partial revival, consequent in part upon the payments on account of the Turkish and Indian loans, coupled with the calls on Indian railways, but the rate of discount in Lombard street did not exceed 2½ per cent. Chili was carrying on negotiations here with the view of raising a loan of 1,500,000*l*.

In 1859, payments on account of Indian railways and 440,000*l* on account of the Victoria Government loan, and the issue of 1,600,000*l* in debentures of the East Indian Railway, caused an active inquiry for money. A great demand for specie for export to the Continent and India existed, but it was met by large bullion remittances from the West Indies, United States, and Australia.

In 1860, intelligence had been published of the capture of the Taku forts, in China, the allies experiencing but little loss. In Italy, the voting had taken place in the kingdom of Naples on the projected annexation to Sardinia, which resulted in an immense majority in favour of the proposal, only a few suffrages being given against it. Capua had surrendered to the national forces. King Victor Emmanuel was about to enter the city of Naples, and great preparations had been made for his reception. The Prince of Wales was still travelling in the United States. The election of the Republican candidate for the Presidency appeared assured, but so little were the signs of the times generally apprehended, that the New York correspondent of the leading journal described the threats of disunion "to be gradually fading away." Some important mercantile failures were again reported from Brazil. At home, proceedings in bankruptcy had been taken against Messrs Davies and Co., the suspended Shoreditch bankers.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,350,771*l*; in 1858, a deficiency of 2,558,183*l*; in 1859, a deficiency of 4,237,407*l*; and in 1860, a deficiency of 6,031,293*l*. In 1861, the deficiency is 2,326,234*l*.

DISCOUNT AND MONEY MARKET.—The money market remains easy. The general rate for the best paper has fallen to about 2½ to ⅝ per cent., but, owing to the stagnation in trade, little business is doing. The following table indicates more exactly the rates on the different classes of bills, though of course these rates differ somewhat at different establishments:—

30 days	2⅝ per cent.
60 days	2⅝ to 2¾ per cent.
3 months	2¾ to 2⅞ per cent.
4 months	3 to 3¼ per cent.
6 months	3¼ to 5 per cent.

This afternoon, however, there was a slightly better demand, owing to preparations for Monday, the 4th of the month. A general expectation prevailed yesterday that the Bank would lower their rate of discount, and the breaking up of the Court without making any alteration produced for a time a rather adverse effect in the stock markets. On the Stock Exchange the supply of capital continues very abundant, and loans on Government securities are readily obtained at 1½ to 2 per cent.

To-day, the 1st of November, being the day appointed for the half-yearly balance of the Bank of England, the transfer offices have been shut, and there has been no attendance on the Stock Exchange.

The Bank of England have given notice that, in order to prepare the dividends due on the 5th of January, 1862, the balances of the several accounts in the following funds will be struck on the night of Monday, the 2nd December, viz.:—

3*l* per Cent. Consolidated Annuities.
New 3*l* 10s per Cent. Annuities, 1854.
New 5*l* per Cent. Annuities.
New 2*l* 10s per Cent. Annuities.
Annuities for terms of years.
India 5*l* per Cent. stock.

On Tuesday, the 3rd December, the above-named funds will be transferable without the dividend due on the 5th January next. The old East India stock is to shut on the 13th December, 1861, and will open on the 7th January, 1862.

LONDON:—Printed and Published by DAVID AIRD, of 18½ Exeter street, Strand, in the parish of St Paul, Covent Garden, at the ECONOMIST OFFICE; 340 Strand, parish of St Mary-le-Strand, in the county of Middlesex.—Saturday, November 2, 1861.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	6	5½
Vienna	6	5
Berlin	4	3½
Frankfort	4	3½
Amsterdam	3	3
Turin	6½	6½
Brussels	4	3½
Hamburg		3¼
St Petersburg	7	3

ENGLISH FUNDS.—Consols have again been firm this week, the low value of money in the discount market leading to increased investments, partly by the public, but to a more considerable extent by the banks. The closing prices yesterday were 93½ to ⅜ for money and the present account, and 93½ to ⅝ for the new settlement in December, being a rise on the week of a quarter per cent. The improvement would probably have been more marked, but for the adverse effect of the news from America, our relations with the Federal Government exciting some uneasiness. The position of Continental affairs is also viewed unsatisfactorily.

The ease in the money market causes Exchequet bills to be in demand for temporary investment, and the price shows a further advance of 1s, the March issue being quoted 5s to 8s to 8s premium, and the June 13s to 16s premium. India bonds remain without change at 11s to 15s premium.

The Indian Five per Cent. stock has again improved, and at one time touched 105⅜, but subsequently went to 105⅛ to ¼. Exchanges continue to be made from Consols into this security.

Indian rupee paper stocks have been in less active demand this week, but closed at a further advance of a quarter per cent., the final prices being 104¾ to 105¼ for the Five-and-a-Half per Cents., and 97¾ to 98¼ for the Fives.

FOREIGN STOCKS.—The principal movement this week has been a steady rise in Mexican, on the announcement that the terms of the Convention have been definitively arranged, and that the rights of the bondholders as to priority of claim will be fully respected. Compared with last Friday, the price of yesterday evening showed an advance of more than 2 per cent. The advices from Venezuela of the installation of General Paez in the chief government of the country, and of his appointment of a Ministry containing Senor Rodriguez for the department of Finance, have also caused a good improvement in the bonds of that Republic. Buenos Ayres descriptions have risen on the announcement of the defeat of General Urquiza, Turkish Six per Cents. have fallen on the disturbances reported from various parts of the Ottoman Empire and the apprehension of a revival of "the Eastern question." There has been a better inquiry for Brazilian bonds, and also for Spanish. The chief firmness, however, is shown in Spanish American descriptions, and the transactions in this department were yesterday unusually large. The new Italian loan continues to droop.

The closing price of French Three per Cents. in Paris yesterday evening was 68f, showing a decline since last Friday of about a quarter per cent., but a recovery of a quarter from the lowest price touched during the week. To-day the Bourse is closed for the festival of All Saints.

The annexed memorandum has been received from the Committee of Mexican Bondholders:—

The Committee have received advices from Mr Whitehead, dated Mexico, the 29th September, and from Messrs Viga Brothers, dated Vera Cruz, the 1st October.

The latter send by this packet 30,703 dols per balance of anterior receipts. A balance of similar receipts—about 57,000 dols—is also still locked up in the city of Mexico, and it was contemplated to send a conducta to Vera Cruz between the 2nd and 5th October, by which that balance would of course go, but Government had scarcely any troops to dispose of, or officers to take charge, in whom the public feel confidence; besides which people are not much disposed to risk their funds at so precarious a moment, so as to leave the intended conducta still a matter of doubt. Senor Montes having, in a public sitting of the Congress, attacked Government for having entered into a treaty with an American Company for the sale of the whole of the Tierras baldias for 10,000,000 dols, Mr Whitehead addressed a formal protest to the Minister of Finance against the alienation of those lands, to which the Minister replied the next day, denying the fact, and asserting, in answer to an observation in Mr Whitehead's letter that a considerable part of the Church property yet remained. On the 13th of September, Mr Whitehead had an interview on the state of the debt, when the conversation took a somewhat interesting turn, but which, in the present position of affairs, when England is precluded from acting separately as regards her claims on Mexico, comes, of course, too late to lead to anything. The Government sees the necessity of imposing taxes, but complains that with their federal system (each State being sovereign within its own limits), it was very difficult. Their plan now is to get a certain contingent assigned by Congress to each State, leaving them to raise it as they choose. Politics continue in a state of the utmost confusion. Congress was nominally in ordinary session since the 16th September, but virtually closed for want of members. The extraordinary sessions which preceded it were pretty well attended. The law of the 17th July (suspending payments) had been severely censured, and the Minister of Finance called upon for a distinct statement of the advantages gained by Mexico from the suspension. On the 7th September, 51 deputies signed a petition to Senor Juarez, requesting him to withdraw, at least temporarily, from the presidency. A counter petition of 52 deputies begged him not to resign. The press also is about equally divided on the subject.

The chief command of the operations against the reactionists in the Sierra had been taken from General Ortega and given to General Doblado, the Governor of Guanajuato. Marquez had, on the 3rd September, made an attack on the important city of San Luis, and had got into it, but was driven out again with slaughter.

General Ortega, who commands there, says that though his troops require 2,000 dols a day, he has all the month only had 1,300 dols, and declares that he does not know what to do. The usual amount of outrages has not been wanting, and things are, in short, in as bad a state as possible.

And the following from the Ecuatorian Commission of Agency:—

A remittance of 200l has been received by to-day's mail from Guayaquil, on account of the dividends on the debt of Ecuador. A further amount would have been remitted, but that bills on England were not obtainable.

The subjoined satisfactory intelligence respecting the debt of New Granada is contained in a letter which has been received from Bogota, dated September 13th:—

General Mosquera has triumphed, as no doubt you have heard, over the party who wished to govern the country through the Jesuits and the Church. He has recognised the settlement of the debt as made in a decree dated the 9th inst.

"EXTRACT.

"Organic Decree of the National Credit, cap. 4, art. 24.—The redemption Caisse,' created under the law of the 7th of June, 1847, is re-established in the terms of the present decree.

"The funds of the redemption 'Caisse' are:—

"1. The moiety of the produce of the Panama railways, and 25 per cent. of the import duties for the payment of interest and gradual redemption of the foreign debt, until completing 210,000 dols each year, until 1866; and from 1867 forward 37½ parts shall be taken in the custom houses, for the purpose of completing 315,000 dols annually.

"Should the said funds not reach the sums aforesaid, they shall be made up out of any funds of the revenues of the United States."

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and Thursday:—

RAILWAYS AND OTHER SHARES.—The railway market has shown renewed buoyancy, and in nearly all the leading stocks an advance has taken place. Lancashire and Yorkshire has been especially in demand, the late speculative sales having been in some measure met by purchases for money, and the stock is consequently very scarce for transfer. The traffic returns on this line also continue comparatively good, taking into consideration the extreme depression in trade. Midland and Caledonian have likewise been in request. London and North-Western, on the other hand, has exhibited some dulness, and Great Northern, although higher, is more supplied. South-Eastern has again been flat. The general business shows that, from the cheap rate of money and the expectations of next year, the public continue to invest in railway property, and make few sales at present prices.

Colonial descriptions have been fully maintained, Indian guaranteed stocks continuing to participate in the rise in other Indian securities. Great Western of Canada shares have likewise improved, but have partially relapsed from the highest price of the week.

Foreign shares are firm, particularly Brazilian. French have been affected by the decline on the Paris Bourse. Great Luxembourg were rather flat in the commencement of the week, but they have since become firmer. American securities have generally receded.

In the miscellaneous market the principal feature is an active demand for St John del Rey and United Mexican Mining shares, in both of which a considerable advance has taken place. The new Mercantile Fire Insurance improved yesterday to ¼ to ⅜ premium on a statement of a proposed amalgamation with the old-established North British Insurance Company. Commercial Union are dull at ¼ discount to par.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and Thursday:—

RAILWAYS.	Closing prices last Friday.	Closing prices Thursday.
Bristol and Exeter	94 6	94 6

FOREIGN EXCHANGES.—The rates this week have been rather less firm, the Paris quotations being a shade lower.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, on the transactions in bullion during the week, and the operations in Indian rupee paper:—

Gold.—The transactions in gold this week have not been important. The only arrival has been the Shannon, from the West Indies, with 82,000*l*. The Tyne, from the Brazils, with 119,238*l* for this country, has arrived at Lisbon. The shipments have been 7,500*l* for Bombay and 1,250*l* for Alexandria, per Mooltan; 60,820*l* for New York, per Persia; 14,067*l* for New York, per Edinburgh. About 101,000*l* has been bought by the Bank of England since our last.

Silver.—Our market has been exceedingly quiet since the completion of the orders for Bombay on the 25th instant; the price, however, remains as last quoted, viz., 5*s* 0¾*d* per oz standard. 230,280*l* was shipped for Bombay per Mooltan. The Shannon, from the West Indies, has brought 164,000*l* in bar silver; this will be deliverable about 5th November. The shipments by the India and China steamer of to-morrow will be exceedingly limited.

Mexican Dollars.—A few sales have been effected at 4s 11⅜d per oz, being a rise of ⅛d; this increase of price is owing, however, more to the short supply available, than to any increased demand.

Exchange on India for banks' drafts remains as last quoted, 1s 11¾d Bombay, and 1s 11⅜d to ¾d Calcutta, 60 days' sight; Madras, 1s 11½d to ¾d. Bills with documents, Bombay and Calcutta, 1s 11⅜d to ¼d.; Madras rather lower.

Indian Government loan notes are higher than last week. We quote 5½ per Cents. 104½ to 105, and 5 per Cents. 97¼ to 98. Prices, however, are not as firm the last day or two, the prospect of remittances to this side, against the low exchanges at Calcutta, being no doubt considered.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 75s 6d to 76s, nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, 76s 5d per oz. Silver—Bar silver, 5*s* 0¾*d* per oz std, last price; bar silver, containing 5 grs gold, 5*s* 1d per oz std; fine cake silver, 5s 5⅜d to 5s 5½d per oz; Mexican dollars, 4s 11⅜d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, nominal.

The Alhambra has arrived from the Peninsula with 2,400*l* in specie, and the Pera with the heavy portion of the Calcutta and China mail and 1,800*l*.

There were no sales of gold to the Bank either yesterday or to-day.

The outgoing steamer with the India and China mail will take 22,089*l*, all silver except 728*l*, of which 100*l* is for Alexandria, 2,668*l* for Calcutta and Madras, and 19,321*l* for Chinese ports.

The Atrato, sailing to-morrow for the West Indies, will carry 3,375*l* in silver.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The suspension has been announced of Messrs Barnard, Rosenthall, and Co., braid and trimming manufacturers and warehousemen, of Cheapside, with liabilities of about 60,000*l* to 70,000*l*. The assets are stated to be considerable. The disaster is attributed to the absence of specie remittances from America.

It appears that in consequence of the pressure of the depositors in the Bank of Deposit, National Assurance and Investment Association, it has been determined to call in a public accountant to investigate the books of that concern. The liabilities are estimated to exceed 300,000*l*, while the assets are nominally more than that amount, but will not probably realise more than half. The depositors are chiefly among the poorer classes, and are spread all over the country. The bank was established in the year 1844. Annexed is the circular issued:—

Bank of Deposit, National Assurance and Investment Association, 3 Pall Mall East, London, Oct. 30.

Sir,—In consequence of the advertisements and paragraphs which have recently appeared in some of the daily journals relative to this Association, the stockholders have (not unnaturally perhaps) become anxious for the immediate repayment of their investments. This is virtually impossible, as the nature of the majority of the securities held by the Association precludes their immediate realisation. Under these circumstances, and at the suggestion of some of the stockholders, the Board have resolved that the precise position of the affairs of the Association shall be ascertained by public accountants, and Messrs Harding, Pullein, Whinney, and Gibbons, of 8 Bank buildings, have been requested to investigate the accounts and report thereon. So soon as their report is prepared, a meeting will be convened.—I am, &c.,

PETER MORRISON, Managing Director.

PUBLIC COMPANIES.—A meeting of the Chartered Bank of India, Australia, and China took place on Wednesday, when an ad interim dividend was declared for the past half-year at the rate of 6 per cent. per annum, free of income tax, leaving about 5,000*l* to be carried forward. The general business of the past half-year was stated to have been satisfactory, and a good profit has been realised, notwithstanding the disadvantage of the high rate of interest current in London. An unfavourable feature, however, has transpired since making up the present accounts, in the circumstance of the agent at Bombay having incurred a liability on account of the bank of 20,000*l* in connection with some native railway contractors. This act was strongly reprehended by the Board, and is considered so great a breach of duty, that, in the event of loss, it is believed a claim can be made upon the Association, by whom he is guaranteed to the extent of

5,000*l*. As yet, however, no loss has been sustained, nor is it known if there will be any. As a precautionary measure, the Directors consider it sufficient to reserve the unappropriated profit of 5,000*l*. The proceedings closed with the usual vote of thanks.

At a half-yearly meeting of the Oriental Bank on Tuesday, a dividend was declared at the proposed rate of 14 per cent. per annum, free of income tax. The establishment was stated to be progressing satisfactorily, the profits in the first half of the present year being 109,015*l*.

The following communication with regard to the proposed Telegraph to India Company has been posted in the Stock Exchange :—

Telegraph to India Company (Limited),
62 Moorgate street, Oct. 28.

Dear Sir,—I am desired to inform you that, as the formal acceptance of the Government proposals by the shareholders of the Red Sea and India Telegraph (or old) Company must precede any active operations on the part of the Telegraph to India (or new) Company, it has been resolved not to proceed with the allotment of shares in the latter until after the decision of the meeting of the Red Sea and India Telegraph Company, which is convened for Tuesday, the 5th of November, at 1 o'clock, at the London Tavern, shall have been ascertained.

In the event of the Government proposals not being accepted, the deposits on shares in the new Company will be returned in full. —I remain, dear Sir, your obedient servant,

M. Slaughter, Esq. C. L. Peel, Secretary.

The Directors of the Bank of Turkey have announced that they prepared to return to the proprietors the full deposit of 3*l* per share. In their report, published about a fortnight ago, they proposed to make an immediate distribution of 2*l* only, and a further small payment upon the realisation of the caution money in the Bank of England, about 13,400*l*. It will be remembered that this intimation created great dissatisfaction, and legal proceedings were instituted to compel the return of the full amount. By the present decision of the Directors, all litigation however will now be stopped.

The prospectus of the Asphaltum Company, Limited, has been issued. Its object is to work certain mines near to the Havana, in Cuba, in which there is stated by Mr Andrew M'Clean, who examined the ground on behalf of the Company, to be an excellent vein of asphaltum, in a favourable position for easy transport.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 5 per mille premium, and the short exchange on London is 25.32½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 429 per mark, and the short exchange on London is 13.7⅞ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 4-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107¼ to 107⅜ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The fresh arrivals of English wheat to Mark lane, this morning, were very moderate. Compared with Monday, there was more firmness in the trade, both for red and white qualities, and that day's decline in the quotations was, in several instances, recovered. Foreign wheat was held at extreme rates; but the amount of business transacted in it was small. Malting barley sold steadily, at full quotations; and other kinds were firm in value. Oats moved off slowly, yet good sweet corn quite supported previous rates. Beans and peas were in limited supply, and both article

changed hands at quite the recent advance in prices. In flour, the business doing was somewhat restricted. The quotations, however, ruled firm. This week's imports amount to 25,440 quarters of wheat, 5,460 barley, 32,300 oats, 500 sacks and 790 barrels of flour.

At Liverpool, to-day, wheat was in good request, at an improvement in value of 1d per cental. Flour and maize were firm, and somewhat dearer.

Annexed is M. Othon Trithen's monthly report of the corn trade of Odessa, dated Oct. 18:—The descent of wheat from the interior, towards the end of September, was favoured by magnicent weather, and the arrivals, both by land and water, towards the end of the month, assumed enormous proportions, which, coupled with duller news from abroad, have produced a considerable decline in our prices; this has, however, taken place only in secondary and inferior qualities, superior sorts having slightly advanced. The latest telegrams from London and Marseilles being again more encouraging, things have also recovered with us, and the transactions of this week amount to the large figure of about 140,000 chetwerts. Freights to the United Kingdom, 65s. The want of disposable vessels continues to be much felt. Current prices are as follows:—Polish Odessa wheat, superior, 44s 6d per 495 lbs, 43s 3d per 480 lbs; ditto, ditto, fair average, 41s 3d per 480 lbs; Sandomirka ditto, superior, 44s 6d per 485 lbs, 44s per 480 lbs; ditto, ditto, fair average, 42s 3d per 475 lbs, 42s 9d per 480 lbs; Ghirka ditto, superior, 44s 6d per 500 lbs, 43s 9d per 492 lbs; ditto, ditto, fair average, 40s 3d per 485 lbs, 40s 10d per 492 lbs; hard ditto, 41s 3d per 500 lbs, 40s 6d per 492 lbs; maize, 25s per 500 lbs, 24s 6d per 492 lbs; barley, 18s per 385 lbs, 18s 8d per 400 lbs; oats, 17s 6d per 285 lbs, 18s 6d per 300 lbs; rye, 23s per 450 lbs, 24s 6d per 480 lbs; linseed, sifted, superior, 48s 3d; ditto ditto, fair average, 47s; ditto, unsifted, 45s; rapeseed, fair average, 25s 6d per quarter, f.o.b.

There was considerable activity in the demand for breadstuffs at Alexandria during the week ending October 18, and, in some instances, a further advance had taken place in prices. Annexed are the sales:—11,022 qrs Saide wheat, 32s to 33s 6d; 7,444 qrs Beheireh wheat, red 32s to 32s 8d, white 33s to 33s 6d; 9,216 qrs Saide beans, 26s 6d to 27s 5d; 404 qrs Beheira beans, 24s to 24s 7d; 3,032 qrs barley, 19s 5d to 20s 3d; 282 qrs lentils, 25s 11d; 70 qrs ceci, 33s 10d; 193 qrs linseed, 48s to 49s 4d per qr, free on board. Freights, in the last two days, have been firmer, there being no unengaged tonnage in port. Beans to the United Kingdom for orders may be quoted at 6s 3d to 6s 6d; wheat and other grain or seed in proportion; to a direct port, 5s 9d to 6s 3d; by steamer to Liverpool, 5s 6d per qr.

EXPORTS of GRAIN in Quarters from ALEXANDRIA from 19th April to 17th October.

During the whole of the present week the Liverpool cotton market has been very quiet. The sales amount to only 63,000 bales, including 29,000 to spinners, 28,000 on speculation, and 6,000 for export. Quotations for fair are the same as last week, for middling Georgia and Mobile ⅛d to ¼d lower, for middling Orleans unchanged. Inferior descriptions of Surat are about ⅛d under last Friday. The better qualities, however, command the full rates of last week. It appears that this dulness in the market is merely in consequence of several speculators, being desirous of now realising the immense profits shown on their late purchases in so short a time, now putting their stocks on the market. The position of the article, however, is not changed in the least. The animosity of the belligerent parties in America is only on the increase, and the prospect of supply of cotton consequently must be still very remote. In all probability the market, therefore, will very soon regain its rising tendency. To-day, only 2,500 bales have been sold, with a very quiet market.

The cotton trade of Alexandria, for the week ending Oct. 18, is thus reported by Messrs Briggs and Co.:—Although the Nile has gone down considerably, the danger is not yet over, the pressure of water against the dykes being very great; still it is to be hoped that nothing serious will now occur. The damage done to the cotton so far is estimated at about 20,000 bales, nevertheless the yield will, it is supposed, be larger than last year. The transactions for the past week have been:—10 bales sweepings to low ordinary, 6d; 5 ordinary to middling, 8 3-10d to 8 7-10d; 9 good middling to fair, 8 8-10d; 31 good fair to good, 9 4-10d to 10¼d; 71 bales new crop of 1861-62, 11d to 12⅛d per lb free on board. Freight—¼d per lb by steamers.

EXPORT of COTTON in bales from 3rd to 16th October.

The market for all kinds of tea has continued firm, and the quotations have been well maintained.

The annexed commercial intelligence is dated Hong Kong, September 12:—

Canton Silk—Sales amount to only 15 piculs. Loong Kong, 410 dols. Tea—A fair business has been done in congou, amounting to 18 chops. Prices at first showed no alteration, but latterly the teamen have increased their demands, particularly for medium Oopeik teas, and hold firmly for an advance of fully 1 tael, which in some instances has been paid. Considering the qualities of the teas now offering, an advance of 2 to 2½ taels is established on opening rates. Scented Teas—Common and medium kinds show little change, but fine descriptions, being scarce, are fully 1 tael dearer. Foochow advices are to the 2nd inst. Tea—During a fortnight a considerable business has been done at about previous rates. Common to good common were rather easier, but the medium and better sorts show no change. The principal business has been done for England, with a fair amount for Australia. Stocks—Congou, 84,020 chests, a large portion below good common; ditto fine; souchong, 8,855 chests; Oolong, 20,300 half-chests; pekoe, 2,292 chests; scented teas, 3,438 boxes. Shanghai advices are to the 3rd inst. Silk—Settlements for the fortnight amount to 5,500 bales, of which more than one-half had been bartered against Manchester goods. The settlements for the season amount to 18,000 bales, and the stock was steadily increasing, and was fully 18,000 bales, exclusive of 2,000 bales at Ningpo. Prices were firm at last quotations, but the same complaint of the scarcity of good silk still existed, and there seemed no probability of any arriving during the season. Quotations are—Tsatlee, Nos. 1 and 2, none; No. 3, 415 to 420 taels; No. 4, 390 taels; inferior, 330 to 370 taels. Taysaam, No. 1, 360 taels; No. 2, 330 taels; No. 3, 300 taels; No. 4, 270 taels; inferior, 230 to 260 taels. Total export of silk from China to Europe is 12,545 bales, against 17,631 bales, or a decrease of 5,086 bales for this season. Tea—In blacks a fair amount of business had been done at slightly easier rates for the finer qualities. Nine chops had been settled at 26 to 34 taels. 11 chops of contract tea had arrived from Hankow, and been shipped off. The following had been the settlements:—13,300 chests congou, at 26 to 34 taels; 600 chests flowery pekoe, at 30 to 34 taels; 800 half-chests Japan Oolong, 28 taels. Stocks—12,900 chests congou, Oopeik and Oonahm; 2,500 chests Shanghai-packed and low tea; 1,300 chests flowery pekoe. Green Teas—A small business only had been done owing to the non-arrival of supplies from Ningpo, at which place stocks had accumulated to 22,000 packages. Prices for the lower qualities had advanced, but finer sorts were a little easier. Settlements had been 6,700 half-chests Moyune and Fychow, and 1,200 half-chests Japan. Stocks, 6,900 packages. The total export of tea from China to Great Britain is 21,487,500 lbs, against 18,355,200 lbs, or an increase of 3,132,300 lbs for this season. To the United States the export is 1,822,200 lbs, against 5,556,600 lbs, or a decrease for 1861-62 of 3,734,400 lbs.

The demand for raw sugar has been very inactive. Good and fine qualities have supported previous rates. Inferior samples, though at one period rather drooping, have not materially changed in value. Refined goods have been in limited request, on former terms.

The shipments of sugar and molasses from Havana, Matanzas, and Cardenas, from Jan. 1 to Oct. 4, were as follows:—

SUGAR.

	1861 hhds	1861 boxes	1860 hhds	1860 boxes

Coffee, of good and fine quality, has sold steadily, at full prices. In low descriptions no material change has taken place; but the inquiry for them has been far from active. Cocoa has ruled firm, at extreme rates.

Messrs Fryer, Schultze, and Co., of Ceylon, write as follows in reference to the coffee trade. The communication is dated Sept. 30:—

The exports of coffee since our last have been small, showing the following totals to date:—

PLANTATION COFFEE.

To Great Britain	cwts 419,776	against last year,	cwts	423,015
Foreign Ports	23,814	—	—	37,537
Australia and India	15,293	—	—	10,870
	458,883			471,422

NATIVE COFFEE.

To Great Britain.....	cwts 76,339	against last year, cwts	87,859
Foreign Ports.....	50,769	— —	68,113
Australia and India.....	7,975	— —	3,640
	135,083		159,612

The Cornwallis will clear this day, having on board 8,103 cwts plantation and 918 cwts native coffee, thus completing the shipments for the current season. A few small sales of plantation coffee have been made during the fortnight at our quotations, but scarcely any has yet reached Colombo. Low country crops are ripening rapidly, and hands for transport cannot at present be spared in such localities. The native Ouvah crop is nearly exhausted, and the few remaining parcels find buyers for the colonies at fully our last quotations. Contracts have been made for the new Kandy crop at 37s to 38s, but as yet none has come to market. Freights—With but little produce available for shipment, the rates to London have receded to *4l 5s for coffee in casks* and cinnamon. Bags are still taken at *3l*. Plantation coffee, low, 11s 6d to 11s 9d; ditto, mountain, 11s 6d to 11s 9d per bhl: native coffee, unpicked, 37s to 38s; ditto, picked and dried, 40s per cwt. Cinnamon, plantation, 8d; ditto, inferior, 6d to 7d per *lb*.

Most kinds of rice have been dealt in to a limited extent; nevertheless, prices have been supported. The dry fruit trade has been inactive, at about former rates.

The quarterly sales of cinnamon took place on Monday. There were 1,794 bales, 52 half-bales, 33 boxes, and 38 parcels Ceylon brought forward and nearly all sold, partly at 1d to 2d per lb advance on the previous sales' currency, viz.:—202 bales, firsts, from 1s 3d to 2s 3d; one bale extra fine, 3s 1d; 931 bales, seconds, 1s 1d to 1s 10d; 526 bales, thirds, 11d to 1s 3d; and 135 bales, fourths, 8d to 11d per lb.

For rum, there has been a steady, but far from active demand, at last week's currency. In brandy, no change has taken place. The accounts at hand from Portugal are very favourable respecting the wine crop.

In wool, both English and colonial, very little has been done. Prices, however, are unaltered. The next public sales of colonial will commence on the 7th inst. Hemp has been in steady request, at 34*l* per ton for clean Russian.

Scotch pig iron has been somewhat heavy, at from 50s to 49s 6d cash, mixed numbers. Most other metals have ruled firm. The following is the monthly report of Banca tin in Holland:—

	1861. slabs	1860. slabs	1859. slabs
The stock on warrants amounted on Sept. 30	31747	88072	85477

Stock in the hands of the Trading Society for their annual sale ...	45114	45114	57745

Linseed oil has changed hands to a moderate extent, at 35s per cwt on the spot. Rape, olive, cocoa-nut, and palm oils have been held at fully previous quotations. American spirits of turpentine have advanced to 66s per cwt.

The tallow trade has been inactive. The quotation for Petersburg Y.C. is 52s per cwt on the spot; and 53s for January to March delivery. Town tallow, 53s 3d, net cash.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—No improvement can be noticed in the demand this week, but fine grocery, as well as strong refining qualities, remain firm. The West India market is steady, 1,510 casks being sold to yesterday (Thursday). 350 casks Barbadoes by auction went rather irregularly: brown, 35s to 36s; low to very good yellow, 36s 6d to 42s 6d. Grainy Demerara brought 40s to 44s per cwt. No floating cargoes of foreign have sold during the week. This week's delivery was 5,030 tons, and the landings 2,270 tons; consequently, the stock has further decreased, viz., to 82,050 tons. It is still, however, 16,700 tons over that of the previous season at the corresponding period.

Mauritius.—Of 4,590 bags by auction, a portion only sold: semi-grainy sorts, 41s 6d to 43s; dark to good soft brown taken in at 31s to 34s 6d, a few lots being sold; low grey, 35s 6d per cwt.

Bengal.—2,160 bags about one-fourth part sold: fine Bally, 41s 6d to 46s; Gurpatta date bought in at 38s 6d to 42s per cwt.

Foreign.—1,018 casks 371 barrels Porto Rico went off at about former rates: brown, 35s 6d to 36s 6d; low to fine yellow, 37s to 43s 6d. 623 casks Cuba sold at 33s to 40s for low brown to good yellow. By private contract, 1,200 bags Maceio sold at 32s 6d to 33s 6d per cwt. A floating cargo of white Pernambuco has sold for the Mediterranean at 28s 3d per cwt.

Refined.—The market is quiet, and prices are the same as on Friday last.

RUM.—A better demand prevails. Leewards, 1s 8d; low, 1s 7d; Demerara, 1s 9d to 1s 9½d for current qualities; Penang, 1s 6½d proof; common Jamaica, 2s 6d to 2s 8d per gallon, with sales to a fair extent. The total stock is 33,660 puns 4,200 hhds, against 29,325 puns 4,225 hhds last year at the same time. 200 casks Cuba sold on terms which do not transpire.

COCOA.—West India is steady. Guayaquil commands 62s to 63s per cwt.

COFFEE.—The various parcels of plantation Ceylon from recent arrivals already brought forward, have found buyers at rather irregular and occasionally at 6d to 1s lower rates, but the demand is now steady. 950 casks 520 barrels and bags went at 73s to 81s for small berry to good middling coloury. 749 bags native: good ordinary, 68s to 68s 6d; low and small berry, 66s 6d to 67s. Transactions by private contract have been generally unimportant.

TEA.—The market has been firm at the improvement already established on several kinds. Public sales were commenced yesterday, the total quantity printed in the catalogues being 23,100 packages, 4,213 packages Assam sold with spirit at 1d to 3d advance. The Kumaon tea, not being of quality generally suitable for consumers, was taken in. China kinds sold at former rates.

RICE.—This article is dull, and scarcely any business has been done by private treaty during the week. At auction, on Wednesday, 450 bags good middling white Bengal sold at 14s per cwt. A cargo of Necrancie Arracan of next year's shipment has sold at 11s per cwt.

IMPORTS and DELIVERIES of RICE to October 26, with STOCKS on hand.

	1861. tons	1860. tons	1859. tons	1857. tons

Exported	...	8600	17550	19200
Stock	31050	42400	72720	89100

SAGO FLOUR.—600 bags sold at 16s 6d per cwt.

SPICES.—500 bags Zanzibar cloves partly sold at 3⅝d for fair, and common bought in at 3⅜d. A portion of old import withdrawn. 10 casks Amboyna partly sold at 5d. 53 bags pimento were bought in at 3d per lb. Black pepper remains very firm. Nothing of interest has transpired in white. 208 boxes cassia lignea partly found buyers at 87s to 92s for middling to good. 60 packages cassia vera part sold at 20s to 26s. 46 barrels Jamaica ginger realised 2*l* 14s to 3*l* 10s per cwt.

CINNAMON.—The quarterly sales on Monday went off steadily at full rates to 2d per lb advance, 1,807 bales being chiefly sold. Good to fine 1st sort Ceylon sold at 1s 8d to 2s 3d; very fine at 3s 1d; low coarse to middling ditto, 1s 4d to 1s 6d; good to fine 2nd sort, 1s 5d to 1s 10d; low middling to middling ditto, 1s 2d to 1s 4d; low to fine 3rd sort, 9d to 1s 3d; low and coarse to good 4th sort, 8d to 10d. The Tellicherry sold at 10d and 1s per lb for second and first quality.

SALTPETRE.—A few parcels have sold during this week at rather higher rates, or quite 1s advance upon late prices: refraction 10 to 2½, 33s to 35s. By private contract, Bombay has realised 30s 3d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to October 26, with STOCKS on hand.

	1861. tons	1860. tons	1859. tons	1858. tons
Imported	9550	10760	15700	8300
Delivered	9670	10560	14600	11780
Stock	3200	4050	4030	2650

The deliveries last week were 226 tons.

DYESTUFFS.—55 bales Bengal safflower sold at 4*l* 15s to 7*l* 2s 6d for ordinary to fine quality, partly of the new crop, being 10s higher. Bengal turmeric was taken in at 14s per cwt. Cutch and Gambier are steady at last week's quotations.

LAC DYE.—Middling qualities command steady buyers. 128 chests, by auction, partly sold at 1s 1d to 1s 3d per lb for these sorts.

RUBBER.—East India is selling at 1s 1d to 1s 2d; and fine Para quoted 1s 7½d per lb, with a firmer market.

METALS.—Rather a quiet tone pervades business. Foreign tin is unaltered. Banca does not offer on lower terms in Holland, and quotations here must be considered steady. Iron presents no change. The last sales of Scotch pig were at 49s 9d per ton mixed numbers. Spelter continues active, several contracts being made for delivery at 19*l* 5s to 19*l* 10s per ton. Copper and lead are the same as before.

HEMP.—Of 1,500 bales Manilla hemp by auction, the sound portion was bought in; about half the above quantity, comprising sea-damaged, sold at 17*l* 10s to 23*l*. A moderate extent of business is reported privately, at 22*l* 5s to 23*l* 10s. Petersburg clean steady at 34 per ton.

JUTE.—Speculative purchases have been made at a further rise of 1*l* to 2*l*, partly owing to the high prices of cotton, and large sales are reported by private contract. On Wednesday, the above advance was fully maintained, and of 8,835 bales at auction, about half sold at 15*l* to 22*l* 10s per ton.

LINSEED fully maintains the late advance: Bombay, 67s; Calcutta, 62s to 64s, on the spot, according to quality. Sales in the latter afloat are reported at 58s 6d to 63s, and floating cargoes of Taganrog at 60s 6d to 60s 9d per quarter.

SPIRITS TURPENTINE.—American drawn last sold at the advanced price of 65s per cwt.

OIL.—Sperm neglected, with sellers at 89*l* to 90*l*. Olive has been in better demand: Gallipoli, 60*l*; the town sorts at 56*l* 10s to 58*l* per tun are dearer. Owing to scarcity, linseed oil maintains its previous value of 35s. Rape steady: foreign refined, 47s 6d to 48s; brown, 44s per cwt. By auction, 164 casks palm sold at firm prices, 40s 9d to 45s 6d. 700 casks Cochin cocoa-nut bought in at 51*l*. 200 casks Sydney sold at 45s to 49s 3d per cwt. Both descriptions firm by private contract.

TALLOW.—The large shipments from St Petersburg seem to have prevented further speculative operations, but a steady demand has prevailed from the consumers, and the deliveries keep good. This morning, first sort Petersburg Y.C. is quoted 51s 6d, to the end of the year, 51s 6d; spring, 52s 6d; old, 50s 6d per cwt. 600 casks by auction about half sold: Australian sheep, 43s to 53s 9d; beef, 48s to 49s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, October 21.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was more steady to-day, but closes without alteration in prices. 850 casks Barbadoes and other West India, by auction, sold at previous rates. Of 1,621 bags Bengal, about one-third part, comprising white Benares, realised 46s 6d to 47s for good to fine. The week's business in West India amounts to 2,970 casks. Privately, several parcels foreign and muscovado sold, also some Cossipore Bengal at 45s, and 600 bags China at 31s to 31s 6d per cwt.

COFFEE.—177 casks 138 barrels and bags plantation Ceylon sold upon former terms. 110 bags low Rio bought in at 48s to 49s per cwt.

SPICES.—131 bags pimento sold at 3d per lb. 148 cases common Cochin ginger sold at 50s per cwt.

COCOA.—410 bags Trinidad partly sold at 62s to 67s; fine San Antonio, 100s to 101s per cwt.

TEA.—The sales are progressing at full rates, and will conclude on Monday.

TALLOW.—Y.C., 51s to 51s 6d; spring, 52s 6d.; old, 50s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar presents no new feature this week Fine qualities of treacle continue scarce. For export, crushed remains at 33s to 33s 6d in barrels. No transactions in Dutch crushed worth noting.

GREEN FRUIT.—Market good, with better supply. Arrivals of Messina lemons, and Palermo and Madeira oranges. A parcel of the latter, sold by Keeling and Hunt at public sale, went at fair prices. Almeria grapes are being pressed on the market, importers not being disposed to hold at the high invoice cost. A small cargo of black Spanish nuts to hand. The price asked, 80s per barrel, prevents any sale at present. New Barcelona have been shipped, and wanted.

DRY FRUIT.—A very dull market for all fruits. Currants are depressed, and about 1s ranges between buyers' and sellers' views. For old there has been some little inquiry at 32s, and a few parcels have been sold at that price; fine old, however, command higher rates. The demand in currants is for 28s stuff, but there is no supply, and it remains to be seen whether buyers will hold off purchasing till they can obtain their wants at their own prices. Red raisins sell freely, but Valentias are entirely neglected. Sultanas dull; fine are wanted. Figs a little easier for low descriptions, but fine maintain their value, and, if anything, are a shade higher.

ENGLISH WOOL.—There is no alteration in the English wool trade.

COLONIAL WOOL.—There is not any change to report. The public sales of colonial wool, which will commence on the 7th instant, will continue until December 11. 58,909 bales have arrived

FLAX.—Nothing doing.

HEMP.—Market steady, at our quotations.

COTTON.—Sales of cotton, from Friday, 25th October, to Thursday, 31st October, inclusive:—1,700 bales Surat, 6¾d to 7¾d for very middling to middling fair Oomrawatty; 7¼d to 8d and 8⅛d for middling to good Dhollera; 7d for middling fair Compta; 6¾d to 7⅜d for ordinary to fair Mangarole: 600 bales Tinnevelly, 7½d to 8½d and 8¼d for middling fair to good: 50 bales Western, 7¼d for good fair—total 2,350 bales. The market opened with a good demand, and up to Tuesday a fair amount of business was transacted at advancing prices. Since that period the sudden and unlooked-for flatness in Liverpool has checked operations, and scarcely anything has been done. Holders, however, evince confidence, and there is no disposition to press sales. The quotations are nominally ⅛d to ¼d per lb higher for most descriptions. About 50 bales Carriacou and West India, and 33 Surat, are advertised for public sale on Thursday next, the 7th inst. The following sales have been made for arrival:—1,300 bales Dhollera, 7¾d to 8d for guaranteed fair; 2,300 bales Tinnevelly, 8d for guaranteed good fair; 300 bales Western Madras, 6⅞d for guaranteed fair.

SILK.—Since the receipt of the telegram from China advising large additional settlements, our market has been still more quiet, and prices with an easier tendency.

TOBACCO.—Considerable sales have been effected, both for home trade and exportation; prices have assumed increased firmness, and holders have shown a disinclination to progress with sales at present rates.

TIMBER.—No change in prices. The supply of foreign and colonial deals and timber has been large, and the demand nearly proportionate, but altogether at lower prices than expected. Ship-building timber is kept high from the demand of our own and of foreign Governments. The coopers' trade has been small, in consequence of the reduced exports of beer. Some contracts are now issued after a long interval, and will reanimate the business in staves.

LEATHER AND HIDES.—The leather market remains inactive, the transactions of the week, as well as at Leadenhall on Tuesday, being again limited. The supplies, however, are still moderate, and there is a continued scarcity of heavy English butts of the best descriptions. Prices are unaltered. At the public sales of raw goods on Thursday last, a considerable amount of business was done. The goods sold comprised 2,287 dry River Plate hides of common quality at 8½d to 9½d; seconds, 7¼d: 3,200 Guatemala, at 9d to 9½d; light ditto, 8½d to 8⅞d; seconds, 7⅝d: 1,100 Mazatlan, at 9d; seconds, 7⅞d: 4,388 dry Brazil, at 8¼d to 9d: 3,280 drysalted seconds and damaged, at 3½d to 6d: 6,000 salted Australian, at 4¼d to 5¼d: 2,530 salted River Plate horse, at 8s 6d to 10s 5d: 9,820 East India kips, at fully previous rates. By private contract, 1,415 salted Buenos Ayres hides brought 7d; light, 6¾d.

METALS.—Metals keep fairly steady at quotations, with generally a moderate demand. Copper has not been largely inquired for since the late advance in prices, but the higher quotations of English have enabled some of the holders of foreign to realise on fair terms. Iron is reported in improved demand for Staffordshire. Welsh unchanged, and the same in Scotch pig. Tin is flat. Lead steady. Spelter slightly stiffer in price, with small business doing.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	55	9
Fat by ditto	2	10
Yellow Russian	53	6
Melted stuff	40	6
Rough ditto	23	6
Greaves	18	0
Good dregs	7	0

Imports this week 8,569 casks.

PROVISIONS.

Very little change in the bacon market. Prices the same as last. Very little in the market. No arrival of Friesland to-day, in consequence of the vessel putting back to Holland. No Jersey arrived, therefore cannot quote price. All other provisions dull of sale.

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 28.—The total imports of foreign stock into London, last week, amounted to 14,643 head. In the corresponding period in 1860, we received 9,577; in 1859, 8,537; in 1858, 5,767; in 1857, 5,915; in 1856, 7,037; and in 1855, 7,885 head.

Our market to-day was well supplied with foreign stock, a portion of which was in excellent condition. The show of English and Irish beasts was somewhat extensive; but the receipts from Scotland were limited. The best Scots, crosses, Shorthorns, Herefords, and Devons changed hands steadily at last week's prices, the top figure for beef being 4s 10d per 8 lbs; otherwise the demand was in a sluggish state at a decline in the quotations of 2d per 8 lbs. The arrivals from Lincolnshire, Leicestershire, and Northamptonshire amounted to 2,400 Shorthorns, &c.; from other parts of England, 500 various breeds; from Scotland, 29 Scots and crosses; and from Ireland, 1,600 oxen and heifers. With sheep we were tolerably well, but not to say heavily supplied. Although the general condition of the sheep was somewhat inferior, the mutton trade ruled very inactive at a fall in value of 2d per 8 lbs. A few superior Downs realised 5s 6d, but the general top price was 5s 4d per 8 lbs. About 800 Irish sheep were on offer. Although the supply of calves was only moderate, the veal trade ruled heavy at barely stationary prices.

SUPPLIES.

	Oct. 29, 1860.	Oct. 28, 1861.
Beasts	5640	6670
Sheep	22800	24650
Calves	150	152
Pigs	320	560

THURSDAY, Oct. 31.—Our market, to-day, was fairly supplied with beasts as to number, but their general quality was inferior. All breeds moved of slowly; nevertheless Monday's prices were supported. The show of sheep was only moderate, yet the mutton trade was in a sluggish state, at about previous rates. The best Downs and half-breds realised 5s 4d per 8 lbs. Calves were in short supply, and good request, at an advance in the quotations of 2d per 8 lbs. Pigs—the show of which was rather extensive—were firm in price; but milch cows were a dull inquiry.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	2	5	4
Second quality ditto	3	4	3	8	Large coarse calves	4	2	4	8
Prime large oxen	3	10	4	4	Prime small ditto	4	10	5	2
Prime Scots, &c.	4	6	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	0	3	4	Small porkers	4	8	5	2
Second quality ditto	3	6	4	0	Suckling calves.....each	22	0	32	0
Prime coarse-woolled do.	4	2	5	0	Quarter old store pigs	22	0	31	0

Total supply—Beasts, 1,020; sheep and lambs, 8,960; calves, 110; pigs, 500.
Foreign supply—Beasts, 360; sheep, 2,500; calves, 95.

NEWGATE AND LEADENHALL

FRIDAY, Nov. 1.—The supply of each kind of meat is seasonably extensive; generally speaking, the demand ruled inactive, yet very little change has taken place in the quotations, compared with our previous report.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	6	3	0	Middling mutton	3	10	4	2
Middling ditto	3	2	3	6	Prime ditto	4	4	4	6
Prime large ditto	3	8	3	10	Veal	3	8	4	6
Prime small ditto	4	0	4	2	Small pork	5	2	5	6
Large Pork	4	2	5	0	Lamb	0	0	0	0
Inferior mutton	3	2	3	8					

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Oct. 28.—During the past week the arrivals coastwise have been very limited, the most of which were inferior in quality, particularly from Scotland; but arrivals by rail have been more plentiful. Prices very various according to soundness, size, and quality. The following are this quotations:—Kent and Essex Regents, 110s to 130s; Yorkshire ditto, 90s to 120s; Lincolnshire ditto, 90s to 110s; Scotch ditto, 60s to 95s; French whites, 100s to 110s per ton.

FRIDAY, Nov. 1.—The supplies of potatoes are only moderate, and the trade rules firm at full quotations.

HOP MARKET.

FRIDAY, Nov. 1.—Good and fine hops move off freely, at very full prices. Other kinds are tolerably firm in value. Over 2,000 bales have come to hand this week from the Continent.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0*s* to 5*l* 0*s*; clover ditto, 3*l* 10*s* to 5*l* 15*s*; and straw, 1*l* 8*s* to 1*l* 16*s* per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 5*s* to 5*l* 0*s*; clover, 3*l* 10*s* to 5*l* 15*s*; and straw, 1*l* 8*s* to 1*l* 16*s* per load. Trade slow.

WHITECHAPEL.—Meadow hay, 2*l* 0*s* to 5*l* 0*s*; clover, 3*l* 10*s* to 6*l* 0*s*; and straw, 1*l* 8*s* to 1*l* 16*s* per load. Trade dull.

COAL MARKET.

FRIDAY, Nov. 1.—Wall's-end:—Hetton 20s 6d—Gibson 17s—Acorn Close 18s—North Pelton Gas 14s 6d—Wylam 16s—Craghead Steam 15s—Tanfield Moor Butes 13s 6d—Grey's Hartley 16s 6d. 21 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 1—Since the close of our public sales, there has been a lull in the demand from the home trade, but the inquiry for exports to the States still continues; the transactions, however, are limited, for want of stocks of the descriptions that are most in request for that market.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 1—Fair attendance at to-day's market. Wheat in good consumptive request, at an advance of 1d per cental. Flour scarce, and rather dearer. Indian corn in good request; mixed, 33s 3d to 33s 6d. Egyptian beans, 36s. Oats and oatmeal unaltered.

The Gazette.

TUESDAY, Oct. 29.

BANKRUPTS.

H. P. Simonds, Charles place, Hertford road, Kingsland, goldbeater.
E. A. Colwell, High Holborn, wholesale milliner.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 19th of October amounted to 562,571*l*, and for the corresponding week of last year to 538,552*l*, showing an increase of 24,019*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 264,976*l*, and for the corresponding week of 1860 to 249,132*l*, showing an increase of 15,844*l*.

CEYLON.—The directors of this company state in their report that, according to the agreement far annulling the contract with the Government of Ceylon, entered into on the 19th of August last, the capital was duly repaid on the 21st of August, with interest to that date. The greater portion of the money has been returned to the proprietors, and the remainder is in course of distribution. Application will be made to Parliament next session for an Act to dissolve the company, and until that is obtained the existing legal constitution of the company must be maintained.

RAILWAY AND MINING SHARE MARKETS

LONDON.

MONDAY, Oct. 28.—The railway market remained without business, and, beyond a decline late in the afternoon in South-Eastern, little change occurred. Midland, however, was in demand, and firm. London and North-Western continued to show a heavy tendency. In colonial descriptions there was a relapse in Grand Trunk of Canada to 19½ to 20, while Great Western shares closed without change at 9⅝ to ¾. Foreign railways continued in fair demand, Bahia and Dutch-Rhenish especially exhibiting a further advance. Great Luxembourg and Lombardo-Venetian, on the other hand, receded. American securities were heavy, United States Five per Cents., Virginia Sixes, Erie shares, Illinois Central, and New York Central exhibiting a reduction. There was little doing in mines, but prices were rather more steady.

TUESDAY, Oct. 29.—The railway market was firm in the earlier part of the day, the preparations for the approaching settlement showing only a limited supply of stock. Lancashire and Yorkshire were especially in demand for transfer, the late sales appearing to have been chiefly speculative, and in some degree met by purchases for money. Towards the afternoon the market became flat, London and North-Western particularly exhibiting a decline of ⅛ per cent. Great Northern was likewise heavy. Sheffield was in demand on country account, and improved. In the colonial market, East Indian stock advanced to 102¼ to ⅜, and Great Western of Canada shares to 9⅞. Grand Trunk closed, without change, at 19½ to 20. Foreign descriptions were flat, especially French shares, Bahia, and Lombardo-Venetian. Great Luxembourg partially rallied from the fall of yesterday. In American securities, there was another decline in Illinois Central shares. Other descriptions were also heavy. Mines were generally rather flat, except St John del Rey, which showed a fresh advance.

WEDNESDAY, Oct. 30.—The railway market to-day was very firm, and in most cases an advance took place. The further progress of the settlement showed a general scarcity of stock, Lancashire and Yorkshire being in prominent demand. The closing prices showed an improvement of about 1 per cent. in Lancashire and Yorkshire, Midland, Caledonian, Great Western, Great Northern, and Sheffield, and of about ¼ to ½ in other stocks. These quotations, however, were for the new account in November. In the colonial market, Indian guaranteed descriptions continued in demand. Buffalo and Lake Huron were also quoted higher. Foreign shares were rather less firm. New South Wales debentures improved. American securities closed without alteration. Mines were quiet, but in some descriptions showed an advance, especially St John del Rey and United Mexican. After regular hours the latter were quoted 7 to ½, or nearly 15s better than yesterday. In joint stock banks, London Joint Stock shares were rather flat. Miscellaneous descriptions left off about the same as before.

THURSDAY, Oct. 31.—The railway market opened this morning with increased buoyancy, but relapsed on the announcement that the Bank had made no alteration in their rate of discount. Compared with yesterday, Great Northern declined ½ per cent., and Great Western, Berwick, and South-Eastern ¼. London and North-Western and North British, on the other hand, slightly improved. The market closed with more steadiness than at one period of the day. In the colonial market, Indian guaranteed stocks continued in demand. Great Western of Canada shares were a shade lower. Foreign descriptions were steady. No change of importance occurred in American securities. In mines, St John del Rey and United Mexican were chiefly dealt in, and in both cases showed a further advance.

FRIDAY, Nov. 1.—The Stock Exchange being closed, there have been no transactions recorded in the railway share market to-day.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

London: John Churchill; and may be had of al booksellers

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

FRAMPTON'S PILL OF HEALTH, Price 1s 1½d and 2s 9d per box

This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place: and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.

Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.

These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

TO COLONIAL BROKERS.—A Gentleman having a valuable connection, and willing to invest from £3,000 to £5,000, desires to obtain a Partnership in a House of good standing. Age under 40, of gentlemanly manners and business habits.—Replies to Z. Z., care of Mr H. Salter, 17 Abchurch lane, E.C., will be held confidential.

THE GREAT FIRE.—Destructive Fire at the Jarrow Docks Station, on the North-Eastern Railway.—"Collector's office, Tyne Dock, South Shields, 28th Jan., 1861. Gentlemen,—In reply to your favour of the 25th inst., respecting the state and contents of one of your Safes after the fire at this office on the 31st ult., I have to inform you that it was subjected to a very hot fire for three or four hours, and must at one time have been nearly red hot, as the workmen were not able to touch it for two or three hours after the fire was extinguished. On the Safe being opened, the books and cash were found to be in good condition. The cash boxes contained both notes and cheques, the whole of which were quite safe. I am, gentlemen, yours respectfully, R. THURON, Messrs Milner and Son, Phœnix Safe Works, Liverpool, and 47A Moorgate street, City, London." Note.—Another party says, "I have seen the Safe, and it has had a regular roasting. There was a large amount in bank notes and several bags of gold in the drawers, and the principal books above. Everything else in the building was entirely destroyed; nothing left but the bare walls."

NOTICE TO INVENTORS.—Office for Patents, 4 Trafalgar square, Charing cross.—Printed instructions (gratis) as to the cost of Patents for Great Britain or foreign countries. Advice and assistance in disposing of or working inventions. Branch offices and agencies in every continental state and in America. Established 20 years. Full information as to expired or existing patents at home or abroad.—Apply personally or by letter to Messrs Prince and Co., Patent Office, 4 Trafalgar square, Charing cross, W.C.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

SURPRISING CURE OF A SEVERE COUGH and INFLUENZA by DR LOCOCK'S PULMONIC WAFERS.—From Mr T. F. Ker, Surgeon, 82 Moss lane, Manchester.—"I was an admiring observer of the progress of the case of Mr James Wallerton, of this city, who for some years had been labouring under a severe cough and influenza, pains about the head, in the limbs and across the lower part of back, the kidneys, —a great degree of languor, a cough,—frequent sneezing, great hoarseness,—chilliness, heats, in fact sudden fever. These distressing symptoms were experienced by him in a greater or less degree every day for some years, until he tried Dr Locock's Pulmonic Wafers, by persevering in the use of which, to the third box, they have entirely removed all the symptoms above stated." Dr Locock's Pulmonic Wafers give instant relief, and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To Singers and Public Speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d and 2s 9d per box. Sold by all Chemists.

EXTRAORDINARY DISCOVERY—NEW THEORY. (Medicines Superseded.)

NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Applisnce. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

GOOD DIVIDENDS.—Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C., have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ¼, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

DEANE'S TWO-HOLE BLACKPENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE's Two-Hole Black Pens, 46 King William street, London bridge."

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person.
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and
DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.
Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 9 Burton crescent, Tavistock square, London, W.C.

DR MARSTON'S LECTURES—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.
State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

SWANN AND CO.'S STOURPORT MALT VINEGAR for PICKLING.
"The best known."—Vide "Lancet," Feb. 14 and Aug. 29, 1852.
CITY DEPOT—WHITMORE and CRADDOCK, 16 Bishopsgate street within, London, E.C., opposite "The Baltic" Coffeehouse.
Shippers and the trade supplied on best terms.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.
CHUBB and SON, 57 St Paul's churchyard, London; 28 Lord street, Liverpool; 16 Market street, Manchester; and Wolverhampton.

KENTISH TOWN COLLEGIATE SCHOOL, N.W.—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable apply to Head Master, Leighton House, Kentish town.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand,

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.
Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double *ditto*, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

DR CURTIS'S MEDICAL WORK "MANHOOD,"
An Essay on Nervous and Generative Diseases.
The 140th thousand, with numerous plates, in a sealed envelope, price 1s, *or post paid, by the Author*, for twelve stamps.
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.
N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."
Dr LANKESTER, F.R.S., Superintendent of the Food Collection, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

HOLLOWAY'S PILLS.—HEAD COMPLAINTS.—Towards the end of the year, when the nervous power is low, and the circulation languid, the cases of apoplexy, paralysis, and all affections of the brain rapidly increase in number, as every newspaper reader must have remarked. Holloway's Pills have the power of radically removing the earliest symptoms, as headache, flatulence, dimness of sight, and giddiness; to them may the threatened look for safety; they soon rectify the digestion, rouse the drooping nerves, purify the blood, and regulate the circulation through every organ of the body. These admirable Pills control every function, and restore every secretion to its proper quantity and quality. Epileptic, Apoplectic, and Paralytic fits are averted by the timely use of these Pills.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

FORD'S FLANNEL SHIRTS.—Patterns of all the newest designs in fancy wove and printed flannels sent per post free.

Patent Metallic Bedsteads for exportation.
*** Illustrated catalogues on application.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

A WELCOME ANNOUNCEMENT.

E. MOSES AND SON beg respectfully to acquaint the public that they have made preparations, on an unprecedentedly large scale, for the Autumn and Winter Seasons. Their stock of OVERCOATS comprises every modern style in all kinds of seasonable and serviceable materials, with the latest improvements in workmanship. The Eversley and Shelburne overcoats are particularly recommended.

Their general stock includes every description of attire for all classes, all ages, and all occupations; the articles are too numerous to particularise, but may be gathered from their several trades of—

READY-MADE AND BESPOKE TAILORS, HABIT MAKERS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Their BESPOKE CLOTHING DEPARTMENT is too important a branch of their business to be passed over without a special notice. It offers a perfect fit, combined with the most fashionable and comfortable styles, and the most elegant workmanship.

E. MOSES and SON need scarcely remind the public that in every department of all their establishments the Highest Degree of Excellence is associated with Prices the Most Moderate.

Any article not approved of will be exchanged or the money returned.

Rules for self-measurement and lists of prices post free.

E. MOSES and SON'S establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.

East Indian Railway House, Alderman's wa'k, New Broad street, London, 22nd October, 1861.

THE EAST INDIAN RAILWAY COMPANY

is prepared to receive Tenders for CRANES,—namely, Eight 5-Ton Platform Cranes, and Four 3-Ton Henderson's Derrick Cranes. The Tenders must be accompanied with a drawing of the Cranes proposed to be supplied, and must state the date the contract will be completed.

Tenders, endorsed "Tender for Cranes," must be delivered to the Secretary on or before 12 o'clock at noon on Thursday, the 7th day of November next.

The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman walk, New Broad street, London, 24th Oct., 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

BRITISH AND FOREIGN INVESTMENT.

Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

THE ASPHALTUM COMPANY, LIMITED,

Original capital £100,000, recently authorised by a resolution of the shareholders, to be increased to £200,000, by the issue of 100,000 new shares of £1 each.

Deposit, on application, 5s per share, and on allotment, 7s per share.

ENGINEER AND MANAGER.

Arthur Dean, Esq.

WORKS.

Millwall, Poplar, and the Havana, Cuba.

OFFICES.

No. 34 Great Winchester street, E. C.

This Company is formed for the purpose of working certain mines, near to the Havana, in Cuba, containing large deposits of a substance called Asphaltum, or Chapapote, and rich in oils, paraffin, and other valuable products; and for importing and manufacturing the produce.

Prior to the formation of the Company the original promoters expended large sums in practically testing the commercial value of the products distilled from the material, and when satisfied upon that point arranged for the purchase of the mines, and also of valuable patent rights for Great Britain and Ireland relating to the distillation of oils from asphaltum. The purchase was made for £50,000, in shares fully paid up, but upon the condition that such shares should not participate in any dividend until the other shareholders had received a preference dividend of 5 per cent. per annum.

Of the remaining £50,000 of original capital the whole has been subscribed, and £40,000 has been called up and paid, and until recently it was thought that the remaining £10,000 would have been fully sufficient for the full and profitable development of the Company's operations. The Directors were, however, strongly advised to become the purchasers of another large property in Cuba, consisting of an asphaltum mine, extensive and valuable plant for making and refining mineral oil, and a wharf situated on the Bay of Havana, upon which the late proprietors expended between £60,000 and £70,000, the whole of which have been purchased by the present Company for £18,000.

In the purchase was also included a concession from the Spanish Government, conferring upon the Company the exclusive privilege of making oil from asphaltum in the islands of Cuba and Porto Rico, for a term of fifteen years now to run.

The Company occupies extensive oil works at Millwall, which have been for some time past in operation. The oil and other products are highly appreciated, and command a ready sale, but as the existing plant is not capable of producing more than 7,000 gallons of oil per week, it will be necessary to increase the works in order to meet the daily increasing demand.

The Company now stands possessed of the following properties and privileges in Cuba and England:—

1. The exclusive privilege of making oils from asphaltum, in the islands of Cuba and Porto Rico, for a term of fifteen years yet to run.

2. Patent rights for Great Britain and Ireland, &c., relating to the distillation of oils from asphaltum.

3. The leasehold oil works at Millwall, held under very advantageous terms, and at present fitted up at a cost to the Company of £10,000, with stills, and all necessary appliances for operating upon about 4,000 tons of asphaltum per annum.

4. The Santa Theresa oil works, situated upon the Bay of Havana, near to the Company's wharf, and connected with the asphaltum mine of the same name (No. 7) by railway. These works, built by the late proprietors, regardless of expense, may, with a moderate further outlay, be adapted to treat 4,000 tons of crude asphaltum per annum.

5. The freehold of about 66 acres of land at the Prosperidad Mines, which is in the occupation of the Company, for the use of the workpeople and cattle.

6. A wharf on the Bay of Havana, in connection with the Company's mines and works.

7. The Santa Theresa Asphaltum Mine, eight miles from the Havana, on the Havana and Mantanzas Railway.

8. "La Prosperidad" Asphaltum Mine, on the Havana and Taposte Macadamised road, at twelve miles from the Havana.

These mines are rich in asphaltum of fine quality, and will supply the Company's utmost requirements.

The whole of the above enumerated mines, works, and privileges have been paid for in full by the Company.

The official returns show an annual import into Cuba, of oils and other illuminating substances, to a value exceeding £250,000.

At the Annual General Meeting of the Company, held on the 26th day of March last, a dividend upon the paid-up capital was declared of £3 6s 8d, as the result of only four months' partial working to the end of the year 1860, or at the rate of 10 per cent. per annum.

The subjoined statement of the profits to be derived from the undertaking, deduced from the experience of actual workings, is based upon a calculation of the highest prices of labour and raw material, and the lowest value of the manufactured articles. It is well known that a firm in Scotland, is realising a profit of upwards of £100,000 per annum, from the manufacture of similar articles from a different substance.

Statement of Weekly Expenditure and Receipts in the Working of 50 Stills now in operation at the Company's Works, Millwall.

OUTLAY.	£	s	d
75 tons asphaltum	112	10	0
Fuel	30	0	0
Chemicals and treatment	32	10	0
Iron	4	10	0
Wages	50	0	0
Salaries, rent, insurance, &c.	10	0	0
Wear and tear of plant	12	0	0
Cartage and petty expenses	8	0	0
Management, commission, &c.	61	0	0
	320	10	0
RETURN.	£	s	d
Oils	468	15	0
Residuum	60	0	0
Sulphate of iron	28	0	0
	556	15	0
Outlay	320	10	0
Balance in favour	236	5	0

Result per ton of asphaltum treated:—Outlay, £4 5s 6d; return, £7 8s 6d; profit, £3 3s 0d.

Estimated Net Annual Revenue.

Based upon the least produce of oil yet known; but qualities of asphaltum are procurable yielding a much larger percentage of oil per ton.

	£
The works at Millwall will be augmented to treat 8,000 tons of asphaltum per annum, which, at £3 3s 0d per ton, will yield a revenue of	25,200
The oil works in Cuba are not yet in operation, but will be adapted to treat 4,000 tons of asphaltum yearly: the high price at which oil sells in Cuba will probably ensure a higher rate, but the profit is here estimated at the English standard of £3 3s 0d per ton of asphaltum treated	12,600
Total net annual revenue	37,800

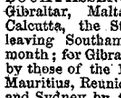
Or 19 per cent. per annum upon the capital.

The Directors, and the Engineer and Manager, are to be remunerated by a percentage on the profits in lieu of fixed payments, which is included in the item of management, commission, &c., in the above statement.

Applications for shares may be made to the Secretary; to the brokers of the Company; or to Messrs Whitworth and Cookson, Carlton buildings, Cooper street, Manchester, from whom forms of application may be obtained, but no such application will be considered unless the deposit of 5s per share shall have been previously paid. This sum will be returned in full, if no allotment is made to the applicant.

THE PARAFFIN OR MINERAL OIL

SAFETY GUAGE, made for the ASPHALTUM COMPANY, Limited, enables consumers to avoid purchasing Paraffin or Mineral Oil of an explosive and dangerous kind. Price, with a tin oil-holder, 1s 6d each. Forwarded by post upon receipt of 18 postage stamps.—Apply at the Offices of the Company, 34 Great Winchester street, London, E.C.



OVERLAND ROUTE.—

With power to add to their number.

SOLICITORS.

Messrs Harding and Son, 32 Waterloo street, Birmingham.

Twenty-five years have elapsed since a Joint Stock Bank was established in Birmingham. During that period the population of the town and neighbourhood has nearly doubled, and its wealth and trading operations have increased in an equal or greater ratio. It has long been a matter of surprise that the requirements of this rapidly increasing manufacturing and trading community have not sooner been met by the formation of another Joint Stock Bank, a course obviously more desirable than that of allowing the want to be supplied by branches of Metropolitan establishments.

The restrictive provisions of the Act of 1844 have no doubt operated against the establishment of another Bank in this town, while the risk of Shareholders in Joint Stock Banks, formed on the principle of unlimited liability, has deterred many from investing their capital in such undertakings.

Both of these obstructions have been removed—the first by the repeal of the restrictive provisions of the Act of 1844, the second by the passing of an Act to limit the liability of Shareholders in Banks complying with its provisions to the amount of their subscribed capital.

It is proposed, therefore to establish the "Birmingham Joint Stock Bank" on this principle of limited liability, accompanied by such guarantees as shall ensure the confidence of the public and the interests of the Shareholders. With this view it is intended that not more than £25 per share of the entire capital of £500,000 shall be called up, so that there will remain a reserve of capital amounting to £375,000 available to meet the engagements of the Company. It is also determined that no Dividend beyond Five per Cent. per annum shall be paid until a Guarantee Fund shall have been created out of profits amounting to at least one-fifth of the paid-up capital. Provision will also be made that the Company shall be dissolved in the event of the Guarantee Fund and one-fourth part of the paid-up capital being lost.

No Director will be permitted to overdraw his account, or to be a holder of less than fifty shares.

The Provisional Committee will, after the allotment of shares, appoint the first Board of Directors, who will thereupon make the necessary arrangements with London and Provincial Agents, and also appoint the Manager and other officers.

The foregoing are the principle rules by which the "Birmingham Joint Stock Bank (Limited)" will be governed, and the promoters feel confident that with such guarantees for the stability of the Bank, and with prudent yet liberal management, the undertaking cannot fail to be profitable to the Shareholders and advantageous to the public.

Very suitable buildings have been secured in Temple row west (formerly occupied by the New Liberary), and it is hoped that arrangements may be made for commencing business in January next.

Five Pounds per Share must be paid on allotment, and any sum not exceeding £5 per share as soon thereafter as the Directors may think fit. No subsequent call will exceed £5 per Share, and not less than three months intervene between any two successive calls.

Applications for Shares, in the annexed form, to be made at the offices of the Solicitors, No 32 Waterloo street, Birmingham, from whom Prospectuses may be obtained.

FORM OF APPLICATION FOR SHARES.

To the Provisional Committee of the Birmingham Joint Stock Bank (Limited).

GENTLEMEN,—I request you will allot me shares in the above Company, subject to the Memorandum and Articles of Association of the said Company, and I accept such shares, or any less number that may be allotted to me, and agree to pay the sum of £5 per share on allotment, and the remaining calls when they become due, and I request to be registered for the shares allotted to me.—Your obedient servant,

TRENHAM REEKS Registrar.

LUCRATIVE MERCANTILE BUSINESS, established upwards of 20 years, to be DISPOSED OF under peculiar circumstances. No Stock or Book Debts to be taken, but a considerable capital is necessary, and a suitable premium required, the payment of which may be deferred on terms to be arranged.—Principals only can obtain further particulars on personal application to Messrs DEBENHAM and TEWSON, 80 Cheapside.

A YOUNG GENTLEMAN
(aged 18), who writes and speaks fluently the German and French languages, is desirous of an engagement in a merchant's office. Respectable references can be given.—Address by letter H. C., care of Messrs Risan and Arnold, 29 Poultry, London.

TO COLONIAL BROKERS.—
A Gentleman having a valuable connection, and willing to invest from £3,000 to £5,000, desires to obtain a Partnership in a House of good standing. Age under 40; of gentlemanly manners and business habits.—Replies to Z. Z., care of Mr H. Salter, 17 Abchurch lane, E.C., will be held confidential.

TO BANKS AND PUBLIC COMPANIES.—A Gentleman who has had during the last six years charge of Branches of a Bank of issue doing a large discount and general business, wishes an appointment as Manager or Secretary. No objection to go to any place not in the Tropics. Can give references of the most unexceptional character.—Address D., care of Messrs Pearson and Son, 35 Bishopsgate street, E.

WANTED, BY A YOUTH,
17 years of age, educated in France and Germany, and who speaks and writes both languages fluently, an engagement in a business where his general knowledge (arithmetic in particular) would prove useful.—Address Mr J. C. Sidebotham, 7 Angel court, E.C.

WANTED, A MANAGER
(unmarried) for an English firm long established at one of the chief ports in the Indian Archipelago. His mercantile education and experience must have been of the first order, and he must possess a general knowledge of cotton goods.—Address A. H., City of London Club, Old Bread street, London.

PARTNERSHIP.—A GENTLEMAN,
aged 36, of nineteen years' Mercantile experience (the latter ten as principal), wishes to join a well-established firm. Speaks five languages. Can introduce about £3,000, and give the highest references.—Address M., care of Messrs Pearson and Son, 35 Bishopsgate street, E.

PARTNERSHIP.—
A Gentleman of position, engaged in business (Stone Quarrying), wishes to meet another of like station to join him; profits are 25 per cent. Capital required £3,000. No previous knowledge necessary. This will be found a safe and improving investment.—Apply to Mr H. Salter, 17 Abchurch lane, E.C.

WHOLESALE HOUSES,
Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

SWANN AND CO'S STOURPORT
MALT VINEGAR for PICKLING.
"The best known."—Vide "Lancet," Feb. 14 and Aug. 29, 1852.
CITY DEPOT—WHITMORE and CRADDOCK, 16 Bishopsgate street within, London, E.C., opposite "The Baltic" Coffeehouse.
Shippers and the trade supplied on best terms.

KENTISH TOWN COLLEGIATE
SCHOOL, N.W.—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable apply to Head Master, Leighton House, Kentish town.

MR LEWIS AND SON,
113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification; adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the Commercial community, expressed at the influential meeting held at the Mansion House on the 25th July last, and trust they will be supported by the public to enable them to carry out this system with success.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

UNIVERSAL LIFE ASSURANCE

SOCIETY, No. 1 King William street, London, E.C.

Committees in Calcutta, Madras, and Bombay.
Agents throughout India.

The last Annual Reduction of Premium amounted to 45 per cent., so that a person being assured for £1,000 at the age of 30 is now paying £13 8s 7d instead of £24 8s 4d.

Invested Capital upwards of £780,000.

M. E. IMPEY, Secretary.

Empowered by Act of Parliament. 3 Wm. IV.

THE ECONOMIC LIFE

ASSURANCE SOCIETY, 6 New Bridge street, Blackfriars, London.

Established 1823.

DIRECTORS.

Robert Biddulph, Esq., Chairman.
William Routh, Esq., Deputy Chairman.

Alfred K. Barber, Esq.	Rear-Admiral Robert Gordon.
Henry Barnett, Esq.	
The Rt. Hon. E. Pleydell Bouverie, M.P.	Charles Morris, Esq.
	George Kettilby Rickards, Esq.
Edward Charrington, Esq.	
Pascoe Charles Glyn, Esq.	Augustus Keppel Stephenson, Esq.
Sir Alex. Duff Gordon, Bart.	

ACTUARY.—James John Downes, Esq., F.R.A.S.
SECRETARY.—Alexander Macdonald, Esq.

The Society offers the following Advantages:—
The lowest rates of Premium on the Mutual System.
The whole of the Profits divided every Fifth Year.

Reversionary Bonuses have been added to	£
Policies to the extent of	1,365,000
The last Bonus, declared in 1859, which averaged £65 per cent. on the Premiums paid, amounted to	475,000

8,471 Policies are now in force, yielding an annual income of £139,000, assuring the sum of £6,697,572, which, with £610,827 Bonus additions, makes a total Liability of £7,308,399.

The Invested Capital is £1,911,505, producing upwards of £74,000, thus making the present Annual Income of the Society £263,000.

Service in the Militia, Yeomanry, or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to

ALEXANDER MACDONALD, Secretary.

THE POLICIES OF

THE STANDARD LIFE

ASSURANCE COMPANY ARE MORE VALUABLE THAN ORDINARY POLICIES, inasmuch as they are free from extra Premiums in the case of Foreign residence, when the Directors are satisfied there is no intention or prospect on the part of the Assured to reside abroad. They are also free from other restrictive clauses. These are great benefits. Take as an example a life-renter who assures his life. In ordinary policies he is limited to residence in Europe, and his policy is subject to forfeiture on various grounds. A Standard Free Policy once obtained contains but one condition—payment of the Premium, and for that, too, increased facilities are given; while, at the end of five years, the Assurance Deed becomes—as regards any question—a simple promise to pay on proof of death. If the Policy is to be made the basis of a marriage contract, or to be a security in any way, the advantage of a Free Assurance is undeniable; and, in the present day, every Policy, it may be said, becomes in the course of its existence, in some way or other, the groundwork of a responsible transaction.

The BUSINESS of the STANDARD LIFE ASSURANCE COMPANY has been most successful since its Establishment in 1825.

PROGRESS DURING 1860.

	£.
Sums proposed for Assurance during the year 1860	807,747
Policies accepted and taken up	705,897
Annual Income was at 15th Nov., 1860	304,161
Accumulated Fund	1,856,802

SPECIAL NOTICE.

ADVANTAGE OF ASSURING BEFORE 15TH NOVEMBER, 1861.

A Policy effected before 15th November next will not only participate in the 7th Division of Profits to be made in 1865, but will secure one year's additional Bonus, at all future Divisions, over Policies of later date.

THE PROFITS OF THE COMPANY

have been divided on six occasions—in 1835, 1840, 1845, 1850, 1855, and 1860, when large additions were made to Policies under the peculiar mode of division adopted by the Company, which is essentially Tontine, affording very important advantages to Assurers.

EXAMPLES OF BONUS ADDITIONS.

Date of Policy.	Sums in Policies.	Bonus Additions to 1860.	Sums in Policies with Bonus Additions.
	£	£ s	£ s
Nov. 15, 1830	1000	1115 0	2115 0
— 1835	1000	790 0	1790 0
— 1840	1000	515 0	1515 0
— 1845	1000	302 10	1302 10
— 1850	1000	152 10	1152 10
— 1854	1000	74 0	1074 0

NEXT DIVISION IN 1865 AND EVERY FIVE YEARS AFTERWARDS.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT

COMPANY.

The Directors are prepared to comply with all applications for their Debentures at par. They are issued in sums of £50, £100, £500, and £1,000, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in mortgages of freehold land of very ample value, the Company by its charter being in every case first mortgagee.

Individuals and public institutions, who usually lend on mortgage, are offered a higher class security than is afforded by the old mortgage system.

The interest is payable by coupons, on the 1st January and 1st July, at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, and the same is receivable through any of the country banks.

The last half-yearly statement and the Debentures may be had at the Company's brokers, Messrs Brunton and Son, Auction Mart chambers, Bartholomew lane, London, E.C.

LOANS ON DEBENTURES.—

The Directors of the SOUTH STAFFORDSHIRE WATER WORKS COMPANY are prepared to treat for Loans of £100 and upwards, to replace debentures falling due. Interest 5 per cent., payable half-yearly. Apply to Messrs Sheppard, Pelly, and Allcard, 23 Threadneedle street, or to the Secretary, Bridgeman place, Walsall.—By order,

J. CHURCHILL, Secretary.

THE EAST INDIAN RAILWAY

COMPANY require 100 Tons of GALVANISED ANNEALED IRON WIRE, and the Directors will be prepared to receive Tenders for the same on or before 12 o'clock at noon, on Thursday, the 21st day of November instant.

Specifications and Forms of Tender, upon which only tenders will be received, can be seen upon application at the Company's offices, Alderman's walk, New Broad street, London.

The Directors do not bind themselves to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman walk, New Broad street, Oct. 24, 1861.

MADRAS RAILWAY COMPANY.—

Notice is hereby given, that the Ninth Half-yearly General Meeting of the Madras Railway Company will be held at the London Tavern, Bishopsgate street, London, on Friday, the 22nd day of November inst., at One o'clock precisely, for the purpose of receiving and considering a Report from the Directors of creating new capital, and for the transaction of the general business of the Company.

The Transfer Books of the Company will be closed from the 15th to the 22nd inst., both days inclusive.

Deeds of Transfer are not received at the offices of the Company while the books are closed.—By order of the Board,

JAMES WALKER, Managing Director.

33 New Broad street, London, E.C., Nov. 3, 1861.

MADRAS RAILWAY COMPANY.

The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

ERRATUM.—In our last number, p. 1206, line 56, by the accidental omission of a cypher, 5 per cent. was erroneously printed for 50 per cent.

LORD LYONS AND MR SEWARD.

It will be one of the most painful, and we fear it is one of the most probable consequences of the American revolution, that it will destroy the most remarkable political excellence for which the Americans were distinguished. We will not speak of the South-Western Slave States or of any of the ruder States in some of which the higher conditions of civilisation did not exist; but it is certain that the Northern and more cultivated States had a respect for *law*, almost unexampled in a new and energetic community, and curiously contrasted with the eager and impetuous temperament which, on rare occasions, and especially in foreign policy, was so peculiar and remarkable. The Supreme Court of the United States had the power of disallowing as *ultra vires* and illegal the acts of Congress *itself*. They had the power of treating the Federal Government exactly as the Court of Queen's Bench treats a railway company. Yet its decisions were always waited for with eagerness, and obeyed with respect. The Constitution, of which the Federal Court was the guardian, was regarded with an admiration which might in some respects be unmerited, but was in other respects invaluable.

It is no light matter to get a great and new country, containing very many dissimilar elements, to obey with daily deference a modern and a written Constitution. Experience shows that the sentiment of *constitutionality* is one of the rarest of human feelings—one of the most difficult to create, and one of the most valuable if created. The Americans used to possess it in singular excellence, and the results exhibited themselves in various remarkable ways. Their lawyers were not only comparable to those of England, but *in* many respects better. The works of Kent and Story show a combination of philosophical capacity and business-like precision which no contemporary lawyer in this country could pretend to rival.

It is to be feared from Mr Seward's reply to Lord Lyons, as well as from many other circumstances, that this great, and, in a new, an enterprising, and a democratic community, most rare and priceless virtue is seriously endangered and undermined by the critical contingencies and pressing temptations of the present convulsion. There can be no doubt as to what the judgment of an unprejudiced lawyer would be upon the question suggested by Lord Lyons as to the illegal detention and imprisonment of certain English subjects. Mr Seward contends that the President of the Republic has the right of suspending the writ of *habeas corpus* whenever he deems it right and necessary, or, at least, whenever *he thinks* the Constitution authorises him to do so; but no one who comprehends the nature of that safeguard to public liberty will be at all disposed to agree with him.

The writ of *habeas corpus* is a safeguard *against* the Executive. It was devised by English legislators and lawyers as a protection against the illegal tyranny of the Crown. It amounts in substance to this, that when an American or an Englishman has been arrested and incarcerated by his Government, he should have the power and the right at once to bring his case before an ordinary court of law, and to ask there for an immediate judgment whether his detention be legal or illegal. From the very essence of the matter it is evident that to give the power of suspending the *Habeas Corpus* Act to the Executive, is to give the anticipated and apprehended aggressor the power to remove the especial legal protection provided against him—is to place in charge of the wolf the last safeguard of the lamb.

The framers of the American Constitution were the last legislators to commit this error. They, as they would have said themselves, and as many of them on countless occasions have said, asserted the natural liberty of man against the tyranny of King George the Third. They were nervously alive to every possibility of encroachment, and every indirect instrument of tyranny of which the President—their faint copy of an elected King—might be fancied to make use. They accumulated safeguards on behalf of the liberty of the subject; even *Congress* itself cannot impair the freedom of the press, or the right to petition, or the right to bear arms; and if they believed it necessary to restrict the popular Legislature in this stringent manner, it is not probable that they would intrust the right of imprisonment *at pleasure* to the President alone.

If we look at the Constitution itself, this *à priori* probability will be conclusively confirmed. There is not a syllable in it indicating that the President has the power for a single instant to suspend, dispense with, or modify *any law*. His duty is to cause all laws to be faithfully observed, and not a word is added (for the bare idea was not entertained) which can be even remotely construed to give him the power of infringing the liberty of the subject at *his own* discretion, by abrogating the recognised right of the subject to bring every instance of an arbitrary imprisonment immediately under the cognisance of a judicial tribunal. The only mention of the writ of *habeas corpus* in the American Constitution is contained in the first article referring to the authority of the Legislature. It forbids the whole Legislature (President included) to suspend this Act except in a narrow class of defined cases. The clause is simply prohibitory; and the only authority for suspending the Habeas Corpus Act at all, is the general clause giving a general power of legislation to the Congress of two Chambers, subject to the veto of the President. There is nothing in the American Constitution giving the President power to abrogate *any* law, and there is an express clause saying that no one, not even the Legislature and the Executive combined, shall abrogate this particular law except in enumerated cases. This law is, therefore, by the Constitution the one which may most rarely be

suspended; and the President is the one person who is to carry out all laws in their integrity, who is never to suspend any, against whom this special law was especially directed.

The Queen herself, immeasurably greater as in most respects her prerogative is than that of Mr Lincoln, cannot, as we all know, suspend the *Habeas Corpus* Act by virtue of it. She requires the sanction of Parliament. Her advisers have undoubtedly done so on certain urgent occasions, when the concurrence of Parliament could not immediately be obtained, and have trusted to a bill of indemnity to relieve them from the legal penalties of so doing. But Mr Seward does not liken his case to this, and, indeed, could not do so, inasmuch as Congress has met since the civil war broke out, and did not confer on the President this power, although it conferred other powers.

These arguments are confirmed by the general consent of American lawyers. Mr Justice Story expressly affirms that the power to suspend the writ of *habeas corpus* "is given to "Congress" in certain stated exigencies, and is inclined to infer that when Congress thinks fit to say there is such an exigency, no one else can question it. But he never even discusses the question whether the President has or has not such a power; for it had never occurred to him even as a possible error, and is the illegitimate offspring of recent circumstances. On the only occasion in which it was proposed to suspend the *Habeas Corpus* Act, the measure was regularly brought before Congress in the usual manner, and was lost.

But though it is certain that Lord Lyons was correct in his policy, it does not altogether follow that he was judicious in his policy. We have no doubt that the acts he complains of were altogether illegal. Still the British subjects in question were treated with no excessive tyranny, and there were fair and plausible grounds of suspicion against them. It would be evidently unworthy of the magnanimity of this country to pick a quarrel with the United States upon a purely legal ground. We should only intervene in cases of substantial injustice. In the hurry of a revolution, much that is illegal must often happen, and must often be pardoned. Lord Lyons was, we think, justified in pointing out the illegality and entering a *caveat* against acts of substantial tyranny, but more than that we cannot think that he was justified in saying.

THE RATE OF DISCOUNT AND THE PRICE OF CONSOLS.

THE reduction of the Bank rate of discount to 3 per cent. has aggravated a difficulty which has haunted the minds of many persons for some time. They are puzzled to know why Consols are not higher. They remember that last February, when the Bank rate was 8 per cent., the public securities were as follows:—

3 per Cent. Consols, account	92¼
— —, money	91⅝
New 3 per Cents.	91⅝
3 per Cent. Reduced	91⅝

They see that now, when the Bank rate is 3 per cent., these securities are—

3 per Cent. Consols, account	92¼
— — money	93⅛
New 3 per Cents.	91¼ 92
3 per Cent. Reduced	91¼ 92

and they cannot comprehend how so slight a variation can have taken place in the one, when so great a variation has taken place in the other.

There is, however, no difficulty in the problem. The price of the funded debt of the Imperial Government and the rate of discount upon commercial bills are two perfectly distinct phenomena, resulting from very different permanent causes, and differently affected by different temporary agencies. The primary cause regulating the rate of discount, is the ratio of the number of commercial bills which the holders wish to have discounted to the quantity of money which is in search of that form of temporary investment. When, therefore, trade is very active, the rate of discount will tend to be very high—will be very high, unless the accumulated money in Lombard street is extraordinarily superabundant. When, as now, trade is stagnant and depressed, the rate of discount will be very low, unless the funds applicable to the discount of commercial bills are anomalously small and scanty.

The causes which operate upon the price of Consols are wholly different from these. The principal cause is the ratio of the amount of money in search of permanent investment of this particular species to the amount of stock for sale in the market. This sort of money is wholly distinct from the former sort. A great deal of money must go into the funds; by law the executors and trustees in whose hands it is have no authorised option, and can invest it in no other mode. A great deal more of the wealth of the country is invested solely in Government securities, simply because the owners of it understand and believe in no other kind of security. On the other hand, for much of the money ordinarily employed in Lombard street the funds are a wholly insuitable investment, which no competent person would ever resort to. A bill-broker, for example, has much money lodged with him at call, on which he pays an interest fluctuating very frequently, according to the chances of the market and the circumstances of the time. This money may be asked for at any hour. If the bill broker, therefore, were to invest this money in Consols, say at 90, he would be running the risk of having to sell at 80 and of getting only 3*l* 6s 8d interest, when he might perhaps be paying for it 5 per cent. or even more. In other words, he would be risking his principal for a low rate of interest. Just now, the rate of discount is low, because commercial bills are scarce; but the money which would have been laid out on them is not applicable to the purchase of Consols, and will certainly not be invested in them.

There is even a reason at the present time why the price of the funds should tend to be low, just when the rate of discount is low also. The two results may be in part the concurrent effects of one and the same cause. The Bank rate is reduced because the trade of the country is straitened by strange events; that slackness of trade also causes much suffering to the working classes, and the savings of those classes are, through the agency of the Savings Banks and of the National Debt Commissioners, invested in the public funds. The Chancellor of the Exchequer is immeasurably the largest fundholder in the list, and he must sell if the lower classes who deposit in the Savings Banks ask for their money. The present depression will presumably cause them to demand some of their deposits, more or less; and it is not, therefore, too much to say that so far from a high price of the funds being very naturally connected with the low rate of interest which now prevails, the two are for the most part affected by dissimilar influences and causes, and that one cause which operates upon both would decidedly tend to reduce the price below what it would otherwise be.

THE UNNATURAL AND THE NATURAL MODE OF OBTAINING COTTON FROM NEW COUNTRIES.

ONE of the ablest of our contemporaries, the *Spectator*, made last week a bold and ingenious suggestion for removing the difficulty which the utter uncertainty of all American events now inevitably throws in the way of our obtaining a supply of cotton from India and other quarters. The proposal is to levy a considerable duty on American cotton, and no duty whatever upon cotton coming from other quarters,—and it is thus hoped to protect those who at this moment of need send us unusual supplies from the "ruinously low prices" which they might encounter if the American civil war suddenly came to an end, or the American blockade were suddenly broken by an overpowering force from Europe. The same suggestion had been previously made to ourselves by a thoughtful correspondent, and we have likewise heard it more than once put forward in conversation,—and, therefore, although the plan is not likely to be even considered by practical statesmen, much less to be adopted, it may not be wholly needless to point out how ineffectual it would be for the end in view, even supposing we agreed to abandon for once the great principles of free trade, and supposing there were no legal objections founded upon the "favoured nation" clause of valid treaties.

The argument,—and it is for a single moment a plausible argument,—by which this proposal is sustained, is something like the following:—'The circumstances of the present 'case are singularly exceptional. America will not give us 'her own cotton, and yet she prevents our obtaining it 'from any other country. If America were at the bottom of 'the ocean, or if the whole society of the Slave States were

'permanently disorganised and reduced to obvious inefficiency, 'we should have cotton enough. All other nations would 'pour into Liverpool every bale they could muster, and if the 'quantity so obtained were not adequate, it would be nearly 'so, and at any rate it would be all that the resources of the 'earth could give us. We might be straitened, but we should 'be only suffering from the natural scarcity of an important 'article, of which we had obtained all possible supplies. Now 'the reverse is the case. The market of Liverpool is an inse-'cure market. At any moment a sudden peace in America, 'or a sudden intervention from Europe, may throw the usual 'cotton supply of America at once upon the market. The 'political necessity which caused the dearth may be poli-'tically removed, and those who have exerted themselves to 'supply scarcity may bring their cotton to a port already 'glutted. Under these strange circumstances, it is argued, 'we may protect those who bring at a great cost supplies of 'cotton from new quarters against the very low prices which 'they must obtain if they should unexpectedly encounter the 'ruinous competition of our ordinary American supplies.'

But would the imposition of a special duty upon American cotton really effect this? Those who think so have not adequately attended to the remarkable phenomena of glutted markets. To achieve anything effectual, you must give the Indian or other non-American producer a higher price than he would obtain without your interference, and how would the proposed duty effect this? The cessation of the American war, or the rupture of the blockade, will find the Southern States with a vast stock on hand, which they would be eager to sell at whatever price they could get for it. They will have withheld their main staple from market for a ruinously prolonged interval, and as soon as the market opens they will be compelled to take the price of the moment for it. They will have long held back for what they believe to be a patriotic purpose; but when they can sell without impairing that purpose, they will be in no position to drive a hard bargain for mere pecuniary profit; they will have to take what they can get, or very nearly so.

Under these circumstances, a differential duty upon American cotton would scarcely raise its price at all. The importers of American cotton would pay the duty, and the Government would be the gainer; but the Indian or non-American importer would be almost exactly where the interference found him. The quantity of American cotton imported would be nearly as much as it would otherwise have been. The sellers are under a stringent necessity to sell, and sell they assuredly will. Under such circumstances as these, a differential duty does not practically advantage the person for whose apparent benefit it is imposed, for the general price of the entire supply *from all sources* is indefinitely lowered by a great superabundance.

It may indeed be said that, in consequence of the suggested duty, the American cotton will be sold elsewhere,—that it will not be sent to Liverpool, but to Havre, or some other quarter. But all other markets for cotton are limited and easily glutted, as compared with that of Liverpool. A small increase of supply in them would cause a large reduction of price. The English market is the ruling market, and any kind of cotton exceptionally excluded from it would find a cool reception elsewhere; while, for the vast American cotton crop there would be simply no reception elsewhere at all.

The whole American crop, with the exception of any trifling portion which its owners might be able to withhold in the indefinite hope of better times, would be landed in Liverpool if the suggested duty were imposed, as much as if it were not imposed. The familiar agency of demand and supply would determine the price precisely in the same manner; that price would be identical, and the non-American importer would gain nothing by the well-meant but mistaken interference on his behalf.

But although inoperative for good purposes, the suggested duty might be efficient for bad purposes. So long as the war continues and the blockade remains unbroken, its effect would, in a commercial point of view, be so much pure evil. Cotton is very scarce, and the more we can induce bold infringers to extricate some by breaking the blockade, so much the better for us. The differential duty is, however, an additional difficulty in the way of all such attempts; and it would, therefore, aggravate the pressing evils of the present scarcity, without mitigating the partial evils of a sudden superabundance.

The real mode in which a natural remedy will be applied to the abnormal circumstances of the American war is evident from recent events. The price of cotton has risen to nearly double the average of the last few years. We last week quoted:—

Raw Cotton.	Price Oct. 31, 1861	Price Oct. 1860	Price Oct. 1859	Price Oct 1858	Price Oct. 1857	Price Oct. 1856
	s d	s d	s d	s d	s d	s d
Upland fair.....per lb	1 0⅜	0 7¾	0 7½	0 7⅜	0 9½	0 6⅝
Ditto good fair.....	1 0½	0 7⅞	0 7⅞	0 7⅝	0 9⅜	0 7⅛
Pernambuco fair	1 0½	0 8½	0 8½	0 8½	0 10⅜	0 7⅜
Ditto good fair.....	1 0¾	0 8¾	0 9¼	0 9	0 10½	0 7⅝

The profits of Indian importations are now very great, and those importations are consequently very considerable, while the orders that have gone out, and that will probably be executed, are greater still. This rise of price is, without doubt, largely caused by what may fairly be called speculation, and it is by no means certain that these speculators will benefit themselves. They may be great losers. They are dealing in an article the price of which is wholly dependent on most uncertain political events, and they cannot exempt themselves from the great risks of the investment they have selected. But as far as the public is concerned, such speculation is exceedingly beneficial. It tends to bring cotton here which otherwise would never have been sent to us. The possibility that the price might not rise so rapidly as it should in face of the cessation of the greater part of our American supplies, was one of the gravest dangers to which we drew the attention of our readers in our earliest articles upon this great subject. For a long time our fears seemed to be realised, since the price did not rise so rapidly as might be expected or hoped. Cautious men were fearful. *Now* the price has risen to a very high point, and it is probable that such great profits have been and are being realised as would go far to counterbalance, and perhaps to exceed, any ultimate loss which might be incurred from a great sudden fall in price. Speculation has raised the price to the *attractive point*, and to the English nation, though perhaps not to the individual speculator, this is a great blessing.

It is quite true that this natural remedy is a very sharp and severe one. The raw material has risen in price, but the manufactured article has not risen, and is not likely to rise at all equally. We quoted last week:—

	Price Oct. 31, 1861	Price Oct. 1860	Price Oct. 1859	Price Oct. 1858	Price Oct. 1857	Price Oct. 1856
	s d	s d	s d	s d	s d	s d
No. 40 Mule Yarn, fair, 2nd quality.....	1 2½	1 0	1 0½	1 0½	1 1⅜	0 10⅜
No. 30 Water Twist, ditto	1 2	0 11⅜	1 0¼	0 11⅜	1 0⅝	0 10½
26-in, 66 reed, Printer, 29 yds, 4 lbs 2 oz...	6 6	5 7½	5 9	5 3	5 6	4 9
27-in, 72 reed, ditto ditto 5 lbs 2 oz...	7 3	6 4½	6 6	6 1½	6 6	5 10½
39-in, 63 reed, Gold End Shirtings, 37½ yards, 8 lb 4 oz.....	10 4½	9 6	9 1½	9 4½	10 1⅜	7 10½
40-in, 66 reed, ditto ditto 8 lbs 12 oz...	11 6	10 6	10 4½	10 8	11 0	8 9
40-in, 72 reed, ditto ditto 9 lbs 4 oz ...	12 6	11 9	11 9	11 0	11 10½	9 10½
39-in, 48 reed, Red End Long Cloth, 36 yards, 9 lbs	9 6	8 9	8 9	8 10½	9 6	7 4

The loss to our manufacturers by working is therefore very considerable, and the consequent pressure upon all classes is now great, and will, we fear, ere long be much greater. Such suffering is to be deplored, but it is an inevitable consequence of an extended commerce that the calamities and perils of one country become the calamities and perils of others widely separated from it; and if the Old World chooses to trade very largely with the New World, it must inevitably suffer very much from the perplexing events which have interrupted its peace and disorganised its society.

AMERICAN AVERSION TO A DISSOLUTION OF THE UNION.

We last week considered the objections felt by the Northern Republicans to a dissolution of the Union, arising out of the diminished national grandeur it would entail; and we showed that out of the late United States six Empires at least, each larger respectively than the great monarchies of Europe, might and probably would be ultimately carved;—and we could not help concluding that a territorial ambition which was not satisfied with being larger, not only than England, France, Austria, or Spain, but than any two or

three or four of them together,—was somewhat inordinate and irrational.

But there are other fears in the minds of the Americans, which perhaps weigh with them more pressingly and more definitely than the above in making them so determined to avert separation even at the cost of a desperate and long-continued civil war. They say:—"It is because America is "so geographically cast, because the interests of South and "North, Sea States and Western States, are so divided, that "we deprecate disunion in the interest of humanity. The "geographical facts, the differing climates, the long and "ramified frontier, the rivers piercing all sections, and the "seas equally necessary to each, are just those which pro-"duce incessant jealousies, questions, and savage wars. The "divergent interests—faith in trade and protection, aristo-"cratic tendencies and democratic prejudices, free labour "and serf labour—are precisely those which call up the "masses, and change campaigns from military promenades into "wars of extermination. *We can see no future for the Union,* "if once split into fragments, *except the fate of the South* "*American Republics,* intensified by the vigour of the Anglo-"Saxon character—*endless wars followed by treaties made to* "*be broken,* invasions with no result but slaughter, reprisals "without effect save exasperation, *paralysis of commerce, and* "*ultimate national degeneracy.*"

Another source—a private letter from a very intelligent American, says:—"*How can the South ever be a peaceful* "*neighbour to us,* when, even before, *Northern citizens were not* "*always safe in the South?* We should be at war in less "than a year. *We should be compelled to maintain a large* "*standing army* at all times, to protect ourselves from the "aggressions of a people *whose civilisation is so antagonistic to* "*our own.* Besides, the South must needs begin her national "existence with a debt of at least 300 millions of dollars. "She would have a sea-coast of 1,500 miles; and not a ship "of war, or more than two or three hundred schooners, "sloops, and row-boats, altogether, as a commercial marine. "Who would keep up all the light-houses along her coast? "What could prevent her from falling an easy prey to any "foreign Power who wished to hold her—as a *political necessity* "perhaps in some difficulty with us? She must be as poor "as imbecile; for it is proposed to confine herself to agri-"culture, and to import all her manufactures, from a cradle "to a coffin.—No! no! the North understands what she is "about perfectly well."

We have here something distinct and intelligible to deal with. The Northerners dread—or their advocates for them—that the Secession of the South, once consummated and recognised, would be followed by a general dissolution; that the 33 States would split up into numbers of small and feeble fragments, without cohesion, without sagacity, without strength, and mutually hostile; presenting as deplorable and undignified a spectacle as the revolted colonies of Spain, and surpassing these only in the extent of their follies and the vigour of their hatreds. The fear is far from complimentary to the good sense and self-control of Anglo-Saxons, and we do not share it. For what does it assume? That a people, long trained to self-government and inheriting from their ancestors the most tried and successful plans and bulwarks of constitutional liberty,—a people who have always held themselves up to mankind as models of political sagacity, energy, and prudence, who have been considered by many as having alone, or more successfully than all others, solved the difficult problems of political freedom,—are yet so deficient in those intellectual and moral qualifications which fit men to govern and to guide themselves, that they will fail as completely under the first grave difficulty they encounter, as races who suddenly shook off the yoke of one of the most effete, paralysing, and bigoted despotisms of modern times! That the countrymen of Washington, the pupils of Franklin, and the descendants of Englishmen, will manage no better than wretched Spaniards, effeminate Creoles, and Mexican half-breeds! That, in fine, all the boasted superiority and capacity of the "free and enlightened citizen" of the New World has been a sham, and that he has owed his apparent success and his wonderful progress merely to the favouring circumstances of his career! A bitterer sarcasm, or (we believe) a harsher or unjuster libel, was never uttered.

Those who anticipate an *indefinite* split among the States as the natural issue of the split which has already taken place, read that event, we take leave to say, in a very unanalytic spirit. The same reasons which led to the severance between the North and South, will logically lead to the union and mutual cohesion of the New England States, the North-Western States, and the Pacific States respectively. The very arguments which are pleaded why Massachusetts and South Carolina should be under different Governments and should be linked with different fellow-citizens, may be pleaded also to show why Michigan and Ohio should be content with one Congress, one capital, and one President. A few moments' consideration will make this clear. When the political institutions of a country are essentially constitutional and free, whether Monarchical like ours, or Republican like the Americans, they exist by the consent and as expressive of the wants and wishes of the people. The First Magistrate is such because he is the chosen or accepted chief of the whole nation. The Parliament exists and is obeyed because its members *represent* the citizens, embody their will, and look after their interests. The moment that the views or interests of a large minority of the citizens become utterly at variance with those of the majority, the President or the Parliament ceases to represent and speak the will of the whole people, and represents and speaks the will of only the larger half. This is especially true when the discrepancy is local in position and permanent in cause. Take the case of the North and South in reference to the late election of Mr Lincoln. The whole South voted against him. How, then, could he be said, with any sense or truth, to have been chosen by them, to represent their views, or to rule by their will? The *completeness,* the *localisation,* and the *extent* of the divergent and antagonistic wills, were such that his election (especially as it would have been followed by the election of a Congress equally preponderant on the side of the North) became a conquest of the majority over the minority, and imposed on that minority the rule of a hostile chief—that is, of a chief against whom they had striven, and whom their opponents had thrust down their throats. That being so, *they could no longer feel that they were governed by magistrates of their own choice*—in which consists the very essence of political freedom. And being six or eight millions of people, accustomed to think they had a right to be governed by magistrates of their own choice, they did not choose to have a magistrate chosen for them and forced upon them.

It is obvious, that free and constitutional Government—*i.e.,* Government by the will of the people and embodying that will—can only exist in a nation which is, practically and in the main, homogeneous and consentaneous. Where a nation consists of several sections, essentially discrepant and antagonistic, those sections may coexist under a despotism, but never under a republic, except where they are too insignificant to have a will of their own or to make that will respected. The North and the South, therefore, *could* not permanently be combined, and can never be recombined, under one Government. But no such reasons exist why the New England States with New York and Pennsylvania should not remain united; nor why the North-Western States should not continue to adhere together; since, in all important matters, the same President and the same member of Congress who represents the citizen of Ohio will represent the citizen of Michigan and Wisconsin also;—and the same man who is welcome to the Democratic or the Conservative party in Massachusetts, will be welcome to the Democrats or the Conservatives in Connecticut and New Hampshire as well. Separation, therefore, which is *commanded* by the relations between North and South, is *prohibited* by the relations between the several New England and the several North-Western States. And to suppose that they will split, when no real or vital discrepancies exist to divide them, is to assume that they prefer isolation to union, weakness to strength; and that they are disqualified by ignorance or passion for the simplest conclusions of political good sense. We do not do them this dishonour. We believe that they will divide just as far as grave divergencies of interest and feeling divide them, and no further; that those States whom nature has linked together will remain linked, and will gradually grow to be respectable and powerful; and that those whom nature makes mutually repellent will consult their own peace and prosperity by amicable separation.

"But," we are told, "if they sever, they will fight. Several "independent republics cannot coexist side by side on the

"same continent without incessant disputes arising between "them, and without these disputes leading to incessant "wars."—If it be indeed so, then we can only conclude that the free and enlightened Republicans of the New World are much behind their benighted and enslaved European contemporaries in self-control, in sense of justice, and in political capacity. Perhaps they are. In the Old World, six or seven different nations with conterminous boundaries live side by side, and contrive to adjust the differences and litigations which undoubtedly do and must spring up under the circumstances, by diplomacy and forbearance, and with only very occasional breaches of either courtesy or peace. Probably the Americans have this lesson of mutual forbearance yet to learn, and may find it somewhat new, difficult, and mortifying. But they will learn it in time. Hitherto, having had no neighbours, or only very weak and very patient ones, they have hectored and encroached at pleasure. But out of the necessities of enforced juxtaposition will arise the virtues and the wisdom which such juxtaposition teaches and compels; and from the new relations thus engendered will spring a far higher degree of civilisation than they have yet attained. They will gain in political morality far more than they lose in political power. At first, as is usual with young blood, they will be quick to resent and vigorous to demand, and will be over ready with the sword and rifle, as they are in their private relations;—but meeting with neighbours equally hot and equally ready to appeal to force, moderation and temper will gradually be taught them by experience of the cost and mischief of their opposites. If they cannot learn these lessons, and that speedily, then we must pronounce that unlimited prosperity has been bad for them, and that they are deficient in that political capacity which alone entitles men to, because it alone fits men for, liberty and self-government.

"But," they plead, "the circumstance of being surrounded "by independent and not always friendly neighbours will "compel us to keep up considerable standing armies and per-"haps navies, to incur burdensome taxation, and in a word to "provide all those costly and troublesome arrangements which "are comprised under the Old-World denomination of 'Na-"'tional Defences.'" No doubt it will. But when translated into English, what does the complaint amount to? Simply to this—that henceforth the Americans will have to submit to the fate of Europe, *and to acquiesce in those ordinary and all but universal conditions of national existence* from which hitherto they have enjoyed an exceptional exemption. We are by no means satisfied that this is a result really to be deprecated; but we can well understand the American desire to avert it, even by a resolute and deadly struggle.

AMERICA.

(FROM OUR SPECIAL AMERICAN CORRESPONDENT.)

NEW YORK, Oct. 20, 1861.

The question which overshadows every other in importance, and especially in interest to the English observer, is that of the probable duration of the war and maintenance of the blockade. And it requires but a very short residence here to become convinced on one point,—viz., that there is not even a possibility of a settlement till after the winter campaign be fought out, or probably for a much longer time. So long as the North acted upon the assumption that the rebellion was weak and unpopular at the South, and certain to be immediately crushed, it did not seem impossible that when wakened up to the fallacy of this idea there might be a revulsion of feeling, under the influence of which the task might be conceded to be hopeless, and the Government might then set about looking for terms of separation. But there is now a widely different opinion abroad among the people of the North as to the difficulties before them. They have experienced the disasters of Bull Run, Springfield, and Lexington. The veteran commander in whom so much of their early confidence was based has been found wanting. Their favourite Western General, Lyon, has been defeated and perished. Their commander-in-chief of the Western department, Fremont, in whom the hopes of the younger men of the nation were concentrated more than in any other man, has made some great blunders, and though he for the present retains his command, he is virtually under sentence of removal. Hardly a foot of ground has been gained in any Seceded State, and the great border States of Kentucky and Missouri, thought a few weeks ago to be safe to the Union, are now trembling in the balance, while nothing short of a miracle seems likely to save them. Indeed, it has come at last to be recognised by a very large proportion, if not by the majority of the men of substance and of mind in the country, that the war *may* be one of years. Yet what do we find? Do not they shrink back appalled from the prospect? No, not one whom I have been able to find among the native-born Americans of either property or intelligence, except a limited section whose social or business relations are exclusively Southern. Among the foreign merchants of New York it is otherwise, but their influence is infinitesimal,—a drop in the ocean in its bearings upon the policy of the nation at large Bankers, merchants, men of property, lawyers and members of the other learned professions, men of letters, editors, clergymen—Republicans, Democrats, Abolitionists—all, so far as I have yet been able to discover, are united on one point—that whatever the sacrifices to the present generation, the Union must be preserved. Tell them that it will produce national bankruptcy,—that the grass will grow in Broadway,—that army after army will be annihilated by starvation and disease, if not by battle, before eight millions of men as brave as themselves will be conquered by a race they detest as they do the Yankees,—and still you can get no concession. Even admitting, as many do, that the difficulties may be very great, they are determined to encounter them.

The unanimity is not, however, so complete with the lower strata of society—those who think little and are mainly led by their prejudices—the clerks, shopkeepers' assistants, tradesmen, mechanics, labourers, and rowdies, who constitute the great majority of the town populations. Of these, many are of course led on by the warlike enthusiasm of the hour, and think it their duty to aid in defending "their flag" and supporting the Government without any very definite idea of what they are to fight for, or the good of fighting at all. It is of this section of the community, and of the probably still larger number who have enlisted for want of other remunerative employment, that the army is composed. But another very important, and probably the largest section of the strata referred to, either care very little about the war or have a lurking sympathy with the South, or at least a hatred of the "Niggers," whom they think at the bottom of this and every other trouble in the country, and they are generally determined that nothing but necessity will make soldiers of them. Hence it is that the whole North has not yet furnished half as many men as the State of New York alone *could* furnish according to the census tables of the number fit to bear arms. And hence it is that the Seceded States, with about one-fourth the population of the Free States, have already sent larger armies into the field. But it will be observed that this class has very little weight or influence in the community except at the ballot boxes, when brought up to vote "the ticket" prepared by the leader of their own party. So long as the leaders of both parties are in favour of the war, and these men find employment and wages, they will remain quiescent. If either the Democratic or Republican leaders should form a peace party, they would no doubt find plenty of adherents among this class after their organisation had acquired some degree of consistency. But of the prominent men of either section adopting such a course, I see not the slightest prospect till the country be exhausted and the task of conquering the South be found utterly hopeless. At present it would no more be permitted to organise a peace party here than a red republic.

Let us now look to the South for our peace prospects. When will she yield? When Lord Palmerston was once cross-examined on the hustings by the indomitable Rowcliffe as to what Ministry he would connect himself with, his Lordship's reply was that he could not exactly answer that question, but he could tell what Ministry he would not be connected with—"he would not be a member of the Rowcliffe Administration." Well, in the same way it is difficult to tell when the South will yield, but it is easy to form an opinion as to when she will not yield. She will not yield while she has more men in the field (as she has at present) than her antagonist—while her armies are better commanded—while they have several important victories to show and no important defeats—while hardly a foot of ground is wrested from her—while she occupies the strongest position in Virginia, and while, from the strength of her forces in Kentucky and Missouri and the support of the inhabitants, she is more likely to drive the Northern troops than to be driven herself out of those States. All this must be reversed before there is any chance of the South yielding; and if she even sustained three defeats in the next few months, she has still an equal number of victories to show. And, supposing her armies were beaten out of the Border States into which they have come to meet the North, will they then give up? On the contrary, it is only then that the greatest difficulties of the Northern leaders would probably begin. If roads are few and bad in Virginia and Missouri, they are fewer and worse in North Carolina, Georgia, and Arkansas, and the woods and swamps of those regions, or the creeks, bayous, mud banks, overflowed lands, and interminable swamps along the margins of the Mississippi are neither favourable to the evolutions of artillery or cavalry, nor the spots likely to be chosen by the quarter-master or sanitary commissioners as very conducive to the health of the troops. And as to supplies! In Tennesse, which grows but little cotton, Indian corn and pork could be obtained, but in none of the other Cotton States would it be possible. The Negroes would be removed out of the way of an advancing army, and whatever they could not take would be destroyed. Communications would need to be maintained through hundreds of miles of hostile county, and all supplies for a large and exacting army conveyed from the

North. Of such an expedition, few would probably ever return except as prisoners of war.

In Kentucky, the Union cause looks much better. The Confederate invasion has proved a mistake, wounding the pride of the State and offending its conservative tendencies. Hence the Union party has gained much support, and it is now said that volunteers are coming in for its defence in large numbers. The Confederate leaders have accordingly altered their tactics, giving up for the present any attempt upon Louisville, the commercial capital of the State, and General Johnston has been transferred to Missouri. In the latter State the Confederates now occupy a strong position. Their two main armies, hitherto under Price and McCullogh, have combined, and made a stand within the angle formed by the confluence of the Osage and Sac Rivers, near Osceola, from which, commanded by such an officer as Johnston, it will be very difficult to dislodge them with any force the Government will be able to bring against them for months to come. It is probable that this movement will, so long as they can maintain the position, make a "stale mate" of the Federal game as regards the West. The policy of the Government was to prepare the way and the materials for an advance down the Mississippi, but this need not be attempted while the enemy have a powerful force in the rear to cut off communication with the North. An army attempting it would never return. Any one who has seen the interminable swamps, bayous, marches, "cut offs," mud banks, monster tributaries, creeks, shallows (across which the eye sometimes wanders in vain in its search for a land horizon), bluffs (which at some points offer commanding positions for artillery), and impassable roads, cannot but be astonished at the ignorance shown by the Northern editors, who write as flippantly upon the subject as if they were talking of a progress on the Hudson through a friendly and well-settled country. From my own observation of the Southern States, nearly every one of which I have seen with my own eyes, I should say that an invasion of Russia would be a more feasible enterprise, the fate of Napoleon's grand army to the contrary notwithstanding. It is this knowledge which gives the South such arrogant self-confidence.

Agriculture.

SENTIMENTAL FEUDALISM.

It might be supposed, apart from experience, that tricks of the imagination and mockeries of things passed away would not easily enter into any matter so material and prosaic as the management and occupation of farming land. The contrary, however, is the fact. It is unfortunately no mockery but a sad reality, that feudalism—a system by which land tenure was made subservient to a rude military organisation—has left its mark, not only on the law of real property in this country, but on the practical relations of English landlords and tenant-farmers. The modern results of feudalism are entirely mischievous. There is no redeeming or compensating benefit. It does not, indeed, prevent contracts between landowners and their tenants for farms from being what in substance and fact they are, money or commercial bargains; but the prejudices born of feudalism tend to render such contracts imperfect, one-sided, and far less beneficial than in the actual state of modern knowledge of the business of husbandry they ought to be.

The relations of a modern landlord and tenant are, or ought to be, wholly those of business. That, however, need not and ought not to prevent the best and most friendly feeling and intercourse between the two parties. On the contrary, the relation of landlord and tenant may give occasion to many acts and sentiments of good-will and friendliness, which will promote the comfort and happiness, aye, and the usefulness of both parties. Do not the merchant, the manufacturer, and the trader regard, and are they not regarded by, their correspondents and customers with the most harmonious sentiments? With these classes, business connections commonly lead to personal respect and esteem. Why, then, should a purely business contract for land require to be polluted by a quasi-military subordination of the one party to the other,—of the tenant to the landlord,—in order to maintain relations of good-will and mutual consideration between them? There is often much confusion of ideas on this subject, which has some tendency to retard agricultural progress.

In Scotland the contracts between the landed proprietors and the farmers, though not free from the feudal element as regards particular stipulations, are upon the whole far in advance of those which prevail between English landowners and farmers. Yet there we find the Duke of Argyle, who is considered to be a liberal and intelligent landowner, talking sad nonsense about the contract between landlord and tenant.

A dinner was lately given to the Duke by his tenantry at Inverary—in itself a strong circumstance in evidence of the good-will with which he is regarded by them—at which some facts were stated and opinions broached which deserve a passing notice.

The Rev. Dr Smith, Moderator of the General Assembly, occupied the chair, who, after some references to the long period for which the Duke's ancestors had held the Inverary estate, his own Parliamentary success, and his personal kindness and popularity in the district, said:—"It is more important to us that the Duke should be a fair, just, and liberal landlord. And it is to testify our appreciation of him in this capacity that we have requested him this evening to do us the honour of meeting us..... And there is one thing especially which I will claim for the Duke, even in his own presence, as particularly deserving our gratitude and thanks. He is no devastator. Glenshira is not one sheep-walk nor yet a deer forest. Neither is Glenaray under one tenant; and instead of having three or four or five tenants to meet him here to night, he has upwards of sixty." This is unquestionably high praise. Though with advancing husbandry the crofters, who once formed the only occupants of a Scotch Highland estate, must give way to occupiers of larger means, and their small holdings must eventually be consolidated into larger farms, it is yet desirable that the process of change should be gradual, and that larger farms well cultivated should succeed the crofters, and afford them as labourers a better livelihood than they could obtain on their ill-managed crofts. To convert a Highland estate into a mere sheep farm, is a social crime only less than that of converting it into a deer forest. We have referred to numerous instances of improvements in the Highlands of Scotland which prove that such districts may be very profitably improved, and that men need not be extirpated to give place to sheep or deer, in order that the landowner may receive an increased rental.

In returning thanks, the Duke seems to have been led away by ancestral traditions, and to have regarded the tribute of regard his tenants had offered to him for his liberal conduct as owner of the estate, as a modern manifestation of the feudal homage his ancestors in their days received from their tenants. He said:—"I am not vain enough to believe that I enjoy more of the affection and attachment of those among whom I live than other representatives of the family of Argyle have done in former generations, but the truth is that this is a modern form of expressing very ancient feelings. My ancestors were accustomed to look on the support and attachment of the tenants by the numbers who would follow their muster-roll when they went to one of those contests, to those fights, either offensive or defensive, to which Dr Smith has alluded..... But so lately as in the time of my grandfather I gather from tradition, which I have often heard related by my father, that he was more proud of the number of men which on one occasion he had been able to offer the Government, than of all the farming improvements of which he was a great master in this county." Now this is perfectly intelligible. Formerly the importance of the House of Argyle consisted in the number of men whom, under the feudal organisation of the time, the Duke could bring to the fights, offensive or defensive, in which he engaged. The tenants were regarded more as soldiers than as farmers. The estate was a kind of military colony. Then the "Old Duke," the grandfather, who was a "master of farming improvements," and who could yet muster a large number of his tenants as soldiers for the use of the Government, was a man of the transition period. He was wisely and usefully engaged in growing on his land crops of corn in the place of fighting men, but still so much of the old semi-military organisation remained as enabled him, the Highland landowner, to act as an effective recruiting officer for the King's army. Such traditions might be well referred to for the purpose of showing the progress since made, and that the grandson, instead of mustering bands of feudal retainers, is feasted by his tenants "as a just, fair, and liberal landlord;" liberal, because he has dealt fairly and justly, aye and commercially, with his tenants. But, like his grandfather, the Duke seems to entertain a sentimental pride in the traditions of the past, rather than a rational pride in having acted up to the sound maxims of modern science. He said:—"Scotland has now long been in a state of profound peace, and there has been time for the old feelings, for the old relationship which existed between the Highland chieftain and his tenants and retainers, to take the more modified and modern form of the relations which now subsist between a landlord and his tenant. There are some writers of the present day, in science and political economy, who maintain that there is much, too much, of the old feudal feeling still remaining in the relation between landlord and tenant. They maintain that the proper state of things is this—that it should be purely a pecuniary arrangement—that the landlord should let his land for a certain period and for a certain rent, and that there should be no trace of any other connection remaining than that which necessarily arises from those business relations between them. It is my firm belief that it is one of the great public advantages of this country, that whilst we have been continually advancing from one generation to another, yet the ideas of to-day are always modified and take the form of the old feelings and associations which have descended from former times. I believe that the feudal element may, and doubtless still does remain in the relations—the ordinary relations—between landlord and tenant, and is one of the great strengths of the liberties of this country." This assumed connection between feudalism in farm leases and the liberties of the country may, perhaps, be regarded as an after-dinner flourish, conveying no very definite meaning to the minds of speaker or hearers. But the approval of the feudal element in the modern relation of landlord and tenant-farmer is a blunder and a contradiction to all that was passing around him.

The Duke said, that few men of middle age taking a lease of 21 years could expect to see the end of it, but that—we do not perceive the sequence—"with regard to that small class of

tenantry who have not had possession of leases in this county, that their tacks have been much more permanent than those who have leases." This is just a reproduction of the argument used by English landowners in favour of their yearly tenant system. In the present case the facts refute the argument most strongly, for the small holders who hold their small farms from generation to generation are so unimproving and helpless, that their utter extinction is a mere question of time. On well-managed estates they will gradually become labourers, and be better off than they are as crofters. And the Duke afterwards referred to some statistic facts in Argyllshire, which prove the value of his practice of improvement and belie his sentimental feudalism. He said in reference to the recent census:—"The county of Argyle represents a decrease of population the largest and most continuous of any county in Scotland. It appears from that return that in the 30 years which have passed since 1831 the population of this county has decreased by nearly 20,000 souls, being a decrease of very nearly 20 per cent. upon the total amount of the population. Other counties have diminished, but not in the same ratio. Now, if we remember that there are certain parts of this county which have vastly increased in population—if we remember that a great part of the shores of the Frith of Clyde which belong to this county have indeed very largely increased, by the feuars, who, part of the year, reside in Glasgow, and the rest on the shores of Argyleshire, we must come to the conclusion that the decrease in the purely rural, the purely agricultural part of the county, has certainly been not less than from 25 to 30 per cent. This is a very remarkable fact. But we must look things as they are in the face, and not with reference to sentiment alone. Let us now see what the state of things is as regards the county of Argyle in the contribution which it makes to the producing power or general prosperity of the country. We find that, coincident with this decrease of population, there has been an increase in the valuation of the county to a very much larger extent." This increase he estimated, we have no doubt truly, at 50 per cent. since 1831. Feudalism, however, has had no share in that increase. So in other districts: "the result," says the Duke, "is a general one over Scotland, that the purely agricultural parts of the country are decreasing in population and *increasing* in growing productive power. Now, what inference ought to be drawn from this fact? Undoubtedly the increase in the valuation of a country does not mean merely an increase in the rents which are derived by the landlords or by the proprietors of the soil. It means increased proficiency of the tenants. It means increased knowledge, increased industry, increased skill. It means, above all, an increased contribution towards that surplus of human food which goes to support the remaining population of the country. We therefore see that in this county, so far as we can gather from these facts, although we have to a certain extent, to a considerable extent, been decreasing in population, we have been increasing in energy, and in skill, and in productive power. I do not think that this is a result of which the county of Argyle needs to be ashamed, and I think it is very creditable to those tenants who remain, and shows that both in regard to their knowledge of their business and in reference to the improvements of the soil, they are keeping pace with the general advancing prosperity of the country." The Duke concluded his rural remarks by specially thanking by name several of his tenants who had most aided him in his plans for effectually draining his estate.

Literature.

COMMERCIAL LITERATURE.

THE GAZETTE OF BANKRUPTCY. No. I.

THIS is a new publication, which is designed to give creditors throughout the country a full knowledge of what are, in fact, their own concerns. It is intended to be "so accurate a record of the proceedings in bankruptcy in every Court of the country, that any creditor may, by reference to its pages, at once ascertain the position of any estate in which he is interested, whether it be under administration in the District Court of Bankruptcy at Newcastle-on-Tyne, or in a County Court in Cornwall, and receive every notice that can be useful to him, not only in the enforcement of present rights, but in providing the means of caution in giving credit for the future." This paper will also give good reports of the proceedings in Bankruptcy, and insert careful lists of trust deeds, Chancery proceedings, assignments, &c., as well as short papers explanatory of the present law of bankruptcy, of the recent changes that have been made in it, and of the various statistics connected with the subject. The plan of the publication is an excellent one, and the numbers already issued are excellent embodiments of it. Every banker, and every one else with numerous debtors, must have often felt at a loss for some cheap and handy place of reference, in which he can see how many dividends have been paid by his debtor, what their amounts were, and generally how the estate has turned out and is going on. This can now be seen in this new publication easily, and from the standing of its conductors, we should believe accurately.

ANNUAIRE DE L'ECONOMIE POLITIQUE ET DE LA STATISTIQUE POUR 1861. Par MM. BLOCK and GUILLAUMIN. 18th Year.

IT is a striking fact that by far the most useful manual of cosmopolitan finance, the only manual which has any pretension to be really useful, is published, not in London, but in Paris. M. Guillaumin's "Annuaire" is now in its eighteenth year, and is a library book with every one who cares for the facts of finance and the relative progress of civilised countries. We may fairly envy the publishers of Paris the credit of producing such a volume.

GENERAL LITERATURE.

THE CORNHILL MAGAZINE. November. Smith and Elder.
MACMILLAN'S MAGAZINE. November. Macmillan.
THE TEMPLE BAR MAGAZINE for November. Temple Bar Office.
THE ENGLISH WOMAN'S JOURNAL. October and November.
THE ENGLISHWOMAN'S DOMESTIC MAGAZINE. November.

THE magazines are fairly good this month. The "Cornhill," with the triple strength of Thackeray, Trollope, and Mrs Stowe, ought to be, and indeed is, sufficiently attractive. We must say in passing, however, that never has Mr Trollope been so little attractive to our thinking as in the present story in the "Cornhill." The taint of vulgarity, always latent in his best works, here develops itself with something of the luxuriance for which his mother's novels were so remarkable. But he doubtless possesses the power of reproducing life, even in its lowest and vulgarest forms (as in the present instance), so as to render that amusing which in real life would be simply repulsive or dull. His power of this kind is, however, limited. In "Orley Farm," now in course of publication, many of the scenes, especially some of those in Judge Stavely's family, are so naturally dull, that we lay them down with a feeling of *ennui*, as though we had in reality endured those Christmas festivities. Perhaps in one sense this may be a compliment to the artist, but it also shows that something is wanting. The habit of writing for serials may in some degree account for the want of artistic wholeness, if we may so express it, perceptible in Mr Trollope's later works. The article called "Paper" is an interesting account of the manufacture of this useful commodity. Some of the statistics of "rags" are curious, as showing the comparative cleanliness of different localities. "From London and the great cities, or from the pleasure towns such as Bath and Leamington, a great deal is of the best quality and unpatched. From the agricultural districts the rags are clean, but very much darned; from the manufacturing districts they are both dirty and patchy; whilst it is still some parts of Ireland that supply the filthiest rags of all."

"Macmillan" has a good instalment of "Ravenshoe," which continues as spirited as ever; and three short biographical notices, interesting in their different ways—one of Hugh Macdonald, a Scotch poet, by Alexander Smith (whose prose, by the way, we prefer to his poetry), one of De Tocqueville, and a short but interesting account of Herbert Coleridge, nephew of S. T. C., who died in the spring of the present year at an early age. The following sentences give an idea of the stuff of which he was made:—"He was always at work, to the serious injury, as I could not but think, of his bodily health. When not at his chambers he was working hard at home, and even during the short vacation he allowed himself, and when away from London, books were always with him, and his mind and his pen were always labouring. A small drawing room he turned into a literary workshop; and thus, with the floor, the chairs, and the tables covered with books, a large deal frame by his side with its multitude of compartments filled full of extracts, he went on working long after he was a dying man, in such intervals as his determined energy won from the progress of a wasting disease, and as long as his failing frame could be propped up by pillows and his fingers had strength to hold a pen."

"Paris Revisited" is a clever paper by one who evidently, as the title states, "knows Paris well." He appears to be strongly impressed with the state of mutual distrust subsisting between the Emperor and his subjects. The extensive public improvements are contrived by the astute Louis Napoleon to act in a double way for his safety, by driving broad straight streets through the dangerous quarters, down which the cannon may sweep on occasion, and by keeping employed there, by perpetual changes and reconstructions, as large a portion as possible of the working population away from their homes in the dangerous quarters. The enormous expense, however, consequent on these operations, is entailing a very dangerous debt on the Government, and increasing rents in Paris to a frightful magnitude. The writer is not favourably impressed by Imperial reforms. "Wide streets, less habitable houses, undersized men, an improved breed of horses,—such seemed to me among the more obvious untoward fruits of the French empire in Paris."

Four epistles of Mr Patmore's "Victories of Love," and a small poem by Miss Muloch, form the poetical portion of this number.

The "English Woman's Journal" continues to bring forward and advocate every rational scheme for the advancement of education and the means of self-support among women. This journal deserves credit for the good sense with which it avoids aimless talk and unpractical suggestions, confining itself to the forwarding of actual work, and the awakening in women themselves of a feeling of responsibility and a spirit of mutual helpfulness. The last two

numbers report the progress made by the "Society for Promoting the Employment of Women" during the years it has now existed; they draw attention to a plan for helping our overnumerous governesses to emigrate to places where their services would be valued and well remunerated; they give some graphic sketches of "Slavery in the South;" and the usual fairly written articles on celebrated women, on various reformatories and charities, and on general literary topics.

The "Englishwoman's Domestic Magazine" keeps its contributors well supplied with the latest fashions and inventions in dress and needlework. The pattern sleeve accompanying the number will, we have no doubt, be welcome to many fair readers; while the tales, some of them we are inclined to think translations from the French, will serve to amuse an idle hour innocently at least, if not very profitably.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday Evening.

The Bank of France has not made any modification in its rate of discount, and this is regarded as a proof that the pressure on it has become less severe, especially as it did not succeed in obtaining the loan for which it was last week negotiating with the Bank of Prussia. The supposed improvement in the situation of the Bank has created a better feeling in the commercial world. But, nevertheless, serious apprehension continues to be entertained that grave difficulties have yet to be encountered.

On the Bourse, the last monthly settlement went off better than had been expected, and business has been somewhat more active during the past week. The consequence is, that quotations have improved, as will be seen from the following:—

	Thursday, Oct. 31. f c	Thursday, Nov. 7. f c

Do. do. 500f, 3 —	...	452 50

Some of your daily contemporaries have published from a correspondent, who describes himself as a merchant, a letter complaining of various matters in regard to the carrying out of the commercial treaty between France and England. I cannot help thinking that there is great puerility in all that has been said on this subject. Who, for example, can suppose that a Parisian wholesale trader is seriously embarrassed in having accounts presented to him in English measures and moneys? Has he not in his counting-house a book in which all foreign standards are given with their French equivalents? Has he not already had so much to do with England as to know that 1*l* sterling is 25f, or a trifle more or less, according to the exchanges which vary every day—and that a yard is somewhat less than a metre? Is it not the custom in France as well as in England to draw bills for goods supplied? Is there anything astonishing in a Parisian retailer, on the coming into force of the treaty, passing off as "real English tissues" the rubbish he had on his shelves? Are "alarming sacrifices" never announced in London? The questions might easily be extended; but the answers to the preceding will be sufficient to show that the quibbling about the working of the treaty is unreasonable. Inconveniences have no doubt arisen, but they were inevitable on the introduction of a new trade: deceptions have no doubt been practised, but they were a matter of course. All these things, however, are trifles, and will be righted in a very short time.

From a series of returns relative to the import and export of grain and flour, just published by the Government, I compile the following tables, which will probably be of interest to many of your readers at the present moment:—

IMPORTS and EXPORTS of GRAIN and FLOUR during the First Nine Months of 1861.

	Wheat, Spelt, &c. Imports. quintals*	Wheat, Spelt, &c. Exports. quintals	Rye Imports. quintals	Rye Exports. quintals	Maize Imports. quintals	Maize Exports. quintals
Russia	1,327,953	...	34,409	...	...	...

Total	241,207	104,432	428,718	29,077	191,842	460,225

The preceding figures represent what the French call "General Commerce"; that is to say, in imports the quantities destined both for consumption and for exportation abroad; and in exports, both foreign and French productions. The subjoined table shows what is designated "Special Commerce;" that is to say, the quantities of the total imports which were taken for consumption in France, and the quantities of the total exports which were exclusively of French production:—

	Imports. Total. quintals.	Imports. Portion thereof taken for home consumption. quintals.	Exports. Total. quintals.	Exports. Portion thereof of French production. quintals.
Wheat, spelt, &c.	4,351,117	3,745,606	372,017	326,541
Rye	77,756	66,346	42,950	34,768
Maize	155,778	95,307	59,652	29,532
Barley	241,207	228,960	104,432	86,418
Oats	428,718	417,520	29,077	23,961
Flour of wheat, spelt, &c.	191,842	246,299	460,225	269,468

From the 1st to the 20th October the following additional imports and exports were made:—

	Imports. Total quantities arrived. quintals.	Imports. Portion thereof taken for consumption. quintals.	Exports. Total. quintals.	Exports. Portion thereof of French production. quintals.
Wheat, spelt, &c.	1,234,421	1,305,290	6,129	3,342
Rye	2,077	2,077	1,930	1,930
Maize	39,175	27,191	7,601	761
Barley	17,816	18,733	2,507	2,507
Oats	41,895	44,695	1,028	1,028
Flour	153,006	165,758	10,098	6,056

A stockbroker of Bordeaux has taken to flight (to England it is said), leaving liabilities which exceed his assets by 32,000*l* English.

The season, or, as the French call it, "campaign," for the manufacture of beetroot sugar commenced on the 1st September, and from that date up to the 30th of the same month the quantity manufactured was 5,195 tons, whilst in the corresponding period of last year it was only 188 tons. The stock, however, on the 30th September last was 12,863 tons, whereas on the same date late year it was only 8,442 tons.

The Company of the Services Maritimes of the Messageries Imperiales announces that 20f per old share, on account of the profits of the present year, will be paid from the 1st December next.

Annexed is the weekly account of the markets:—

FLOUR.—Business at *Paris*, during the past week, has been very dull, and yesterday the quotation was at 80f to 84f the sack of 159 kilogs. In the four marks there has been a decline. Yesterday, at the beginning of the business, the current month was offered at 81f 50c, December at 82f 50c to 83f, but in the evening the quotations were: current month, 81f 50c; December, 83f; January, February, March, and April, 85f.

WHEAT.—At *Paris*, yesterday, offers were rather large and prices fell. Wheat from the Centre and other provinces was offered at 41f to 43f 50c, but not taken; but some Beauce of indifferent quality went at 42f 50c the sack of 120 kilogs, and the demand for wheat of the Paris district was 43f to 46f. In foreign, Hamburg was offered at 45f to 47f, but not taken; English at 45f to 46f, but not taken; American, 40f 50c to 41f and Hungarian, 41f to 42f, but there were no purchasers. Of the provincial markets, 13 present a rise of from 5c to 1f the hectolitre, 74 a fall of from 10c to 3f; 11 are reported firm, 19 without variation, 9 calm.

COTTON.—At *Havre*, in the week ending Friday, business was calm, and prices receded. The sales were 6,645 bales, and the arrivals 781. The closing quotations were 1f lower for all qualities, consequently very low New Orleans was at 138f the 50 kilogs; low ditto, 149f; and very ordinary, 155f. The stock on Friday was 151,300 bales, against 122,670 at the same date in 1860, and 38,300 in 1859. This week, very low has been at 139f, and low 150f.

COFFEE.—In the week ending Friday, at *Havre*, business was active, and prices rose. The sales were 422 sacks Hayti Port-au-Prince, disposable, at 85f the 50 kilogs in bond; 2,800 ditto, for delivery, 83f 50c; to 85f; 150 Jeremie, disposable, 83f 50c; 330 Cape, 86f to 86f 50c; 200 ditto, for delivery, 87f; 50 Gonaives, disposable, 87f; 250 Rio, not washed, disposable, 67f to 80f; 700 ditto, for delivery, 75f to 78f 50c; 500 Santos, washed, for delivery, 90f; 159 Porto Rico, part at 90f, the rest at prices kept secret; 46 Ceylon plantation, 115f duty paid; 142 casks Quilon, at prices kept secret. By auction, 50 sacks Hayti Cape damaged, 15 bales Mocha, ditto, 124 casks and 130 sacks Malabar ditto, and 3 ditto ditto were also disposed of. The arrivals were 200 sacks and 130 casks. This week, Hayti Cape, *in bond*, has been at 85f, 86f 50c, 87f, 88f, and 89f; Rio, for delivery, 77f 50c to 79f; ditto, *in bond*, 80f; Ceylon, 110f to 111f; Maracaibo, damaged, 80f to 85f. At *Nantes*, last week, no business was done. This week, same stagnation. At *Bordeaux*, last week, business was calm, the sales being only 46 sacks Salem, at 125f; 60 dittto Rio, washed, 100f; 28 sacks Santiago, 105f. This week, Costa Rico has been at 114f 50c; Guayra, *non gragé*, at prices not stated. At *Marseilles*, last week, about 1,200 Rio were disposed of at 63f to 76f. This week, Rio has been at 65f to 78f; Reunion, 115f duty paid.

SUGAR.—At *Havre*, last week, business was almost null, and prices receded from 1f to 1f 50c. The sales consisted only of 370 casks French West India at 45f to 45f 50c, duty paid. The arrivals were 1,022 casks and 829 sacks. This week, Havana has been at 45f; French West India 45f 50c. At *Nantes*, last week, prices were very firm, and the sales were the large quantity of 14,994 sacks Reunion at 49f; 200 ditto at 42f. This week, French West India has been at 45f 50c. At *Bordeaux*, last week, business was calm, the sales being 185 casks French West India at 47f; and a certain quantity Havana at 54f. This week, no business has been done.

INDIGO.—At *Havre*, in the week ending Friday, nothing was done, and the arrivals were only 37 chests. This week, Caraque has been sold 7f above the estimates; Kurpah, Madras, Bombay, and Bengal, at prices kept secret. At *Bordeaux*, last week, the sales were 9 chests Vellore, 2 serons Mexico, 54 chests Kurpah, and 36 chests Bengal. The latter was sold at 4f above the estimates; the quotations of the others not given. This week, nothing done.

HIDES.—At *Havre*, in the week ending Friday, business was animated, and prices were firm. 1,900 Buenos Ayres dry went at 102f 50c to 105f the 50 kilogs; 1,500 La Plata salted Saladeros, 70f 50c to 73f for ox, and 67f for cow; 200 Rio Grande salted, 66f; 2,800 Australia ditto, 50f; 300 New York damaged, 45f; 14 bales *vachettes* Calcutta, 76f; and 500 salted horse Monte Video at 85f 50c the 100 kilogs. The arrivals were 957. This week, Rio Grande have been at 66f to 70f: Buenos Ayres dry cow, 115f; ditto for ox, 117f 50c.

WOOL.—At *Havre*, last week 156 bales La Plata, not washed, went at 1f 40c to 2f the kilog; 14 ditto Peru, not washed, 1f 40c; 219 German, not washed, 2f. The stock on Friday was 6,030 bales La Plata, 1,250 Australia, 1,226 Cape, 90 Russia, 190 South Sea, 225 German, 150 Spain, 120 Portugal, 7 alpaca, and 400 sheepskin La Plata. The arrivals were 40 bales in wool, and 18 in sheepskin. This week, Buenos Ayres, not washed, has been at 1f 75c to 2f 30c; Monte Video, ditto, 2f 15c; German, washed, 5f 10c.

TALLOW.—At *Havre*, last week, business was active, and prices rose. The sales were 50 casks New York, for delivery, at 64f the 50 kilogs; 100 ditto, disposable and for delivery, 63f to 65f; 200 Rio Grande, 62f 50c. No arrivals. The stock on Friday last was upwards of 600 casks. This week, New York has been at 64f to 65f. Yesterday, at *Paris*, the 100 kilogs were at 134f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was at 81 the hectolitre; Montpellier, disposable, of 86 deg., 110f. At *Bordeaux*, the day before yesterday, Languedoc was at 108f; and beetroot, first quality, at 92f.

ANTWERP, *Nov. 5.*

The stock of cotton in this city on the 1st of the present month was only 1,397 bales. On the 1st October it was 2,112; 1st September, 3,882; 1st August, 5,299; 1st July, 7,881; and 1st June, 8,277.

An official return calculates the total annual production of coal in Belgium at 9,606,720 tons, the import at 97,009, the export at 3,453,737, and the home consumtion 6,249,992.

COMMERCIAL AND MISCELLANEOUS NEWS.

From Calcutta, we have telegraphic news to the 9th ult. The annexed information is to that date:—Shirtings, grey, fair demand, all widths, about 2a higher; twist, mule, fully maintained; silk, raw, nothing doing; indigo, crop expected to be under 60,000 maunds; copper, sheathing, limited sales at 39½r to 40r per factory maund; copper, tile, nothing doing, prices unchanged, stock very light; rice rather easier; saltpetre, very firm, stock reduced to 35,000 bags; linseed, 2a lower; jute, small transactions, prices easier; hides, market very busy, stock light; shellac, last quotations unchanged. Exchange on England, first class credits, 2s 0 5-16d to 2s 0⅜d per rupee. Freight to London, dead weight 2*l* 5s to 2*l* 12s 6d per ton; light freight, 3*l* per ton.

The following commercial intelligence is dated Bombay, Oct. 11:—In imports we have little change to report since the date of our last. Piece goods since then have changed hands to a large amount, chiefly at the rates current during last fortnight. Holders are now selling more freely, and we fear should this continue, present rates will hardly be maintained. Twist is quiet for the present, and, with the exception of No. 30's water twist, previous rates are barely supported. Metals generally are also quiet. British bar iron is lower, and dull of sale in consequence of dealers having ceased their speculative purchases in this article. Brazier copper has declined a little in value, owing to a forced sale of a large quantity at 59 rs per cwt., which has been held for nearly two years. In other descriptions of metals there is no change of importance to report. The Dewallee holidays, which are now close at hand, are already interfering with business. Within the last few days all kinds of imports are quieter, and this will likely continue till the holidays are over, after which we anticipate a very active market with a more remunerative range of prices than those now current. Exports—Cotton has been contracted for to the extent of about 3,850 candies. Dharwar sawginned has advanced to 195 rs per candy, in consequence of the great demand for this description in Liverpool at very high rates. Of seeds there are no stocks on the spot. Linseed and rape are both in demand, and contracts have taken place at full rates.

The following is the report of the timber trade of Quebec to Oct. 25:—The bulk of the fall fleet having been dispatched, the demand for white pine has slackened, and there is but little disposition on the part of exporters to lay in their stocks at recent prices. Nevertheless, square wood is held at full rates, and the stock will not be heavy. Small averages are almost exhausted. Waney wood is heavy in stock, but much of it inferior. Red pine sells freely; 47 feet fetched 10½d measured off. Elm—No change in this article. Oak of prime quality sells at 18d measured off; inferior at 15d to 16d. Birch—No demand. Staves are firm and likely to advance, lakre freights being unusually high. Deals—Some bright of ordinary specification are offered at 14*l* 10s, and dry floated at 14*l*.

An account of the importations and exportations of bullion and specie registered in the week ended 6th November, 1861:—

In the early part of the week the cotton market was languid, and forced sales were making at a decline of ¼d to ⅜ per lb from last week's quotations, the demand being very limited. During the last three days, however, confidence has revived, and the market has again become excited, a large business has been done at rapidly hardening rates, and at the close American have fully regained the level of last quotations. Egyptians continue rather to advance. Brazil have well maintained their ground. East India are ⅛d to ¼d per lb higher during the week; the lower qualities still more. The sales to-day are 20,000 bales. The market is scarcely so excited as yesterday, but prices are firm. The reported export amounts to 7,310 bales, consisting of 300 American, 150 Brazil, and 6,860 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand from nearly the whole of the markets held in the manufacturing districts this week are of a most gloomy character. In goods, both for export and home consumption, very little business has been transacted; indeed, in numerous instances, prices have ruled almost nominal. The stocks, however, have not increased. In iron, a fair amount of business has been passing, and coals have sold freely, on higher terms.

MANCHESTER, Nov. 7.—This market has been quite without feature since last week. One or two India buyers have certainly been bold enough to make investments, while prices have been somewhat reduced in order to tempt them; but the majority have altogether kept aloof, and the majority of sellers have done the same. The Indian advices report large sales, but almost universally at a sacrifice, even reckoning cost at the very lowest rates which have prevailed here during the year, so that the now greatly enhanced rates may well be looked upon with distrust. Yarns have again, since the reanimation of cotton, returned to former values, though occasionally, in the beginning of the week, ¼d per lb less was accepted.

COMPARATIVE STATEMENT OF THE COTTON TRADE:

RAW COTTON.	Price Nov. 7, 1861	Price Nov. 1860	Price Nov. 1859	Price Nov. 1858	Price Nov. 1857	Price Nov. 1856

BRADFORD.—The cry is still for lustre wools, and staplers consider themselves fortunate who have a stock. The consumption just now seems to be limited to this class of wools, and good lots are brought up with much avidity. The stocks in staplers' hands, however, are very light. Other wools are, generally speaking, neglected. There is a good business doing in piece goods, in fancy sorts, for home, and especially for France. Many large firms have orders in hand which will occupy them for months.

ROCHDALE.—Rather more business has been done in the flannel trade, though the sales have not been to any great extent. There is a little more doing in Yorkshire goods, more especially where any abatement in price is submitted to. There has not been much done in wo ls. Skin wools are a little easier to buy, but all other sorts are moderately firm.

LEEDS.—In the coloured market there was, perhaps, more call for spring union Meltons than for any other class of goods. Coatings and regular cloths did not command ready sale. The whitehall was flat, and we cannot report even ordinary sales in any description of white cloths. The general woollen trade is still in a very depressed state, excepting in those parts where army contracts are out. Dewsbury and Batley manufacturers are very busily engaged in army pilots and coloured blankets. An order from one of the American Governments for a million pairs of blankets is in course of execution.

HUDDERSFIELD.—The demand for low-priced woollens and unions is still very limited, and the shipping houses here are almost at a standstill. Business has been quiet in the warehouses. There is little doing in the local wool trade in anticipation of the London colonial sale.

BELFAST.—The new-opened market with our French neighbours is doing pretty well. There is likely to be a good trade in light fabrics done with the East Indies. Home sales are quiet, but not dull.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5*s* to 3*l* 7*s* 6d; best native hydrate pigs, 3*l* 7*s* 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 7*s* 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6d; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 10*s* to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 5*s*; Barrow hæmatites, 3*l* 5*s*; Workington hæmatites, 3*l* 5*s*; grey forge cinder pig iron, 2*l* 10*s* to 2*l* 15*s*; white forge cinder pigs, 2*l* 5*s* to 2*l* 10*s*; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 7*s* 6d to 3*l* 17*s* 6d, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10*s* f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6d to 3*l* 15*s* delivered; Northern hæmatites, 3*l* 5*s*, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 23.—The increased demand for State and Western flour, which was occasioned by the favourable advices from Europe, has sensibly abated. The market is now less buoyant, and prices tend in favour of the purchaser. The receipts during the three days have been heavy and have exerted a rather unfavourable effect. The transactions since Friday comprise 53,000 barrels, of which 16,500 found purchasers yesterday, the market closing quiet at the revised quotations. Canada flour has been in moderate request; the sales aggregate only 2,400 barrels. Southern flour remains steady under a moderate demand at the previous quotations; the sales for the three days comprise 3,700 barrels, including 900 yesterday. Export from October 1 to October 22:—1861, wheat flour 231,404 barrels; 1860, 208,658. The market for wheat has ruled rather heavy since our last, owing chiefly to the very heavy receipts. There has prevailed a tolerably active demand for shipment under the recent favourable advices from abroad, however, and the transactions during the intervening time have been unusually heavy, though at a moderate reduction in prices. The sales foot up 790,000 bushels, of which 335,000 were placed yesterday. Corn has been in fair request; but with large receipts the market has ruled heavy, and prices have declined 1c to 2c per bushel; the sales for the three days comprise 535,000 bushels, including 198,000 yesterday, closing at 50c to 60c for Western mixed, and 56c to 58c for unsound. Export from October 1 to October 22:—1861, wheat 2,901,127 bushels, corn 936,971 bushels; 1860, wheat 2,139,582 bushels, corn 124,609 bushels.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1861.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The leading markets of consumption have continued to be scantily supplied with home-grown wheat. Both red and white qualities have changed hands somewhat freely, at, in some instances, an advance in the quotations of 1s per quarter, and at which fair clearances have been effected. In foreign wheat—the imports of which have fallen off—a fair average business has been passing, at late currencies. We have very little change to notice in the value of either English or foreign barley; nevertheless, selected samples have commanded extreme rates. Malt has maintained its previous value; but the demand for it has been of a retail character. Good sound oats have moved off steadily, at full prices; but heated qualities have ruled in favour of buyers. Both beans and peas have moved off steadily, and there has been a good consumptive inquiry for flour, at full quotations.

The imports of foreign produce into France from the Black Sea ports continue on a very extensive scale. The wheat trade has, therefore, become heavy, on easier terms. All spring corn has commanded very full prices. Flour, however, has met a fair inquiry. Heavy shipments of produce continue to be made from New York.

In Scotland, there has been a moderate demand for wheat, at about previous quotations. Barley and oats have changed hands freely, at very full prices; and most other articles have sold on former terms. The shipments of produce to the South have been on a limited scale.

Advices from Ireland state that nearly all kinds of produce have continued in fair request, at very full prices. The potato crop is turning out well in some localities; but, in others, the losses are heavy.

The supply of English wheat at Mark lane, to-day, was small, and the trade ruled firm, at fully Monday's currency. Foreign wheat changed hands to a limited extent, but at very full prices. Barley moved off slowly, on former terms. Oats, beans, and peas were firm, at full quotations. The flour trade was steady, and prices were well supported.

Messrs Sturge, of Birmingham, write as follows, in reference to cereal produce:—"We have had another month of the most favourable weather; dry and warm, with just sufficient rain to supply moisture for the green crops, and enable the farmers to prepare their land, and on stiff soils, also to sow the wheat. We never remember so large a crop of all varieties of turnips, or such luxuriant grass on the 1st of November. The outstanding corn and pulse, under these favourable conditions, have of course been secured in first-rate order. The demand for France has not only entirely ceased, but we hear that re-shipments have begun from some of the ports to this country. There has at length been sufficient rain in most, if not in all parts of France, to enable the peasants to complete the wheat sowing, and we believe the grower will hereafter deliver more largely of home-grown produce. There are still about the same number of grain-laden vessels on passage to this country from ports to the east of Gibraltar, the number being about 500. The accounts of the produce of the harvest in the United States and Canada continue favourable, both as regards quantity and quality."

Mr Ed. Rainford reports the arrival of 72 vessels off coast, and a steady business doing in floating cargoes, at full prices.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The liberal supplies of many kinds still offering prevent any improvement in prices, but there is a very steady demand for grocery as well as strong refining sorts. Up to yesterday, 2,800 casks West India sold at former quotations, including 450 casks Barbadoes and 253 casks Granada and grainy Demerara by auction. The Netherlands Trading Company have declared 17,400 baskets Java for sale on the 26th inst. The imports into London have been 16,700 tons above the former season's. There is a falling off amounting to 9,150 tons in the home deliveries, and the stock still reaches to 80,750 tons, against 63,750 tons last year. In Great Britain to 130,000 and 105,000 tons respectively.

Mauritius.—4,215 bags rather more than half sold at full prices, and business has also been done by private contract: crystallised, 41s to 45s; semi-grainy, 39s 6d to 43s 6d; low grey to good yellow, 35s 6d to 42s; brown, 31s to 34s 6d per cwt.

Bengal.—3,870 bags partly found purchasers: grainy yellow to fine greyish, 43s 6d to 46s; fine Gurpatta date, 42s; good white Benares, 46s to 46s 6d. Khaur bought in at 32s to 32s 6d; and soft grey Dumma at 35s to 35s 6d per cwt.

Madras.—4,065 bags grainy sold at the full valuations in most cases: grainy yellow to good white, 40s to 46s 6d; soft yellow, 37s to 39s 6d. About 1,600 bags native sold by auction and privately at 31s 6d to 33s per cwt.

Foreign.—1,502 casks Cuba muscovado, by auction, partly sold at previous rates, from 33s 6d to 40s 6d for brown to good yellow. 733 casks Porto Rico also partly met with buyers: brown, 33s 6d to 37s; grey and yellow, 39s to 44s 6d. 200 cases strong grey and white Bahia, 39s to 44s 6d. Several transactions have occurred in Cuba privately, and two floating cargoes are reported sold at 23s 4½d to 23s 6d for muscovado, with a small portion clayed as high as 27s; one of Havana, No. 11 26s 5d, all for the United Kingdom; one of white Pernambuco, for the Mediterranean, at 28s per cwt.

Refined.—Crushed and the better kinds of pieces continue readily saleable at former rates, but there is not any change to notice in dry goods, which range from 49s to 52s per cwt for common to fine grocery.

MELADO.—330 casks were chiefly bought in at 24s to 28s per cwt.

RUM.—Transactions have been rather limited, but quotations remain unaltered since last Friday. The market is now steady.

COCOA.—Considerable sales are reported privately in West India upon late enhanced terms. By auction, 309 bags sold at 60s to 75s per cwt for grey to fair mixed red.

COFFEE.—There is more animation in the market, and the various parcels of plantation Ceylon at the public sales have commanded full prices, 1,460 casks 885 barrels and bags selling at 73s to 82s for pale and small to good. 1,492 bags 117 casks, &c., native found ready buyers: low small to superior quality, 66s to 71s. A few small parcels Jamaica realised 65s 6d to 77s per cwt. The accounts from Holland of higher

prices, and the large deliveries of Java, have led to a better demand here. Two floating cargoes of Rio have sold, particulars of which do not transpire.

TEA.—There have been some large arrivals, but the new season's teas continue to be taken off readily by the trade at extreme rates, and the market generally is very firm.

RICE.—Some parcels have changed hands privately this week, of which the exact particulars do not transpire. A floating cargo also sold, of which the price is kept secret.

IMPORTS and DELIVERIES of RICE to November 2, with STOCKS on hand.

	1861.	1860.	1859.	1857.

Stock	28900	42400	71750	88000

SPICES.—2,088 bags Penang pepper were partly disposed of at 3⅜d to 3⅝d for fair common greyish brown. 800 bags very good sold rather under 3⅝d. Privately, black Singapore has sold at 4 1-16d to 4¼d. 451 bags Zanzibar cloves went at ⅛d decline: very low to good, 3d to 3½d. 18 cases brown nutmegs: small to middling, 1s to 1s 2d. 131 bags pimento: common to middling, 2⅞d to 3d. Of 442 cases wormy Cochin ginger, about 200 cases sold at 48s to 52s. 153 cases Japan cinnamon, 37s to 54s per cwt.

SAGO is rather dearer, middling small grain having sold at 23s per cwt.

SAGO FLOUR continues in demand. Present value 16s 6d to 17s per cwt.

SALTPETRE.—A few contracts have been made in Bengal at 34s 6d to 34s 9d per cwt for 5¾ to 4¾ per cent., which accords with the advance established last week.

IMPORTS and DELIVERIES of SALTPETRE to November 2, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	9725	11230	16000	9000
Delivered	10000	10700	15110	12100
Stock	3060	4560	3860	3000

The deliveries last week were 308 tons.

COCHINEAL.—The public sales on Wednesday passed off with greater spirit than of late, and 520 bags brought forward chiefly sold at full rates to 2d advance. Lima grain 2s 7d to 3s; Honduras silvers, 2s 7d to 2s 9d; pasty and foul to good ordinary, 1s 9d to 2s 5d; good bought in at 3s 4d. Teneriffe black obtained 2s 8d to 2s 10d; silvers, 2s 7d to 2s 9d per lb.

LAC DYE.—Holders have shown more desire to realise, and 413 chests about half sold at rather lower rates: good to fine marks, 1s 6d to 2s 1d; common to middling, 8d to 1s 3d; very low, 1½d per lb.

OTHER DYESTUFFS.—Gambier is steady. Safflower may again be quoted 5s to 10s dearer. 54 bales common to fair Bengal, by auction, sold at 5*l* 17s 6d to 7*l*. The sound portion of 1,944 bags good Pegue Cutch sold at 24s per cwt, being an advance of 6d per cwt.

DRUGS.—At the fortnightly sales held yesterday, camphor sold fully 2*l* cheaper, from 8*l* to 8*l* 2s 6d per cwt. No material change occurred in other articles.

RUBBER.—East India of good quality continues in demand at 1s 2d per lb.

JUTE.—The high prices last established are not quite maintained for the lower grades. About half of 2,800 bales, by auction, sold at 13*l* 10s to 21*l* 2s 6d per ton.

HEMP.—No further change has been established in Manilla.

METALS.—The market is not very active this week. Banca tin is firmer in Holland. Quotations here are about the same as before, with a moderate demand prevailing. Iron presents no change to notice: Scotch pig has declined to 49s 3d per ton, mixed numbers. Lead continues firm. No sales were reported in spelter to yesterday (Thursday).

LINSEED.—There are no sellers of Bombay on the spot under 67s per quarter, and Calcutta 62s to 64s as to quality; Taganrog, 60s 6d to 61s. Several cargoes of the latter description on passage have been sold at 60s 6d delivered United Kingdom, with customary option of Continent; also 900 tons Calcutta, September October shipments, at 59s, cost, freight and insurance to London, including bags.

OIL.—Linseed continues scarce, and parcels available command 35*l* per ton, and for the month 5s to 10s less as to period. The demand for rape oils has become inactive, and purchases may be made at a reduction of 10s per ton. We now quote brown 43*l* 10s per ton; and refined 47*l* to 47*l* 10s per tun. Owing to the reduced stocks of olive here and at different outports, holders generally require an advance of 30s to 40s. 62*l* is now demanded for Gallipoli; Gioja, 61*l*; Sicily, 60*l*, down to 57*l* per tun for Mogadore. Prices of cocoa-nut oils are well supported. Cochin brings 50*l* 10s to 51*l*, and Ceylon 49*l* 10s to 50*l* on the spot; business has been done in Cochin to arrive, at 50*l* per tun. Fine qualities of palm continue scarce, and Lagos is saleable at 45*l* 10s per ton, that price demanded for parcels on passage. Fish oils are neglected; sperm offers at 90*l* per tun for colonial, and 89*l* for American: pale seal 41*l* per tun.

TURPENTINE continues to advance rapidly in value, with an excited market; 500 barrels rough in store have been sold at 22s. American spirits in quantity at 70s; and French at 67s to 67s 6d per cwt.

TALLOW.—The market has been more steady within the past few days. This morning, 1st sort Petersburg Y.C. is quoted 52s on the spot; 52s to 52s 3d to the end of the year; for delivery in January to March, 53s per cwt.

PARTICULARS OF TALLOW.—Monday, November 4.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was quiet to-day, and Gurpatta date Bengal declined 6d in the sales. Dry grainy Mauritius sorts went very high. West India unaltered. Sales for the week, 2,800 casks.

COFFEE.—There was a better demand, and the plantation Ceylon brought forward realised extreme rates.

SALTPETRE continues firm. The parcels of Bengal, by auction, were chiefly bought in, but refraction 7¾ since part sold at 34s per cwt.

SPICES.—Singapore white pepper sold steadily at 6½d to 6¼d per lb. Cassia lignea bought in at 90s to 93s per cwt.

OILS.—Rape and Seed Oils—The demand for rape oils has become sluggish, and purchases may be made at a reduction of 10s per tun. We now quote brown 43*l* 10s per tun, and refined 47*l* to 47*l* 10s; Bombay Gingelly, 42*l* 10s; Madras ground nut, 44*l* to 45*l*. Fish neglected; sperm offers at 90*l* per tun for colonial, and 89*l* for American; pale Southern, 36*l*; pale seal, 41*l*; cod, 34*l* 10s to 35*l*.

TALLOW.—The market has been very steady at 52s on the spot for St Petersburg Y. C., 51s 9d all the year, 52s 6d December, 53s January to March, and 53s 6d March only.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains without any alteration to note. Fine qualities of treacle very scarce. Crushed, 33s to 33s 6d in barrels.

GREEN FRUIT.—Market lively, and a good demand for all kinds. Arrival of oranges from Oporto and Lisbon, some parcels of which, sold by Keeling and Hunt at public sale, went at moderate prices, quality being middling. Messina lemons have opened at a low figure compared to last season, shipments expected being large. Two cargoes new Barcelona to hand, orders for which were anticipated and are cleared off the market.

DRY FRUIT.—Notwithstanding the continued large arrivals of currants and the daily greater variety of samples offered, the trade cannot be induced to purchase even at a reduction in price. Valentias are still very dull, and the low prices existing for Turkey fruit are not, at any rate, likely to induce to any very active trade in the article, at the same time these are a few buyers below the present quotation of 44s. Figs sell freely at slightly advanced rates.

ENGLISH WOOL.—The trade continues dull, but the demand for low sorts for America has cleared the market of some old stocks of very inferior quality.

COLONIAL WOOL.—The last series of colonial wool sales opened on Thursday. There was a large assembly of home and foreign buyers, but the competition was rather languid. For all descriptions of Australian prices ruled from ½d to 1d per lb lower than last sales, scoured and faulty wool suffering most. Cape of Good Hope, washed and scoured, realised former rates; inferior lots went rather in favour of buyers; greasy was in demand at ½d per lb advance. Quantity arrived to date—from Sydney 14,875, Port Philip 8,486, Van Diemen's Land 744, South Australia 1,138, New Zealand 8,286, Swan River 31, Cape of Good Hope 27,470 bales; total, 61,030 bales.

FLAX.—Market quiet.

HEMP.—Market steady, but without much business passing. The Government have accepted tenders for 1,000 tons Italian hemp, to be delivered by the 30th April next at Chatham, Portsmouth, and Devonport yards, at 42*l* to 42*l* 9s per ton.

COTTON.—Sales of cotton from Friday, 1st November, to Thursday, 7th November, inclusive:—4,000 bales Surat at 9½d to 10 1-16d for fully fair to fully good fair sawginned Dharwar, 8⅝d for good Broach for cash, 9d for fully good fair Broach, 7d to 8⅜d for middling to good Oomrawatty, 7½d to 7⅞d for good fair Dhollera, 6⅝d to 7¼d for ordinary to fair Compta, 6⅝d for ordinary Mangarole; 550 bales Tinnevelly at 7⅜d to 8¼d for fair to good; 800 bales Western at 7d for fully fair. On Friday and Saturday last the market was much depressed, and sales were made in Surat at a decline of ⅜d per lb from the late highest point. The same decline was submitted to for several parcels this week, but on Wednesday, owing to the improved tone in Liverpool, a revival in the demand was experienced, and a fair amount of business has been transacted, prices of Surat generally recovering what they had lost. Sawginned Dharwar is about ⅛d per lb dearer, and Western Madras and Tinnevelly unchanged, the market closing with great firmness. Yesterday, the Bank of England reduced the rate of discount from 3½ to 3 per cent. Sold yesterday at public sale:—38 bales Carriacou, 11½d to 11¾d; 19 bales West India, 12d to 16d; 34 bales very ordinary Surat, 5¼d per lb. The following sales have been made for arrival:—500 bales Tinnevelly, 8d for guaranteed good fair; 900 bales Western Madras, 6⅜d and 7d for guaranteed fair.

TOBACCO.—A good demand has continued both for home trade and for exportation, and the principal sales effected have been at outside quotations.

METALS.—There is little to remark upon the metal market. Copper is very quiet at the late advance, but by accepting comparatively low prices a fair amount of foreign has changed hands. Burra Burra is now 104*l* per ton. Iron shows no change whatever. Tin keeps steady in prices, but no large amount of business is being done. Spelter is flat at quotations. Lead is fairly firm in prices, with steady demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	55	9
Fat by ditto	2	10
Yellow Russian	53	6
Melted stuff	40	6
Rough ditto	23
